Message from the CEO

Working in the industry for over 40 years in various Project Management roles has convinced me about [the importance of mentoring and coaching up-and-coming talent](#). It's the most productive and sustainable way to pass on knowledge from experienced practitioners and is fundamental to the profession's future success.

In my own work at corporations such as Hatch, Fluor, Anglo American, Debswana Diamond Company, De Beers Group, and Murray & Roberts, I gained valuable hands-on experience in Project Management and Controls.

Together with my work at global oil and gas companies such as Shell, Total, Caltex, Mobil, Engen, Sasol, and BP, this developed my expertise and shaped my thinking on important professional issues like leadership.

I nevertheless always understood the importance of continuous education. This includes the theoretical knowledge that one learns in books and other training materials and the practical insights one must obtain to apply subject knowledge in the real world where projects succeed or fail.

Since 2014, I have been working alongside knowledgeable colleagues to improve the profession through educational activities that involve hands-on mentoring and coaching with junior and established Project Team Members.

We should never underestimate the lasting, positive impact that seasoned Project Team Members can have as role models – even in guiding experienced businesspeople to perfect their know-how and skills.

Plowing expertise back into the broader Project Management profession is the most effective way to ensure that standards of knowledge and competence remain at the highest levels.

This satisfying educational work has motivated me to lay the groundwork for a fully-fledged Academy that offers in-depth learning opportunities to both established businesspeople and first-time students with no prior experience in the field.

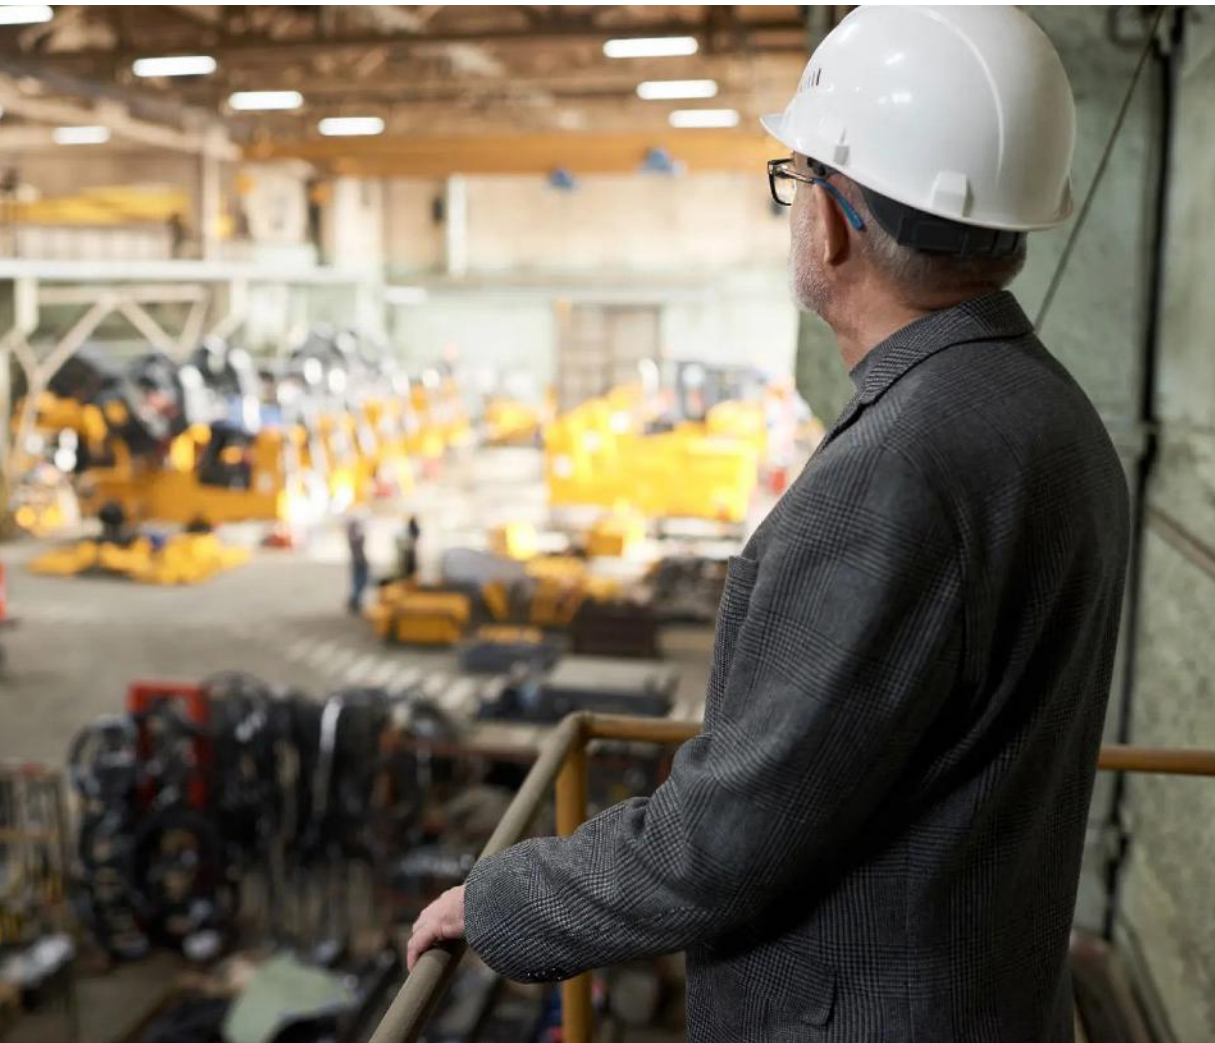

At Ernest Lehman, our curriculum allows students to gain expert qualifications that are aligned with the highest international Project Management certification standards.

Through the power of education, we strive to uplift novice, junior, and experienced Project Team Members. This top-quality training will leave the profession in the most capable hands going into the future.

The Aim of the Executive Education coursework

Streamlining and flow are integral processes for the success of any organization's projects.

Ernest Lehman teaches you how to handle these processes with confidence and expertise – arming you with the advanced knowledge and leadership skills that enable you to guide even the most challenging projects from cradle to grave.

Through top-quality education, you can develop your expertise and work as a highly effective Project Team Member in a vast range of industries. With your Ernest Lehman knowledge and skills, your organization will benefit from your ability to always ensure positive outcomes for their projects and protect their bottom line.

The Executive Education stream caters to your specific competency needs. You enroll at your current level of expertise and develop your talents through our programs to excel in your present career environment and in the future.

The Advantages of an Ernest Lehman Education

Our students are trained to maintain the highest, internationally recognized standards in their work as Project Managers:

- ▶ Excel at leading any project throughout its entire lifecycle.
- ▶ Judge the scope, timing, and cost of your projects with precision.
- ▶ Implement cutting-edge methodologies to streamline your project processes.
- ▶ Exercise disciplined Project Controls that guarantee project success.

A Personalized Education

The Ernest Lehman Approach

Each student's individual needs are assessed throughout their studies to create a bespoke learning experience. Through talent analytics, we measure your competencies and guide you to focus on the strengths that will make you stand out in your profession.

You have access to specialist lecturers with decades of real-world experience in the Project Management field.

The theory that you learn is always rooted in practice. The case studies that you are exposed to are chosen to give you the know-how that you will use daily as a Project Team Member.

Additional Benefits

Students at Ernest Lehman are [guided through an Individual Development Planning system](#). This empowers them to identify and strengthen their competencies to make informed and advantageous career decisions.

As part of this in-depth personalized competency and career development package, you will have access to:

- ▶ Development Reports
- ▶ Talent Match Reports
- ▶ Coaching and Mentoring Sessions
- ▶ Interview Practice Sessions

Achieve excellence with EXECUTIVE EDUCATION

This program consists of four certification components that can be enrolled in successively or separately – depending on your needs:

- ▶ Executive Certificate
- ▶ Executive Diploma
- ▶ Executive Professional
- ▶ Executive Expert

The Executive Education stream is designed to offer [senior managers, executives, and functional operational managers](#) a tailor-made curriculum with maximum flexibility for their unique educational needs.

Executive Certificate

Executive Expert students must demonstrate highly proficient capabilities in implementing Project Management within the business environment.

A full dissertation accounts for the research component of the coursework. Previous key aspects of the Executive Education curriculum will be perfected through in-depth class discussions and personalized mentoring and coaching (either in person or online).

Key aspects of the program include:

- ▶ Leadership and Management
- ▶ Governance, Ethics, and Oversight
- ▶ Advanced Project Management
- ▶ Knowledge & Skills Transition
- ▶ Planning and Cost Control
- ▶ Project, Program & Portfolio Management
- ▶ Business Case Study & Review
- ▶ Strategic Management
- ▶ Organizational Change

A state-of-the-art blended learning experience

Ernest Lehman's live online Learning Management System (LMS) gives you complete access to your classes and learning materials.

Classes are presented in the format of webinars, online work sessions, and online Q&A sessions.

Our **online and distance** e-learning training model enables you to study from anywhere in the world, while still benefitting from personalized interactions with our expert Faculty.

Additional opportunities will be arranged to meet in person and strengthen your learning by giving you direct access to industry experts and fellow students.

The Ernest Lehman learning model and curriculum are ideal for professional businesspeople who need enough time and capacity to study in-depth Project Management course material while continuing with their demanding careers.

Assessment

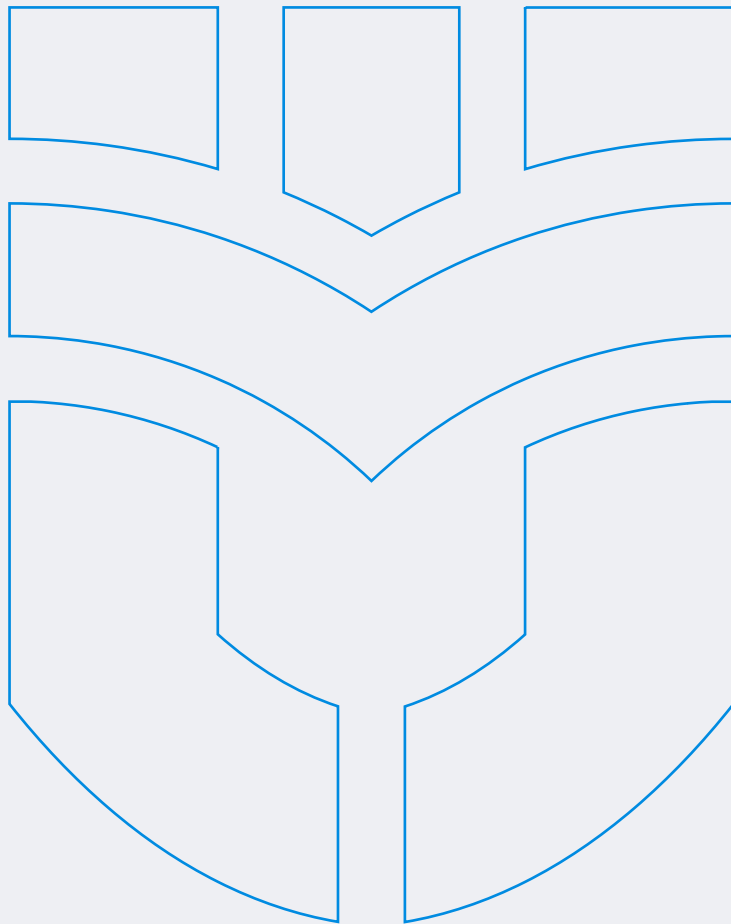

The Executive Education program is completed through interactive coursework and research (assignments or dissertations, depending on your course level) that enhance the student's knowledge and competencies according to their specific professional needs.

The student's research is assessed and critiqued meticulously by Faculty and other relevant industry experts.

Students benefit from continuous assessment throughout the course, which tests their competencies and makes use of talent match and development reports to guide them in making appropriate career trajectory decisions.

After completing your Executive Education courses, you can apply to write the required examinations for your ISO certification of your qualification. There is a compulsory one-week pre-exam course to prepare for these examinations.

International Certification

Ernest Lehman is partnered with international accreditation bodies that provide ISO (International Organization of Standardization), PMP (Project Management Professional), and IPMA (International Project Management Association) certifications.

Our curriculum is accredited by:

International Accreditation Service (IAS)

United Kingdom Accreditation Service (UKAS)

ANSI National Accreditation Board (ANAB)

CPD Certification Service

Standards Council of Canada (SCC)

We follow the United States Council for Higher Education Accreditation (CHEA) rules and regulations.
