

SELECT PRO BOLT-ON LOCK WITH FOREND

Specification Sheet **1601F**

FEATURES

- This variation of the Select Pro range has a lockcase without the projecting security escutcheons on each side and is fitted with a stainless steel forend plate.
- These locks can be fitted into a mortise on the edge of a gate or door.
- They are ideal for use on wooden gates where the long 30mm throw allows for varying gaps between the gate and the post.
