Cyber Shield
Advanced Cybersecurity Add-On

Why We Created Cyber Shield

Cyber threats today don't target large companies — they target everyone. Most attacks begin with one click in an inbox, one fake login page, one compromised account.

Cyber Shield gives you a powerful, affordable layer of protection built specifically for small businesses, nonprofits, and solo professionals who can't risk downtime, data loss, or financial fraud.

Ideal Cybersecurity Protection for

✓ Businesses with Remote or Hybrid Teams
✓ Family-Run and Solo Operations
✓ Nonprofits Handling Sensitive Information
✓ Organizations Using Microsoft 365 or Google Workspace
✓ Anyone Who Wants Stronger Security Without Complexity

Why Add Cyber Shield

Cyber Shield closes the gap with a simple, low-cost layer of protection designed specifically for organizations without internal cybersecurity staff.

| 90% of attacks start with a single email | Small organizations are the most targeted | Traditional antivirus isn't enough | One compromised inbox can cost thousands | Peace of mind for growing teams |

We implement and manage a unified cybersecurity platform that offers complete visibility and advanced threat detection across your entire environment, going far beyond traditional antivirus.

Monitoring & Detection

Our systems continuously monitor all your computers 24/7. Our team is immediately alerted to initiate rapid remediation for every critical threat.

- ✓ Endpoint Detection & Response
- ✓ MS 365 / Google Detection & Response
- ✓ Threat Disruption & Active Containment

Vulnerability Management

Our platform proactively scans your systems for critical software vulnerabilities and security misconfigurations, allowing us to patch and secure gaps before they can be exploited by attackers.

- ✓ 24/7 SOC And Threat Hunting
- ✓ Vulnerability Testing
- ✓ External Threat Monitoring

Advanced Email Protection

Email remains the primary attack vector for ransomware and phishing. We deploy specialized protection services to fortify your inboxes against sophisticated, deceptive threats.

- ✓ Anti-Phishing & Anti-Malware Filtering
- ✓ Zero-Hour Threat Detection
- ✓ Data Loss Prevention (DLP)

HEART FELT IT
