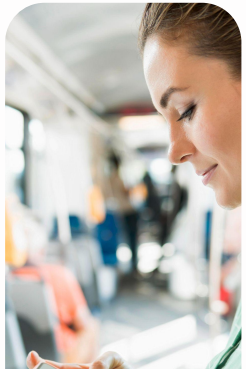
TECH FOR SOCIETY

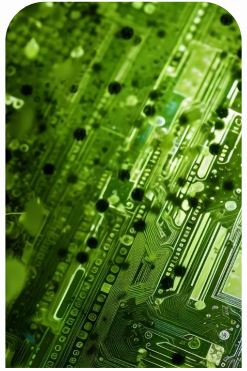
TECH TO WATCH

FINANCE, BANQUE, ASSURANCES

INDUSTRY 4.0



RETAIL, CX & MARKETING

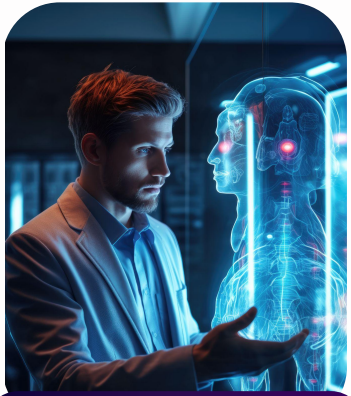


TECH FOR ENVIRONMENT

FUTURE OF WORK

AI & GENERATIVE AI

EXECUTIVE SUMMARY I



AI & Generative AI

AI and Gen AI are becoming more autonomous and creative, opening new possibilities in all industries.

Tech to Watch

Emerging technologies such as quantum computing and synthetic biology are set to reshape industries by offering unprecedented computational power and approaches to health and materials science.

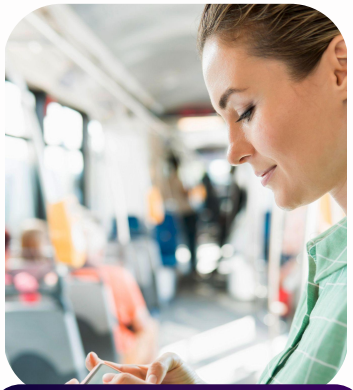
Finance, Banque, Assurance

The adoption of blockchain and AI is revolutionizing security, service personalization, and operational efficiency.

Industry 4.0

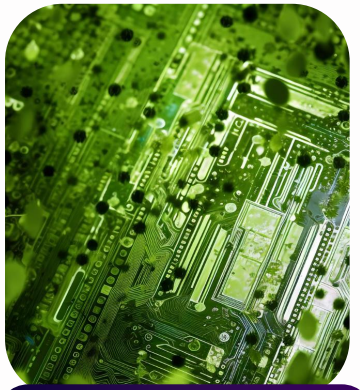
The integration of IoT, AI, and advanced automation is redefining production lines and predictive maintenance for a greener industry.

EXECUTIVE SUMMARY II



Retail, CX & Marketing

Big data analytics, AI, and Gen AI are enhancing customer experience by personalizing interactions and offers bringing them to a new level.



Tech for Environment

Innovations in renewable energy and emission reduction technologies are fundamental to reach a sustainable future.

Future of Work

Remote work, digital collaborative tools and Gen AI are redefining where and how we work.

Tech for Society

Technology is enhancing social inclusion and governance with advances in smart city solutions and mobility services improving urban living and accessibility.

🚀VIVATECH 2024 : “FASTER, HIGHER, STRONGER.”🚀

AI

Highlighting AI as its centerpiece, the event will feature industry giants like Microsoft, Google, Meta, Amazon, Nvidia, as well as leading AI startups such as Mistral AI and OpenAI.

JAPAN

The spotlight is on Japan: 40 representatives business from the Japanese ecosystem will be present, such as Mitsubishi, Fujitsu, and Hitachi.

TESLA

Besides AI, the key themes of this edition will be sustainable tech, healthcare, and mobility. In this last vertical, Tesla will be making an appearance for the first time, a year after Elon Musk's show at VivaTech.

INSTITUTIONS

UN PAVILLON
DU NUMERIQUE DE L'ÉTAT

cnrs

The presence of 14 entities committed to the digital transformation of French Republic will be present at the VivaTechnology trade show, as well as CNRS

BIG BOSSES

In addition to Bernard Arnault (LVMH) and Christel Heydemann (Orange), returning this year, Linda Yaccarino from X, Eric Schmidt, former Google CEO, Faye Iosotaluno (Tinder), and Kathleen Breitman, co-founder of Tezos blockchain, will also attend.

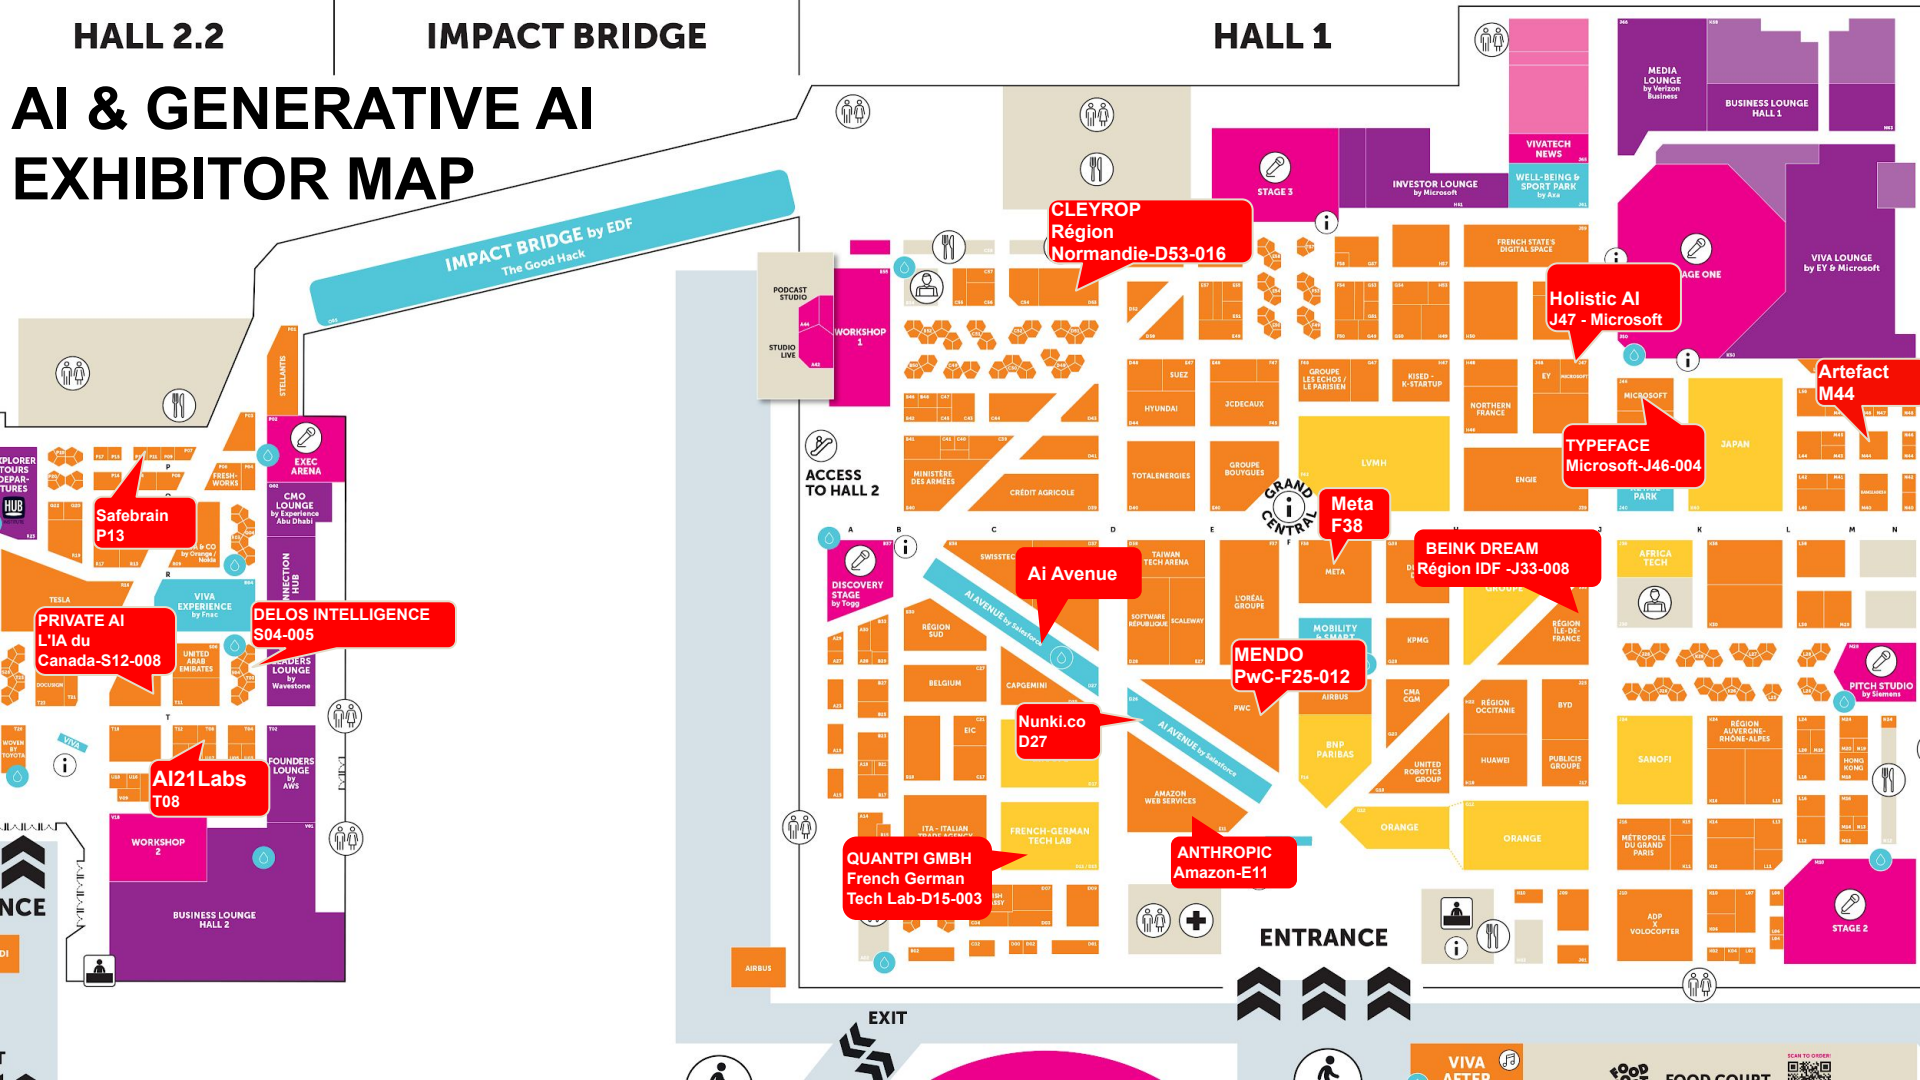
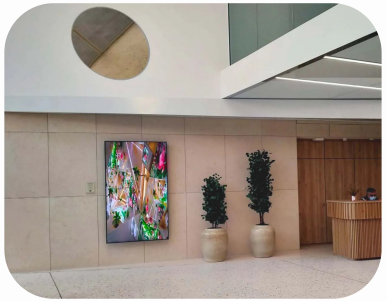
AI & GENERATIVE AI EXHIBITOR MAP



VIVATECH AI AVENUE BY SALESFORCE



ARTPOINT

FRANCE 🇫🇷

Innovative digital art platform which connects users with the world's best digital artists, allowing for personalized art experiences, offering thousands of artworks for subscription-based exhibition in offices and public spaces.

biped.ai

SWITZERLAND 🇨🇭

Robotics software for visually impaired people, integrating obstacle detection, turn-by-turn GPS, and scene description with GPT for enhanced mobility and independence.

Cognixion

UNITED STATES 🇺🇸

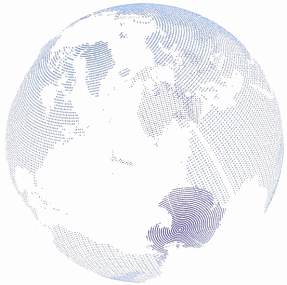
Axon-R is a novel brain-computer interface platform that integrates augmented reality, EEG, and artificial intelligence in a self-contained headset, designed to enhance human communication capabilities.

Esper

EE. UU. 🇺🇸 / UKRAINE 🇺🇦

Advanced bionic prosthesis, including the Esper Hand and a bracelet-based control system, emphasizing innovation in robotic multifunction devices for enhanced user mobility and control.

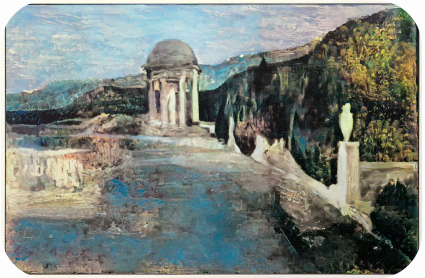
VIVATECH AI AVENUE BY SALESFORCE



nunki.co

FRANCE 🇫🇷

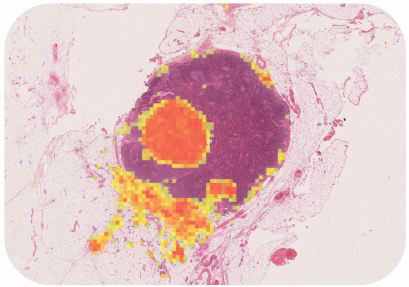
AI-powered, real-time data analysis solution with a dynamic display to anticipate, detect and overcome crisis.



OXIA PALUS

SWITZERLAND 🇨🇭

Oxia Palus combines spectroscopic imaging, AI, and 3D printing to resurrect lost artworks, creating an artistic parallel universe by uncovering significant pieces hidden beneath existing paintings



Primaa

FRANCE 🇫🇷

An AI-driven platform for automated and precise cancer diagnosis, built on image analysis and deep learning, significantly enhances the detection of key cancer biomarkers, contributing to personalized treatment plans.

SoundHound AI

UNITED STATES 🇺🇸

AI technology, specializing in conversational voice assistants. Two main products: a restaurant ordering interface and automotive technology integrated with generative AI, facilitating intuitive voice interactions.

VIVATECH AI AVENUE BY SALESFORCE

STUDIO ARTERA

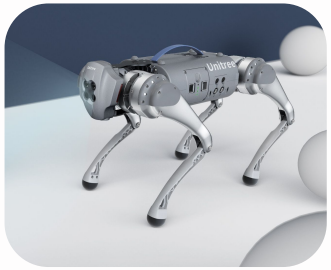
FRANCE 🇫🇷

Contemporary art and talent agency, supports and represents exceptional visual artists, facilitating meaningful artistic collaborations with brands, businesses, cultural institutions, and the public sector.

Triplet

SOUTH KOREAN 🇰🇷

AI Product Recommendation Kiosks, DeepLounge V for wine and DeepLounge S for fashion. Store Analytics AI, showcasing advanced visitor interaction and analytics capabilities.



Unitree

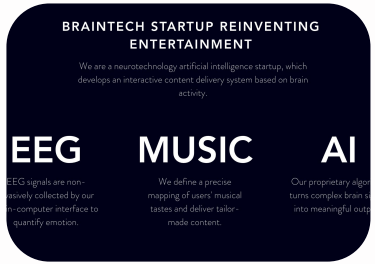
CHINA 🇨🇳

H1 Robot: groundbreaking advancement in robotics. Unitree is pushing the boundaries of technology and design, aiming to set new standards in robotic performance and efficiency.

VTOUCH

SOUTH KOREA 🇰🇷

Spatial Touch Home, WHSP Ring, and Holo Button at VivaTech, pioneering interactive technology for IoT device control and touchless interaction in space, aiming to revolutionize user connectivity and experience.



Yneuro

FRANCE 🇫🇷

Biometric innovation for identification using brain activity. Interactive experiences based on real-time emotional visualizations, with broad applications, heralding a new era in human-machine interaction and biotechnological access.

ARTEFACT: DATA & AI SOLUTIONS TO ACCELERATE BUSINESS TRANSFORMATION

🇫🇷 FRANCE I LAB ARTEFACT

📝DESCRIPTION

Artefact is a data consulting company, specialising in data acceleration programs and data marketing, deploying AI solutions at scale designed to meet today's clients' specific needs and accelerate their business transformation.

💡INNOVATION

→ Data Acceleration (data strategy, data governance, data platform, data factory, data culture & innovation, training,...)
→ AI Solutions (Supply chain, Augmented Operations, Call Centers, Generative AI, AI Ethics, Data for Sustainability,...)
→ Data & Digital Marketing (Consumer data environment, data-driven Sales, Data measurement, Advanced analytics,..)
→ MLOps to deliver scalable AI models
→ Artefact School of Data: training & eLearning platforms
→ Hackathons for enterprises: data culture and innovation spirit

ARTEFACT
AI IS ABOUT PEOPLE

Launch of **Artefact AI Film Festival,** an international short film competition rewarding the creativity of artists using AI, in partnership with mk2.

AI GENERATIVE DEMOS AT VIVATECH 2024

Elia, the virtual agent of Legrand : How to leverage GenAI to build a robust self care solution ?

Gen AI aims to summarize Orange's lengthy and complex fiber outage tickets.

Gaia streamlines due dil for Ardian teams by summarizing documents, answering questions, and comparing reports.

💰25 OFFICES: EU, ASIA, MENA, AMERICAS
👥NUMBER OF EMPLOYEES: 1500+

ANTHROPIC: AN AI SAFETY AND RESEARCH COMPANY

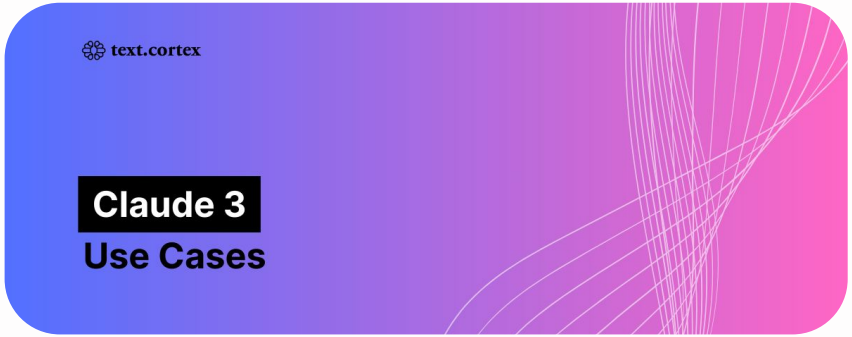
🇺🇸UNITED STATES I LAB: AMAZON WEB SERVICES

📝DESCRIPTION

Anthropic, based in San Francisco, is a leader in AI safety and research, dedicated to developing Artificial Intelligence that is both safe and beneficial. Their API allows businesses to integrate and leverage Claude's capabilities to unlock significant business value.

💡INNOVATION

- **Claude 3:** AI models that can be used in a variety of applications. People can talk directly with Claude at claude.ai to brainstorm ideas, analyze images, and process long documents.
  It includes: advanced reasoning and vision analysis; code generation; multilingual processing
- **Anthropic** emphasizes AI safety, producing research and frameworks to ensure AI operates without causing harm.



ANTHROP\C

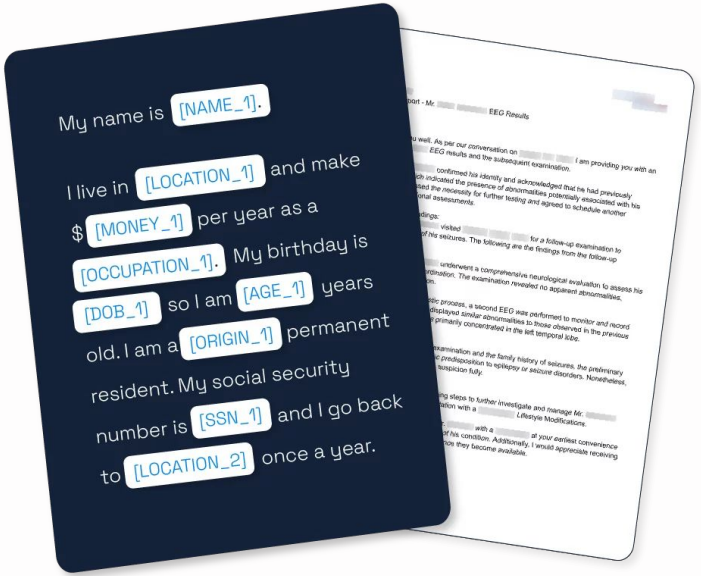
💰FUNDRAISING: 7,6B$
👥NUMBER OF EMPLOYEES: 251-500

PRIVATE AI : AN AI TAKING IN CONSIDERATION PRIVACY OF DATA

🇨🇦CANADA I LAB : L'IA DU CANADA

📝DESCRIPTION

Private AI is a solution that allows companies to protect customer data and access valuable information without compromising privacy. Deployable onsite, it supports various file types including texts, PDFs, images, and audio, integrating seamlessly into existing infrastructures.



💡INNOVATION

- **Transcription ASR:** Automatic Speech Recognition.
- **Audits and evaluations:** scan of data and make a classification; Data discovery: scan information to identify personal datas and find which can be shared or not; Compliance and secure storage allows to filter out all sensitive data.
- **Named entity recognition** finds specific informations in a large amount of data.
- **Company confidential information:** it uses of LLM without taking risk with the exposition of strategic data.

PRIVATEAI

💰**FUNDRAISING: 11,5M$**
👥**NUMBER OF EMPLOYEES: 11-50**

HOLISTIC AI: SAAS FOR AI RISK, GOVERNANCE, AND COMPLIANCE

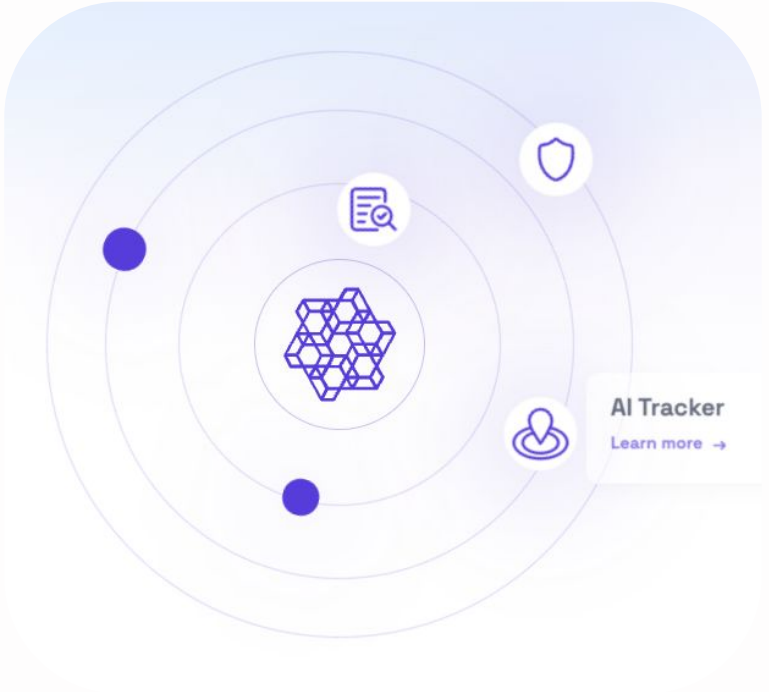
🇬🇧 UNITED KINGDOM I LAB: MICROSOFT

📝DESCRIPTION

Holistic AI provides a comprehensive legal information platform designed to cater to users seeking general legal knowledge and guidance. The website acts as a hub for updated, informative content, and materials but does not offer direct legal advice. It features links to third-party sites for additional information, although it does not endorse these sites.

💡INNOVATION

- **AI Governance platform:** a 360° solution for AI management.
- **AI Tracker:** global visibility on AI landscape through an AI intelligent mapping.
- **AI Audits:** a toolkit to audit with gen AI.
- **Use case:** AI risk posture reporting, AI inventory, AI 3rd party vendor management, AI conformity assessment, AI bias assessment.



Holistic AI

💰FUNDRAISING: N/A
👥NUMBER OF EMPLOYEES: 11-50

MENDO: LEARNING SOFTWARE WITH AI

🇫🇷FRANCE I LAB:

📝DESCRIPTION

Mendo has deployed an add-in in ChatGPT and Microsoft Copilot that acculturates and trains teams in generative AI, right in their workflows. Mendo helps companies to use AI gen tools to enhance their productivity.

💡INNOVATION

- **MENDO IA:** AI platform that helps employees to learn with a chatbot and learning modules.
- **Excel:** the learning tool is particularly focused on the use of excel and helps companies to develop the employee's skills.

mendo

💰FUNDRAISING: 700k$
👥NUMBER OF EMPLOYEES: 1-10

SAFEBRAIN: DATA SECURITY FOR COMPANIES

🇫🇷FRANCE I P13

📝DESCRIPTION

Safebrain is a company specialised in technologies for data security and protection. Their innovative solution enables companies to protect their sensitive information effectively and reliably.

💡INNOVATION

- **Security**: It guarantees the security of AI models and data.
- **Development**: It provides tools and resources for developing and refining AI models, including access to curated datasets and training environments.
- **Piloting**: It enables businesses to pilot AI models in a controlled and secure manner, allowing them to test and evaluate their effectiveness before full deployment.

💰**FUNDRAISING: N/A**
👥**NUMBER OF EMPLOYEES: 51-200**

DELOS INTELLIGENCE: GENERATIVE AI FOR COMPANIES

🇫🇷COUNTRY I STAND INFORMATION

📝DESCRIPTION

Delos Intelligence is an engineering company specializing in Generative AI.

💡INNOVATION

Activities

- Audit
- Training
- Secure AI application platform : deployment of customised solution with connections to internal servers

DELOS INTELLIGENCE

💰**FUNDRAISING: N/A**
👥**NUMBER OF EMPLOYEES: 11-50**

AI21LABS: GENERATIVE AI DEVELOPMENT FOR COMPANIES

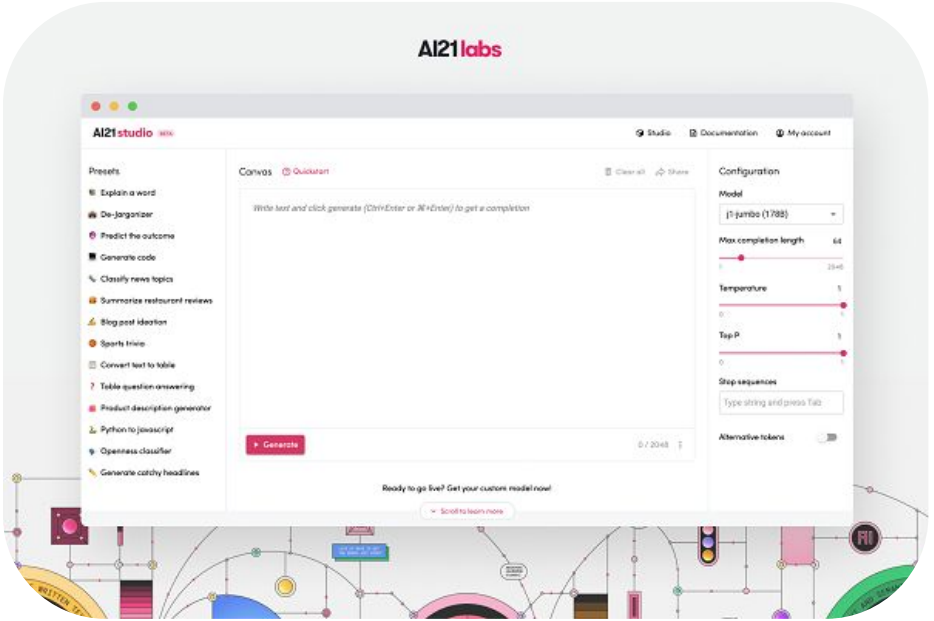
🇮🇱ISRAEL I STAND T08

📝DESCRIPTION

AI21 Labs is a creator of generative artificial intelligence and massive language models, as well as tools for creating artificial intelligence systems with understanding and generation of natural language.

💡INNOVATION

- **Models:** Foundation Models; Task-Specific Models.
- **Deployment options:** Platform; Partners; Virtual Private Cloud
- **Integration for companies:** Financial Doc Q&A, Term Sheet Generator, Customer Chatbot, Product Descript Generator, Research Assistant, Virtual Health Assistant, Shopping Assistant, Article GhostWriter, Product FAQ Generator, Financial Document Summarizer



AI21labs

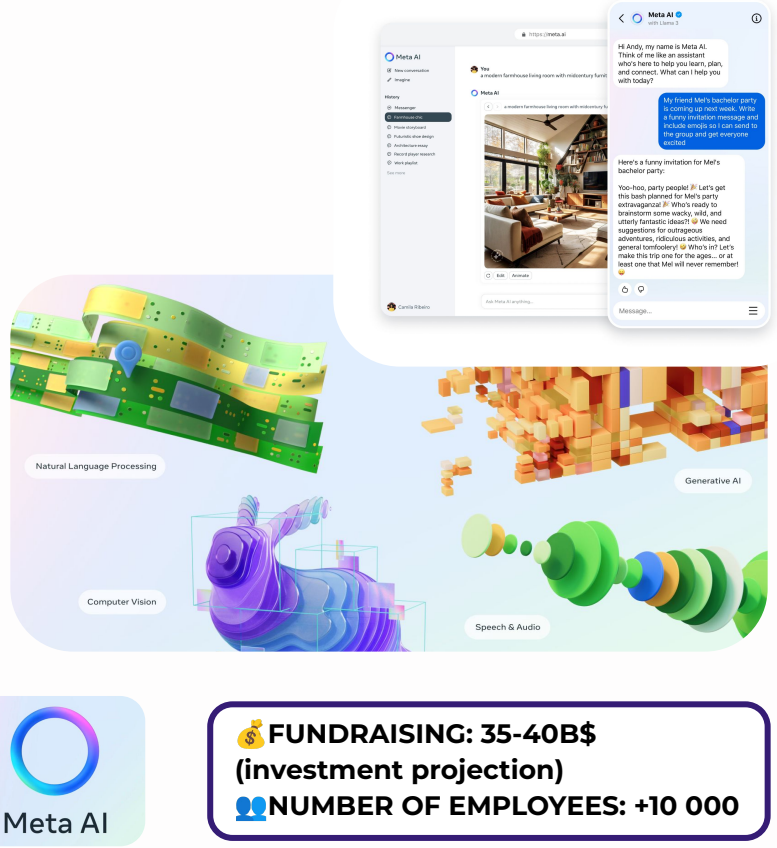
💰FUNDRAISING: 326,5M$
👥NUMBER OF EMPLOYEES: 101-250

META AI: THE AI ASSISTANT OF META II

🇺🇸UNITED STATES I LAB: META

📝DESCRIPTION

Meta AI is an advanced intelligent assistant developed using the cutting-edge Meta Llama 3 model. It has been designed to perform complex reasoning, follow instructions, visualize ideas, and solve nuanced problems, Meta AI integrates seamlessly into a suite of applications.



💡INNOVATION

- **Startups incubate at Station F by Meta :**
- **Qevlar AI:** a cybersecurity startup leveraging AI to help analysts prioritize and remediate threats with autonomous alert investigation.
- **Fringuant:** a personalized size and fit recommendation solution for apparel brands, which leverages an AI-powered body scan technology.
- **Kartoon AI:** an app to create webcomics and illustrated stories without drawing thanks to their state-of-the-art generative AI tech.

Meta AI

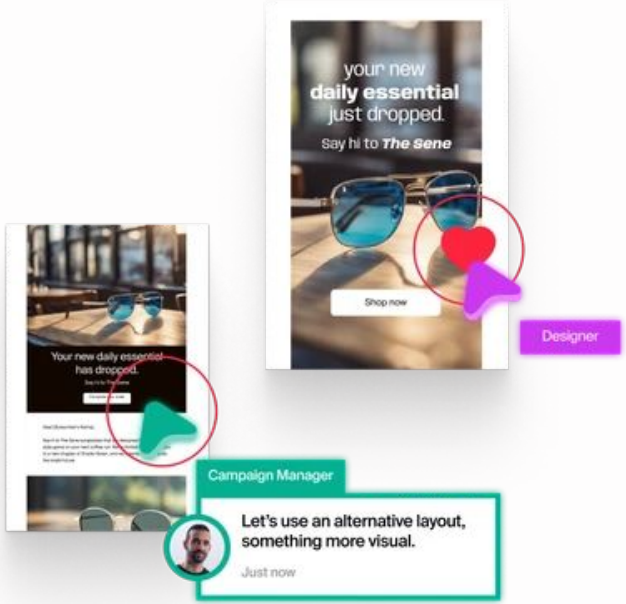
💰FUNDRAISING: 35-40B$ (investment projection)
👥NUMBER OF EMPLOYEES: +10 000

TYPEFACE: PERSONALIZED GEN AI CONTENT CREATION FOR ENTERPRISES

🇺🇸UNITED STATES I LAB: MICROSOFT

📝DESCRIPTION

Arc offers an AI-driven platform that transforms content creation, enabling businesses to design, launch, and refine brand stories tailored to diverse audiences and platforms. The suite includes tools for integrating multimodal content, enhancing productivity, personalizing content at scale, and ensuring data safety and responsible AI use.



💡INNOVATION

- **Arc** empowers teams across any organization to produce targeted, on-brand content for a variety of use cases including email marketing, advertising, and recruitment.
- **Hub:** it is a personalized multimodal content platform for enterprises.

Typeface

💰**FUNDRAISING: 165M$**
👥**NUMBER OF EMPLOYEES: 11-50**

QUANTPI GMBH: AUTOMATED AND SCALABLE SOLUTIONS FOR AI MODEL

🇩🇪GERMANY I LAB: FRENCH GERMAN TECH LAB / GERMANY

📝DESCRIPTION

PiCrystal, developed by QuantPi, offers a versatile AI testing engine designed to enhance the validation of AI and ML systems. Additionally, PiCrystal supports data scientists and ML engineers in automating validation tests, promoting transparency, and facilitating continuous improvement through advanced analytics.

💡INNOVATION

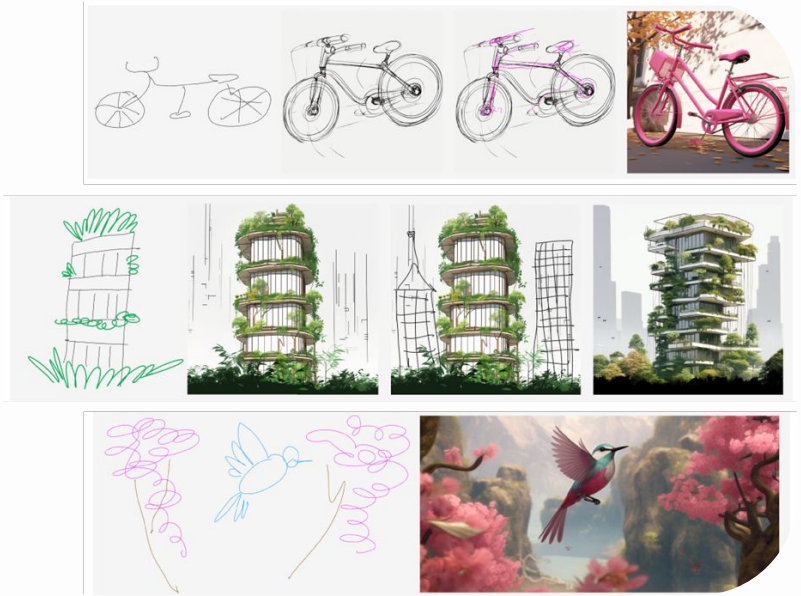
- **AI Trust Platform:** it is offers a proprietary and model-agnostic AI testing engine, which enables data scientists and ML engineers to accelerate the validation tests for any AI/ML system; it translates AI requirements, laws or guidelines into a testable framework; it provides a shared understanding of AI performance through pre-built dashboards.

QUANTPI

💰**FUNDRAISING: 2,5M$**
👥**NUMBER OF EMPLOYEES: 11-50**

BEINK DREAM: AI PLATFORM THAT GENERATES ILLUSTRATIONS FOR SCIENTISTS

🇫🇷FRANCE I LAB: RÉGION ÎLE DE FRANCE



📝DESCRIPTION

Beink Dream focuses on blending art and technology, developing an AI that transforms simple sketches into detailed drawings. This innovative tool aims to democratize design capabilities, enhancing creative & collaborative processes across various industries. The platform is celebrated for its user-friendly interface, fostering creativity and detailed visualization without requiring advanced drawing skills.

💡INNOVATION

- **Smart drawing:** it is draws a design and generates creative content with AI gen.

Beink DREAM

💰**FUNDRAISING: 500k$**
👥**NUMBER OF EMPLOYEES: 1-10**

CLEYROP: DATA EXPLORATION WITH INTEGRATED AI ASSISTANT

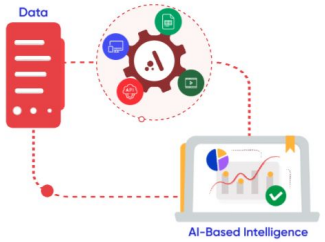
🇫🇷FRANCE I LAB: RÉGION NORMANDIE, FRENCH GERMAN TECH LAB / GERMANY

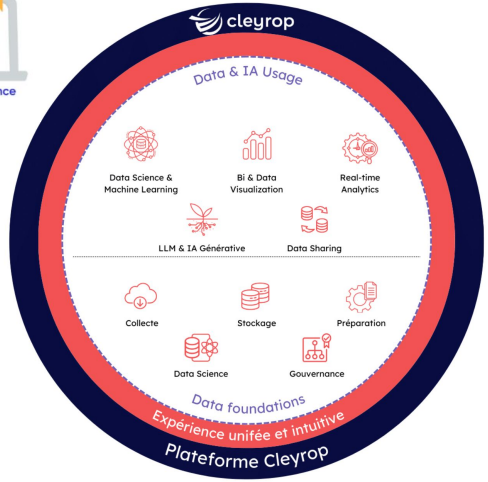
📝DESCRIPTION

Cleyrop offers a comprehensive data management solution, providing a unified and secure platform for data collection, storage, transformation, analysis, and display. This French software publisher enhances data exploration and utilization through advanced governance features, tailored to both public and private organizations.

💡INNOVATION

- **Platform Cleydrop:** Cleyrop DataHub enables end-to-end data lifecycle management by abstracting the underlying complexity of orchestrating various services; the platform is designed to facilitate adoption across all the teams.
- **Gen AI:** Thanks to the ML Ops capabilities, companies can develop and train models directly on the Cleyrop platform.





cleyrop

💰**FUNDRAISING: 14M€**
👥**NUMBER OF EMPLOYEES: 11-50**

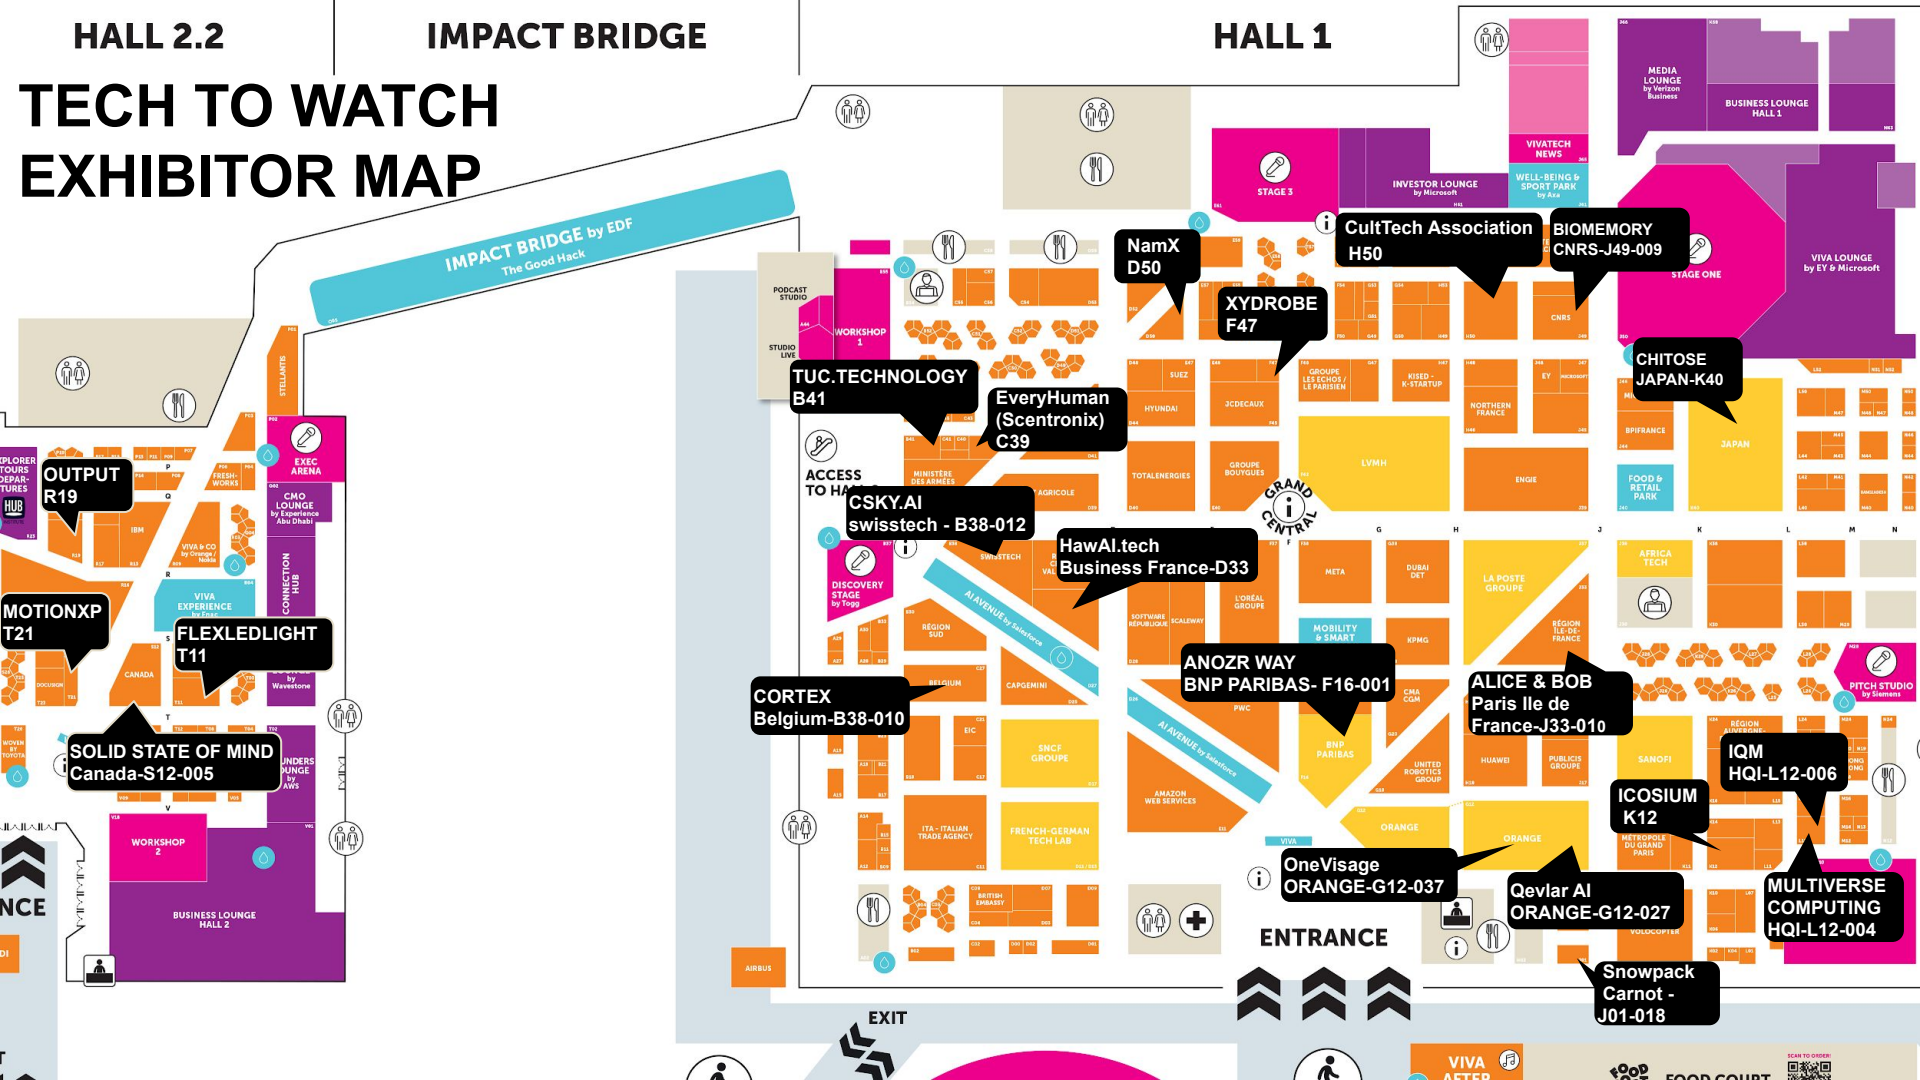
TECH TO WATCH EXHIBITOR MAP



VIVATECH EXPERIENCE PARK I

FRANCE 🇫🇷

Flex Lead Light is specialized in custom LED solutions for lighting, signage, and events, offering unique, tailor-made illumination projects.

FRANCE 🇫🇷

As a new car manufacturer on the market, NamX aims to bring new perspectives to the automotive world. X for exploration, X for experience. Their innovative concept makes green hydrogen accessible everywhere.

FRANCE 🇫🇷

CultTech leverages technology for cultural and societal advancement, empowering creators and consumers, facilitating widespread access to culture, and fostering innovative economic models.

FRANCE 🇫🇷

A premium automobile brand known for its sophisticated French design and innovative automotive technologies.

FRANCE 🇫🇷

MotionXP give to professionals the opportunity of building their own 6DOF motion simulators, enhancing virtual reality and simulation experiences.

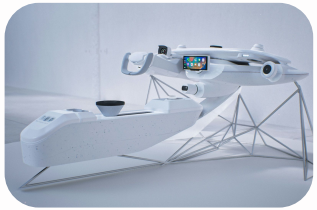
FRANCE 🇫🇷

Icosium excels in advanced software solutions for business operations and digital transformation strategies.

VIVATECH EXPERIENCE PARK II

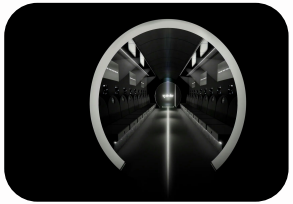
HONG KONG 🇭🇰

Teleport creates innovative technology and immersive experiences that blend science and creativity, aiming to connect the real and virtual worlds.



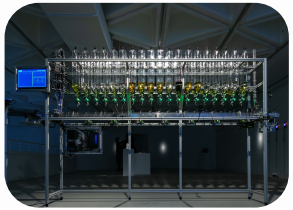
ITALY 🇮🇹

An interconnected, multimodal, circular and dynamic system, capable of enhancing every phase of the life cycle of vehicles and prolonging their use.



U. K. 🇬🇧

The platform offers to luxury brands immersive virtual worlds and different storytelling activations



NETHERLANDS 🇳🇱

Perfume-making machine based on a text-to-scent technology, allowing users to describe their desired fragrance

HONG KONG 🇭🇰

OUTPUT is a platform leading the creation of an ecosystem for digital culture — a network where digital creators can distribute their cutting-edge and entrepreneurial practices into the cross-industrial applications

BIOMEMORY:
DNA-BASED DATA STORAGE

🇫🇷 FRANCE I CNRS

📝DESCRIPTION

Biomemory created a digital media capable of storing data with 1-million higher density than any SSD or magnetic tape.

💡INNOVATION

- **Biomemory Prime :** a DNA-based data storage and replay system for datacenters capable of storing 100 Petabytes in a standard rack. This system aims to achieve a future capacity of 1 Exabyte, maximizing storage efficiency.
- **DNA Card :** a removable medium for DNA-based molecular storage, offering a portable and secure solution for data storage and access.

BIOMEMORY

💰**FUNDRAISING: 5M€**
👥**NUMBER OF EMPLOYEES: 11-50**

CSKY.AI: CONVERSATIONS THROUGH AI SOLUTIONS

🇨🇭SUISSE I SWISSTECH

📝DESCRIPTION

Csky.ai is dedicated to enhance and secure human conversations through AI solutions, particularly in settings that require confidentiality such as medical consultations and board meetings.

💡INNOVATION

- **ClearMindAI** offers automation for confidential in-person meetings, providing smart and secure meeting rooms.
- **The ClearMind private assistant**, a smart microphone, processes and enhances confidential conversations while maintaining privacy. It transforms sensitive meetings into secure, organized, and compliant reports, all within the confines of the room.

csky.ai

💰**FUNDRAISING: 5M€**
👥**NUMBER OF EMPLOYEES: 11-50**

ONEVISAGE:
SENSITIVE DATA PROTECTION

🇨🇭SUISSE I ORANGE & SOFTWARE REPUBLIC

📝DESCRIPTION

OneVisage develops white-labelled 2FA authentication software solutions that help large integrators, cybersecurity vendors and IAM solution providers increasing security levels by instantaneously eliminating digital identity theft and cyber attacks at endpoints.

💡INNOVATION

- **3D Facial Biometry:** Enable 3D facial biometry on various hardware and platforms.
- **3D Graphical Auth:** Enable 3D graphical authentication for on-line transactions.
- **MFA Solutions for OEMs:** OEM 2-factor authentication solutions for enterprises & service providers.

OneVisage®

💰**FUNDRAISING: 410K CHF**
👥**NUMBER OF EMPLOYEES: 1-10**

HAWAI.TECH: ENHANCING PROBABILISTIC AI CAPABILITIES FOR EDGE COMPUTING

🇫🇷 FRANCE I BUSINESS FRANCE

📝DESCRIPTION

HawAI.tech develops hardware accelerators to enhance probabilistic AI capabilities for edge computing. Their architecture prioritizes trustworthiness, explainability, and efficiency, currently implemented on FPGA cards and slated for custom chip availability in 2026. Probabilistic programming crucial for reconciling learning and expertise amidst data explosion.

💡INNOVATION

- **Probabilistic AI Enhancement:** hardware accelerators for probabilistic AI aiming to enhance frugality and explainability in AI systems.
- **Trustworthy AI:** Focus on analyzing, understanding, and controlling model decision-making processes.
- **Sustainable AI:** Emphasis on working with limited data, reduced training time, and energy efficiency.

HAWAI .tech HARDWARE FOR AI

💰**FUNDRAISING: 340K€**
👥**NUMBER OF EMPLOYEES: 11-50**

CORTEX MACHINA SRL: BRAIN COMPUTER INTERFACE TECHNOLOGY

🇧🇪 BELGIUM I BELGIUM

📝DESCRIPTION

Cortex Machina is a company specializing in the development of Brain-Computer Interface (BCI) technology. Cortex Machina's BCI technology decodes brain signals to enable users to interact with devices and software using their minds.

💡INNOVATION

- **Vortex BCI Gaming Headset** uses EEG technology to allow gamers to interact with games through neural activity, creating a highly immersive experience. This technology also has potential applications beyond gaming, including in accessibility and neuromarketing, by harnessing the power of real-time brain activity.

CORTEX MACHINA

💰**FUNDRAISING: 310 000 €**
👥**NUMBER OF EMPLOYEES: 1-5**

CHITOSE: LARGE-SCALE PRODUCTION OF MICROALGAE TECHNOLOGY

🇯🇵 JAPON I JAPAN PAVILION (JETRO)

📝DESCRIPTION

Chitose envisions a future where microalgae can be used to create a sustainable and abundant source of food, energy, and materials.

💡INNOVATION

- **Biotechnology solutions:** high-efficiency photobioreactor culture systems for sustainable, large-scale production of microalgae biomass. The company is developing a range of food, biofuel, biomaterial, and cosmetic product.

CHITOSE

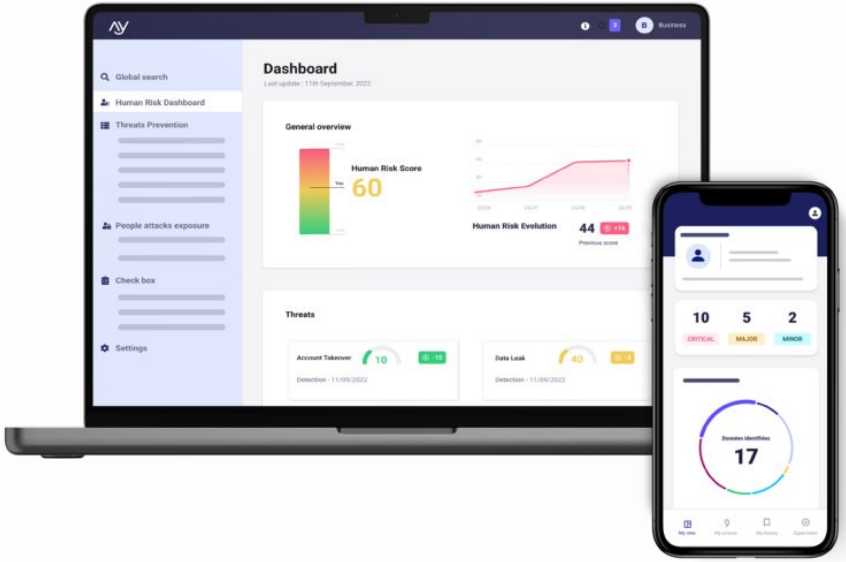
💰FUNDRAISING: 7M€
👥NUMBER OF EMPLOYEES: 51-100

ANOZRWAY: HUMAN RISK MANAGEMENT PLATFORM

🇫🇷 FRANCE I BNP PARIBAS

📝DESCRIPTION

Anozr Way is a French company that provides a software platform to help organizations assess and mitigate human risks, particularly those related to cyberattacks and fraud. It uses a combination of technology and human expertise to assess an organization's vulnerabilities to social engineering and identity theft. It then provides recommendations and solutions to help mitigate these risks.



💡INNOVATION

- **All-in-one platform:** identify potential threats such as spear phishing, account takeover, and MFA bypassing. The service evaluates cyber risks associated with managers and employees' human attack surface.

ANOZR WAY PEOPLE-CENTRIC CYBER PROTECTION

💰**FUNDRAISING: 8M€**
👥**NUMBER OF EMPLOYEES: 11-50**

SOLID STATE OF MIND: ARTIFICIAL GENERAL INTELLIGENCE FOR THE REAL WORLD

🇨🇦 CANADA I L'IA DU CANADA

📝DESCRIPTION

Solid State of Mind is pioneering the development of Artificial General Intelligence (AGI) aimed at functioning effectively in real-world environments. Their innovative approach leverages insights from ethology, psychology, and neuroscience to create a new class of AI that can adapt and operate autonomously with significantly lower energy and data requirements.

💡INNOVATION

- **Deep Meaning AI model** focused on understanding rather than deep learning.
- **Applications for Solid State of Mind's AI** include autonomous robotics, autonomous vehicles, medical devices, cloud-based recommendations, and gaming.

Solid State of Mind

💰**FUNDRAISING: N/A**
👥**NUMBER OF EMPLOYEES: 2-10**

ALICE & BOB: FAULT-TOLERANT QUANTUM COMPUTER

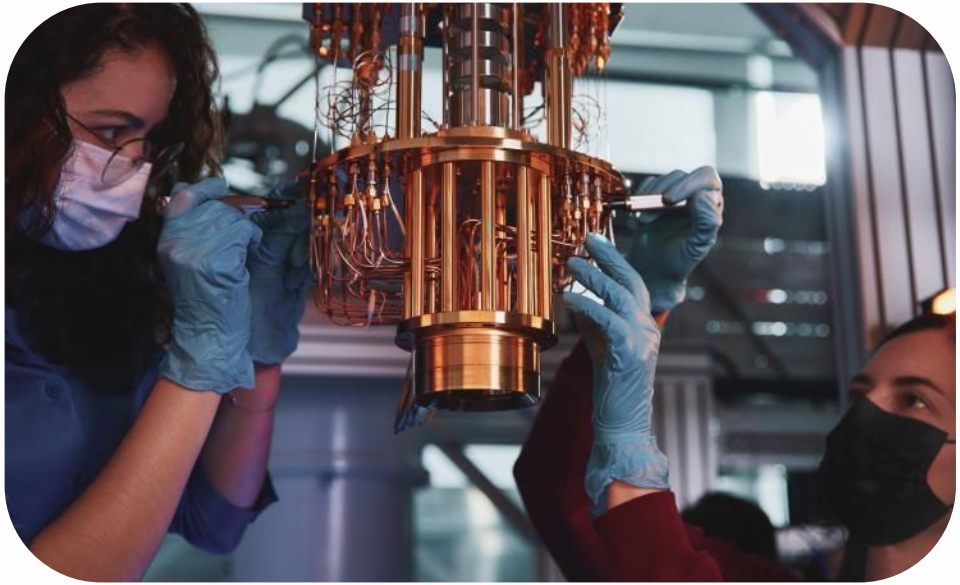
🇫🇷 FRANCE I HQI

📝DESCRIPTION

Alice & Bob is a quantum computing company whose goal is to create the first universal, fault-tolerant quantum computer. The have developed a pioneering technology called cat qubits, later adopted by Amazon.

💡INNOVATION

- **Cat Qubits:** nanofabrication, chip design, validation, digital tools and electronic control.



ALICE & BOB

💰**FUNDRAISING: 30M€**
👥**NUMBER OF EMPLOYEES: 80**

IQM: SUPERCONDUCTING QUANTUM COMPUTER

🇫🇮 FINLAND I HQI

📝DESCRIPTION

IQM is a company that develops and builds quantum computers. They offer a superconducting quantum computer called IQM Spark™ and IQM Radiance™, designed for universities and research labs.

💡INNOVATION

- **IQM Spark™:** Comprises a superconducting quantum computer and tailored learning experiences for universities and research labs worldwide. It comes pre-installed with a 5-qubit quantum processing unit.
- **IQM Radiance™:** A quantum computing platform available with 20 high-fidelity qubits, easily upgradable to 54, and soon up to 150 qubits.

IQM

💰**FUNDRAISING: 200M€**
👥**NUMBER OF EMPLOYEES: 80**

MULTIVERSE COMPUTING: QUANTUM SOFTWARE PLATFORM

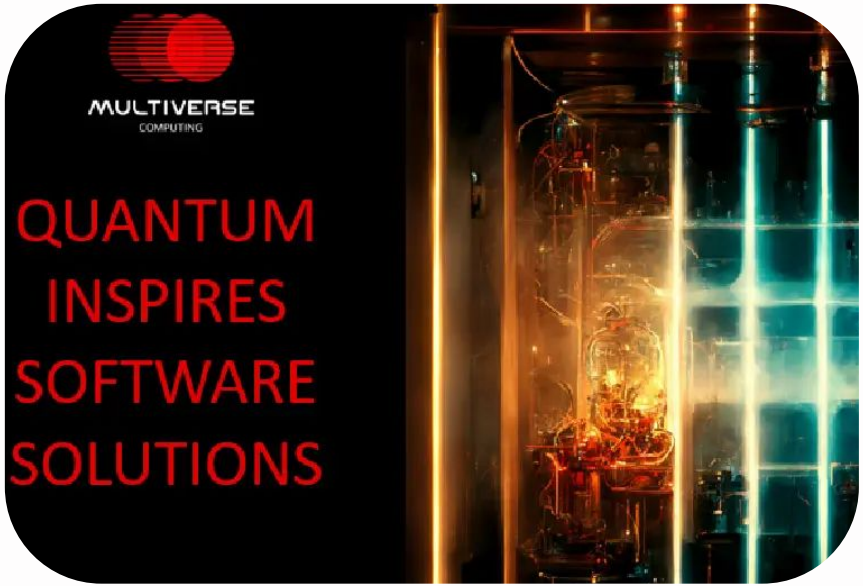
🇪🇸 SPAIN I HQI

📝DESCRIPTION

Multiverse Computing is a quantum software platform dedicated to applying quantum and quantum-inspired solutions to address complex challenges in finance, energy, manufacturing, logistics, space, life sciences, healthcare, and defense, delivering tangible value today.

💡INNOVATION

- **CompactifAI:** LLM compressor which uses quantum-inspired tensor networks to make AI systems such as large language models more efficient and portable, reducing size by over 90% while maintaining accuracy, and with over 50% savings in retraining and inference costs.



MULTIVERSE COMPUTING

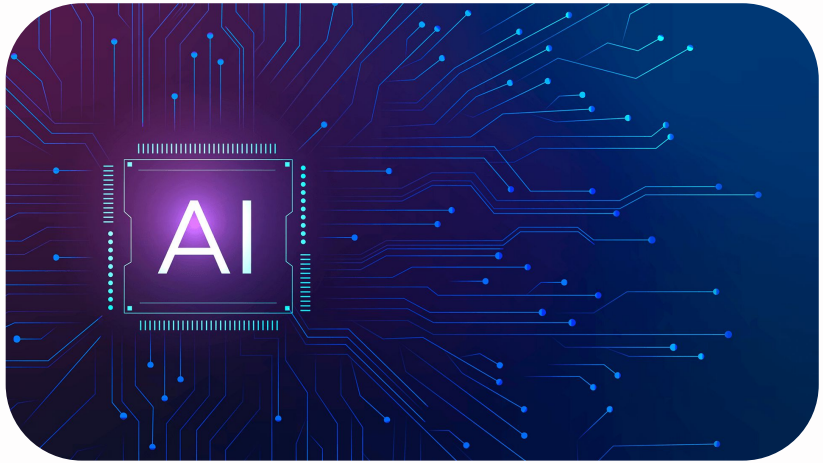
💰FUNDRAISING: 27M€
👥NUMBER OF EMPLOYEES: 80

QEVLAR AI: AUTONOMOUS AGENTS FOR CYBERSECURITY

🇫🇷 FRANCE I META

📝DESCRIPTION

Qevlar AI is a French cybersecurity company specializing in security operations. Their platform provides data analytics, artificial intelligence, and automation capabilities to help security teams detect, investigate, and respond to threats more effectively.



💡INNOVATION

- **Autonomous agents:** ensure comprehensive threat detection by analyzing selected logs and triggering alerts autonomously
- **Comprehensive outcomes:** qevlar AI conducts deep investigations using scalable, explainable, and proprietary AI, requiring no manual inputs
- **Seamless Sync:** effortlessly sync with SIEM and EDR systems through dedicated connectors, mirroring the viewpoint of top analysts for exhaustive investigations.

Qevlar AI

💰**FUNDRAISING: 4,5M€**
👥**NUMBER OF EMPLOYEES: 5-10**

SNOWPACK: BECOMING INVISIBLE ON THE INTERNET

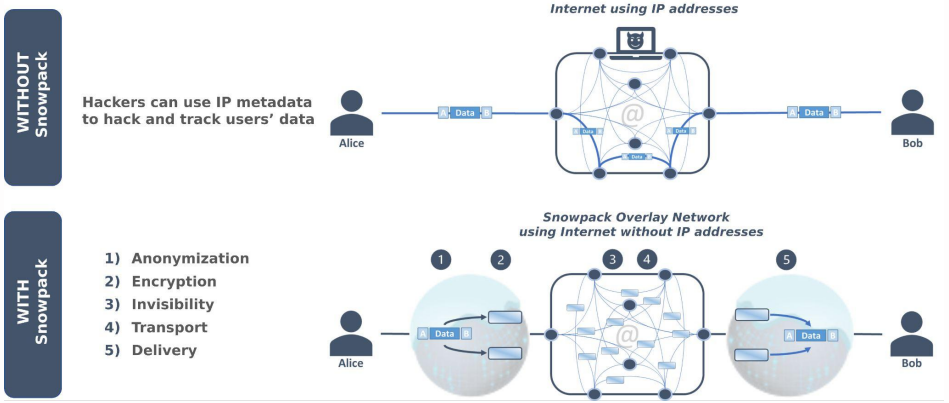
🇫🇷 FRANCE I LE RÉSEAU DES CARNOT

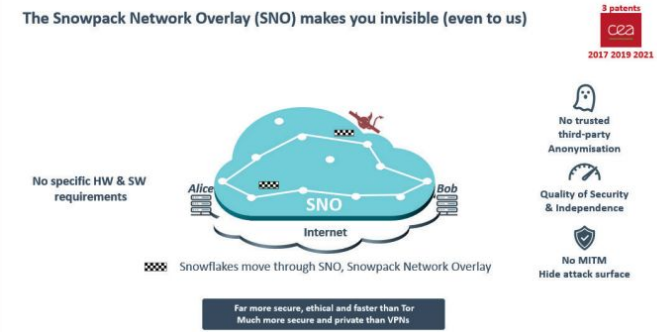
📝DESCRIPTION

Snowpack has developed the Snowpack Network Overlay, a technology that uses a network of servers to make data invisible on the Internet. It avoids identification, geolocation and data interception.

💡INNOVATION

- Server network operated by Snowpack.
- **Peer-to-peer mode:** anonymous and secured.
- **Multiple use cases**: Protecting data when being connected to a public Wi-Fi or travelling abroad, accessing the dark web, e-shopping, streaming, VPN.





Snowpack

💰FUNDRAISING: €2M
👥NUMBER OF EMPLOYEES: 1-10

QUANTEXA: GEN AI DECISION INTELLIGENCE PLATFORM

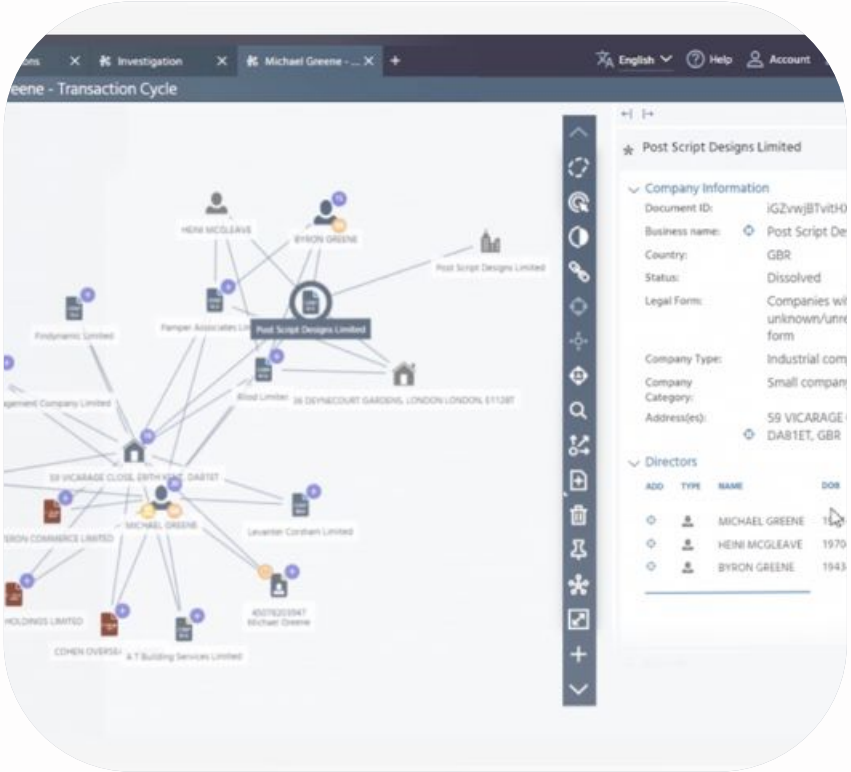
🇬🇧 UNITED KINGDOM I BNP PARIBAS

📝DESCRIPTION

An business decision platform powered by AI with a machine learning-based approach to evaluate corporate data and to research signals that could indicate possible fraud, money laundering and other illicit activities. Its new Q Assist uses natural language queries (compatible with OpenAI LP) to enhance entity resolution, graph analytics and scoring capabilities.

💡INNOVATION

- Q Assist with natural language.
- Analytics integrating internal and external data.



quantexa

💰FUNDRAISING: 370 M
👥NUMBER OF EMPLOYEES: 501-1000

ZELROS: GENERATIVE AI RISKS

🇫🇷 FRANCE I CAPGEMINI & MICROSOFT

📝DESCRIPTION

Zelros is a Generative Ai SaaS platform that offers personalized insurance recommendations for both personal and small business lines, helping insurance businesses provide the best coverage to their potential policyholders. The platform provides optimal coverage and prevention advice to their clients across all distribution channels.

💡INNOVATION

- **The Insurance Copilot** is a recommendations system for insurance powered by Gen AI.
- Tools allow to create personalized experiences throughout the customer journey.
- **Sintra** is a special LLM to integrate an insurance-specialized generative AI into daily workflows.

ZELROS

💰**FUNDRAISING: 16,1 M**
👥**NUMBER OF EMPLOYEES: 11-50**

QBITSOFT: ACCESSIBLE QUANTUM TECHNOLOGIES

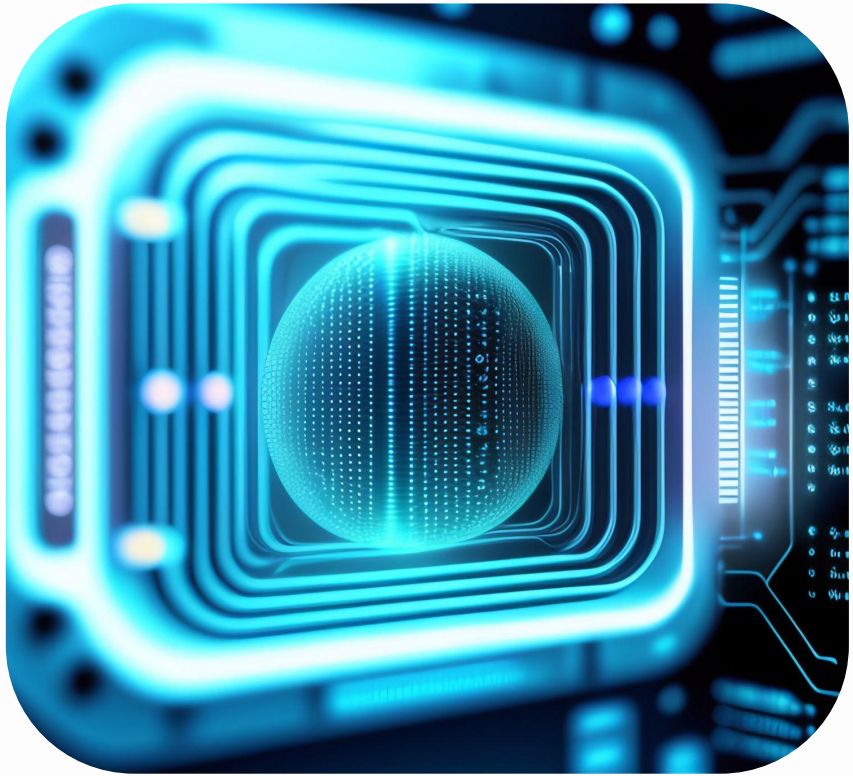
🇫🇷 FRANCE I HQI

📝DESCRIPTION

QbitSoft provides a single cloud-based platform allowing enterprises to use Quantum powered algorithms and applications to boost their business processes.

💡INNOVATION

- **The Quantum as a service platform (QaaS)** is a cloud-based platform with multiple Quantum computing hardware capabilities accessible to everybody.



💰**FUNDRAISING: 2-10**
👥**NUMBER OF EMPLOYEES:**

LEGALON TECHNOLOGIES INC: LEGAL AI REVIEW

🇯🇵 JAPAN I JAPAN PAVILION JETRO

📝DESCRIPTION

LegalOn Technologies is a contract review software powered by AI designed to help legal teams and improve their productivity. The service is a smart tool to find and fix contract risks through automation and legal intelligence in the pre-signature phases .

💡INNOVATION

- **LegalOn Assistant**: it is a generative AI tool that uses the latest GPT technology and Microsoft Azure's OpenAI Service.

LegalOn Technologies

💰**FUNDRAISING: $681M (valuation 2023)**
👥**NUMBER OF EMPLOYEES: 251-500**

SHIFT TECHNOLOGY:
SMART INSURANCE DECISIONS

🇫🇷FRANCE I MICROSOFT

📝DESCRIPTION

Shift Technology delivers AI-powered decisioning solutions for insurance fraud detection and claims handling. The tools improve combined ratios by optimising and automating critical decisions across the policy lifecycle.

💡INNOVATION

- **The Shift Insurance Decision Platform** is a unified software architecture to integrate data and empower decisions.

Shift

💰**FUNDRAISING: $320 M (2021)**
👥**NUMBER OF EMPLOYEES: 501-1000**

FINOVOX: INSTANT FALSE DOCUMENTS DETECTION

🇫🇷 FRANCE I PWC

📝DESCRIPTION

Finovox is a software solution for detecting false documents: it analyses all types of documents, in all languages and formats, scans thousands of files instantly and simultaneously to provide with tangible evidence of fraud. The software is available by API and by SaaS platform to adapt to different business and document volume.

💡INNOVATION

- **Investigation software:** document falsification detection software equipped with multiple advanced machine learning algorithms.

Finovox

💰**FUNDRAISING: $ 3,1 M (2022)**
👥**NUMBER OF EMPLOYEES: 11-50**

EASY PEASY INSURTECH: A NEO-INSURANCE MODEL

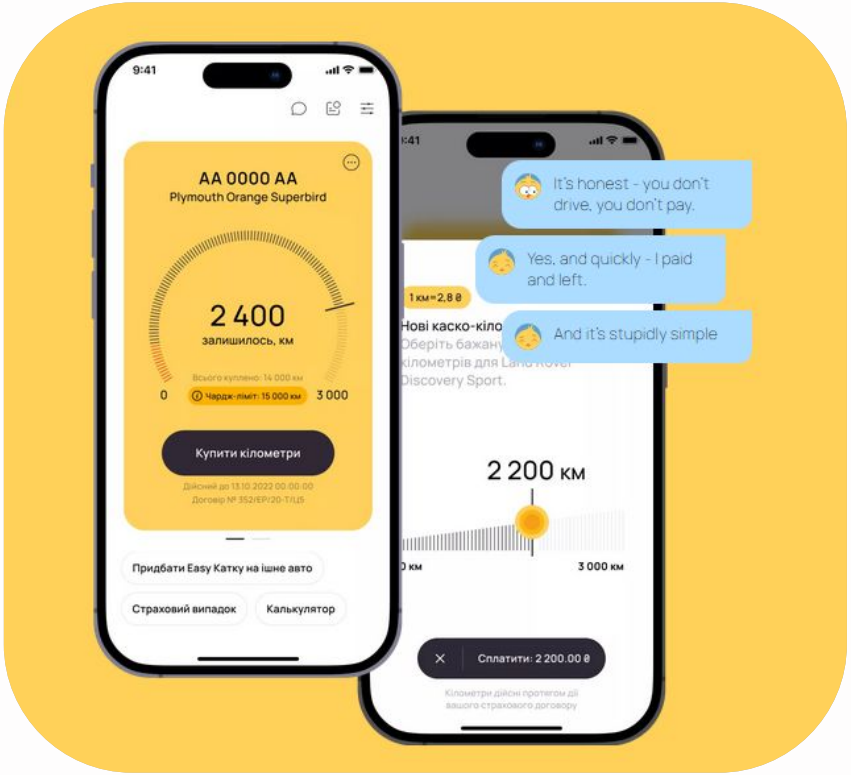
🇺🇦 UKRAINE I UKRAINE, UKRAINE EMBASSY

📝DESCRIPTION

Easy Peasy Insurtech is a neo-insurance platform that allows drivers to optimize their car insurance on a pay-per-mile basis and driving style report.

💡INNOVATION

- **Mobile App** where customers manage their insurance and It provides purchase of kilometers, accumulation of bonuses for safe driving, refer-a-friend program, automatic renewal and round-the-clock support.
- **SRM** for insurance companies where agents or brokers can manage their portfolio.



💰FUNDRAISING:
👥NUMBER OF EMPLOYEES: 1-10

FLUIIDD: INDUSTRIAL SCANNER FOR THE PROCESS INDUSTRIES

🇫🇷FRANCE I LAB: FRENCH GERMAN TECH LAB / GERMANY

📝DESCRIPTION

Fluiidd specializes in advanced industrial scanning technology designed to enhance operational efficiency and prevent costly downtime by detecting defects in industrial pipelines.

💡INNOVATION

- **Prevent costly downtime:** it identifies and addresses potential disruptions before they halt operations.
- **Enhance energy efficiency:** it optimizes pipeline flow for reducing energy consumption and environmental impact.
- **Unlock superior performance:** it gains continuous monitoring and make informed decisions for a smoother, more efficient process.

Awards :

🏆 Tech for Future Award, Issued by Journal La Tribune, Feb 2024

🏆 Trophy for the most promising startup for collaboration between the academic and industrial worlds, Issued by Pôle SCS, Dec 2023

🏆 Societal and sustainable responsibility innovation Award, Issued by World Nuclear Exhibition, Nov 2023

🏆 I-Lab Award : National Innovation Contest, Issued by French government and BPI France, Jul 2023

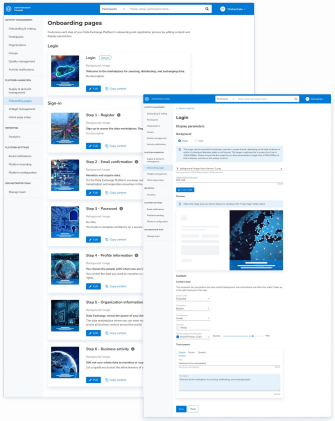
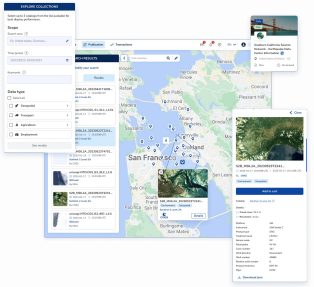
DAWEX: A DATA EXCHANGE PLATFORM SOLUTION

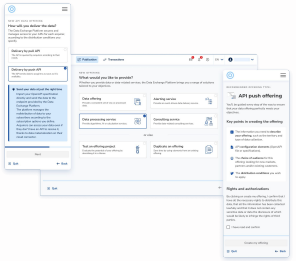
🇺🇸UNITED-STATES I LAB: BOUYGUES

📝DESCRIPTION

Dawex offers Data Exchange Platform solutions that orchestrate data ecosystems. Their platform facilitates secure, compliant, and efficient data transactions, enabling businesses to foster innovation, increase productivity, and generate new revenue streams through strategic data utilization.







💡INNOVATION

- **Data exchange platform capabilities:** facilitate governance and business modeling; data product discovery; data product publication (the platform enables data orchestrators & data providers to efficiently market and share data products in a collaborative way); and data transaction to control and monitor the data distribution & consumption.

DAWEX

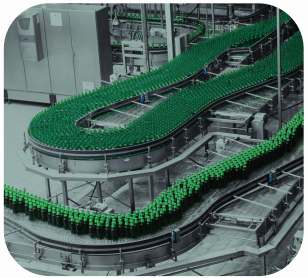
💰**FUNDRAISING: 10,5M€**
👥**NUMBER OF EMPLOYEES: 51-100**

WASE: AN ENERGY SOLUTION

🇬🇧 UNITED-KINGDOM I LAB: ENGIE

📝DESCRIPTION

WASE provides a decentralized sanitation system with the goal of accelerating the global adoption of circular waste treatment.



💡INNOVATION

- **Electro-Methanogenic Reactor (EMR):** it is designed to enhance biogas production from biomass in anaerobic digestion facilities and organic matter in wastewater.
  _ Boosts energy production by 30%
  _ Treats waste 3-10x faster
  _ 70% smaller footprint
  _ Improves effluent quality by >50%
- **Industrial wastewater:** anti-waste water.
- **Anaerobic digestion:** higher methane generation and feeding rates.

ATOPTIMA: SOFTWARE FOR SMART SUPPLY CHAIN

🇧🇪BELGIUM I LAB: RÉGION NOUVELLE-AQUITAINE

📝DESCRIPTION

Atoptima provides integrated planning, network design, routing optimization, shipment pooling, SaaS, and artificial intelligence services.

💡INNOVATION

- **Digitalization of processes and optimization:** use of mathematical modules to solve problems of organizations
- **Solutions & apps:**
  Route Solver: optimization of transport plans.
  Pack Solver: optimization of packing and palletizing.
  Pick Solver: order preparation automatization.
  Plan Solver: management of production orders.
  Yield Management: management of advantage and risks of the supplychain.
  Assembled Solvers: syncrhonization of the supplychain.

EX9: AUTONOMOUS TRANSPORT FOR LOGISTIC

🇫🇷FRANCE I LAB: INSTITUT POLYTECHNIQUE DE PARIS & CCI PARIS ÎLE-DE-FRANCE

📝DESCRIPTION

Ex9 provides comprehensive automated terminal transport solutions to enhance efficiency and sustainability in logistics and industrial sectors. They focus on deploying fleets of autonomous yard tractors designed for the safe and efficient movement of heavy loads such as trailers, containers, and various other goods within closed compounds.

💡INNOVATION

- **Autopilot:** autopilot algorithms for heavy goods handling vehicles, trained for operations in o dense, dynamic environment with mainly rear.
- **Site deployment:** integration to the site's operational process (IT interface to TMS/YMS, mapping, monitoring)
- **Tele-driving control tower.**
- **Daily operations:** running cycle of operations, technical support, training, maintenance, HMI & Data monitoring. Data analytics and take away reporting with KPIs.

LACTIPS: BIODEGRADABLE AND WATER SOLUBLE PLASTIC ALTERNATIVE

🇫🇷 FRANCE I LAB CNRS

📝DESCRIPTION

Lactips produces a material made from milk protein sourced from renewable and abundant dairy industry by-products.

💡INNOVATION

- Versatile material properties, offering excellent film-forming capabilities, barrier properties, and mechanical strength.
- They are suitable for single-use packaging applications in industries such as:
  food and beverage: edible film coatings, sachets, and capsules;
  home and personal care: detergent pods, toiletry sachets, and hygiene products;
  agrochemicals: water-soluble packaging for fertilizers and pesticides.

Lactips

💰FUNDRAISING: €7.6M
👥NUMBER OF EMPLOYEES: 51-200

MECAWARE: RECYCLING FOR STRATEGIC RAW MATERIAL

🇫🇷 FRANCE I LAB ENGIE

📝DESCRIPTION

Mecaware pioneers sustainable recycling, transforming end-of-life batteries and scraps into strategic raw materials. Their technology captures CO2 and extracts critical metals.

💡INNOVATION

- Metal: extraction of purified strategic metals including lithium, cobalt, nickel, manganese, aluminum, and copper from urban mine deposits.
- Carbon: capture and valorization of CO2 from industrial flue gases for metal separation via mineral carbonation; storage of 900 Kg of CO2 per ton of recycled metals.

mecamale

💰FUNDRAISING: €40M
👥NUMBER OF EMPLOYEES: 11-50

RAPTOR MAPS : SOLAR INDUSTRY WITH DIGITAL SOLUTIONS

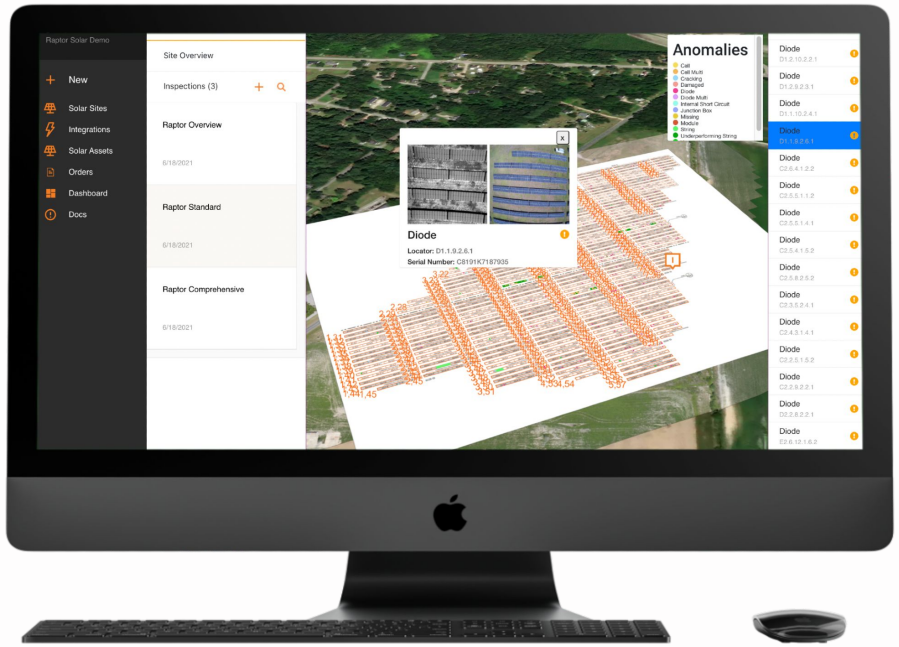
🇺🇸 ÉTATS-UNIS I LAB CNRS

📝DESCRIPTION

Raptor Maps serves as the digital foundation for a more scalable and resilient solar industry.

💡INNOVATION

- GIS-enabled analytics and tools for comprehensive solar asset management
- Drone-in-a-box: deployment of advanced robotics to automate data capture and enhance margins.
- Digital twins for intuitive workflow tools and precise anomaly localization.
- Aerial thermography inspections for accurate asset health assessment and anomaly detection.
- Prioritized remediation patterns based on precise GPS locations and anomaly classification.



RAPTOR MAPS™

💰FUNDRAISING: €27.2M
👥NUMBER OF EMPLOYEES: 51-100

SWEEP: HELPING COMPANIES REDUCE THEIR CARBON FOOTPRINT

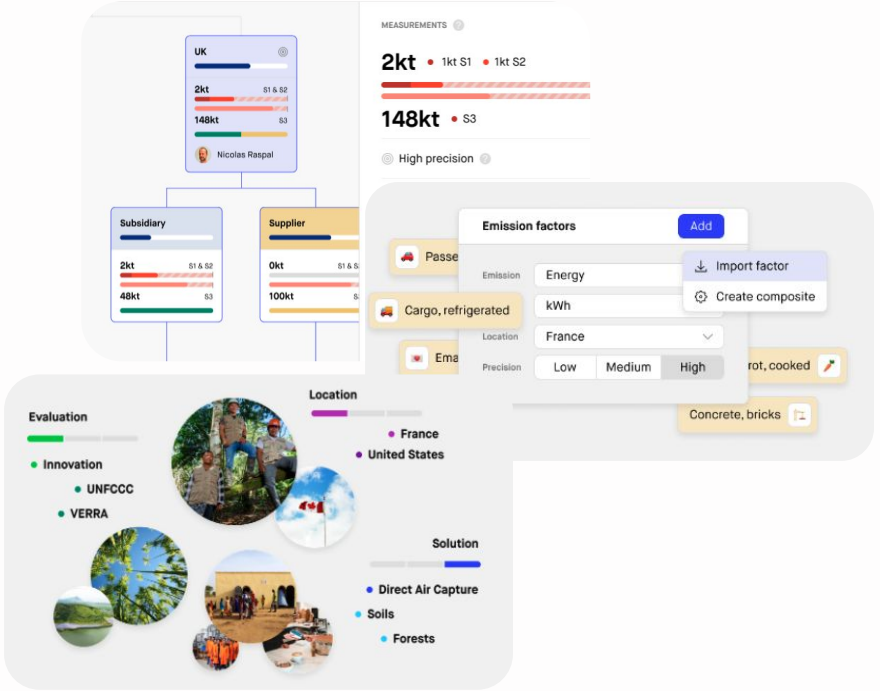
🇫🇷 FRANCE I LAB GROUPE SNCF

📝DESCRIPTION

Sweep built a platform that is meant to help companies reducing their carbon emissions across their entire business and value chain.

💡INNOVATION

- Estimation of the current impact with the hotspots and reduction potential; mapping of the reality of the emissions.
- Building a credible plan to reduce the carbon footprint by setting realistic targets; simulation of the reduction pathways; regular feedbacks thanks to automated measurements.
- Data sharing with other companies to maximize the impact.



SWEEP

💰FUNDRAISING: $99.9M
👥NUMBER OF EMPLOYEES: 51-200

BIOMYC: PACKAGING SOLUTIONS MADE FROM MYCELIUM

🇧🇬 BULGARIA I LAB HYUNDAI MOTOR & KIA

📝DESCRIPTION

Biomyc specializes in providing sustainable packaging solutions derived from mycelium, the root structure of mushrooms.

💡INNOVATION

- Mycelium as the primary raw material plus plant waste for an alternative to styrofoam.
- Biofabrication process that allows mycelium to grow and form into customizable shapes and structures (for specific packaging requirements and branding needs).
- Additive manufacturing (3D printing, scanning, and simulative design); stronger, more durable and insulated than conventional plastics.

biomyc

💰FUNDRAISING: €500K

SO SPONGE : INNOVATIVE HUMIDITY REGULATION TECHNOLOGY

🇫🇷 FRANCE I LAB IFP ÉNERGIES NOUVELLES

📝DESCRIPTION

SoSponge pioneers innovative humidity regulation technologies aimed at reducing energy consumption and greenhouse gas emissions.

💡INNOVATION

- **The Regulating Ribbon** is a solution for localized humidity control to combat fungal diseases and production losses; it uses a specific adsorbent material based on mesoporous aluminas; the material is transformed into a thin layer deposited on a flexible support and deployed in the enclosed space; the material is self-regenerating (no external energy or complex maintenance required); Utilization of passive humidity regulation.

so sponge

👥**NUMBER OF EMPLOYEES: 1-10**

BEHAV : PLANT BASED TEXTILE MATERIALS FOR ALL BRANDS

🇫🇷 FRANCE I LAB INSTITUT MINES-TÉLÉCOM (IMT)

📝DESCRIPTION

Behav offers an elegant and durable alternative to leather by utilizing cactus-based materials and non-valued agri-food waste, promoting eco-conscious consumption in the fashion industry.

💡INNOVATION

- Sustainable resource: Raw materials sourced from Moroccan agriculture, cleaned, processed and powdered by an all-women cooperative.
- Resource optimization: 1000 times less water consumption per square meter compared to traditional materials; 12 times fewer greenhouse gas emissions per square meter; 10 times less energy consumption per square meter.

BEHAV

👥NUMBER OF EMPLOYEES: 1-10

VOLTR: POSITIVE IMPACT LITHIUM BATTERIES

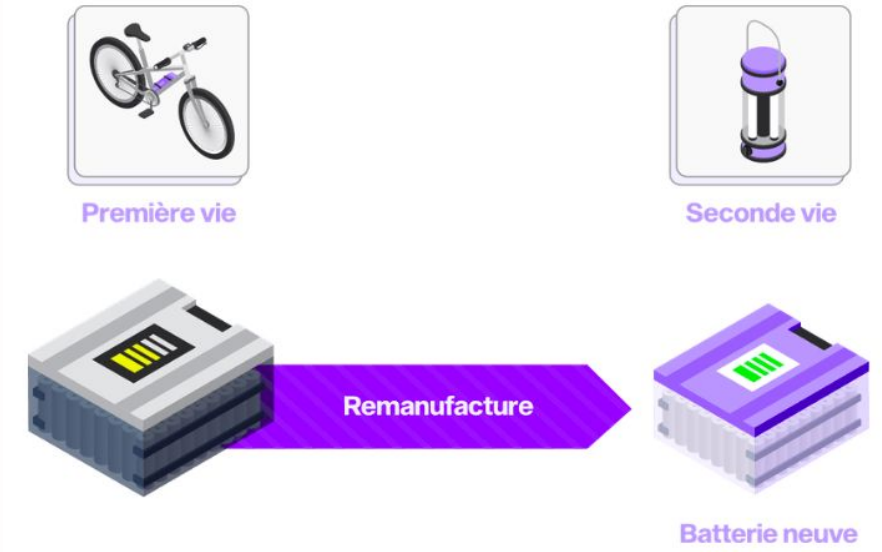
🇫🇷 FRANCE I LAB INSTITUT POLYTECHNIQUE DE PARIS

📝DESCRIPTION

VoltR reconditions batteries using second-life cells to avoid new resource extraction and promote circularity.

💡INNOVATION

- Battery Manufacturing: catalog or custom orders tailored to specifications.
- Cell Sales: Tested and ready-to-integrate cells such as 18650, 21700, pouch, others.
- SOH Diagnostics: characterization of used batteries for better valorization.
- End-of-life battery collection: removal, transport, and regulatory formalities.
- Re-use: example, cells from end-of-life bike batteries may be reused for lower-energy-consuming portable speaker batteries.



VoltR

💰FUNDRAISING: €4M

SAVIAN BY BIOFLUFF: LUXURY PLANT-BASED MATERIALS

🇫🇷🇺🇸 FRANCE-ÉTATS-UNIS I LAB LVMH

📝DESCRIPTION

With Savian, BioFluff pioneers a revolutionary approach to luxury by crafting fur, fleece, and shearling from 100% renewable plant fibers and agricultural waste, significantly reducing CO2 emissions and promoting eco-friendly material production.

💡INNOVATION

- **Genuine plant fibers:** it utilizes nettle, hemp, and flax for plush textures.
- **Fibers sourced & crafted in EU:** it supports local and sustainable sourcing and production in Italy.
- **Sustainability**: free from GMO & toxic chemicals; 100% vegan; 40-90% less CO2 emissions.

BIOFLUFF

💰**FUNDRAISING: $3.2M**
👥**NUMBER OF EMPLOYEES: 1-10**

KUMULUS WATER: DRINKING WATER MADE USING THE SUN AND THE AIR

🇹🇷 TURKEY I LAB PWC

📝DESCRIPTION

Kumulus Water presents innovative water purification solutions tailored to address diverse water treatment challenges. Its machines create drinking water using solar power and the humidity in the air.

💡INNOVATION

- **Kumulus One:** an Atmospheric Water Generator (AWG) producing 20 to 30 liters of healthy drinking water per day; it tests water quality; it is equipped with a solar power pack, making it fully autonomous and independent; easy to transport, install and used, and maintenance; it is digitally connected and can be remotely controlled.

KUMULUS

💰**FUNDRAISING: €1.1M**

KIKLEO: REVOLUTIONIZING FOOD WASTE MANAGEMENT

🇫🇷 FRANCE I LAB RÉGION AUVERGNE-RHÔNES ALPES

📝DESCRIPTION

Kikleo offers innovative food waste analysis technology to help restaurants sustainably reduce losses, achieve significant savings, and minimize environmental impact with real-time monitoring.

💡INNOVATION

- AI-powered cameras to detect, identify, and estimate remaining food on guests' trays or plates; the system is adaptable to any restaurant type with simple installation and autonomous analysis.
- Connected scales for automated weighing and digitalized waste diagnosis in the kitchen.
- Modular data and personalized action plans for tailored solutions in waste reduction.

Kikleo

💰**FUNDRAISING: €1.5M**
👥**NUMBER OF EMPLOYEES: 1-10**

CLHYNN: AN INNOVATIVE FUEL CELL

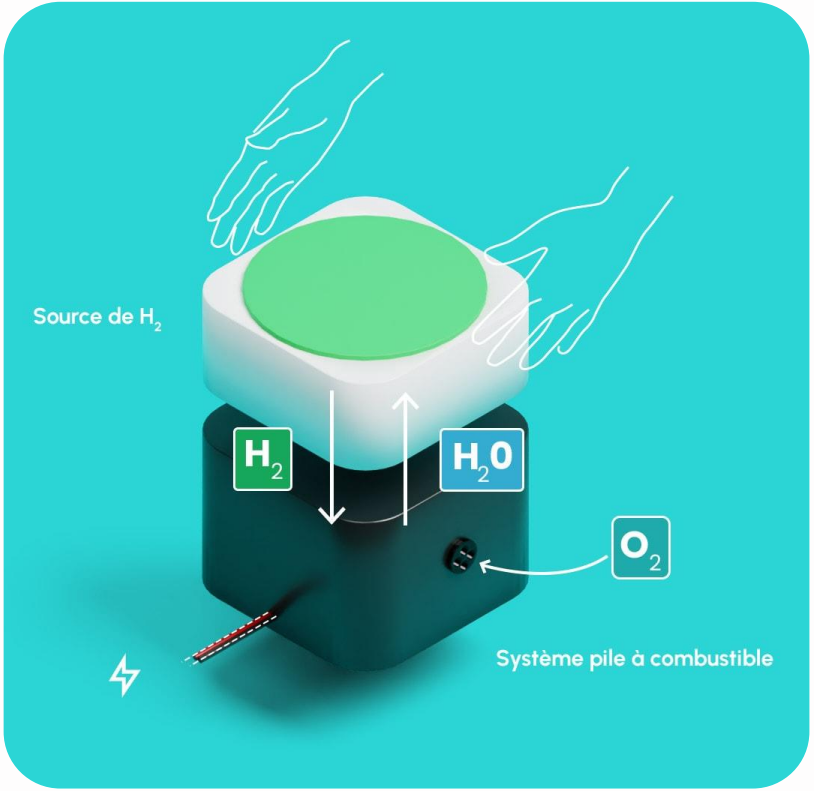
🇫🇷 FRANCE I LAB RÉGION BOURGOGNE FRANCHE COMTÉ

📝DESCRIPTION

CLHYNN introduces a revolutionary green hydrogen fuel cell that combines the cell with its own hydrogen source, transforming the sector and offering a sustainable future for various applications in transport and stationary technologies.

💡INNOVATION

- Versatile for various wattages and applications, easily replaceable hydrogen source.
- Cost-effective Nickel-based catalyst, no reliance on rare metals.
- Green hydrogen production from water, recyclable components, no critical raw materials.
- Applications: clean, efficient alternative for transportation; intelligent, secure energy access for generators, even in remote areas.



CLHYNN

💰FUNDRAISING: €1.5M

NISIAR BY MONDIN: ECO-INNOVATION FROM FRENCH VINEYARDS

🇫🇷 FRANCE I LAB RÉGION NOUVELLE-AQUITAINE

📝DESCRIPTION

Mondin offers a unique, flexible material (Nisiar) crafted from grape marc and bio-sourced, recyclable polymers.

💡INNOVATION

- **Nisiar material**: it is animal-free, no harmful chemical treatment and 73% plant-based.
  Sourcing: partners with local vineyards and artisans to procure premium grape marc
  Manufacturing: It blends grape marc with bio-polymers through innovative processes.
  Customization: it tailors material composition to meet client specifications.
  Sustainability: it focuses on eco-conscious practices and ongoing research to enhance resource efficiency.

Mondin

👥**NUMBER OF EMPLOYEES: 1-10**

ENEAD'S WATERCOOLING: TECHNOLOGY FOR COMPUTERS

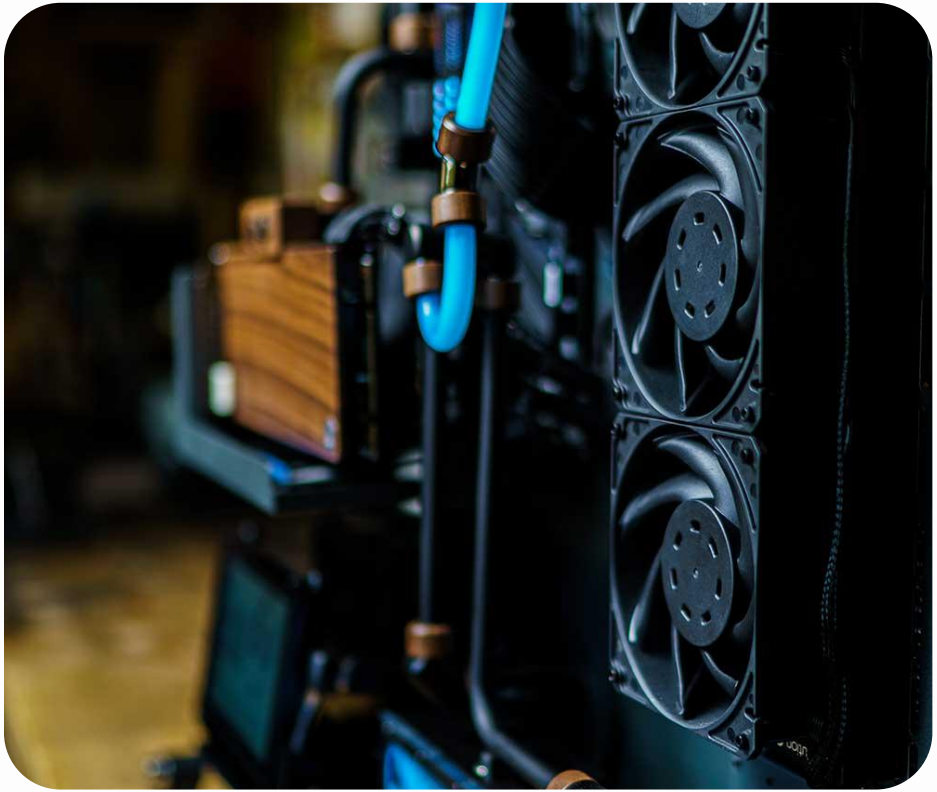
🇫🇷 FRANCE I LAB RÉGION PAYS DE LA LOIRE

📝DESCRIPTION

EnéaD integrates watercooling technology into computers, enhancing performance, durability, and aesthetics while reducing noise.

💡INNOVATION

- Watercooling technology circulates liquid through tubes to absorb heat from computer components; the heated liquid is directed to a radiator where the heat is dissipated into the air; this process maintains optimal temperature, improving performance and extending the lifespan of computer hardware.



EnéaD

👥NUMBER OF EMPLOYEES: 1-10

BIOMITECH: MICROALGAE TO PURIFY THE AIR

🇫🇷 FRANCE I LAB RÉGION SUD

📝DESCRIPTION

Biomitech develops filtration systems that use microalgae to purify the air and filter atmospheric pollutants.

💡INNOVATION

- **BioUrban:** an urban system for capturing atmospheric pollutants (CO2, NOx, CO, ...) in urban spaces and monitoring air quality. It can handle 290 000 m3 of air per day. It is powered by solar energy.
- **BioCov:** prototype of ozone filter designed for gas stations and currently teste in the USA and Mexico.
- **BioFilter:** biofiltration system designed to treat emissions of Sox, CO, CO^2, Nox and fine particles 2.5-10 pm for industrial applications.

BiomiTech

👥**NUMBER OF EMPLOYEES: 1-10**

BE ENERGY'S BATTERY, OIL AND ENGINE REGENERATION TECH

🇫🇷 FRANCE I LAB RÉGION SUD

📝DESCRIPTION

BE ENERGY pioneers battery regeneration technology, extending the lifespan of lead-acid and NiMH batteries for hybrid and rechargeable vehicles.

💡INNOVATION

- **REGEN PULSE project :** backed by Capenergies, leads to advanced diagnostic and regeneration programs for NiMH batteries, particularly in hybrid vehicles; it doubles the lifespan of batteries, oils and engines; it generate savings of around 50% for the user (¼ of the cost of a new industrial battery); it reduces industrial waste by 50%.
- 3 patents secured.
- Partnerships with players like Volvo and Airbus.

HOLIS: SUSTAINABLE PRODUCT ANALYSIS

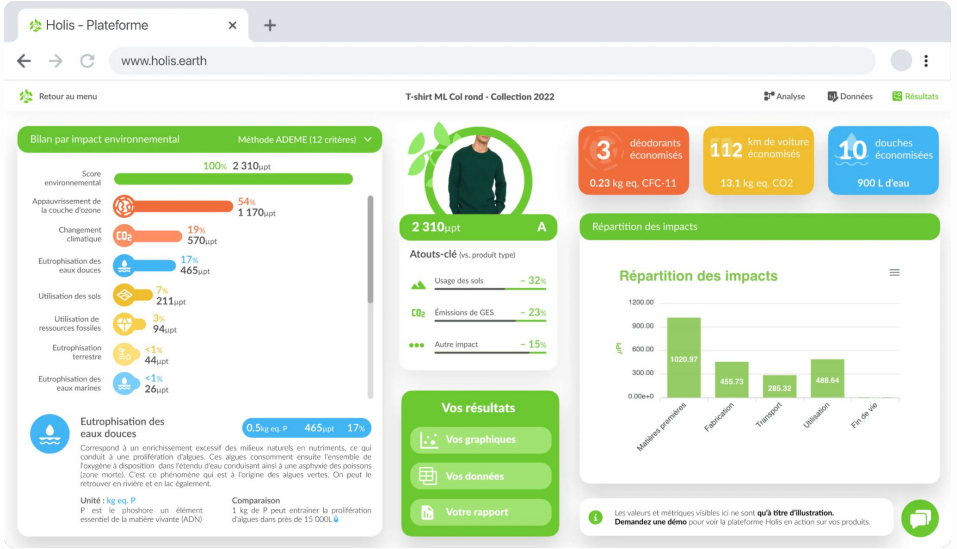
🇫🇷 FRANCE I LAB PARIS-SACLAY & MICROSOFT

📝DESCRIPTION

Holis offers accessible life cycle assessments (LCAs) for sustainable product development, enabling efficient analysis and transparent communication of environmental impacts.

💡INNOVATION

- Graphical interface to measure impacts across the supply chain with customizable detail levels.
- Databases and advanced algorithms to collect and verify supplier data; it Identifies high-impact processes and explore various eco-design scenarios.
- Advanced algorithms automatically detect cost-effective choices for impact reduction.
- QR codes to easily share key environmental information with consumers.



holis

👥NUMBER OF EMPLOYEES: 1-10

EDONIA: NEXT GENERATION PLANT BASED PROTEIN

🇫🇷 FRANCE I LAB PARIS-SACLAY

📝DESCRIPTION

Edonia revolutionizes plant-based protein with its innovative technology, Edonization, transforming nutrient-rich microalgae into a clean, meat-like ingredient for healthier and tastier plant-based products.

💡INNOVATION

- Raw microalgae biomass converted into a flavorful protein ingredient, rich in nutrients.
- Partnerships with micro-algae farmers in Europe for high-quality, food-grade biomas.
- Soft, chewy texture and umami flavor profile without additives or artificial flavoring.

edonia

VIVOO:
AT-HOME TEST STRIPS FOR HEALTH

🇹🇷TURKEY I INVEST IN TURKEY

📝DESCRIPTION

Vivoo offers a wellness platform with focus on personal health monitoring through easy-to-use at-home test strips. These tests measure various health indicators such as hydration, vitamin levels, and more, providing users with immediate results and personalized advice through their mobile app.

💡INNOVATION

- **Vivoo:** at-home urine test strips paired with an app give real-time insights into 9 key body markers.

vivoo

💰FUNDRAISING: 2M$
👥NUMBER OF EMPLOYEES: 51-100

XUND:
DIGITAL HEALTHCARE CHECKER

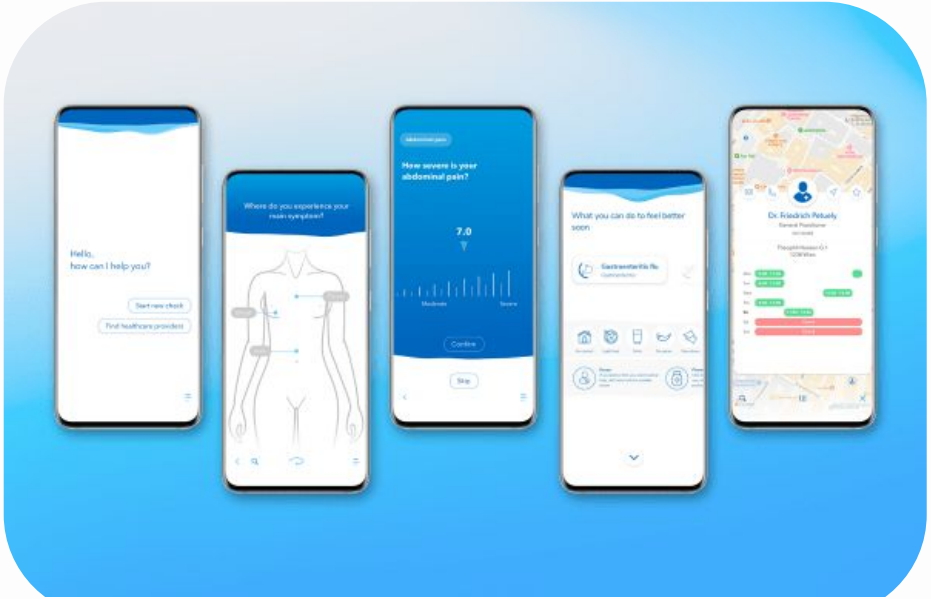
🇦🇹AUSTRIA I FRENCH GERMAN TECH LAB / GERMANY

📝DESCRIPTION

XUND enables healthcare companies to digitize the patient journey and translate unstructured data into actionable information.

💡INNOVATION

- **Symptom & illness Check:** 24/7 symptom check powered by XUND's AI-driven medical knowledge base of 520 conditions and 21,000 symptom variants.



xund

💰**FUNDRAISING: 8M€**
👥**NUMBER OF EMPLOYEES: 51-100**

ZENCEY: HEALTHCARE FACILITY FOR BUSINESS IN AFRICA

🇨🇮IVORY COAST I AFRICATECH LAB

📝DESCRIPTION

Zencey is a healthcare platform that creates software to facilitate patient access to medicines and make them more affordable. It puts patients and doctors in touch via video consultation on their smartphone or tablet, without having to go anywhere.

💡INNOVATION

- **Affordable Healthcare Solutions in Africa:** an accessible and affordable healthcare plan for startups and small businesses.
- Customizable language models and AI solutions tailored for digital health products.
- Comprehensive health coverage prioritizing well-being and financial security.

zencey

💰**FUNDRAISING: 120K$**
👥**NUMBER OF EMPLOYEES: 1-10**

ALTEVAX: BIOTECHNOLOGY COMPANY AGAINST CANCER

🇫🇷FRANCE I CCI Paris Ile-de-France

📝DESCRIPTION

Altevax is a French biotechnology company developing a new immunotherapy against cancer. Their innovative approach uses synthetic melanin as a vector to deliver cancer-specific antigenic peptides. This technique aims to stimulate the skin's biological pathways more precisely, potentially reducing unwanted side effects.

💡INNOVATION

- Altevax is developing an immunotherapy against glioblastoma, currently in advanced pre-clinical development, with Phase 1/2a expected in 2024.
- Altevax's partnership with Assistance Publique Hôpitaux de Paris and other research institutions enables it to leverage their resources and accelerate clinical trials.

AltevAx

💰**FUNDRAISING: 2,4M€**
👥**NUMBER OF EMPLOYEES: 2-10**

KIPSUM: OPTIMIZES ENERGY CONSUMPTION VIA A DIGITAL TWIN AND AI

🇫🇷 FRANCE I CCI Paris Ile-de-France & TotalEnergies

📝DESCRIPTION

Kipsum optimizes energy consumption associated with the heating/cooling needs of buildings and processes via a digital twin and AI.

💡INNOVATION

- **The Kipsum solution** requires collecting data related to the building and its use case to build a thermal, hydraulic, and energy model of the building.

💰FUNDRAISING: 2,4M€
👥NUMBER OF EMPLOYEES: 2-10

AVES REALITY:
AUTOMATE 3D CREATIONS

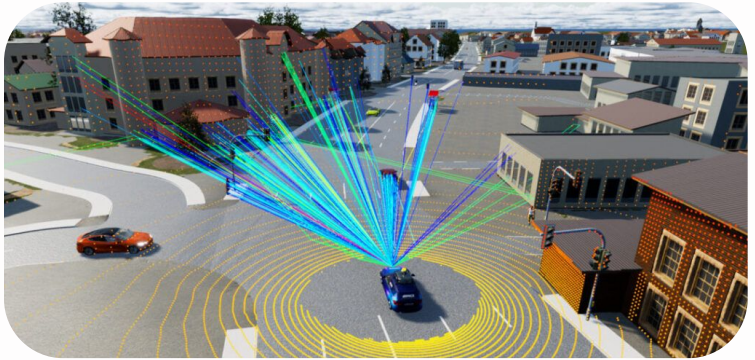
🇩🇪 GERMANY I French German Tech Lab & Software République

📝DESCRIPTION

AVES Reality is an innovative company specializing in the creation of 3D virtual worlds from satellite images. With their cutting-edge technology using artificial intelligence, they can transform any location on Earth into an ultra-realistic virtual environment.

💡INNOVATION

- High-fidelity 3D environments, optimized for usage in game engines and automotive simulation tools
- HD-maps in ASAM OpenDRIVE format, optimized for usage in different automotive simulation tools



💰**FUNDRAISING: 2,4M€**
👥**NUMBER OF EMPLOYEES: 2-10**

GENSE TECHNOLOGIES:
PORTABLE HEALTH SCREENING DEVICES

🇭🇰 HONG-KONG I Hong Kong Trade Development Council

📝DESCRIPTION

Gense Technologies is a medtech startup offering portable health screening device for preventive screening and chronic disease monitoring at home, elderly service, and clinics, specifically for liver, lungs, kidney and more.

💡INNOVATION

- **Mediscan device + belt :** Connect belt to the mediscan device to monitor organ-specific health indexes across the lungs, liver and kidney using the Gense app

gense

💰FUNDRAISING: 3M€
👥NUMBER OF EMPLOYEES: 11-50

WINTICS: AI SMART CAMERA SOLUTIONS FOR MOBILITY

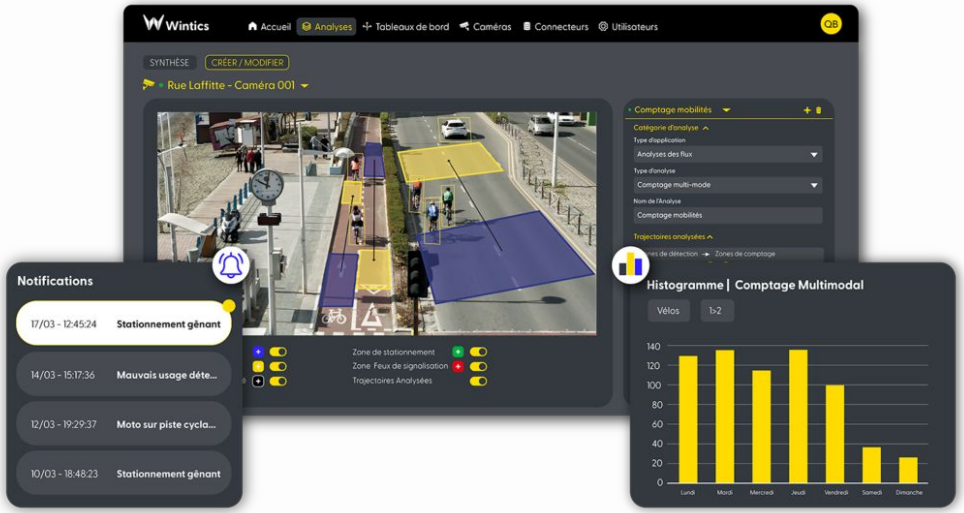
🇫🇷 FRANCE I Métropole du Grand Paris / ADP

📝DESCRIPTION

Wintics develops artificial intelligence solutions to make cities more practical and sustainable. We address 2 themes: mobility and urban planning.

💡INNOVATION

- **Wintics develops Smart Camera,** a software suite that draws on the latest discoveries in Deep Learning, to automate real-time video analyzes on any type of camera.



💰FUNDRAISING: 1M€
👥NUMBER OF EMPLOYEES: 11-50

TECHNOCARBON:
CARBON-NEUTRAL COMPOSITE MATERIAL

🇫🇷FRANCE I Métropole du Grand Paris

📝DESCRIPTION

TechnoCarbon develops and manufactures new alternative materials to carbon-intensive materials.

💡INNOVATION

- **CarbonFibreStone:** an almost carbon-neutral composite material whose use would reduce CO2 emissions by one million tonnes per year by 2030.

TECHNOCARBON
BUILDING THE FUTURE

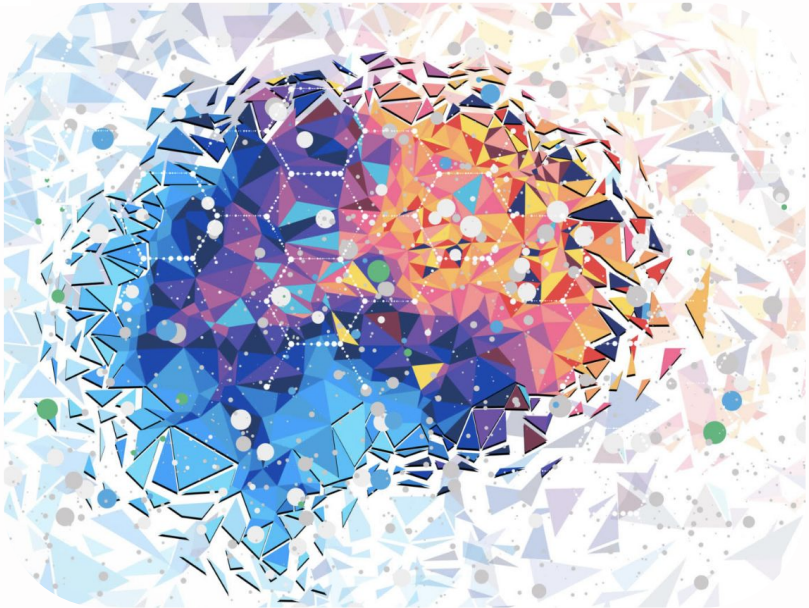
💰**FUNDRAISING: 1,6M€**
👥**NUMBER OF EMPLOYEES: 1-10**

QPMIND: BIOLOGICAL MODELING THROUGH AI AND QUANTITATIVE SYSTEMS

🇳🇱 NETHERLANDS I Netherlands

📝DESCRIPTION

QMind is a biotech company to apply the combination of AI with Quantitative Systems Pharmacology (QSP).
QPMind has a lead in Alzheimer's disease complemented by a small pipeline of other targets and diseases, among which chronic pain.



💡INNOVATION

- A sophisticated method of biological modeling, to drive the drug discovery process de novo with a platform approach for central nervous system (CNS) diseases.

QPMind

💰**FUNDRAISING: 1,6M€**
👥**NUMBER OF EMPLOYEES: 1-10**

BRAINBOXAI: DECARBONIZE BUILDINGS WITH AI

🇨🇦 CANADA I Orange

📝DESCRIPTION

BrainBox AI utilizes cloud-based computing, algorithms, and a proprietary process to create an autonomous building technology.

💡INNOVATION

- **Green House Gas Protocol:** BrainBox AI generates a full scope 1 and 2, audit-grade GHG assessment fueled by data and trusted emission factors to identify where to improve.
- **AI Heating, Ventilation, and Air Conditioning:** optimized solutions connected to HVAC system.
- **Access to vetted carbon offsets:** it helps cut through the noise of carbon markets by facilitating the purchase of carbon offsets that fund recognized green initiatives such as carbon capture technology, nature-based solutions, and renewable energy projects.

BRAINBOX AI

💰**FUNDRAISING: 75M€**
👥**NUMBER OF EMPLOYEES: 101-250**

MAGENTINE HEALTHCARE: DIGITIZING ALL STAGES OF MEDICAL DIAGNOSIS

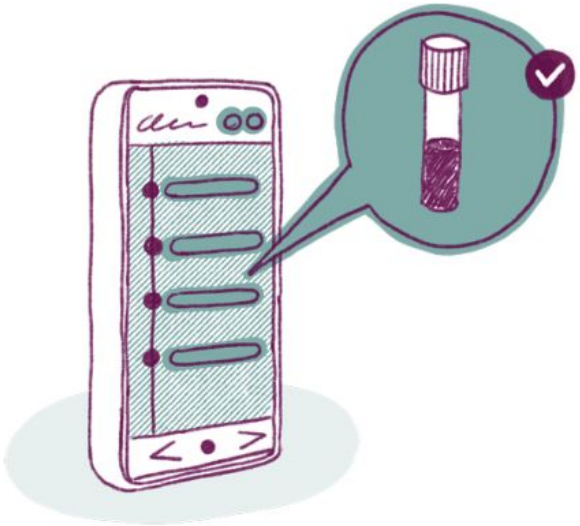
🇫🇷FRANCE I RÉGION OCCITANIE

📝DESCRIPTION

Magentine Healthcare offers tools for digitizing all stages of medical diagnosis, from patient intake to results delivery. It develops connectivity and interoperability solutions to enable the transmission of clinical information between IVD devices and healthcare information systems.

💡INNOVATION

- **Support** to register patients or their relatives, set their contact and result return modes, fill in their management information, their medical and pre-analytical information.
- **Test follow-up** to manage and edit patient records, track the routing of samples to the laboratory, and monitor incubation times for rapid diagnostic tests.
- **AI Companion** helps patients to understand their results via an explanatory video.



M - H MAGENTINE HEALTHCARE

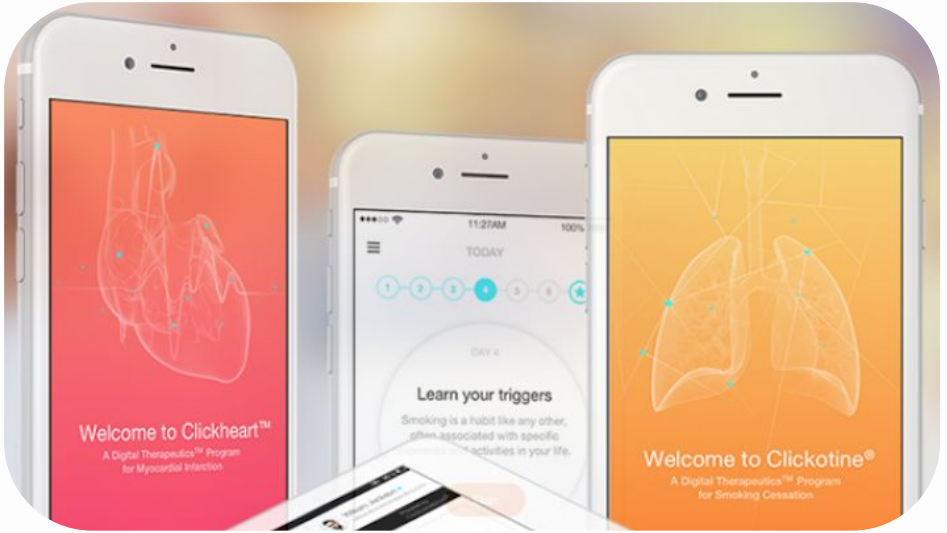
💰FUNDRAISING: N/A
👥NUMBER OF EMPLOYEES: 11-50

CLICK THERAPEUTICS: SOFTWARE AS MEDICAL TREATMENT

🇫🇷FRANCE I Région Occitanie

📝DESCRIPTION

Click Therapeutics is a pioneering company in the digital therapeutics space, focused on developing software applications that treat various medical conditions. Leveraging mobile technology, these therapeutics offer an engaging and personalized treatment experience directly on a user's phone.



💡INNOVATION

- **Clickotine®:** a comprehensive digital smoking cessation program.
- **Digital Therapeutics** for Major Depressive Disorder (MDD), schizophrenia, insomnia, and acute coronary.

Click Therapeutics

💰**FUNDRAISING: N/A**
👥**NUMBER OF EMPLOYEES: 11-50**

AIRBUS: THE FUTURE OF AIR MOBILITY WITH AI AND HYDROGEN

🇫🇷FRANCE I LAB: AIRBUS

📝DESCRIPTION

Airbus is a manufacturer of aircraft products Airbus works on cybersecurity, intelligence, secure communications, secure land communications, Airbus protect, Airbus Aircraft & services, Airbus Corporate Jets, Airbus Corporate Helicopters, Acubed, Airbus Ventures.

💡INNOVATION

- **Electric vehicle boosted with AI.**
- **ZEROe & Flying taxis:** hydrogen airplane.
- **eVTOL:** pilot simulator.
- **Metaverse pilot cabin experience.**
- **Spatial cabin module exploration:** direct catch of carbone technology, satellite pictures.

AIRBUS

💰FUNDRAISING: N/A
👥NUMBER OF EMPLOYEES: +10000

FACEHEART CORPORATION:
AI-DRIVEN VITAL SIGNS VIDEO TRACKER

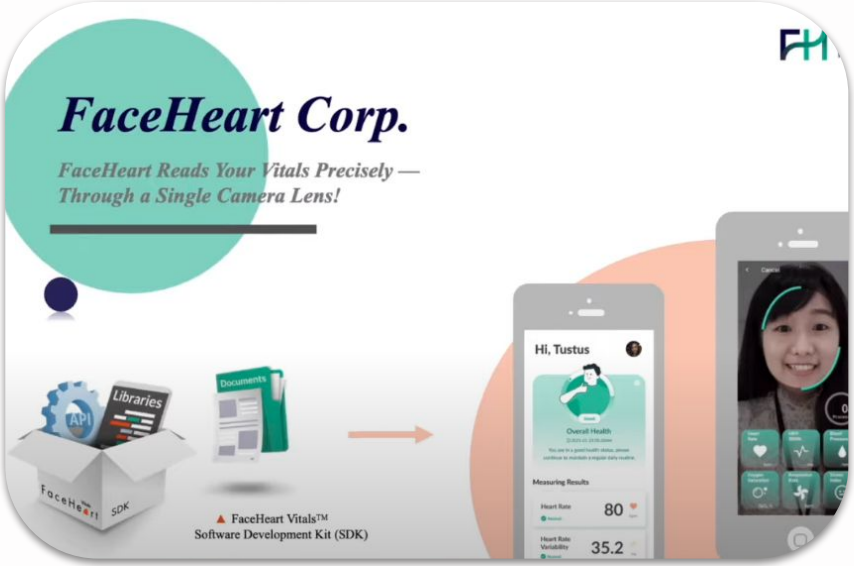
🇹🇼TAÏWAN I LAB: TAÏWAN

📝DESCRIPTION

FaceHeart Corporation provides AI software of video-based vital sign measurements for different fields of action (smarthome, mobile health, sports tech, employee wellness).

💡INNOVATION

- **FH Vital SDK** provides application developers with a series of software modules, allowing them to easily incorporate FaceHeart's contactless vital signs measurement solution into their desired applications. Key features: contactless measurement; measuring in 40-60 seconds; single video camera; no internet needed.
- **FaceHeart integration:** can easily integrate into a wide variety of devices.



鉅怡智慧 FaceHeart

💰**FUNDRAISING: N/A**
👥**NUMBER OF EMPLOYEES:**

VOLOCOPTER : FLYING MOBILITY ECOSYSTEM

🇩🇪GERMANY I LAB: ADP

📝DESCRIPTION

Volocopter is an urban air mobility company that develops eco-friendly air taxis to transport people.

💡INNOVATION

- **Volocity:** It is an air taxi that avoids urban streets and flies silently and without emissions in the lower airspace.
- **Voloregion:** the extension of Volocity for longer trajects.
- **Volodrone:** an heavy-lift solution.
- **Voloport:** boarding and disembarking points.
- **VoloIQ** is the digital interface that manage all the flying ecosystem.
