

Luma Rooflights

Creating vibrant living spaces to ill**luma**nate your world

- Made to measure
- Slimline contemporary profile
- Excellent energy efficiency
- Secured from the inside for improved security
- High performance self-cleaning glass
- Easy to install

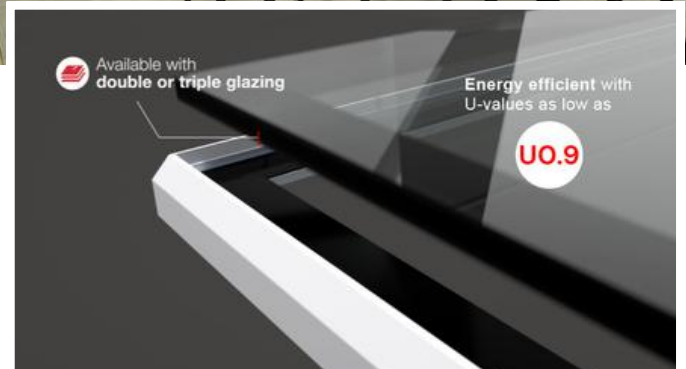

Luma Flat Rooflights

Luma rooflights are elevated, fixed shut, flat roof windows with a sleek and contemporary look. Unlike roof lanterns, there are no bars across the glass to interrupt the view of the sky or cast shadows across the room.

Luma is the only flat rooflight which is fixed from the inside for improved security.

They're the perfect way to flood a home with natural light. So, whether you're planning a new flat roof extension or want to breathe life into an existing room, adding Luma flat rooflights will totally transform the space.

Benefits of Luma Rooflights

- > Rigid slimline aluminium profile – visible framework is minimised and daylight is maximised
- > 2.5° installation pitch – flexible installation options to minimise pooling of water
- > Thermally broken for excellent energy efficiency, U-values from as low as 0.9
- > Slimline modern profile with sleek seamless glazing
- > Secure – the only flat rooflight which is fixed from the inside
- > Integral drainage system - unique drainage system allowing moisture to drain away outside
- > Double or triple glazed options
- > High performance self-cleaning glass
- > Meets 2025 Future Homes Standard Building Regulations
- > 10 year guarantee

Luma - No Compromise on Quality or Performance

Built-in exclusive, market-leading features that come as standard for a premium-quality product that performs excellently.

Eurocell Luma's aluminium frame has an integrated thermal break, which reduces heat transfer. And it's available in double-glazed and triple-glazed options, with U-values of 1.3 W/m²K for double and 0.92 W/m²K for triple-glazed.

So, you'll stay cool in summer, warm in winter and save money on energy bills.

> Tinted laminated glass options

Luma is available with either neutral or blue tinted glass. Tinted glass still allows the light to flood in but reduces uncomfortable glare when the sun hits the glass.

> High performance self-cleaning glass

Luma features self-cleaning glass. It has a special coating that uses UV rays to break down organic matter on the surface, which then washes away when it rains. So, the glass stays cleaner for longer, and the need for regular washing is significantly reduced.

> Integral drainage system

The outer frame includes a unique drainage system that allows moisture to drain away outside for added reassurance.

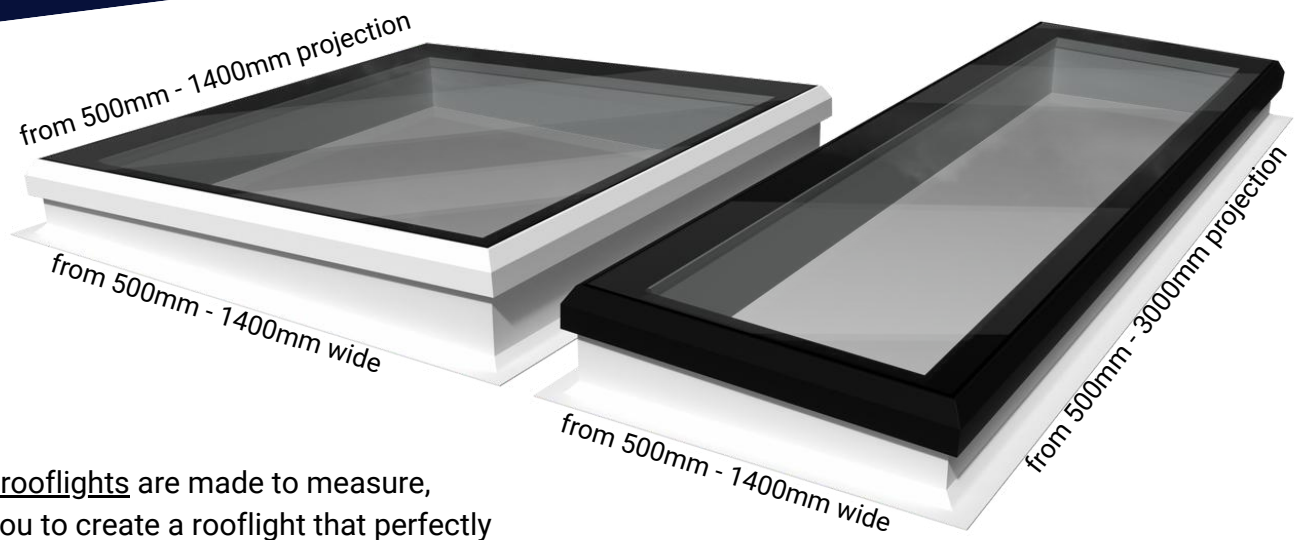

> Secured from the inside

The only flat rooflight which is fixed from the inside for added security.

> Slimline modern profile with sleek seamless glazing

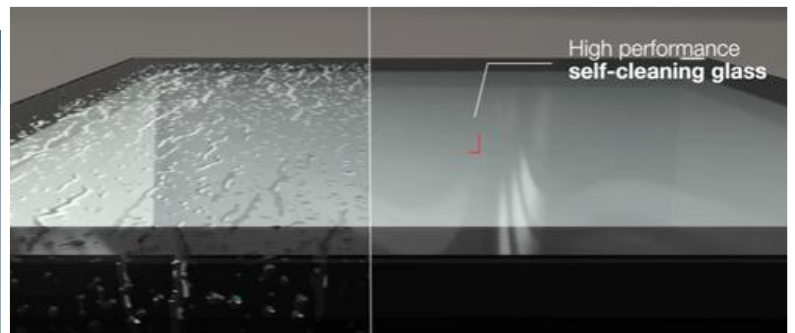

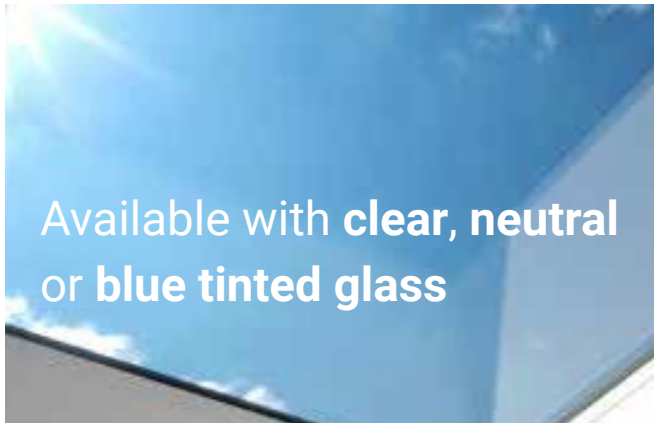

Luma's sleek aluminium frame and unique glazing tape mean there are no chunky frames or painted borders. And there are no bars across the glass to impede your view either. The inside is beautifully finished with a PVC plasterboard trim. The result is minimal framework and maximum daylight.

Luma flat rooflights are made to measure, allowing you to create a rooflight that perfectly fits your space and style.

Luma rooflights are ideal for a variety of projects, such as existing or new flat roof extensions, garage conversions, new builds or garden rooms. For a standout feature in larger spaces add two or more.

Frame Colours

Weather-resistant powder-coated frame

Luma is built to withstand everything the British weather can throw at it. Its aluminium frame is powder coated for durability and has a UV resistant, weather-tight seal.
