**GASTROGUSS**

**Premium Non-Stick Cookware**

## Award-Winning Reputation

The excellent quality of the AMT cookware line has been confirmed many times by independent authorities and numerous awards. \*"The world's best pan", according to VKD, largest German Chefs Association.

# Gastronorm Trays

AMT Gastronorm essential baking trays are available in a range of industry standard GN sizes, and are direct replacement trays for OEM combi-ovens. AMT Gastronorm trays are durable, versatile and made to last a life time.

## Features & Benefits Of AMT Cookware

- Produces even heat distribution for perfect cooking results.
- Featuring revolutionary non-stick, Lotan<sup>®</sup> coating.
- Constructed from extremely robust, ultra-resistant layers.
- Induction and non-induction options available.
- Used by foodies and chefs world-wide.

# Providing A High Quality Cooking Experience

## Highly Robust

The constructed layers of AMT pans make them extremely hard, ultra-resistant, and particularly well suited for the stresses of professional kitchen environments.

## Dishwasher Safe

Our products all are dishwasher safe. Yet, the best way to cleanse AMT cookware is with warm water and dish washing liquid. Our self-developed coating Lotan® makes cleaning easier and keeps the pans clean and hygienic.

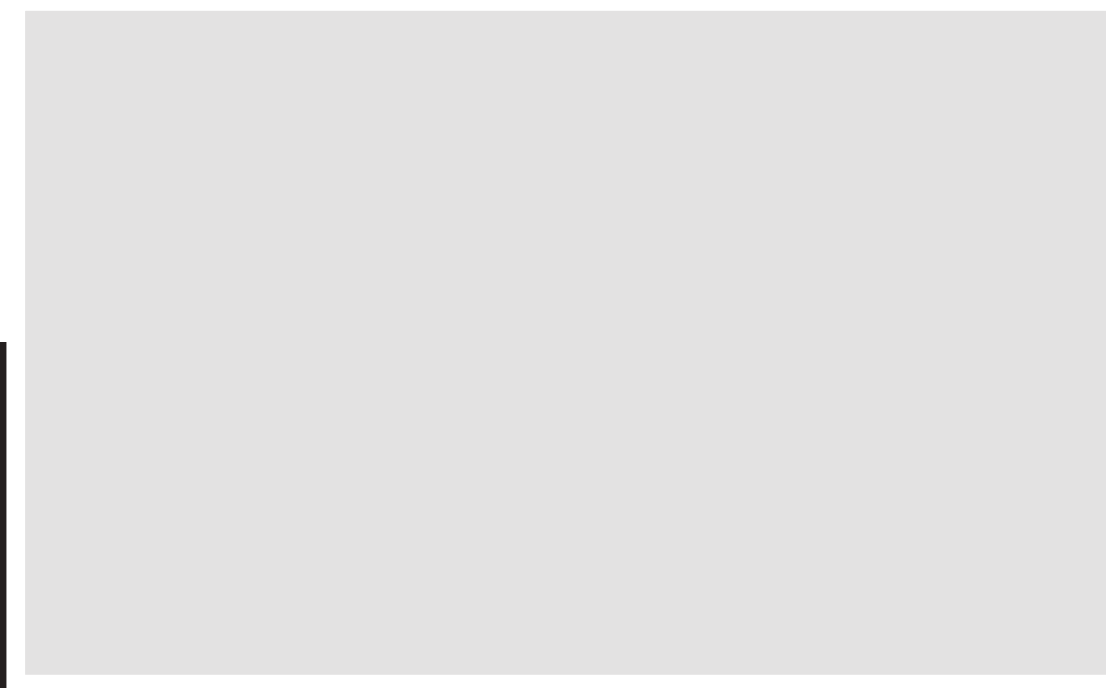

## Superb Culinary Results

- Shorter cooking times.
- Repeatable culinary results.
- Minimal meat shrinkage.
- Beautiful browning effect.
- Saving more nutrients and vitamins.

AMT cookware features revolutionary Lotan® coating for a pleasurable, non-stick cooking experience, and the quickest clean-up imaginable. Available in both induction and non-induction options, our premium cookware produces even heat distribution for perfect cooking results, every time!

# Designed With Five Layers Of Construction

AMT cookware is designed for maximum heating efficiency with exceptional durability. Our cookware stays warmer for a longer time after turning off the stove. The 9 mm thick aluminum base ensures better heat distribution, not only at the bottom, but also on the side walls of the cookware.

- 1** Non-stick coating layer made from unique Lotan® sealing with antibacterial effect.
- 2** Reinforced ceramic layer fortified with mineral particles to provide a long lasting abrasion resistance.
- 3** Anti-corrosion layer for optimal protection against aggressive detergents, fruit acids and acetic.
- 4** Titanium oxide layer (nearly as hard as diamond). Burned-on at 20,000 °C. Extremely scratch and cut resistant.
- 5** Heavy duty, hand casted aluminum body. Abrasive blasting enhances the surface area 12 times better, enabling superior adhesion for the subsequent layers.

## Innovative Detachable Handle Design

AMT features (2) exclusive handle upgrades for all single-handle AMT pans. Add sleek and stylish appeal with the refined AMT all stainless steel handle option, or upgrade your pans for maximum efficiency with the AMT exclusive detachable handle option.

- Space saving - easier way to store pans in the cupboard.
- Child friendly - eliminating protruding handles - a potential hazard for children.
- Oven friendly - no oven gloves necessary.
- Innovative design - Based on AMT-Patent 2586346

# Unique, Sleek And Convenient

The AMT exclusive detachable handle can be used with all single-handle AMT pans. Simply remove the existing standard handle from your AMT pan using a screwdriver. Next, attach the exclusive detachable handle using the new screw provided, and you're good to go!

The exclusive AMT detachable handle features an innovative quick-release button on top. Simply press and slide the button backwards to release the handle from the pan. No more oven gloves needed!

Your handle re-attaches in a flash by simply clicking back into place. The detachable handle provides convenience for both cleaning and space savings. This makes it easier to store your pans in the cupboard, and eliminates issues with fitting pans into the dishwasher.

# AMT Frying & Tossing Pans
