BLUBRELLA BLUBRELLA

BLUBRELLA

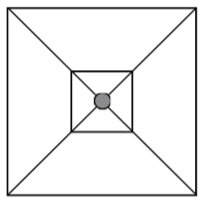

Our umbrella model is a telescopic umbrella with a double-tube feature, manufactured from an aluminum body with 4 or 6 ribs, which you can choose for your garden, poolside, beaches and sandy areas, your hotel's outdoor spaces, as well as your terraces and balconies. It consists of two tubes: the outer tube is Ø39x41 and the inner tube is Ø35x38. The frame color can be customized to match your corporate identity. Thanks to the double tube, the clamping system in the middle of the tube allows you to adjust the height as you wish. The umbrella's opening and closing system is achieved by sliding the middle plastic connecting the arms upwards. You can close your umbrella by pulling the middle plastic downwards. The fabric of our umbrella is 100%

polyester, but acrylic, jute, and olefin fabrics are also available upon request. The umbrella fabric can be chosen with or without a skirt, and your brand's logo can be printed on the skirt to highlight your corporate identity. We offer multiple color options for the umbrella fabric, enabling us to produce customizable umbrella models for our valued customers.

You can find the technical details of our Blubrella umbrella and the bases and buckets to be used with our umbrella in the details and technical specifications table.

BLUBRELLA PLUS BLUBRELLA PLUS

BLUBRELLA PLUS

Our umbrella model is a telescopic umbrella with a double-tube feature, manufactured from a 4- or 6-spoke aluminum frame, suitable for use in your garden, by the poolside, on beaches and sandy areas, in hotel outdoor settings, as well as on your terraces and balconies.

Thanks to the tilt feature on the center pole, you can adjust the umbrella according to the angle of the sun. It consists of two poles: the outer center pole is Ø39x41 and the inner center pole is Ø35x38. The frame color can be customized to match your corporate identity. The double pole allows for height adjustment as desired thanks to the clamping system in the middle of the pole.

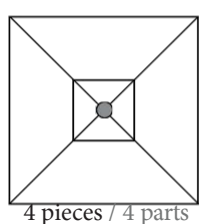

The umbrella's opening and closing system is activated by sliding the central plastic piece, which connects the arms, upwards. You can close your umbrella by pulling the central plastic piece downwards. Our umbrella fabric is 100% polyester, and acrylic fabric, jute fabric, and olefin fabric can be chosen upon request. The umbrella fabric can be chosen with or without a skirt, and your brand's logo can be printed on the skirts to highlight your brand's corporate identity.

We offer multiple color options for the umbrella fabric to our valued customers, enabling us to produce customizable umbrella models. You can find the technical details of our Blubrella Plus umbrella and the bases and buckets to be used with our umbrella in the details and technical specifications table.

SUNMINIUM

SUNMINYUM

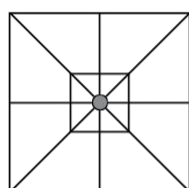

Our umbrella model is manufactured with a 4 or 8-spoke aluminum frame and is the most popular umbrella you can use in your garden, by the pool, on beaches and sandy areas, in your hotel's outdoor spaces, as well as on your terraces and balconies. The central pole has a diameter of Ø40 mm, and the arms are made of 13x19 mm aluminum profiles. The frame color can be customized to match your corporate identity.

Our umbrella's wind vents, located at the top, allow you to use it safely in windy conditions. To open the umbrella, simply press the plastic body latch on the center pole and move it upward until the safety pin automatically locks into the slot on the pole. To close it, press the latch and easily remove the safety pin from its slot.

Our umbrella fabric is 100% polyester and, optionally, acrylic fabric, jute fabric, and olefin fabric options provide protection from the sun for many years. The umbrella fabric can be chosen with or without a skirt, and your brand's logo can be printed on the skirts to highlight your brand's corporate identity. We offer multiple color options for the umbrella fabric, producing customizable umbrella models for our valued customers. You can find the technical details of our Sunminyum umbrella and the bases and buckets to be used with our umbrella in the details and technical specifications table.

MAXI SUNMINIUM

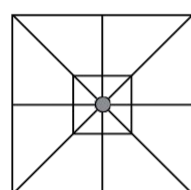

MAXI SUNMINYUM

Our umbrella model is manufactured with an 8-spoke aluminum frame and is the most popular umbrella choice for use in your garden, by the poolside, on beaches and sandy areas, in your hotel's outdoor spaces, as well as on your terraces and balconies. The central pole has a diameter of Ø50 mm, and the arms are made of 19x29 mm aluminum profile. The frame color can be customized to match your corporate identity. Thanks to the air vents at the top of our umbrella, you can use it safely in windy weather. To open the umbrella, simply press the plastic body latch on the center pole and move it upward so that the safety pin automatically locks into the slot on the pole. To close it, press the latch to release the safety pin from its slot. Our umbrella fabric is 100% polyester and provides long-lasting protection from the sun, with optional acrylic, jute, and olefin fabric options.

The umbrella fabric can be chosen with or without a skirt. You can also highlight your brand's corporate identity by printing your brand's logo on the skirts. We offer multiple color options for the umbrella fabric, producing customizable umbrella models for our valued customers. You can find the technical details of our Maxi Sunminyum umbrella and the bases and buckets to be used with our umbrella in the details and technical specifications table.

MAXI AQUA

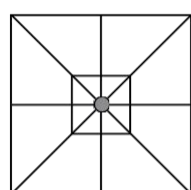

MAXI AQUA

Our umbrella model, manufactured with an 8-rib aluminum frame, is one of the most preferred and popular choices for use in gardens, poolside areas, beaches, sandy shores, hotel outdoor spaces, terraces, and balconies. The central pole has a diameter of Ø50 mm, and the ribs are made from 19x29 mm aluminum profiles. The frame color can be customized to reflect your corporate identity. Thanks to the ventilation windows located at the top, the umbrella ensures safe and stable use even in windy conditions by allowing for effective air circulation. To open the umbrella, simply slide the plastic lift mechanism with a hook upward on the central pole. To close it, pull the same mechanism downward for quick and effortless operation. The umbrella fabric is made of 100% polyester as standard, with optional fabric alternatives such as acrylic, jute, and olefin, all of which provide long-term protection against sunlight. The fabric can be produced with or without valances, and your company logo can be printed on the valance to enhance and promote your brand's corporate image. We offer a wide range of color options for the umbrella fabric, enabling us to provide a fully customizable umbrella model to our valued customers. Technical specifications of our Maksi Aqua umbrella, along with suitable umbrella bases and drums, can be found in the detailed technical specifications table.

BOND BOND

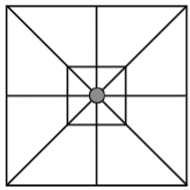

BOND

Our model is manufactured from an 8-spoke aluminum frame and is the most preferred umbrella that opens and closes with a cord mechanism, suitable for use in your garden, by the poolside, on beaches and sandy areas, in your hotel's outdoor spaces, restaurants, cafes, as well as on your terraces and balconies.

It is a popular product also preferred by corporate brands as a promotional large umbrella. Its central pole has a diameter of Ø50 mm, and its arms are made of 19x29 mm aluminum profile. The body color can be customized to match your corporate identity. Thanks to the air vents located at the top of our umbrella for wind drainage, you can use it safely in windy weather. To open the umbrella, simply pull the cord located on the center pole downward and secure the cord to the safety plastic once the umbrella is fully open. It closes easily by releasing the cord. The fabric of our umbrella is 100% polyester and provides long-lasting protection from the sun, with optional acrylic, jute, and olefin fabric options. The umbrella fabric can be chosen with or without a skirt, and your brand's logo can be printed on the skirt to highlight your corporate identity. We offer multiple color options for the umbrella fabric, producing customizable umbrella models for our valued customers. You can find the technical details of our bond thread umbrella and the bases and buckets to be used with our umbrella in the details and technical specifications table.

MAXI BOND MAXI BOND

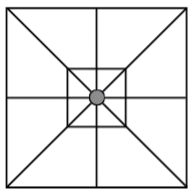

MAXI BOND

Our corded umbrella model is manufactured with an 8-spoke aluminum frame and is the most preferred corded mechanism umbrella that opens and closes, suitable for use in your garden, by the poolside, on beaches and sandy areas, in your hotel's outdoor spaces, restaurants and cafes, as well as on your terraces and balconies. It is a popular product that corporate brands also prefer as a promotional large umbrella. Its center pole has a diameter of Ø60 mm, and its arms are made of 20x30 mm aluminum profile. The frame color can be customized to match your corporate identity. Thanks to the air vents located at the top of our umbrella for wind drainage, you can use it safely in windy weather. To open the umbrella, simply pull the cord located on the center pole downward and secure the cord to the safety plastic once the umbrella is fully open. It closes easily by releasing the cord. The fabric of our umbrella is 100% polyester and provides long-lasting protection from the sun, with optional acrylic, jute, and olefin fabric options. The umbrella fabric can be chosen with or without a skirt, and your brand's logo can be printed on the skirts to highlight your corporate identity. We offer multiple color options for the umbrella fabric, producing customizable umbrella models for our valued customers. You can find the technical details of our Maxi Bond thread umbrella and the bases and buckets to be used with our umbrella in the details and technical specifications table.

MANUAL TELESCOPIC MANUAL TELESCOPIC

MANUAL TELESCOPIC

Our umbrella model is made of an 8-spoke aluminum frame and is a quick-opening and closing telescopic umbrella that you can use in your garden, cafes, restaurants, hotel outdoor areas, as well as on your terraces and balconies. The central pole has a diameter of Ø60 mm, and the arms are made of 19x29 mm aluminum profiles. The frame color can be customized to match your corporate identity.

The wind

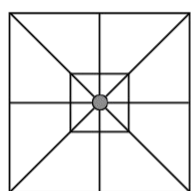

ventilation system allows for safe use in windy conditions thanks to the air vents located at the top. If preferred, a mechanical tower system can be added to further increase its resistance to wind. To open the umbrella, press the latch on the mechanism located on the center pole and lift it upwards using the lifting handle to ensure that the safety pin enters its slot in the center pole.

To close, simply press the latch to release the safety pin from its slot, then pull down using the lifting handle for easy closure.

Our umbrella fabric is 100% polyester and provides long-lasting protection from the sun, with optional acrylic, jute, and olefin fabric options. The umbrella fabric can be chosen with or without a skirt, and your brand's logo can be printed on the skirt to highlight your corporate identity. We offer multiple color options for the umbrella fabric, producing customizable umbrella models for our valued customers. You can find the technical details of our manual telescopic umbrella and the bases and buckets to be used with our umbrella in the details and technical specifications table.

SUN DREAM SILVER

Our umbrella model is made from an 8-spoke aluminum frame and can be used in your garden, cafes, restaurants, hotel outdoor areas, and on your terrace.

It is a super-luxury telescopic umbrella that can be opened and closed with its system. Its central shaft has a diameter of Ø100 mm, and its arms are made of 20x40 mm extruded aluminum profile. The body color can be customized to match your corporate identity. Thanks to the air vents at the top of our umbrella's wind

discharge system allows you to use it safely in windy weather thanks to the air vents located at the top. If preferred, a mechanical tower system can be added to further increase its resistance to wind. The umbrella operates with a crank system, and turning the handle is sufficient to move the gear shaft for opening and closing. The fabric of our umbrella

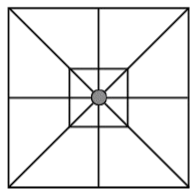

is 100% acrylic fabric, and with optional polyester and olefin fabric options, it provides protection from the sun for many years. The umbrella fabric can be chosen with or without a skirt, and you can highlight your brand's corporate identity by printing your brand's logo on the skirts. We offer multiple color options for the umbrella fabric, producing customizable umbrella models for our valued customers. With a spare parts guarantee, you can continue to use your umbrella for many years by having it repaired. You can find the technical details of our Sun Dream Silver umbrella and the bases and buckets to be used with our umbrella in the details and technical specifications table.

SUN POLE SUN POLE

SUN POLE

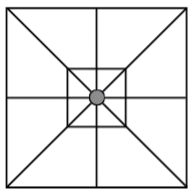

Our model is manufactured from an 8-spoke aluminum 70x70 mm frame and is a crank-operated umbrella with a steel cable-supported turning wheel system that you can use in your garden, cafes, restaurants, hotel outdoor areas, and on your terrace. The central square frame is 70x70 mm, and the arms are 19x29 mm, made of high-quality extruded aluminum profile. The frame color can be customized to match your corporate identity. Thanks to the 360-degree rotation feature around the umbrella base, you can easily adjust the shade area according to the sun's position. Thanks to the side-body design, the umbrella base remains on the side, offering a wider and more efficient shade area compared to center-pole models. You can safely use our umbrella in windy weather thanks to the air vents located at the top for wind drainage. The umbrella operates with a rotating gear system, and opening and closing it is as simple as moving the steel cable using the turning handle. The fabric of our umbrella

is 100% polyester and, optionally, acrylic fabric, providing protection from the sun for many years. The umbrella fabric can be chosen with or without a skirt, and your brand's logo can be printed on the skirts to highlight your brand's corporate identity. We offer multiple color options for the umbrella fabric, producing customizable umbrella models for our valued customers. With a spare parts guarantee, you can continue to use your umbrella for many years by having it repaired. You can find the technical details of our Sun Pole umbrella and the bases and buckets to be used with our umbrella in the details and technical specifications table.

SAHRA POLE SAHRA POLE

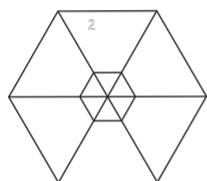

SAHRA

Our side-post umbrella model is manufactured from a 6-spoke aluminum frame and is an extremely easy-to-use umbrella thanks to its opening/closing handle, which you can use in your garden, cafes, restaurants, your hotel's outdoor areas, and also on your terrace. The center pole has a diameter of Ø42 mm and is made of sturdy steel, while the arms are made of high-quality 13x19 mm aluminum profiles. The pole color can be customized to match your corporate identity. With its 360-degree rotation feature, you can easily adjust the shade area according to the sun's position. Thanks to its side-body design, the umbrella base remains on the side, offering a wider and more efficient shade area compared to center-pole models. You can safely use our umbrella in windy weather thanks to the air vents located at the top for wind drainage. To open and close the umbrella, simply remove and reinsert the pin in the body using the lifting handle.

Our umbrella fabric is 100% polyester and, optionally, acrylic fabric, providing protection from the sun for many years. We offer multiple color options for the umbrella fabric, producing customizable umbrella models for our valued customers. With a spare parts warranty, you can continue to use your umbrella for many years by having it repaired. NEVADA NEVADA

NEVADA

Our side-post umbrella model is made from an 8-spoke made from 70x70 mm aluminum tubing. It is a steel cable-supported, crank-operated umbrella that can be used in your garden, cafes, restaurants, hotel outdoor areas, and on your terrace. The central square frame, 70x70 mm, with an up-down elevator system adjustable according to the sun's direction, and the arms, 19x29 mm, are made of high-quality extruded aluminum profile, and the frame color can be customized to match your corporate identity. Thanks to the 360-degree rotation feature around the umbrella base, you can easily adjust your shade area according to the position of the sun. The side-mounted design keeps the umbrella base to the side, offering a wider and more efficient shade area compared to center-pole models. Our umbrella's wind venting system, featuring air vents at the top, allows for safe use in windy conditions. The umbrella operates with a rotating gear system; simply use the turning handle to move the steel cable for opening and closing. Our umbrella fabric is 100% polyester and, optionally, acrylic fabric, providing protection from the sun for many years. The umbrella fabric can be chosen with or without a skirt, and your brand's logo can be printed on the skirts to highlight your brand's corporate identity. We offer multiple color options for the umbrella fabric, producing customizable umbrella models for our valued customers. With a spare parts guarantee, you can continue to use your umbrella for many years by having it repaired. You can find the technical details of our NEVADA Side Pole Umbrella and the bases and buckets to be used with our umbrella in the details and technical specifications table.

DOUBLE NEVADA

DOUBLE NEVADA

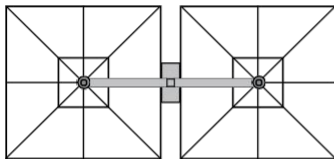

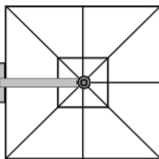

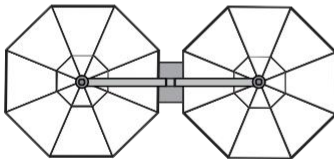

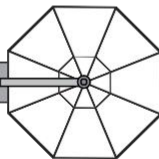

DOUBLE NEVADA

Our side-post umbrella model is made from an 8-spoke made from 70x70 mm aluminum tubing. It is a steel cable-supported, crank-operated umbrella that can be used in your garden, cafes, restaurants, hotel outdoor areas, and on your terrace. The central square frame, 70x70 mm, with an up-down elevator system adjustable according to the sun's direction, and the arms, 19x29 mm, are made of high-quality extruded aluminum profile, and the frame color can be customized to match your corporate identity. Thanks to the 360-degree rotation feature around the umbrella base, you can easily adjust your shade area according to the sun's position. The side-mounted design keeps the umbrella base to the side, offering a wider and more efficient shade area compared to center-pole models. Our umbrella's wind venting system, featuring air vents at the top, allows for safe use in windy conditions. The umbrella operates via a rotating gear system; simply use the turning handle to move the steel cable for opening and closing. The umbrella fabric is 100% polyester and, optionally, acrylic fabric, providing protection from the sun for many years. The umbrella fabric can be chosen with or without a skirt, and your brand's logo can be printed on the skirts to highlight your brand's corporate identity. We offer multiple color options for the umbrella fabric, producing customizable umbrella models for our valued customers. With a spare parts guarantee, you can continue to use your umbrella for many years by having it repaired. You can find the technical details of our NEVADA Side Pole umbrella and the bases and buckets to be used with our umbrella in the details and technical specifications table.

DOUBLE SUN POLE DOUBLE SUN POLE

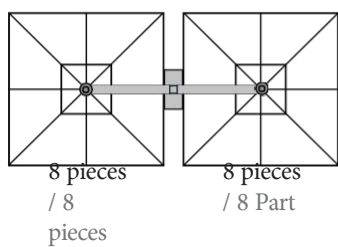

DOUBLE SUN POLE

Our umbrella model is manufactured from a single 8-arm aluminum 90x90 mm main body and is a steel cable-supported, crank-operated umbrella that can be used in your garden, cafes, restaurants, hotel outdoor areas, and on your terrace. The central square body is 90x90 mm, and the arms are 19x29 mm, made of high-quality extruded aluminum profile. The body color can be customized to match your corporate identity. Thanks to the 360-degree rotation feature around the umbrella base, you can easily adjust your shade area according to the sun's position. Thanks to the side-body design, the umbrella base remains on the side, offering a wider and more efficient shade area compared to center-pole models. You can safely use our umbrella in windy weather thanks to the wind vents located at the top. The umbrella operates with a crank system; simply turn the handle to move the steel cable, which is sufficient for opening and closing. Our umbrella's fabric is 100% polyester, and an acrylic fabric option is available upon request, providing years of protection from the sun. Umbrella fabric can be chosen with or without a skirt, and you can also highlight your brand's corporate identity by printing your brand's logo on the skirts. We produce customizable umbrella models for our valued customers by offering multiple color options for the umbrella fabric. With a spare parts guarantee, you can continue to use your umbrella for many years by having it repaired. You can find the technical details of our Double Sun Pole umbrella and the bases and buckets to be used with our umbrella in the details and technical specifications table.

SUN DREAM EXCLUSIVE SUN DREAM EXCLUSIVE

SUN DREAM EXCLUSIVE

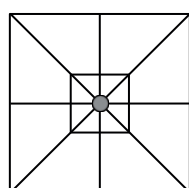

This umbrella is suitable for use in cafes and restaurants and features an 8-spoke telescopic system made from aluminum and iron profiles. The aluminum used in the umbrella arms is Etial 60, which meets global standards and is coated with electrostatic paint. The gear connecting the main support tube of the umbrella to the arms is made of a special alloy aluminum press and is resistant to breakage. The screws connecting the aluminum and plastic parts of the frame are made of stainless steel.

The plastic parts in the frame are manufactured using ABS and POLYAMID Pa6 PRIME raw materials, which are used in umbrella production worldwide and are guaranteed against breakage for 2 years. The fabric support arms on the umbrella are 20x30 mm. The main body profile is 90x90 mm with a thickness of 2.5 mm. The umbrella operates with a crank system; simply turn the handle to move the gear system and open or close the umbrella. To move the umbrella in different directions (left-right/up-down), attach the handle to the mechanism slots on the main body.

Suitable bases are shown in the lower section. With a choice of polyester or acrylic fabric, it can protect you from the sun for years.

Beach Umbrella

BEACH UMBRELLA

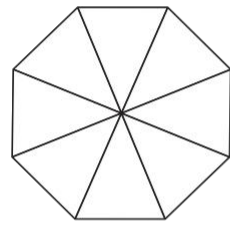

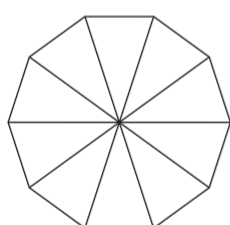

BEACH UMBRELLA

Our model is a telescopic umbrella with a double-tube feature, available in 8 or 10 ribs, made from a steel body with a diameter of 1.8 meters or 2 meters. It is ideal for your garden, poolside, beaches and sandy areas, hotel outdoor spaces, as well as your terraces and balconies. The umbrella pole consists of two tubes: the lower tube is 3.8 mm thick with a diameter of Ø25 mm, and the middle inner tube is Ø22 mm. The body color can be customized to match your corporate identity. Thanks to the double tube, the clamping system in the middle of the tube allows you to adjust the height as desired. The umbrella's opening and closing system is easily operated with a push-release latch. It opens easily by pressing the PUSH button in the center of the umbrella and moving it upwards, and you can close it quickly by pressing the PUSH button again. You can also tilt the umbrella according to the direction of the sun by pulling on the fabric skirt. Our umbrella fabric is 100% polyester, and you can choose between a skirted or skirtless umbrella fabric. At the same time, you can highlight your brand's corporate identity by printing your brand's logo on the skirts and upper body with rotation printing and digital printing. You can find the technical details of our Beach Umbrella model, which is the most preferred functional umbrella by corporate brands as a promotional umbrella, and the details and technical specifications of the umbrella bases and buckets to be used with our umbrella in the table below.

MEGA BEACH UMBRELLA

MEGA BEACH UMBRELLA

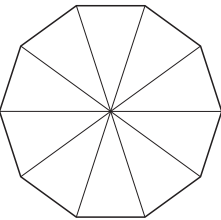

MEGA BEACH UMBRELLA

Our 250/10 model is a telescopic umbrella with a double pole feature, manufactured from a 2.5-meter diameter steel body with 10 spokes, which you can choose for your garden, poolside, beaches and sandy areas, your hotel's outdoor areas, as well as your terraces and balconies. The umbrella pole consists of two tubes: the lower tube is 4.5 mm thick with a diameter of 32 mm, and the middle inner tube is 28 mm thick with a diameter of 28 mm. The frame color can be customized to match your corporate identity. Thanks to the double tube, the height can be adjusted as desired using the clamping system in the middle of the tube. The umbrella's opening and closing system is easily operated with a push-release latch. It opens easily by pressing the PUSH button in the middle of the umbrella and moving it upwards, and you can close it quickly by pressing the PUSH button again.

Additionally, you can tilt the umbrella by pulling on the fabric skirt to face the sun. Our umbrella fabric is 100% polyester, and you can choose between a skirted or skirtless umbrella fabric. At the same time, you can highlight your brand's corporate identity by printing your brand logo on the skirts and upper body using rotation printing and digital printing. You can find the technical details of our Mega Beach umbrella 250/10 model, which is the most preferred functional umbrella by corporate brands as a promotional umbrella, and the details and technical specifications of the umbrella bases and buckets you will use with our umbrella in the table below.
