LARGE 100 FITNESSPARK THE HEALTH PARK

This park is the smallest of the Large series but this figure is misleading because even so, up to 44 people can train at the same time.

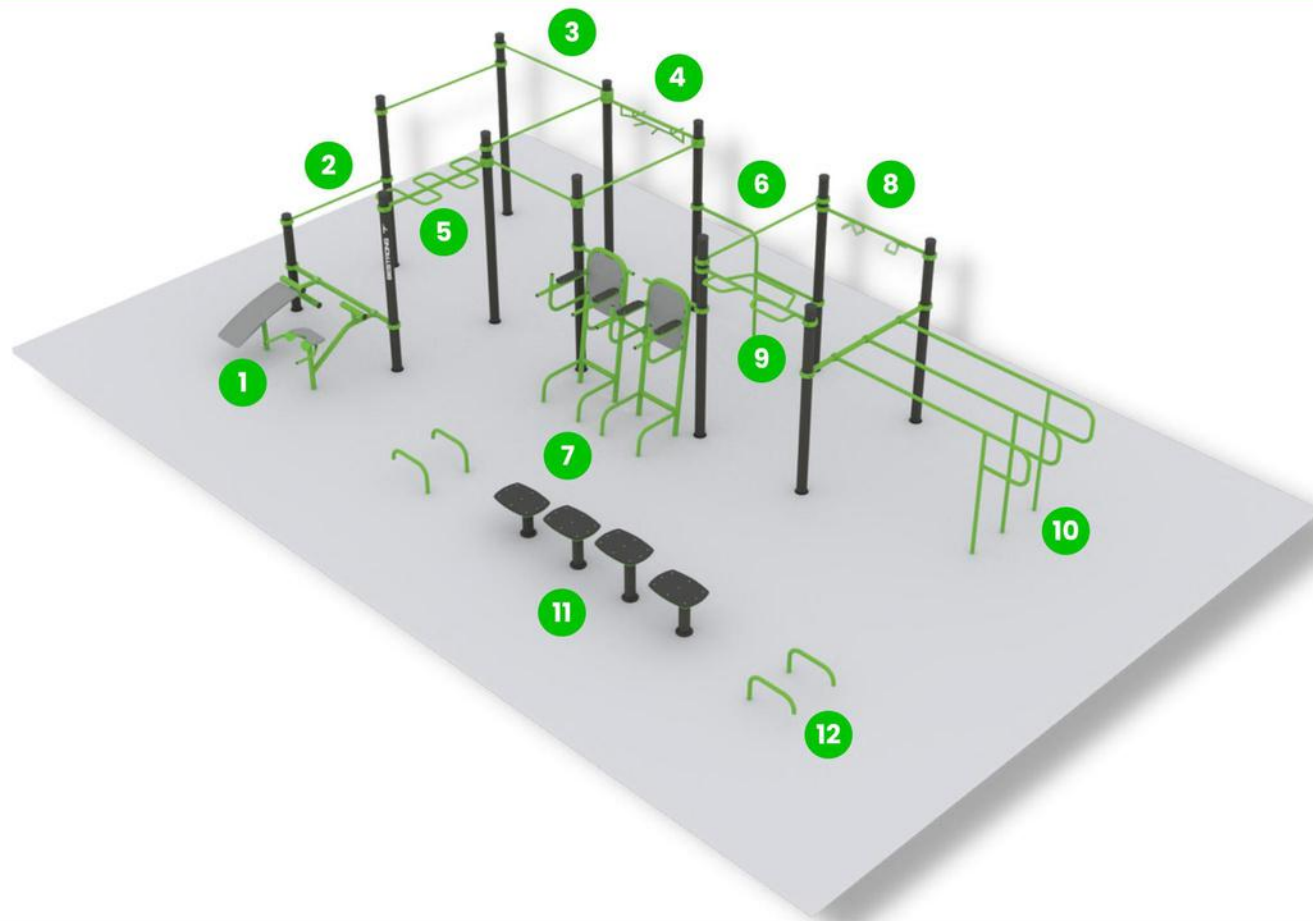

The LARGE 100 fully satisfies what can be expected from its genre, having a wide choice of elements, it leaves no doubt about the possibility of training all muscle groups. As in all other fitness parks, workouts can be varied and enriched simply by using training accessories such as TRX, kettlebells or medicine balls.

Our parks are designed and manufactured in accordance with EN 16630: 2015 (E) for the permanent installation of outdoor fitness equipment.

Construction materials:

- 1) Tool tubes are made of S235(*) construction steel.
- 2) The covering of the pipes for the protection of the surface takes place with an initial cleaning for preparation, followed by the covering with a substance called Primax Protekt - Zinc Chromate, at the end the final covering layer is applied, in a thickness of 65- 90 microns (OPTIONAL)
- 3) hot-dip galvanizing followed by powder coating

CARDIO RING CIRCLE OF HEALTH

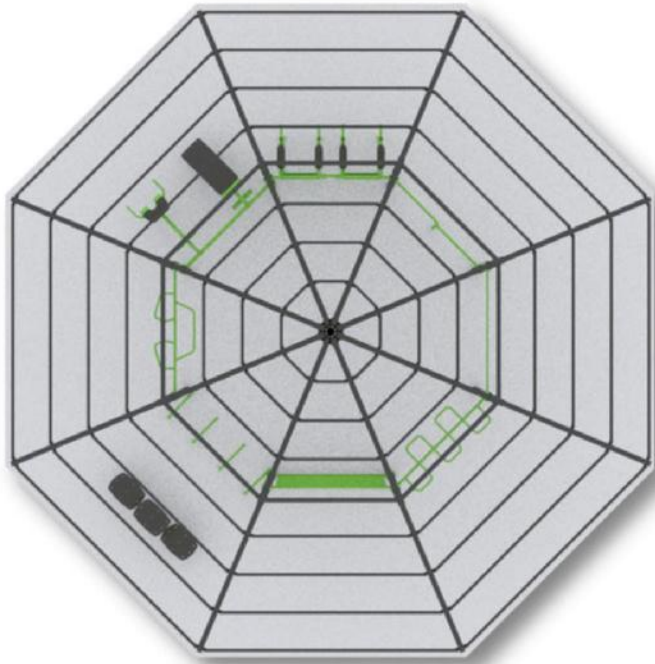

CARDIO RING - THE CIRCLE OF HEALTH is a medium-sized fitness park. It includes new recreational tools, which can be used to easily move the entire body, thus maintaining overall physical fitness, without straining the joints. In the health park you can also find **CALISTHENICS** equipment with which you can also perform advanced exercises.

THE HEALTH PARK

LARGE 90 FITNESSPARK

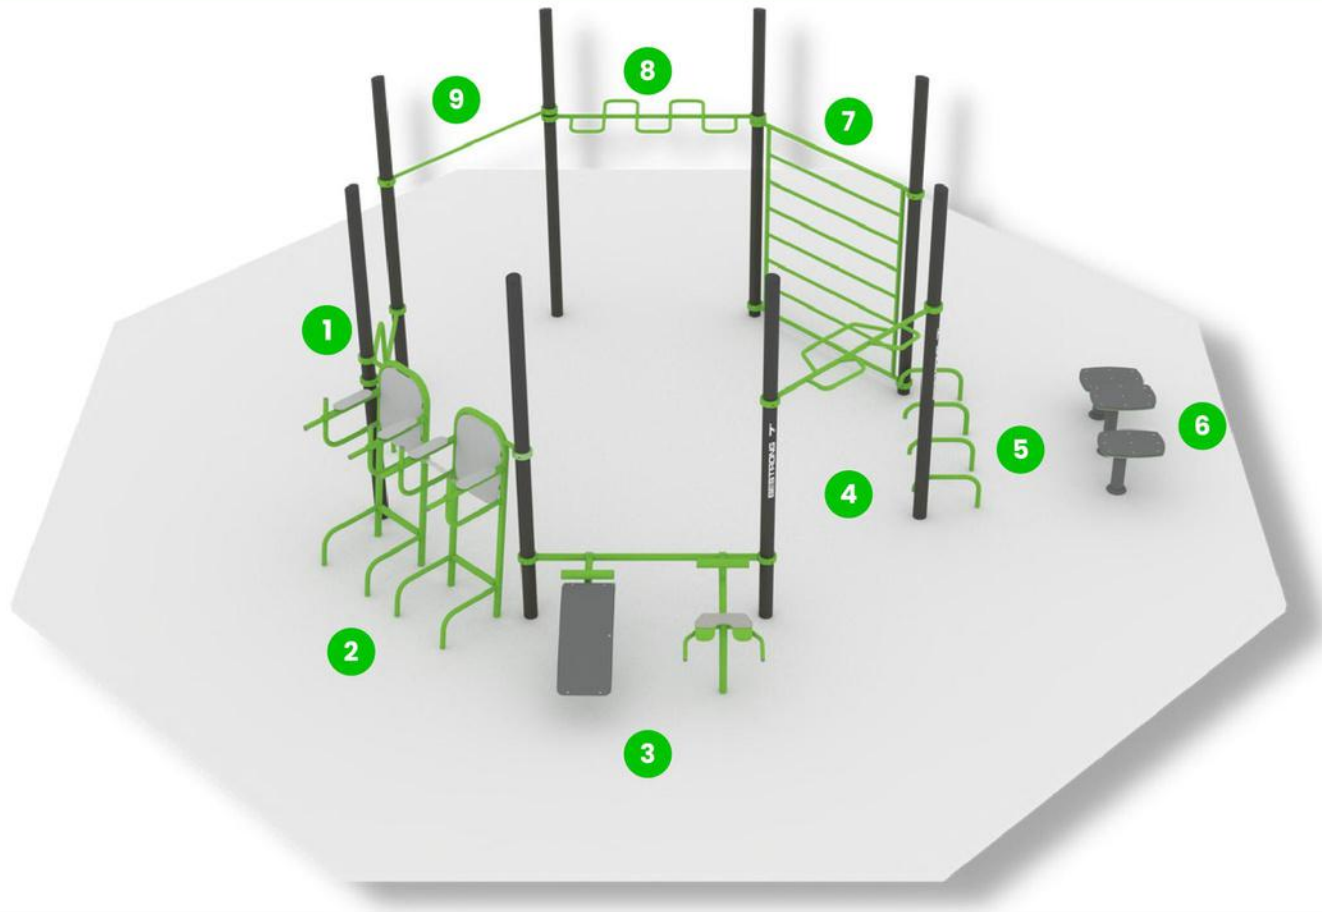

The LARGE 90 is an indoor Fitness Park, perfectly suitable for training larger classes who can enjoy training in the open air regardless of the weather, using a structure designed to work all muscle groups. As in all other fitness parks, also in the case of the LARGE 90 the workouts can be varied and enriched simply with the use of training equipment such as TRX, kettlebell or medicine ball.

Our parks are designed and manufactured in accordance with EN 16630: 2015 (E) for the permanent installation of outdoor fitness equipment.

Construction materials:

- 1) Tool tubes are made of S235(*) construction steel.

Unique products and a
training method
innovative

gold plated

BIOMECHANICAL INNOVATION

The Canali method is based on auxotonic resistance and postural training.
No weight stack, no cables and no pulleys

AUTHENTIC MASTERPIECES

The most advanced metallurgical processing techniques combined with an innovative training system and to the skill of the best craftsmen

100% MADE IN ITALY

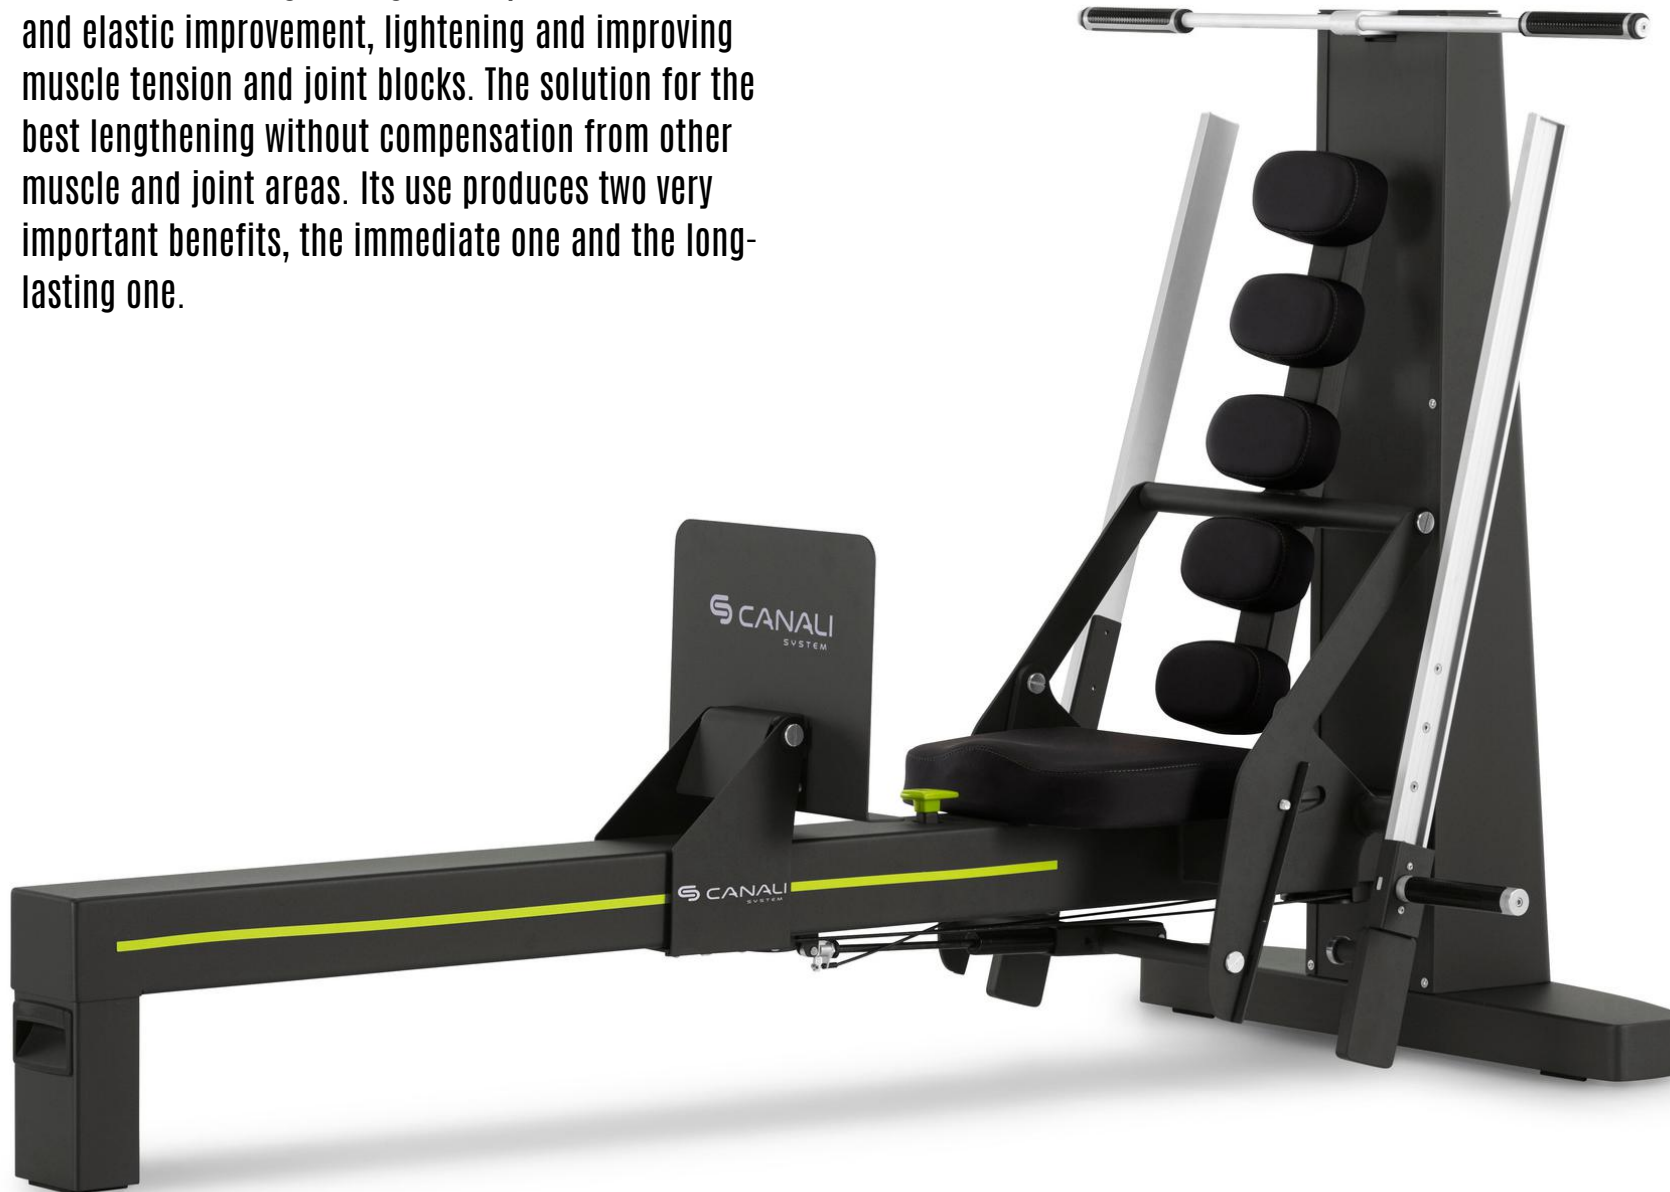

CHEST PRESS

Postural rotation machine with abdominal stabilization, with convergent thrust action, for training the pectoral muscles, Auxotonic progressive resistance, "Safety Back" system for lowering tension on the back. The height-adjustable seat and the position of the handles allow you to finalize the training for the upper, lower, internal and external part of the chest.

Flexibility Machine

Designed for a single purpose, to make people feel good. Flexibility, the only machine designed and created for the lengthening of the posterior chain and elastic improvement, lightening and improving muscle tension and joint blocks. The solution for the best lengthening without compensation from other muscle and joint areas. Its use produces two very important benefits, the immediate one and the long-lasting one.

HALF RACK

Human half racks, designed for athletes and made for everyone, are a concentrate of biomechanics, functionality and rigorous quality controls.

Built with resistant and durable materials, such as: powder coated steel, stainless steel and stainless steel screws.

HUMAN RUN

The Human Run, silent, the top on the market, makes it optimal even for small spaces and personal trainer gyms. Designed to recreate the same sensation as running on the athletics track or on grass. The cushioning system is responsive and at the same time not too harsh.

Sturdy frame and a powerful engine that allows you to reach 22 km/h.

Thanks to constant heart rate training programs, you can perform exercises by indicating your heart rate, the equipment adapts slope and pace based on cardiac effort, performing an exercise aimed at your goal.

FITNESS ACADEMY
WE TRAIN YOUR TRAINERS

The Eagle Association ASD offers constant training activities aimed at athletes and trainers who want to achieve the European classification of Sports Technicians. The model of the qualification system for European sports technicians divides coaches into four professional qualifications corresponding to four levels, as listed on the European Commission website dedicated to regulated professions (SNAQ).

The activities of the National Eagle Association Academy are recognized by the Sport and Health Department (Ministry of Sports) and considered NATIONAL events by the ACSI Promotion Body - National Training Area. They are carried out under the auspices of the Italian Paralympic Committee as the technicians are trained to also carry out inclusive activities with people with disabilities.

The Eagle Association operates in accordance with the National Qualifications System for Sports Operators OF LEGISLATIVE DECREE N. 13/2013, OF LEGISLATIVE DECREE - N. 15/2016 and in coherence with the framework drawn up at European level.
