How Paint May Affect Grass: Please be informed that any paint coating may have adverse effects on grass. Adverse effects will be temporary. Grass will lose its green color and will appear dead. This is due to the fact that the paint coating covers the grass foliage entirely, thus preventing the foliage from getting the much needed energy from the sun and moisture from the atmosphere, in order to sustain its green color. This damage to grass is not permanent, since the roots are not affected. Grass will grow back to its green color as new growth appears.

WARNING: ASI advises that football protective equipment is designed to help reduce the possibility of head concussion or injury to the specific body part which they cover. Use of any equipment does not prevent concussions and the user is not protected from serious, disabling or permanent injury while playing football.

WARNING: ASI advises that sliding into a baseball base represents a clear and present danger. Injuries may occur.
