

Product Showcase

Customized

Face Recognition Terminal

- 7-inch LCD Touch Screen, 2 M camera
- 50,000 Face capacity and 100,000 event capacity
- Face recognition duration<0.2 s/user
- Face recognition accuracy rate ≥ 99%

Speed Gate and Turnstiles

- 4 Pairs of IR light detectors: Permissions validation and anti-tailgating
- LED light indicates passing direction

LED Module

- Automatically detects high-brightness areas and harsh image details, adjusting brightness using dynamic engine algorithms
- Delivers soft, high-quality images while reducing unnecessary power consumption
- Enables Eco-friendly packaging and green production process

Digital Signage Box

- Supports diverse content formats, including images, audio, video, PDFs, and more
- Offers flexible display modes: daily, weekly, or custom schedules
- Enables remote control and management of one or multiple screens

ANPR Camera

- Up to 2688 × 1520 resolution with real-time videos
- Supports quick pass of multiple vehicles
- Supports vehicle type, vehicle color and vehicle brand recognition

HikCentral Professional V3.0 Add On

- Manage all devices in one place
- Maintain student and guardian information
- Centralize all pick-up records

Student Pick-Up Solution

Student Pick-Up Solution

Improving the efficiency and students' safety

What School Managers and Parents Encounter

Student safety is a top priority for school management. While students need to attend classes and activities safely within the school, it's equally important that they return home safely. Traditional student pick-up methods often lead to chaos at the school gate and create several issues, including:

- Students being mistakenly picked up by friends of parents or, in some cases, by strangers
- Lack of clear records indicating whether a student has been picked up
- Students and teachers not being informed in time when parents arrive at school

WHAT WE OFFER

-  Bind students to designated pick-up personnel for easy identification and improved security.
-  Automatically upload records of students and parents entering and leaving the school to the centralized management system.
-  Provide timely notifications of parents' arrival, improving the efficiency of student pick-up.

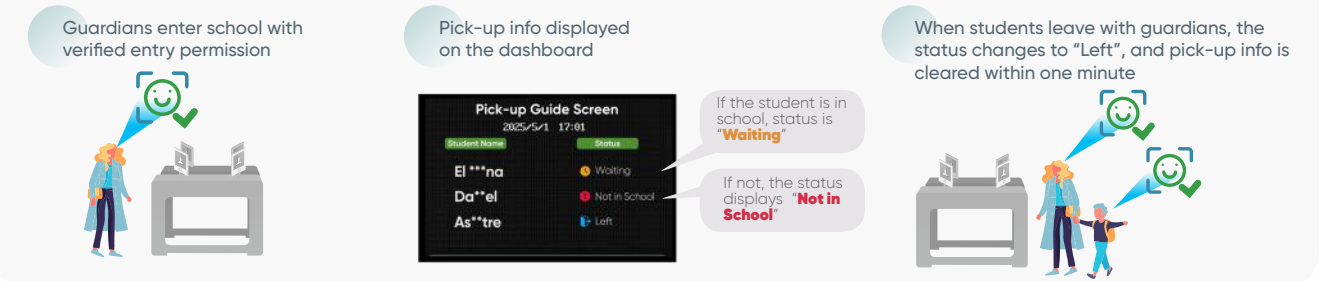

SCHOOL HOURS

At the start and end of the school day, authorized students can swipe their cards to enter the school in the morning and are not permitted to leave the school premises alone during class hours.

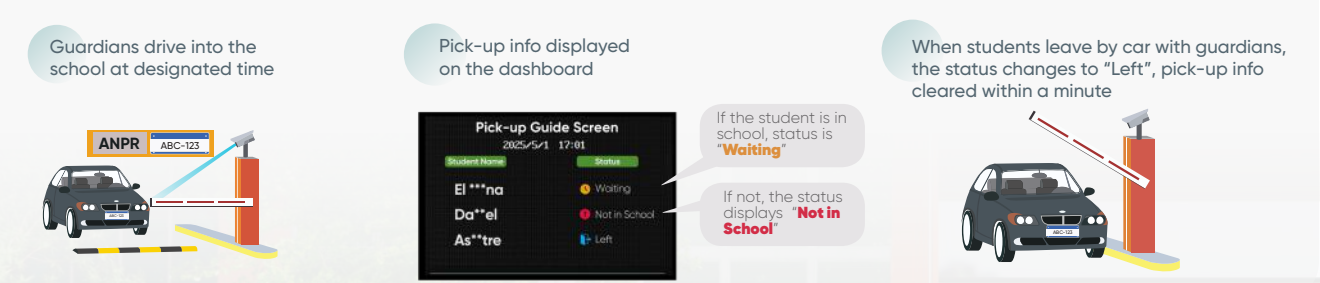

Pick-up Time

On-Foot Pick-Up Process

Car Pick-Up Process

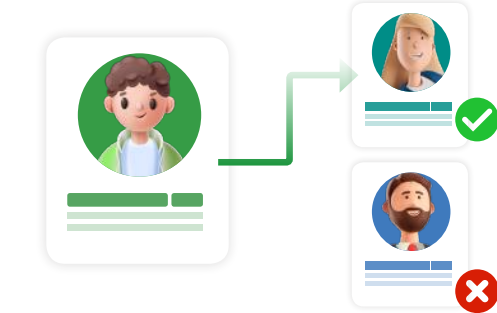

When guardians enter the school by foot or car, pick-up information appears on the dashboard. It's removed once the student or guardian exits, verified by facial recognition or vehicle identification.

***For younger school children**

SOLUTION HIGHLIGHTS

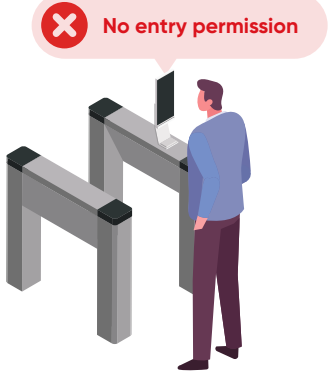

Ensure students are picked up by the right person(s)

Students are pre-assigned to parents in the system. After school, students can only leave with their designated parent who must exit the school first. Temporary guardians can be easily authorized to pick up a child on behalf of the parent.

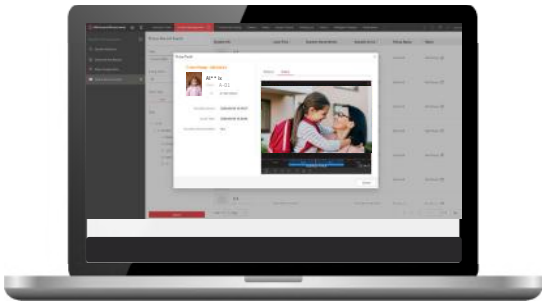

Strict permission management

Only authorized individuals, such as students and their parents, are permitted to enter the campus, preventing unauthorized access by strangers.

Complete entry and exit records

Entry and exit records of students and parents will be automatically recorded in the HikCentral Professional platform with real-time video, enabling quick review in case of any irregularities

Efficient pick-up process

Upon a parent's arrival, whether by car or on foot, the student's status is immediately shown on a large screen as the parent enters the campus. This enables the parent to quickly find their child and leave the school.
