Various Models

Customization Possibilities

Moving Your Innovations Forward

The Move AGV is an advanced solution for seamless, automated transport of goods with precision and speed. Its compact design ensures smooth maneuverability in confined spaces without the need for counterweights.

With a modular structure, it can be easily adapted to specific operational needs, optimizing efficiency in warehouse and production environments.

VDA5050 Compatible

VDA5050 is an open standard for communication between autonomous robots and control systems. The standard ensures that robots from different manufacturers can be seamlessly integrated with central control systems.

All WEWO AGVs are fully compatible with the VDA5050.

AGV Applications

AGV Pallet
Handling

AGV Product
Handling

AGV Cart
Handling

AGV Roll &
Bulk Handling

AGV Assembly
Automation

AGV Machine
Cell Loading

Technical Specifications

Performance

Max. Lifting Height	50 mm
Max. Lifting Weight	800 kg
Max. Speed	1.6 m/s

Dimensions

1,400 x 600 x 210 mm (L x W x H)

Specifications

Navigation Method	Natural Navigation - Bottom
Lift System	Closed Lift System
Battery	Lithium-Ion
Certification	CE Standard
Powder Coating	RAL7016, RAL1007

Load Carrier Types

Compatible load carriers and handling configurations.

Boxes
Plastic / Wood / Metal

Pallet Boxes
Plastic / Wood / Metal

Pallet Cages
Plastic / Wood / Metal

i Other types of carriers? Inquiry to supplier.

i NB: The vehicle is not limited by plastic wrap on the pallet's foot.

Fleet Management & WMS Application

The Software

The Fleet Management Software & MES provides all the essential tools to efficiently manage warehouse and production environments. It seamlessly controls multiple AGVs within the same space, optimizing workflow and minimizing disruption.

For businesses without an existing warehouse management system, the WEWO WMS application offers a complete solution. Designed to integrate seamlessly with the Fleet Management Software, this system enables full control over inventory and logistics.

Task Management

Assign, monitor, and prioritize tasks effortlessly.

Comprehensive Product Tracking

Monitors product positions and data in real time.

Alarm & Traffic Management

Prevent bottlenecks and ensure smooth operation.

Seamless Integration

Connects with production lines, machines, and delivery stations.

Deadlock Prevention

Optimize vehicle paths for continuous flow.

User Role Management

Ensures secure and efficient system access based on defined permissions.

System Integration

Connects seamlessly with MES, ERP, and other enterprise systems.

Navigation Method

Precision Laser Navigation

The Move utilizes natural navigation through safety scanners positioned at ground level. By referencing structures and contours in the environment, it determines its location without the need for complex infrastructure such as inductive wires, magnets, or reflectors. Simple reflectors can be incorporated where needed, providing flexibility in setup.

This method ensures efficient operation without the need for extensive setup or constant adjustments.

Key Advantages

Highly Accurate Positioning

Advanced laser scanning provides precise location tracking.

Long-Range Detection

The scanner covers a wide area, ensuring efficient navigation.

Reliable in Dynamic Environments

Detects across flexible objects.

Enhanced Stability

Dead reckoning technology further refines positioning for consistent movement.

Energy Management

Charging System

The AGVs feature automatic charging, eliminating the need for manual intervention. When the battery reaches a minimum level, the AGV completes its current task and automatically navigates to an available charging station.

With this intelligent charging system, the AGVs remain operational with minimal interruptions, ensuring maximum efficiency in warehouse and production environments.

Key Advantages

Seamless Integration

AGVs recharge without disrupting operations.

Automated Docking

The integrated power collector ensures precise contact with the charging station.

Programmable Charging Levels

Adjust battery thresholds to optimize uptime and efficiency.

Minimal Downtime

Once charged, the AGV automatically resumes its next task.

Safety in the Overview by:

APN Connection

ISO 27001 Certified Data Centers

Encryption According to Highest Standards

Safety & Scanners

The AGVs are equipped with advanced safety systems designed to protect employees, infrastructure, and the robots themselves.

They comply with international standards such as ISO 3691-4 and EN1525.
