

HEMPX

SYMPOSIUM

ROOTED ON EARTH,
BLOOMING IN ORBIT
2026

A REGENERATIVE INFRASTRUCTURE
SYMPOSIUM

NEW YORK CITY | EARTH WEEK

What is
HEMPX
SYMPOSIUM
2026

What is HEMPX?

HEMPX is a curated regenerative infrastructure symposium examining industrial hemp as a measurable, carbon-accountable bio-material system.

Designed as a systems case study, HempX bridges agronomy, materials science, measurement integrity, and industrial integration into a disciplined content arc.

- ✦ Measurability over speculation
- ✦ Infrastructure over advocacy
- ✦ Institutional legitimacy navigated professionally and free of hype.

HEMPX

SYMPOSIUM

Institutional Positioning Statement

HempX is not a trade exhibition.

It is not a policy rally.

It is not a speculative futurism forum.

HempX is a structured
regenerative infrastructure
symposium.

- ✦ Genetic development
- ✦ Field-level agronomic validation
 - ✦ Analytical verification
 - ✦ Lifecycle accounting
- ✦ Industrial deployment under constraint

All claims must be grounded in data.

All performance must be measurable.

All integration must be technically defensible.

HEMPX

SYMPOSIUM

Rooted on Earth, Blooming in Orbit.

WHAT YOU WILL GAIN

From Soil to Orbit — Applied Systems Intelligence

1. Systems-Level Clarity

Unify regenerative agriculture, built materials, and closed-loop systems into a cohesive framework.

2. Infrastructure Convergence Insight

See how biological systems, material science, and emerging technologies converge into scalable solutions.

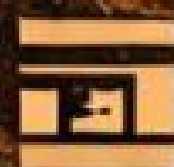

3. Space-Agriculture Readiness

Learn how hemp can lay the groundwork for sustainable off-world habitats.

4. Strategic Collaboration Access

Connect with scientists, architects, XR developers, and policy advocates leading multi-disciplinary efforts.

5. Applied, Not Theoretical

Walk away with models, diagrams, and implementation pathways — not just ideas.

6. A New Design Language

Reframe hemp as a systems substrate for resilient cities and interplanetary expansion.

HempX is where regenerative intelligence meets planetary design.

TABLE OF CONTENTS

ACT I – DEFINING THE SYSTEMS QUESTION

- Michael Kamp
 - Alejandro Otero
-

ACT II – BIOLOGICAL FOUNDATIONS

- Teja Sri Vengala
 - Meredith “MJ” Clay
 - Scott McStacy
-

ACT III – MEASUREMENT & MATERIAL VALIDATION

- Evan Friedmann
 - Silvio Bronomelli
-

ACT IV – INDUSTRIAL SUPPLY & DEPLOYMENT

- Milan Ludovico
 - Ken Meyer
 - Scott McStacy
-

ACT V – SYSTEMS UNDER CONSTRAINT

- Paul J. von Hartmann
 - Davi Souza
-

ACT VI – GOVERNANCE, CULTURE & ETHICS

- Tim Blake
 - Lelehnia DuBois
-

- Featured Speakers
- Institutional & Technical Support Ecosystem
- Symposium Standards & Production Discipline
 - Closing: Beyond the Symposium

ACT I

DEFINING THE SYSTEMS QUESTION

Michael Kamp

Infrastructure Convergence Framework

Alejandro M. Otero

Materials in Long-Term Habitat Design

GET REGISTERED

Featured Speaker

Michael Kamp

CEO | Systems Architect and Strategist
Honeycomb Hydro LLC | Gaia Guild

**"Infrastructure Convergence
Framework"**

**ACT I – DEFINING THE
SYSTEMS QUESTION**

Featured Speaker

Alejandro M. Otero

CEO | Founder | Material Specialist
StarHorizon Takes-U-Places Inc.

**"Materials in Long-Term
Habitat Design"**

**ACT I – DEFINING THE
SYSTEMS QUESTION**

HEMPX

— SYMPOSIUM —

Rooted on Earth, Blooming in Orbit.

April 19, 2026 | Earth Week | New York City

ACT II

BIOLOGICAL FOUNDATIONS

Teja Sri Vengala

Mutation Breeding Strategies
for Industrial Fiber Optimization

Meredith “MJ” Clay

Field Performance & Agronomic Validation

Scott McStacy

Regenerative Substrate Systems for
Constrained Environments

Featured Speaker

Teja Sri Vengala

Lead Plant Scientist | Rare Earth Genomics
Texas A&M AgriLife Research

**"Mutation Breeding Strategies for
Industrial Fiber Optimization"**

ACT II – Biological Foundations

Featured Speaker

Meredith "MJ" Clay

Ph.D. Plant Breeding Student | Texas A&M

Program Cannabis Researcher/Consultant | Rare Earth Genomics

**"Field Performance & Agronomic
Validation"**

ACT II – Biological Foundations

Featured Speaker

Scott McStacy

Regenerative Farmer | Hemp Builder | Educator

Seed to Structure LLC

Support Ecosystem

The grid contains the following logos from top-left to bottom-right:

- HUMBOLDT GRACE**: A circular logo with a stylized leaf.
- STAR HORIZON NEXT 500 YEARS**: A logo with a star and the text 'STAR HORIZON NEXT 500 YEARS'.
- ORO VERDE GREEN GOLD**: A logo with a golden leaf and the text 'ORO VERDE GREEN GOLD'.
- The Emerald Cup**: A logo featuring a green trophy cup with a cannabis leaf on top and the text 'The Emerald Cup'.
- AD SCARVENGERS**: A logo with the letters 'AD' in a stylized font and 'SCARVENGERS' below it.
- SEED TO STRUCTURE**: A logo with a green house shape and a plant growing from it, with the text 'SEED TO STRUCTURE A Hemp Construction Company'.
- GAIA GUILD**: A circular logo with a stylized plant and the text 'GAIA GUILD'.
- W**: A blue circular logo with a white crown-like shape.
- CosmoPlex.**: A logo with a globe and the text 'CosmoPlex.'.
- COMPLETE HEMP PROCESSING**: A logo with the text 'COMPLETE HEMP PROCESSING WINFRED, SD'.
- TEXAS A&M AGRILIFE RESEARCH**: A logo with the text 'TEXAS A&M AGRILIFE RESEARCH'.
- W**: A logo with two stylized, faceted 'W' shapes.
- Edutech Tourism**: A logo with a globe and the text 'Edutech Tourism'.
- RARE EARTH GENOMICS**: A circular logo with a complex geometric design and the text 'RARE EARTH GENOMICS'.
- Welcome to AREA 101**: A logo with a wooden sign and the text 'Welcome to AREA 101'.
- HEMP WALK**: A logo with a white silhouette of a person and the text 'HEMP WALK'.
- Cannabis vs. Climate Change**: A logo with a globe and the text 'Cannabis vs. Climate Change'.

HEMPX

STANDARDS & PRODUCTION DISCIPLINE

Operational Framework for Regenerative Infrastructure Deployment

1

Genetic Validation

- Proven cultivar lineage documentation
- COA-backed cannabinoid and terpene profiles
- Field-trial replication standards

2

Agronomic Protocol

- Soil and substrate control variables
- Climate and photoperiod documentation
- Yield-per-hectare and biomass efficiency metrics

3

Analytical Verification

- Third-party laboratory testing
- Lifecycle assessment (LCA) modeling
- Carbon accounting & material performance analysis

4

Industrial Constraint Modeling

- Building code compliance
- Mechanical and structural load testing
- Cost-per-unit scalability models

5

Data Transparency

- All claims must be measurable
- All performance must be replicable
- All integration must be technically defensible

BEYOND THE SYMPOSIUM

A FLAGSHIP PRODUCTION IN MOTION

- 2026 BUILD PHASE

- National & International Speaking Circuit
- Technical Panels & Policy Engagement
- XR + Regenerative Infrastructure Showcases
- Standards & Production Framework Development

- Integrated Into

Footprints *of* Peace – The Movie

The world's first BLOCKCHAIN-AUTHENTICATED PEACE DOCUMENTARY

INTERMISSION

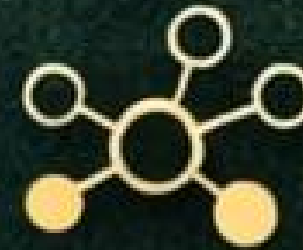

INSTITUTIONAL FEATURE

Limited to Six Organizations

SHOWCASED DURING THE SYSTEMS RESET (INTERMISSION), PLUS:

Digital Program Booklet
Full-Page Feature

Support Ecosystem
Recognition

Social Media
Acknowledgment

PACKAGE: \$1,000

Optional Film Creation: +\$1,000 by Footprints of Peace Motion Identity Lab

Limited to 6 Institutional Placements

- Regenerative Infrastructure Aligned
- Interactive Digital Program Page
- Logo on Support Ecosystem
- Social Media Recognition

Only ~~2~~ Spots Available

Inquiries: Email contact@footprintsofpeace.com
or reach out directly to Michael – 815-861-0420
