

PRODUCT QUICK GUIDE
**E&E AND PARKING
GUIDANCE SYSTEM**

January-June 2023

HIKVISION[®]

E&E and Parking Guidance System

- 003** Entrance & Exit Management System
- 012** Video Parking Guidance System
- 017** On-Street Parking Management System

E&E and Parking Guidance System

At entrances and exits, Hikvision's ANPR Cameras automatically recognize a vehicle's plate number and display it on the control center screen. The Authorized List function with barrier integration enables quick and fluid passing of registered vehicles, preventing congestion at entrances and exits and improving traffic efficiency. The Parking Guidance System combines deep learning algorithms, video monitoring, and information dissemination technologies to give drivers dynamic, real-time information about parking availability within controlled bays. The system helps drivers find the closest parking spaces available. Then, by simply entering their plate number in full or in part, the vehicle can be easily located on the floor map as well as the best route to it.

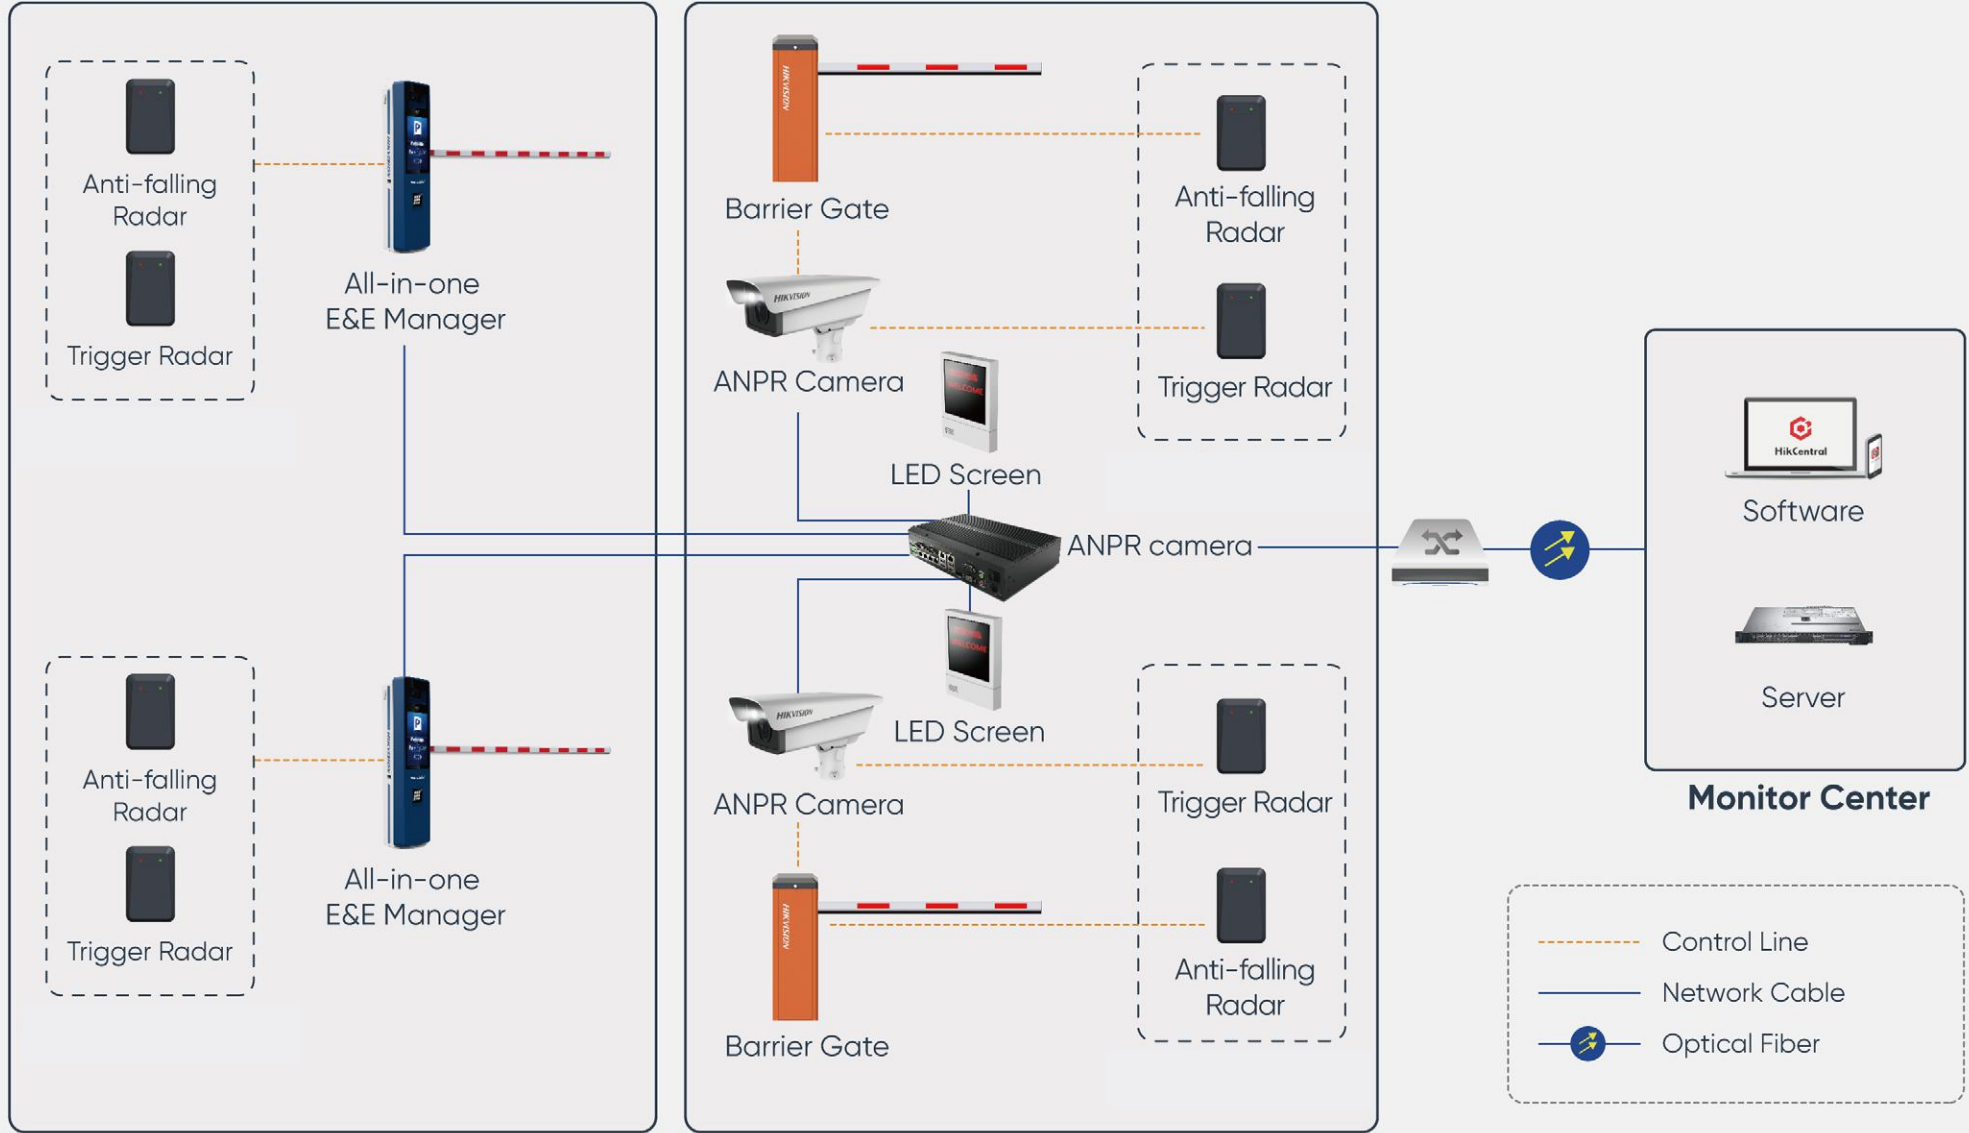

E&E and Parking Guidance System

Entrance & Exit Management System

Hikvision's E&E Cameras automatically recognize a vehicle's plate number and display it on the Control Center screen. The Authorized List function with barrier integration enables fluid and quick entering and exiting of registered vehicles and can be modified easily according to requirements.

- > Embedded ANPR with AI
- > Anti-glare, high-quality images at night in spite of high beam headlights
- > Open protocol for integration
- > Easier installation
- > Robust design – Free from environmental influences including light, dust, rain and snow
- > Safety sensor radar ensures the barrier remains open when a passageway is not clear

Entrance & Exit Video Unit

Memory	Memory: 4 GB	Memory: 4 GB
Storage	HDD: 2 T / 4 T	HDD: 2 T
Working Temperature	-10 °C to +70 °C (14 °F to 158 °F)	-20 °C to +70 °C (-4 °F to 158 °F)

Entrance & Exit LED Display

Model	DS-TVL224-4-5Y
Image	
Working Voltage	220 VAC±10%, 50 Hz 110 VAC±10%, 60 Hz
LED Brightness	1200 cd
LED Angle	110°
Frame Material	Iron Frame Spraying Plastic (Dark armored glass for display part)
Installation Method	Hoop on the back
Speaker Specification	4Q10W
Protection Grade	IP65
Dot Pitch	P4.75
Fundamental Color	1 Red 1 Green
Downward Communication Methods	RJ45/RS485
Display Method	Instant, Left Shift, Up Forward, etc.
Character Display	GB2312 Character Set, 16 × 16 Lattice Chinese Characters
485 Communication Rate	RS485: 57600 bps
Communication Distance	RS485: 1200 m, RJ45: 120 m
Power Consumption	Max 50 W, Average 30 W
Display Size	304 mm (Width) × 304 mm (Height)
Dimension	364 × 484 × 60 mm (14.33 × 19.06 × 2.36 inch)

E&E and Parking Guidance System

Video Parking Guidance System

The Video Parking Guidance Solution combines deep learning algorithms, video monitoring, and information dissemination technologies to give drivers dynamic, real-time information about parking availability within controlled bays. The system helps drivers find the closest parking spaces available. Safety and security are enhanced in large parking garages. In parking guidance camera system, by simply entering their plate number in full or in part, the vehicle can be easily located on the floor map as well as the shortest and best route to it.

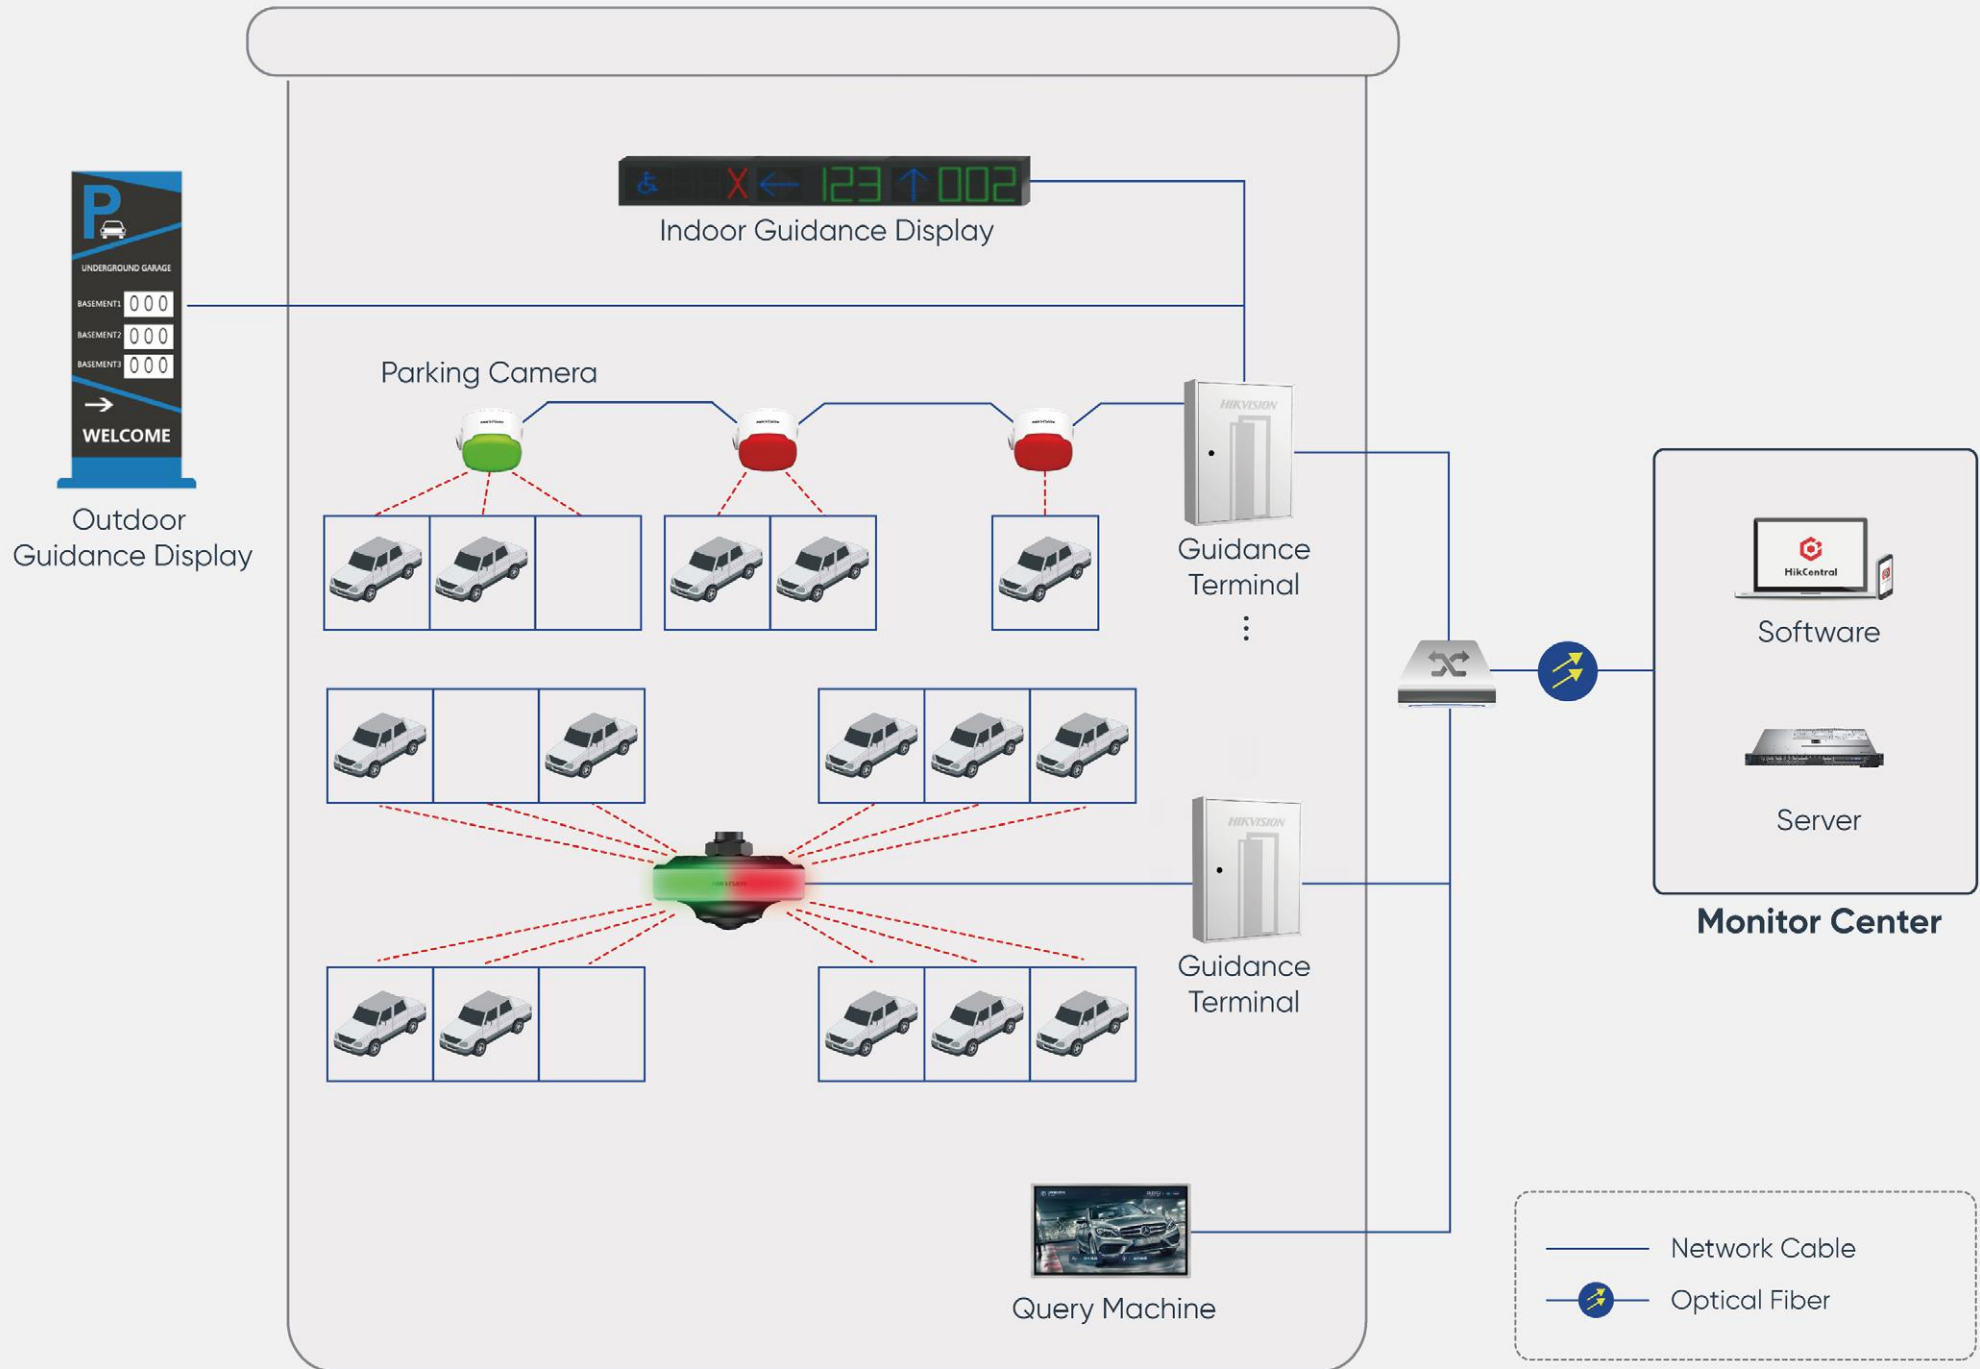

- › The indicator light inside the parking guidance camera has seven configurable colors, allowing for dynamic indication of the purpose of the parking bay
- › Up to 24-TB edge storage for video and images
- › Video, images and data can be stored locally offline if disconnected from central management software, preventing loss of critical information, then automatically forwarded to the CMS upon reconnection
- › By integrating an LED display panel at the entrance, all available parking resources and information can be easily displayed for customers
- › Hand-by-hand cascaded connection for both power and network

Parking Guidance Camera System

- › Embedded parking spaces detection & ANPR with AI

Parking Fisheye Camera System

- › Embedded parking spaces detection with AI

E&E and Parking Guidance System

On-Street Parking Management System

The On-Street Parking Management System detects parking space status, recognizes vehicles, and records the complete process of vehicles parking in the form of images and video. It supports ANPR and H.265 compression. Moreover, they enable intelligent event detection and data collection, which are widely used in urban roadside and outside parking space detection.

- > Intelligent 8/4/2MP on-street COMS camera
- > Captures and recognizes parking vehicles via ANPR
- > Supports maximum 128GB TF card
- > Supports Automatic Network Replenishment (ANR)
- > Supports parking spaces status detection
