# RUBBER TRACKS

COMPACT TRACK LOADER | MULTI-TERRAIN LOADER

MINI EXCAVATOR | MINI TRACK LOADER | CEMENT BUGGY

# RUBBER TRACKS

## SKID LOADER • MINI EXCAVATOR

### C-LUG TREAD PATTERN

HEAVY DUTY "C" SHAPED LUGS PROVIDE GREAT TRACTION, WHILE OFFERING DURRABILITY, STABILITY & A LONG WEAR LIFE. THIS TREAD PATTERN IS BEST FOR USE ON CONSTRUCTION SITES, OR SURFACES SUCH AS CRUSHED ROCK & GRAVEL.

### "Z" TREAD PATTERN

THIS TREAD PATTERN IS OUR MOST AGGRESSIVE, AND WILL OFFER THE BEST TRACTION IN MUD, DIRT & SNOW. THIS IS OUR GO-TO RECOMMENDATION FOR FARM USE, LANDSCAPE & ANYWHERE YOU MIGHT REQUIRE ADDITIONAL TRACTION.

### "NMC" MTL TRACKS (NON-METAL CORE)

THIS TRACK OPTION IS ONLY COMPATIBLE WITH SOME MACHINES FROM CAT, ASV ETC. WITH FAR LESS GROUND PRESSURE COMPARED TO STANDARD CTL TRACKS, THESE TRACKS ARE TYPICALLY USED ON TURF AND OTHER DELICATE USE SCENARIOS.

### MINI RUBBER TRACKS

WE STOCK TRACKS FOR MINI TRACK MACHINES SUCH AS WALK-BEHIND SKID LOADERS, CEMENT BUGGIES, TRENCHERS & LIFTS. COMMON TREAD PATTERNS FOR THESE MACHINES INCLUDE THE BLOCK PATTERN, "S" LUG AND MORE.

# RUBBER TRACKS

## SKID LOADER • MINI EXCAVATOR

## MINI EXCAVATOR TRACKS

WITH HEAVY DUTY “V” SHAPED EXCAVATOR BARS, THESE TRACKS PROVIDE BEST TRACTION AND LONG WEAR ON SMALL & MEDIUM EXCAVATORS.

# HOW DO TRACKS WORK?

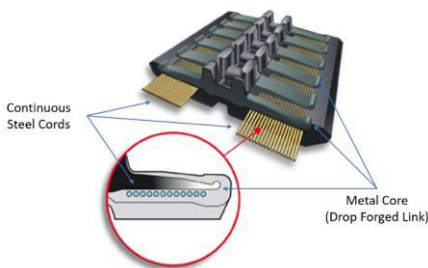

*Rubber Tracks consist of three main components - The links, the steel cords & the rubber tread.*

### *Drop Forged Links*

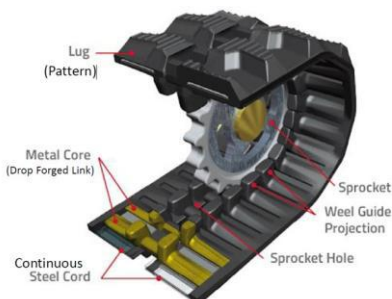

At the heart of our rubber tracks are the metal cores or drop forged links that the sprocket connects with to turn the track. These metal links along with the steel cords make up the bulk of the weight & strength of our tracks.

### *Continuous Steel Cords*

Along with the metal links, there are also steel cords that run the entire length of the track. These cords help stabilize the track, while building to the overall strength.

### *Rubber & Tread*

The steel cords and links are coated in a reinforced rubber compound, which also is where you get the different tread patterns for different uses.

# RUBBER TRACKS

## SKID LOADER • MINI EXCAVATOR

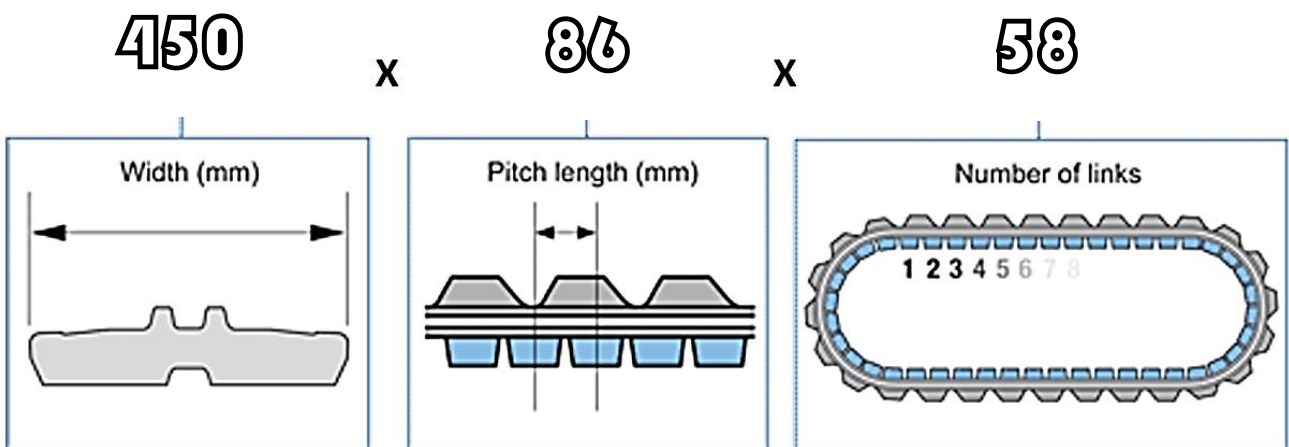

# SIZING RUBBER TRACKS

Rubber tracks are sized using 3 key metrics ...

*These are: Width, Pitch & Number of Links*

- 1) **Width** - shown in millimeters (i.e. 300, 320, 400 or 450 etc.) tracks that are 400mm wide are commonly listed as 16" wide & 450mm tracks are usually listed as 18" wide.
- 2) **Pitch** - also measured in millimeters, this is the distance between the links (i.e. 52.5, 86 etc.)
- 3) **Number of links** - this is a simple count on the total number of links (i.e. 52, 56, 58, 60, 80 etc.)  
The more links there are, the larger the track will be!

An example would be 450x86x58 this means the track is 18" wide, has an 86mm space between the links & has a total of 58 links. This is a common size, and can be found on many machines from Bobcat, CAT, JCB, Kubota, Case, John Deere, Takeuchi & more!

## TRAXTER SSK-03

THE TRAXTER SSK-03 IS ENGINEERED FOR DURABILITY AND PERFORMANCE. WITH ITS DEEP TREAD AND R-4 STYLE DESIGN, IT DELIVERS SUPERIOR TRACTION AND STABILITY ON ANY TERRAIN. PLUS, ITS FLAT-PROOF SOLID CONSTRUCTION ENSURES UNINTERRUPTED OPERATION, WHILE THE APERTURE CUSHIONS PROVIDE A SMOOTH RIDE.

### AVAILABLE SIZES

30x10-16 (10x16.5)
--------------------

## TRAXTER SSK-02

OUR TOUGHEST SKID STEER TIRE YET. BUILT FOR HEAVY-DUTY APPLICATIONS, THIS TIRE SETS THE STANDARD FOR DURABILITY AND STRENGTH. WITH ITS ROBUST CONSTRUCTION AND DEEP TREAD DESIGN, THE SSK-02 DELIVERS UNMATCHED TRACTION AND STABILITY, EVEN IN THE MOST DEMANDING ENVIRONMENTS. THIS SOLID TIRE CAN LAST AS MUCH AS 5 TIMES AS LONG A STANDARD PNUMATIC TIRE.

### AVAILABLE SIZES

33x12-20 (12x16.5)	13.00-24
36.5x12-20 (14x17.5)	14.00-24

## TRAXTER SSK-01

INTRODUCING THE SSK-01: THE GO-TO SKID STEER TIRE FOR SOLID SURFACES. WITH FEWER TREAD BARS, THIS TIRE IS OPTIMIZED FOR USE ON SMOOTH TERRAIN WHERE OFF-ROAD TRACTION ISN'T ESSENTIAL. YOU'RE LOOKING FOR A RELIABLE TIRE THAT EXCELS ON SOLID SURFACES, AND LASTS AN EXTREMELY LONG TIME, LOOK NO FURTHER THAN THE SSK-01

### AVAILABLE SIZES

33X12-20 (12X16.5)

# TRUCK TIRES

DRIVE TIRES • STEER TIRES •  
ALL-POSITION TIRES

Model: CR960 **WEST LAKE**  
TIRES

Class: Long Haul • All-Position

### Description:

- Wider tread spreads load over a larger area, promoting long, even wear in steer and free-rolling wheel position.
- Straight simple rib pattern improves even wearing and efficient water evacuation for excellent wet traction and handling.
- Cross rib sipes slice through water for solid control on wet roads.
- Decoupling tread design suitable for long-distance travel.

# TRUCK TIRES

DRIVE TIRES • STEER TIRES • ALL-POSITION TIRES

Model: CR976A

Class: Long Haul • All-Position

### Description:

- Five ribs with four wide, straight grooves for precise handling and outstanding traction.
- Stone rejector platforms prevent stones from lodging in grooves and drilling into belts.
- Shallower tread depth helps to resist tread squirm and irregular wear forces for exceptionally long mileage.

TIRES

Class: *Mixed Service • All-Position*

### Description:

- 3 circumferential grooves ensure good directional stability, even wear and smooth ride.
- Heavy siping provides good braking stability and high lateral traction on wet and dry surface.
- Improved tread compound helps resist tears and ensure good mileage in on and off-road use.
- Sidewall reinforcing ribs protects against impacts and scuffing.

## TRIDENT TRAXTER TIRES

### SOLID PRESS-ON TRACTION TIRES

- Heavy-duty construction for optimum performance, safety & comfort
- Thick abrasion resistant tread for low rolling resistance
- Highly elastic center for excellent ride
- Tough Base to eliminate slipping & spinning
- Reinforced steel bead construction
- Available in clip/quick fit
- Available in two Non-marking options i.e. grey & off white

### SOLID PRESS-ON SMOOTH TIRES

- Excellent rubber to metal adhesion for low rolling resistance & long service life
- Advanced Natural Rubber compound for low heat build-up
- Suitable for intensive indoor applications
- Option to order Steer Tire sizes in a special 2 layer HD compound for the most demanding applications
- Available in smooth & traction tread
- Available in two Non-marking options i.e. grey & off white

### PNEUMATIC TIRES

- Wear Resistance Tread for long life
- Deep Lug Tread for superior traction
- Wide Square Shoulders for wider footprints
- Tough Side Walls for puncture resistance
- Dual Bead Construction for 12" and above
