SETTING UP YOUR WORKSPACE

Look **STRAIGHT AHEAD**: have your monitor at eye level or just below and an arm's length away. If using multiple monitors, angle them inwards to reduce neck rotation.

Give your **EYES** a break. Every 20 minutes, look 20 feet away for 20 seconds. 20-20-20.

ELBOWS and **FOREARMS** level with the desk surface, with shoulders down and relaxed. Adjust chair height or prop yourself up with additional cushions.

FEET planted on the floor. A footrest is ideal; alternatively, use a box.

Source: Chartered Institute of Ergonomics & Human Factors (CIEHF).
– Home working and staying healthy

Keyboard and mouse positioned close to the edge of the desk to avoid unnecessary stretching. Don't shrug **SHOULDERS** when typing and mousing; lower the work surface or adjust your chair height to avoid this.

Sit **BACK** taking full backrest support. Adjustable chairs are ideal. For more lumbar support, place a cushion or rolled up towel behind you.

Keep **THIGHS** parallel to the floor, knees slightly lower than the hips.

Regular **MOVEMENT** is key. Get up from your chair 2-3 times an hour for 30-60 seconds or 5-10 minutes every hour. Add dynamic stretches to daily routines as well as walking.

Space limitations and available accessories can impact your ability to work well. Whether you have a dedicated workspace or work at the kitchen table, here are some recommended solutions to make the space comfortable and productive.

Empowering Security Anywhere

Privacy filters and security locks

Prevention is the best policy

Workforces are becoming hybrid, with workers at home, at the office and on the move. Employee expectations and behaviors are changing, and businesses must prepare themselves to protect their security and privacy.

Stay compliant

With the introduction of General Data Protection Regulation (GDPR) in the EU, workers must act responsibly when dealing with data protection and privacy. Whether you are responsible for data protection and privacy, Targus locks and privacy screens are very effective against visual hacking and device theft.

DID YOU KNOW?

A laptop computer has a **1-in-10 chance of being stolen*** and **98%** of stolen laptops are never recovered**.

Whether you are working, gaming or web-surfing on your laptop, don't forget locks are the simplest form of theft prevention.

95%

of respondents from a recent survey say **working privately is important to them*****.
