Digital Manager

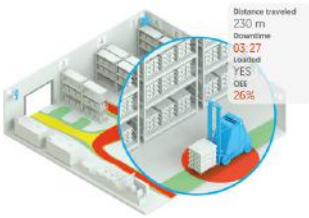

**10%**  
increase  
in productivity

**15%**  
reduction  
in WIP

  
Increase in  
operator safety

## Utilize

YOUR TECHNOLOGY EFFICIENTLY.

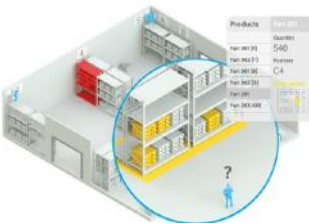

### OEE and the utilization of logistics paths

- Obtain an overview of the utilization of monitored objects.
- Make your planning and identification of downtimes and bottlenecks in production and logistics processes more cost-effective.

## Know where

YOUR MATERIAL IS. PRONTO.

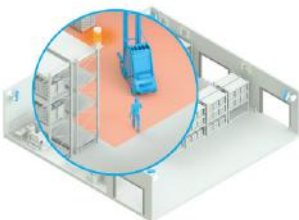

### Material tracking – WIP

- Get a fully automated overview of the consumption and state of warehouse stocks and the online status of the material.
- Reduce the time to look for material and save time as well as human effort by removing the necessity to scan codes.

## Is safety

AN ISSUE?

### Keep your employees and technology safe

- Increase the safety of employees and of logistics technology by monitoring the safety parameters.
- Secure the automatic time monitoring in working and virtual zones.
- Get a system alarm in the form of notifications in the event of an actual conflict situation.
