Guiding you through challenges to protect your intellectual assets

In an era where Intellectual Property (IP) is a pivotal asset, safeguarding it is fraught with challenges. There are cost and resource constraints, and the time required to secure and maintain IP rights is substantial. The diverse legal and regulatory landscapes across jurisdictions are complicated. It is a complex legal terrain.

IP rights face constant risk, vulnerable to infringement, and enforcement can be a costly affair, especially internationally. While effective monitoring and management of your IP is critical to avoid missed renewal deadlines and the consequent loss of rights. Market dynamics can also diminish the value of your IP as markets shift and technology evolves, necessitating regular reassessment.

Securing your IP abroad requires dependable, expert associates or agents who offer quality service at reasonable costs, which is not always readily available.

Our solution

ipRenewal streamlines the protection of your intellectual property internationally, offering personalized solutions tailored to each client's unique needs. We collaborate with only the best experts in any jurisdiction worldwide, guaranteeing top-quality services without compromising on affordability. Our commitment is to provide a seamless experience at competitive prices, ensuring your IP remains safeguarded across all borders.

Our innovative edge in IP services

At ipRenewal, we redefine IP services with a focus on patent drafting, trademark filing, and IP renewal. Our patent drafting process is tailored to meet the specific legal standards of each jurisdiction from the outset, collaborating with experts to ensure compliance and enhance application quality. This approach minimizes the risk of rejection and reduces costs associated with multiple examinations, making the process more efficient for our clients.

For trademark registration, we diverge from the Madrid Protocol, advocating direct filings in individual countries through our network. This method has proven cost-effective and simplifies the process, delivering savings beyond conventional methods.

Our in-house renewal management system offers a seamless solution for maintaining patents and trademarks across various jurisdictions. It provides timely reminders and allows for efficient portfolio management without additional fees. By leveraging our global network, we offer competitive renewal rates, and clients enjoy a streamlined, cost-effective IP management tailored to their needs.

Engage, refer, and grow with us!

When you engage our services, you unlock rewards with ipRenewal's programs for users and referrers. Users earn points through our [Social Growth Program](#) for every dollar spent, which may convert to shares or ownership stakes if the company lists or sells. Referrers can opt for the Affiliate Program, earning points like users, or the Commission Program, which pays a percentage of their referrals' spending in cash, without company stakes.

Start by sharing your unique referral link from your dashboard. Whether it leads to new registrations or service purchases, you'll see your points or cash rewards grow. Monitor your progress easily and witness the expansion of your network.

For more details on how to maximize your rewards with our innovative programs, visit our [website](#).

Global IP renewals made simple, transparent and affordable

Instant quotes

ipRenewal facilitates worldwide IP renewals, offering users instant quotes for renewals. The transparent fee structure allows users to view costs promptly and proceed with payments, initiating the renewal process without delay.

Cost effective results

Recently a client needed to renew their patent in 10 different countries and had received quotes of \$20,000 from a renewal service and \$16,000 from an intellectual property law firm. We successfully renewed the patents in all 10 jurisdictions for under \$13,000, solidifying ipRenewal's position as a highly competitive choice in the market.
