

HOLY CITY STRAW COMPANY

2023-24 BUSINESS CATALOG

THE PROBLEM

There is a shortage of truly sustainable and/or consumer satisfying straws on the market today.

The majority of businesses are using straws that are bad for the environment or have a low consumer satisfaction rating.

Plastic straw - Environmentally damaging but cheap.

Bioplastic Straw - Majority of these are only industrial compostable not home compostable. Most consumers will toss them in the trash making them no better than a plastic straw.

Paper Straw - Energy intensive, most of the time not recyclable or compostable. Extremely poor satisfaction rating.

ABOUT OUR COMPANY

OUR SOLUTION

Our line of **ONE** ingredient drinking straws are the only non-manufactured, home compostable, 100% biodegradable, and 100% bio-based straws on the market today. Mother Earth is our machine.

Our straws require minimal carbon usage during the beginning and end-of-life cycle. They come straight from nature and, when disposed, will naturally return to the Earth all while eliminating downstream waste!

WHEAT

REED

EARTH STRAW 101

FARM TO GLASS

Enjoy our straws straight from the wheat reed farms to your glass. Straws are cut to length, sorted, washed with salt water and uv sterilization methods to remove any bacteria and pathogens, and finally baked before packaged for shipment.

WASTE RE-IMAGINED

Wheat straws are made from reclaimed material left over after grain harvesting, with the leftover stems turning into our straws! This left over material would normally be burned, used as mulch or livestock feed. It completely sustainable and renewable during each harvest.

ZERO MANUFACTURING

Unlike many straws on the market today, our straws require no additional resources to produce or compost, dramatically reducing the pollution footprint on the environment. Mother Earth herself is our machine! No dyes, glues, waxes, or polymers necessary.

SUSTAINABLE AND RENEWABLE

Sustainable growing patterns of wheat (harvested biannually) and reed (harvested annually) minimizes unnecessary resource consumption.

ADAPTIVE REUSE

Reed straws are durable straws that can be re-used over and over which serves to amplify the positive impact on the planet and our resources.

OUR PORTFOLIO

The Premium WHEAT Straw

One-Ingredient - No Chemicals
99% - USDA Bio-Based - 100%
No Downstream Waste
Certified Compostable
Made by Mother Earth

"Save the Turtles!"

"The Straw that saved the Camel's back."

WHAT OUR CLIENTS ARE SAYING

WOW!

"These straws are great. As an Event Planner always planning weddings and parties these straws are amazing. Guests tend to complain about the paper straws that they get mushy and don't last— this solves that problem and great for the environment!"

FUTURE OF STRAWS!

"We tested these out several times and left them in liquid for hours. They never got soggy like paper straws do and they are also flexible. Owning a bartending company, we go through a lot of straws at each event. The Holy City Straws are a guilt-free way to use straws without hurting the environment. They are a great company to work with and I have already recommended them to several friends. Thanks again :)"

AWSTRAWK

"These are exactly what I've been looking for for my mobile cocktail company. It's easier to keep track of plastic straws in a brick and mortar setting and dispose appropriately; if there's such a thing... but when you're in a field in Maine, and a straw made of straw ends up in the field, it's just going home after a long vacay and heroic job. I dig em!"

WHEAT STRAW!

"I tested the straws in both a hot and cold beverage, and I can honestly say the straw never got soggy in neither drink. If you're looking for a straw to use for your margarita or coffee this straw works great!"

FORGET PAPER STRAWS!

"I must say I'm pretty impressed by these straws. I like the fact I don't have to switch straws to finish my drink nor do I get bits of paper in my drink! HolyCity Wheat straws are great!"

GREAT STRAW AND FAST SHIPPING! GREAT EXPERIENCE!

"These straws are not only an ideal alternative to plastic straws, but should become the new normal. As a natural straw, they are the perfect traditional size and never get soggy. Great straw!"

Thanks for your consideration.
We look forward to the possibility of working together!
 Cheers!
