The Nordic Selection

Ergonomic Dental
Instruments from Denmark

ErgoDenta™

From Denmark to dental clinics worldwide

ErgoDenta was founded with one clear purpose: to make daily clinical work easier with instruments designed for comfort, control, and reliability.

Designed in Denmark, our instruments are developed with a strong focus on ergonomics and everyday usability. We pay attention to the details that matter in practice — from grip and balance to finish and handling — so clinicians can work with greater comfort throughout the day.

In a short time, ErgoDenta has grown into a trusted partner for distributors and dental professionals across more than 25 countries. While our reach continues to grow, our approach remains the same: practical solutions, personal support, and instruments made with care.

Whether our products are used locally or internationally, the goal is always the same— to deliver dependable instruments that support better daily work.

4

Pillars of ErgoDenta

ErgoDenta is built on four key principles that shape our products and define the way we work.

Why we do it

We believe small improvements make a big difference. By focusing on ergonomics, balance, and consistent quality, ErgoDenta develops instruments that support clinicians in their daily work and long clinical hours.

Where we are going

Our vision is a dental workplace where instruments support the clinician, not strain them — with thoughtful design, consistent quality, and solutions that make dentistry more sustainable over a career.

Ergonomic Focus

Our instruments are developed to reduce hand fatigue and improve tactile control. Better comfort allows clinicians to work longer with greater precision throughout the day.

Global Compliance

Our products follow international regulatory requirements and include full documentation and traceability for clinics and partners.

Innovative Solutions

We create practical solutions for daily dentistry — from longer-lasting sharpness to replaceable tip systems that reduce waste and extend instrument life.

Danish Design

Designed in Denmark with focus on balance, precision, and everyday clinical use. Every instrument is developed with attention to detail, finish, and consistent quality.

In 2025, ErgoDenta was introduced for the first time at IDS Cologne.

We arrived with a complete range — more than 2,500 instruments ready for the market. Visitors could pick up the instruments, feel the grip, and see the ergonomic design in real life.

Distributors showed strong interest and quickly recognized the potential of a new brand offering a full portfolio from day one. IDS became the starting point of our international journey.

FROM IDS

After IDS, the cooperation began.

Our partners started presenting the instruments in their local markets and introducing the range to their customers. Step by step, the instruments moved from the exhibition booth into everyday use around the world.

Today, ErgoDenta is present in many countries, and the network continues to grow through long-term partnerships. What started in Cologne now continues worldwide.

Sticking

Hygienic
and Easy

Available in Gold,
Black, Blue

Choose your ErgoSlip

Black

A low-glare black titanium coating that enhances contrast and visibility in the operative field. Delivers strong non-stick properties and is especially useful in deep cavities or aesthetic zones.

Blue

A durable blue titanium coating that provides reliable non-stick performance with a balanced feel. Ideal for everyday restorative work where smooth material handling and consistency are key.

Gold

A premium gold titanium coating designed to reduce composite sticking during restorative procedures. Offers smooth handling, high wear resistance, and excellent corrosion protection for long-lasting clinical performance.

ErgoSlip

Available in blue, gold, and black coatings with ErgoX®, ErgoX® Plus, and ErgoSteel Plus handles. Each set includes an ErgoTray-1 for secure handling.

Perfect For: Composite placement, restorative procedures, and general dentistry.

Smoother Restorations, Every Time.

Each ErgoSlip comes with an ErgoTray-1.

Choose your ErgoRazor

ErgoRazor® Black

Coated with a sleek black finish to minimize glare and enhance visibility. Ideal for deep periodontal pockets and precision-focused procedures.

ErgoRazor® Gold

Gold-coated for enhanced durability and smooth movement. Its corrosion resistance makes it a premium choice for clinicians who prioritize long-lasting performance.

ErgoRazor®

Made from high-quality stainless steel, this tip offers dependable performance for routine scaling. Trusted for its balance of strength and precision.

The World's First Perio Instruments Delivered in a Protective Tray

Every ErgoRazor® comes with ErgoTray-1 — protecting razor-sharp tips from damage, keeping instruments organized, and making handling and storage safer. Autoclaveable for full sterilization compatibility.

ErgoRazor®

Scalers & Currettes

ErgoRazor instruments deliver up to 3× longer-lasting sharpness for precise and efficient periodontal work.

Available with ErgoX® and ErgoX® Plus handles, in black or gold coating, or a silver finish without coating. Each ErgoRazor is supplied with ErgoTray-1 for safe handling and organized storage.

Upto **3X** longer sharpness

Each ErgoRazor comes with an ErgoTray-1.

“

I have been using instruments from ErgoDenta for some time and am very satisfied with the quality. We are especially pleased with the ErgoRazor series. The instruments offer solid quality at a reasonable price, and I warmly recommend ErgoDenta.

Did you know?

Ergonomic elevators help improve grip and precision during extractions.

Root Tip Elevators

Kopp Elevators

Kopp Elevators offer gentle, precise luxation with slim, sharp tips designed for controlled movement around the tooth.

3.6mm

Upper Roots, Edge Sharp
6024-1

X-Tool Elevators

Extract with Ease

X-Tool Elevators are designed to make luxation smoother and more controlled. The titanium-coated tips reduce friction, improve wear resistance, and support gentle movement around the tooth — helping you work with confidence and less effort during extraction.

Essential instruments for microsurgical procedures

A carefully selected set of essential instruments for delicate surgical procedures, designed to support precise tissue handling, better visibility, and efficient clinical workflow. Supplied in a 20-instrument sterilization cassette with removable lid for easy cleaning and handling.

ErgoDenta

&

NORDIC
DENTAL
ACADEMY

A collaboration between ErgoDenta and Nordic Dental Academy — as their official instrument partner, we co-developed dental instrument kits designed for their clinical training courses and trusted in everyday surgical practice.

Efficient workflow surgical kit

A practical kit built from clinical experience for everyday surgical procedures. The instruments are organized in a sterilization tray and rack, making preparation simple and improving workflow efficiency in busy clinics.

Kits by Dr. **Iman**

Ideal for busy clinics performing everyday surgical procedures.

Developed with

Iman Azarmehr

Specialist in Oral and Maxillofacial Surgery

A compact, well-thought-out kit that covers the instruments you reach for in routine surgery. Easy to organize, easy to sterilize, and ideal for high-flow clinical environments.

For more info visit **Page no 152**

Suture Silicone Training Pad Available

A practical solution for suturing practice and surgical training.

Mini Suture kit

9920

- 3007-4C** Goldman Fox, Curved, 13 cm, Black, Super-cut, TC
- 3209-2S** Fine swedish needle holder, 15 cm TC
- 3801-1G** Micro surgical tweezer, 1-2, 15cm
- 7158 SP** Glickman, 4mm-4mm
- 5664** Scalpal handle No:3
- 5512B** Sterilization cassette 10

A compact kit for everyday suturing and minor procedures. The instruments are organized in a sterilization cassette for easy preparation and efficient handling during treatment.

Sinus-lift kit

9921

- 7212B-SP** Sinus Lift Instrument, 3mm-3mm, Blue
- 7213B-SP** Sinus Lift Instrument, 4mm-4mm, Blue
- 7202B-SP** Currettes #2, 3mm-4mm, Blue
- 7218B-SP** Sinus Lift Instrument, 4mm-4.3mm, Blue
- 7222B-SP** Sinus Lift Mushroom, 2.5mm-3.2mm
- 5511B** Sterilization cassette 5

Set of 5 sinus-lift instruments in blue titanium coating, arranged in a sterilization cassette for organized handling and efficient preparation during sinus-lift procedures.

Pre molars

Using Rubber Dam Clamps Effectively

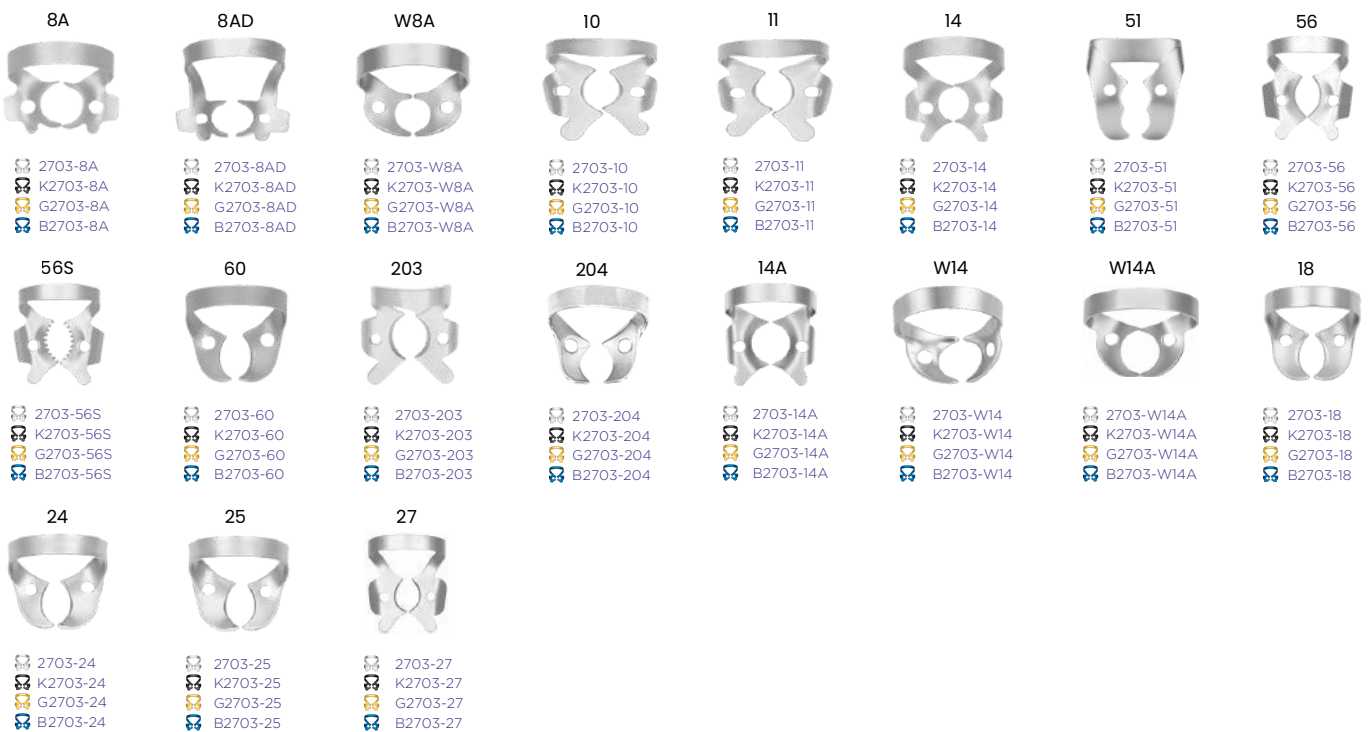

Successful rubber dam isolation depends on selecting and placing the correct clamp for each clinical situation. A properly fitted clamp provides stable tooth isolation, supports moisture control, and helps create a clear, dry working field.

Clamps should always be inspected before use and reprocessed according to standard sterilization protocols. Correct positioning below the tooth's height of contour ensures reliable retention throughout the procedure, while proper adaptation helps avoid unnecessary pressure on gingival tissues.

Choosing the right clamp design and size improves procedural efficiency, enhances visibility, and contributes to patient comfort during restorative and endodontic treatments.
