From the SUPERVISOR

DEAR Brownstown Residents,
As the warmer months arrive, you can feel the energy throughout Brownstown, and there's truly no better place to be this time of year. Our parks are active, neighborhoods are lively and there are so many ways to get out, connect and enjoy our community.

This season, we're excited to bring back our Local Market series, featuring fun, themed events for all ages including Kids Day, Christmas in July, and Fun, Food and Fitness Day. Along with these we also have movies and concerts in the park, and our annual Summer Fest continues to be a favorite for many. These are just a few of the many events happening across our township this season.

One of the things I appreciate most is seeing neighbors come together – families enjoying time outdoors, friends reconnecting and our local businesses buzzing with activity. It's those simple, shared moments that truly make Brownstown feel like home.

I encourage you to take part in everything the season has to offer. Whether you attend an event, visit one of our parks or spend time with those around you, each experience adds to the strong sense of community we all value.

Thank you for being such an important part of Brownstown.

Helpful Information

Tax Bills Due Date(s):

- Summer tax bills are mailed on July 1 and due by September 14.
- Winter tax bills are mailed on December 1 and due by February 16.
- Please note that taxes are billed for the fiscal year ahead, not for the previous year. If you recently purchased a home and paid an amount toward the taxes in your closing costs, you may have paid a prorated amount toward the previous tax year. In most cases, bills issued after the closing date are not covered in your closing costs. Please read your paperwork carefully.

Late Payment:

- A 3 percent penalty/late fee is applied on any payment received after 5:00 p.m. on either September 14 (summer tax) or February 16.
- On March 2, all delinquent real property is transferred to the Wayne County Treasurer and must then be paid either on their website at www.waynecounty.com/treasurer, by phone (313) 224-5990 or in person at 400 Monroe, 5th Floor, Detroit, MI 48226.

How to Pay your Tax Bill:

- **Mail** ▶ Return the bottom portion of the tax bill with your check/money order made payable to: Brownstown Township. Post-dated checks will not be accepted, please date your check for the actual day you write it. Postmarks are not proof of receipt of payment. Payment will be recorded on the date received in our office, not the day it was mailed or the date on the envelope and/or check.
- **Drop Box** ▶ Leave the bottom portion of your tax bill along with your check or money order (no cash) in the secure drive-up, locked drop box located on the sidewalk in front of the main entrance of Township Hall. It can be utilized 24 hours a day, and is under 24/7 video surveillance to ensure accuracy and safety.
- **Credit/Debit Card** ▶ We accept Visa, MasterCard, American Express and Discover. For Water or Miscellaneous invoices, the fee is 2.95%; and for Tax bills it is 2.80%. ACH transactions from \$0-\$1,000 are \$3/transaction, \$1,001-\$5,000 are \$6.00/transaction and \$5,001+ are \$12/transaction.

**BROWNSTOWN
TREASURER'S OFFICE**
Treasurer: Michael Eberth
Deputy Treasurer: Cindy Majlinger
Monday - Thursday 7:00 a.m. - 5:00 p.m.
(734) 675-0052
www.brownstown-mi.org

- **In Person** ▶ Please bring your entire tax bill with you so we can date stamp the top portion for your records.
- **Online Banking** ▶ Use caution when you pay this bill via your online banking system as it is not a guarantee of our timely receipt of your payment. When you use online banking, it may automatically debit your account but your bank still sends us a check and this process can take 5-7 business days longer. If not received by the due date, it will be considered late.
- **Partial Payments** ▶ We now accept partial payments.
- **Escrow/Mortgage Company** ▶ If your taxes are paid through an escrow or mortgage company, you will not receive a tax bill. However, if you do, please forward it to your mortgage company.
- **Income Tax Info** ▶ Please keep a copy of your tax bill for Income Tax purposes. Brownstown cannot advise you on what to claim. All income tax questions must be directed to a professional or to the State of Michigan.

Non-Sufficient Check Fee:

- Checks are accepted as conditional payment. Brownstown will charge any individual or company a fee of \$30 (cash or money order only) for a returned check. The Township is not liable for any difficulty that may occur with a bank or mortgage company. A returned check must be paid in full within five (5) days of Brownstown receiving it.
- A 3 percent penalty/late fee is applied on any payment received after 5:00 p.m. on either September 14 (summer tax) or February 16 (winter tax).

Senior Property Tax Deferrals:

- Brownstown Treasurers Office July 14, 2005 Public Act 24 of 2005 has amended Section 51 of the Michigan General Property Tax Act (MCL 211.51) to allow the following residents: Senior Citizens (age 62 and older), Paraplegic or Quadriplegic, Eligible Serviceperson, Eligible Veteran, Eligible Widow or Widower, Blind

Person or Totally and Permanently Disabled person, to defer their summer property taxes if they have a household income below \$40,000. To qualify for the deferment under the new income limit, a resident must meet one or more of the following conditions as defined by the State Income Tax Act:

- Household income below \$40,000 for the current year
- Is 62 years of age or older, including the unmarried surviving spouse of a person who was 62 years of age or older at the time of death
- Is a paraplegic, quadriplegic, eligible serviceperson, eligible veteran, eligible widow or widower, blind person or a totally and permanently disabled person
- Residents who believe they qualify under the new limit and wish to defer their summer property taxes can obtain an Application for Deferment of Summer Taxes from the Brownstown Treasurers Office. Deferment forms must be on file with the Brownstown Treasurers Office no later than September 14. If the deferment is approved, individuals will have until February 16 to pay their summer property tax without penalty. You may obtain a form on our website.

Where a Simple Problem Became a Lasting Legacy: Jennie's Backyard R.V. Storage

By Mike Sollars

In the 1970s, Jim and Jennie Sute were simply trying to do what so many families dream of – spend time together and see more of the world. With a large family and a newly purchased RV, they had found their ticket to adventure.

But back home in Lincoln Park, Michigan, reality quickly set in. Local ordinances made it impossible to park their RV on the street, and finding a place to store it became a constant challenge.

What began as a personal frustration soon sparked something bigger. Jim realized he wasn't alone and other families likely faced the same problem. And like so many great ideas, the solution was born from necessity.

Determined to turn that problem into an opportunity, Jim set out to find land where people like him could safely store their RVs, boats and campers. In 1977, he and Jennie found it: a nine-acre parcel on Telegraph Road, just north of West Road in Brownstown. It wasn't polished or ready – it was raw, wooded and full of work. But to the Sute family, it was possibility.

That land became the foundation of "Jennie's Backyard R.V. Storage".

What followed was not just the start of a business but a true family effort. The Sute children, extended family and many friends spent countless months transforming the property. They cleared trees, split logs, built and repaired fencing, and worked side by side with their parents. It was hard, physical work,

Where it all began (top): The original Sute family RV sits idle in the driveway shortly after they acquired the property. The Sute family (bottom) working to clear the timbers in order to make way for the parking lot.

Overlooking the vast numbers of RVs (top) and boats stored on the lot. Family members pose (right) in front of sign at Jennie's Backyard R.V. Storage.

but it was also something deeper. It was a shared purpose. It was pride. It was the building of something that belonged to all of them.

Over time, that once-wooded lot became something remarkable. What started as an idea grew into a space with more than 600 storage spots – room enough for several hundreds of families, each with their own journeys waiting just beyond the driveway. It became a trusted place for the community. A place where people could store not just their vehicles but the vessels of their memories and adventures.

Jennie (91) passed away in 2023 and James (91) one year later in 2024. For 48 years, Jennie's Backyard R.V. Storage stood as more than just a storage yard. It was a reflection of the values Jim and Jennie built it on: hard work, fairness and care for others.

Jim, who ran the yard day to day, took particular pride in one simple principle: keeping storage rates flat. In a world that constantly changes, that consistency meant something. It showed customers they were valued, not just as business but as neighbors.

What began as one family's challenge grew into a lasting legacy, proof that with determination, teamwork and a willingness to serve others, even the simplest idea can become something truly meaningful.

Jennie's Backyard R.V. Storage wasn't just built on land. It was built on heart.

Woodhaven-Brownstown School District Board of Education Approves MATTHEW SALAH AS NEXT SUPERINTENDENT

THE Woodhaven-Brownstown School District (WBSD) Board of Education officially approved Matthew Salah as the district's next superintendent during its regular meeting on April 14, 2026.

Mr. Salah's appointment follows final interviews held in March and a 7-0 vote by the Board of Education to extend him an offer. With board approval now complete and contract negotiations finalized, Mr. Salah is set to officially assume the role on July 1, 2026.

A familiar and respected leader within the WBSD community, Mr. Salah brings more than two decades of dedicated service to the district. Since 2024, he has served as executive director of special services. His extensive leadership experience within Woodhaven-Brownstown includes:

- Director of special services (2020–2024)
- Building principal and assistant principal at Patrick Henry Middle School (10 years)
- Special education teacher at Woodhaven High School (five years)

The Board's selection followed a comprehensive search process that began with five candidates.

After preliminary interviews in March, the field was narrowed to two finalists: Mr. Salah and Dr. Angela Jefferson. The final stage of the process included a community open house and formal interviews, where staff and community members had the opportunity to provide valuable feedback to the Board.

"The board was deeply impressed by the exceptional qualifications of both finalists," said Laura Berry, WBSD Board of Education president. "Ultimately, Mr. Salah's proven leadership and unwavering commitment to our district set him apart. He brings the stability we value, paired with a forward-thinking mindset that embraces growth and change. His student-centered approach made him the clear and overwhelming choice to lead our district."

The WBSD Board of Education extends its sincere appreciation to the staff, parents and community members who participated in the search process and shared their thoughtful input throughout.

Mr. Salah will succeed Superintendent Mark Greathead, who is retiring after 15 years of dedicated leadership to the district.

WARRIORS GEAR UP

FOR A SUMMER OF SPORTS, SKILLS AND SPIRIT

This summer, the Woodhaven-Brownstown School District is turning up the energy with a full lineup of youth and middle school sports camps designed to keep students active, learning and connected. From football and basketball to cheer, dance and volleyball, WBSD is offering opportunities for students in grades 3–9 to sharpen their skills, build teamwork and have fun – all while being coached by some of the district’s top athletes and coaches. Whether your student is just starting out or looking to level up, there’s a camp for every interest and experience level.

Scan this QR code for more information, and we look forward to seeing you this summer!

WBSD UPCOMING PERFORMING ARTS CONCERTS MAY – JUNE 2026

- 5/27 – Brownstown Middle School Band Concert, 6:30 p.m.
- 5/28 – Brownstown Middle School Choir Concert, 6:30 p.m.
- 6/5 – Woodhaven High School Java and Jazz Concert, 7 p.m.

Leaving the District in Exceptional Hands

WBSD superintendent Mark Greathead to retire after 15 years

By Kelsi Klein

After 15 years at the helm of Woodhaven-Brownstown School District (WBSD), superintendent Mark Greathead will be stepping into retirement on June 30, 2026.

Greathead's tenure has been defined by dedication and passion as he led the district through periods of growth, innovation and positive change.

According to the WBSD Board of Education, under

Although Greathead spent 33 years in the field of education, it wasn't originally part of his career plan.

"I initially saw myself going into accounting or something in the business world," he said. "But after my first year of college, I really reflected on it and had a handful of pretty inspiring teachers that helped me rethink my career choice."

Greathead took over as WBSD's superintendent in 2011 after building an 18-year foundation in Allen Park, where he taught and held various administrative roles.

When he joined WBSD, he not only brought a wealth of experience, but a vision for growth that he is confident his successor, Matthew Salah, will continue.

"I'm leaving the district in exceptional hands," Greathead said. "I'm very proud of the position we're leaving it in, but I'm also excited to see continued growth here under new direction."

During his time as superintendent, the district experienced notable progress and Greathead credits the support of the community, bond programs and initiatives for helping provide WBSD students and staff with an "exceptional educational environment that would rival anybody's."

A major focus of Greathead's leadership has been expanding academic opportunities for students through programming like STEM, arts, DCTC programs and more, along with the

integration of modern technology to ensure students are prepared for future success.

Equally important to Greathead is the district's early education initiatives.

Greathead's leadership, "the district has achieved significant milestones, including increased pupil enrollment, improved facilities, a stable general fund, and the grade reconfiguration."

"For the past few years, we've put a focus on an early education process for our families to build a strong relationship between home and school district well before kindergarten," he said.

By building early connections, Greathead believes students are better positioned for long-term achievement while also strengthening their sense of community and involvement within the district.

To Greathead, successful leadership is about much more than just measurable accomplishments in academics and operations, it's about prioritizing meaningful relationships with students, staff and families.

"To me, the connection is what this job is all about," he said.

Whether reading to students in elementary schools, making classroom visits or taking middle and high schoolers on ski trips, Greathead believes that being present makes all the difference.

As he reflects on his career, it's the people he'll miss most.

"The students, teachers, administration, support staff, cafeteria workers, bus drivers, security monitors – every single one of them plays a role and has a significant impact on providing the best educational experience

possible," Greathead said.

While Greathead doesn't have any immediate plans as he transitions into retirement, he's looking forward to taking life as it comes.

"I'll take pleasure in watching the snow fall and not worrying about having to make a decision related to it," he laughed.

As Greathead leaves WBSD well-

positioned for the future, his advice for the district is simple: stay connected and communicate.

"There's a wealth of opportunity for growth and support available through the district," he said. "But it really takes everybody working together, at home and at school, to get the most out of our educational system."

The Woodhaven-Brownstown School District is proud to offer Community Enrichment opportunities at Woodhaven High School for our local community!

These programs are free for Woodhaven or Brownstown residents, district employees and WBSD students and their families.

We look forward to welcoming our community into Woodhaven High School!

I Feel Lost Trying to Negotiate Life with my Vision Loss

Ask the Doctor

Q: Dr. Jacobi, I have been looking for help so I can function with my vision loss, but I feel I am on my own. I am getting injections into my eyes to control the damage from my diabetes and macular degeneration. I am grateful that has stabilized my condition, but I am struggling with reading and no one is able to help me. Also, it is questionable whether or not I will be able to continue to drive. I need help in order to stay independent. What are my options?

A: As you have found, few professionals really understand all the options that are available to help people with vision loss. Fortunately, there are "low vision specialists," who have access to a wealth of devices that have been designed specifically for someone like yourself.

As a low vision specialist, I believe that partially sighted patients must be made aware of all their low vision treatment options and that partially sighted patients can be at risk of becoming anxious/depressed when they are not presented with solutions that work.

There are many options available for you! As a low vision specialist, I am skilled in guiding low vision patients along this path to function independently whenever possible.

**Stop struggling with poor vision.

TASTE THE DIFFERENCE

Brownstown Local Market leaning more into food offerings this year

THE Brownstown Local Market is gearing up for a fresh new season, and if last year was any indication the community has plenty to look forward to!

Despite the couple of rainouts, last year's markets proved to be a lively success. Vendors lined up with everything from handmade goods to fresh produce, while attendees gathered to browse, snack and catch up!

This year, the Brownstown DDA is changing it up and shifting the market to a once-a-month format. This change is designed as a test run, giving vendors and attendees alike a chance to settle into a more focused, high-energy experience. These markets will feel like an event worth marking on the calendar with activities, music and so much more!

For the 2026 season the local market is planning to lean more heavily into food-centered items. Visitors can expect a stronger lineup of food vendors, making it just as much about tasting as it is about shopping. Whether you come hungry or just curious, there will be plenty to enjoy!

Each month will also bring its own theme. Things kick off on June 10, with an exciting Kids Day featuring extra kid-friendly activities and family fun. On July 15, the market takes a festive turn with Christmas in July, blending summer heat with holiday cheer. Then on August 12, health and fitness day will spotlight wellness, offering a chance to explore healthier living in an approachable, community centered way.

With a successful year behind it and a couple changes ahead, the Brownstown Local Market is shaping up to be more than just a place to shop but a place to gather, celebrate and experience something new each month.

BUILT FROM THE BACKYARD

Josh Bates grows Mutha Shuckers cornhole into a powerhouse

By Ryan M. Place

FOR nearly two decades, Josh Bates has called Brownstown home, but his impact reaches far beyond his neighborhood. What began as a casual backyard discovery has grown into one of the USA's most recognizable cornhole communities, Mutha Shuckers.

"I didn't even know what cornhole was at first," Bates said. "Back in 2008, I was at a family reunion in Ohio and my uncle said, 'Let's play cornhole'. I said, 'Great. What's that?' We played all day and I never stopped."

When he returned home, Bates got to work. He built his own boards with a jigsaw and made his first set of bags by hand.

"Almost immediately, neighbors started asking for sets," he said. "That's when I realized the potential."

Mutha Shuckers, a grassroots cornhole collective, was born. What began in driveways and parking lots eventually grew into a full operation with leagues, regional tournaments and national recognition.

"Our very first league was in the Taylor AC parking lot," Bates said. "Now we're running leagues at Kudos Taproom (Taylor), Grizzly's (Wyandotte), Joe's Prime Time (Gibraltar). It's gotten bigger every single year."

Today, Bates runs a Tuesday night amateur league at Kudos with 56 teams, while his winter leagues regularly draw between 50-80 teams each. Once a side project supported by a day job, cornhole is now his full-time job.

"Cornhole is a mental game," he said. "The more you play, the better you get. It's fun, just get out there and throw."

Bates has served as a director for both the American Cornhole Organization and the American Cornhole League. In 2025, he was ACL's Regional Director of the Year out of 300 directors nationwide.

"That meant a lot," he said. "It shows how much this area has grown and how strong our community is."

He's watched the game evolve over nearly two decades, especially with the rise of younger players.

"There's some kids now, 13-16 years old, who are insanely good," Bates said. "The talent level is unbelievable."

Mutha Shuckers has also gained attention through its boards and bags. The group's "313" bags have been featured on ESPN, helping establish its name beyond Michigan.

Still, for Bates, the biggest draw isn't competition. It's the people.

"The people are amazing. That's what keeps me going," he said. "It's the social aspect. You meet so many great people doing this."

Mutha Shuckers hosts the annual cornhole challenge at the Brownstown Summer Festival and does events at the Brownstown Rec Center. He's also a regular at Champions Sports Grill.

Outside of cornhole, Bates enjoys watching Pistons and Wolverines basketball, supporting his son's travel basketball team, bass fishing on the Detroit River, and spending time glamping with friends at Jackson's Greenwood Acres.

"It's all about family, community and doing what I love," he said.

From homemade boards to a national powerhouse, Josh Bates has built more than a league. He's built an entire scene that keeps on growing.

GLC Landscaping and Pools

Downriver's leader in professional landscaping By Kelsi Klein

In today's saturated market, homeowners are faced with countless options for their landscaping needs, making it hard to decide which company to choose.

GLC Landscaping and Pools makes that decision easy for clients who are concerned with elevating their property to its fullest potential.

By raising the standards for professionalism, process and design, GLC offers a full-service approach for all landscaping projects, big or small, and has the ability to bring clients' visions to life.

From lawn care and landscape design to retaining walls and brick paving, GLC offers residential and commercial landscape services that include project planning, design, construction, installation and ongoing maintenance.

For over two decades, the family-owned business has been an integral part of the Downriver community, providing superior craftsmanship, tailored communication and seamless execution at every stage of each project they take on.

"Everything we do here is design-led, professionally built and carefully managed," said owner Eileen Lucia. "We design and tailor each project to make it unique to what are customers' needs are."

While GLC specializes in large-scale outdoor landscape construction projects, like custom pools and full backyard transformations, they follow the same design-first process and professionalism with smaller landscape makeovers.

Rather than taking a one-size-fits-all approach to clients' projects, GLC has a special intake process that ensures each

project is managed with care and attention at every stage.

First, prospective clients book a call with GLC to share their goals, objectives and style preferences.

"We talk through project ideas, goals, scope of work and what the design process looks like for us," said Lucia. "We really want them to know exactly what to expect before we send a consultant to their home."

The next step is scheduling an on-site consultation, where the GLC design team assesses the customer's property in person, going over details, measurements and budget.

When the customer decides to engage in design services with GLC, the creative process begins.

"Once we're all in agreement on the design and vision of where we're going, we would have a proposal with pricing and a plan of action for the

construction to

take place," Lucia explained. "Whether it's a front yard makeover or a complete pool and outdoor living space in the back, we do the same process regardless of the size of the project."

GLC creates a seamless, stress-free experience from concept to completion – through expert consultation, professional 3D design and award-winning installation. With more than 25 years of experience and 2,000-plus projects completed, they are committed to delivering results built on quality, expertise and trust.

To learn more about the GLC difference or to get started on your outdoor project, visit www.glc landscapinginc.com or call (734) 472-2492.

BRICKS & MINIFIGS

A LEGO® lovers' paradise By Kelsi Klein

FOR over 15 years, Bricks & Minifigs has been the number one aftermarket LEGO® toy store where customers can buy, sell and trade all things LEGO®.

This spring, Rick and Jennifer Jackson opened a new Bricks & Minifigs franchise in Brownstown, drawing hundreds to its grand opening in April.

For LEGO® enthusiasts and families alike, the locally owned shop is a welcome addition to the Downriver area, offering a large selection of minifigures, bulk bricks, accessories and much more.

"In the last five to 10 years, people have been telling me that I should open a LEGO® store because I have so much stuff," said Rick Jackson. "And I thought it would be awesome to be able to do that one day."

With that idea in the back of his mind, a late-night, fateful YouTube scroll introduced him to the Bricks & Minifigs franchise about three years ago.

After reaching out to the company on a whim, Jackson decided to go all in.

"I said that if I was going to make the leap to open a store, having a franchise with an established name would be the way to go," he said.

Choosing to go the franchise route allows the Jacksons to focus less on logistics and more on customers.

At Bricks & Minifigs Downriver, customers will find a wide range of everything, from retired LEGO® sets and old minifigures to brand new sets and everything in between.

The Brownstown location's inventory reflects both the Jacksons' dedication and resourcefulness.

Most of the used inventory was originally procured by the owners through Facebook Marketplace, yard sales and flea markets.

Many of the store's minifigures were purchased through online sources like BrickLink, the world's largest online marketplace to buy and sell LEGO®, and other franchise-approved vendors.

What sets Bricks & Minifigs apart from other LEGO®

retailers is the in-store experience. When customers enter the store, they might just leave with the oddly

specific LEGO® piece they have been looking for for years.

"I love helping customers. I want everyone to have that love of LEGO® like I have," said Rick, who personally helps customers find and order exactly what they're searching for.

The Jacksons aren't the only LEGO® experts at Bricks & Minifigs Downriver – their team members also have a wealth of knowledge, specializing in Star Wars, Marvel, DC and other popular LEGO® themes.

Beyond retail, the store allows customers to sell and trade at any time during business hours for in-store credit or cash.

While already having established a strong customer base since opening, Bricks & Minifigs is dedicated to becoming a community hub with a dedicated event space onsite for birthday parties, meetings and group activities starting this summer.

"One of the things I really liked about this franchise is that it's not just about being a retail store," said Jennifer Jackson. "It's about focusing on your community and getting involved."

For more information, visit the Bricks & Minifigs Downriver Facebook page or call (734) 301-3245.

Mental Healthcare *is* Healthcare

Detroit Wayne Integrated Health Network works to reduce stigma, normalize treatment By Kelsi Klein

WHILE Mental Health Awareness Month is observed each May to reduce stigma and promote mental well-being, Detroit Wayne Integrated Health Network (DWIHN) is dedicated to providing free, confidential mental health and wellness support for Wayne County residents through a variety of accessible services all year round.

For Melissa Peters, DWIHN's director of outpatient services, her focus is to reduce stigma by normalizing mental health treatment and ensuring people know that help is available to them.

Peters explained that sometimes people don't have the support they need and one of the stronger indicators of someone being successful with where they want to be is to have a solid support network.

Because not everyone has support at home, Peters emphasizes the importance of the community-based, wraparound care that DWIHN offers.

A major part of DWIHN's mission to provide care is making it more accessible. Through their centralized call center, individuals can begin the process of receiving services with just one phone call.

"I think the hardest part is making the phone call," Peters said. "From there, there's going to be staff and professionals to help guide them the rest of the way in a warm, supportive way."

DWIHN provides outpatient services for individuals of all ages, from infants to older adults.

Peters explained that their infant and early childhood program for children aged 0 to 5 is a home-based service that wraps around families.

For children aged 6 through 21, services include outpatient therapy with youth peer support specialists and parent support partners. Home-based services are also provided for families that have children who need more support.

"Kids with higher acuity needs or who are coming out of a hospital setting or are at risk of hospitalization can

receive in-home services that provide a more intensive level of support to hopefully intervene before any other steps need to occur," Peters said.

For the adult population, DWIHN offers therapists, case managers, peer support and peer recovery support. Psychiatric services are also available for both children and adults.

According to Peters, just as important as making mental

healthcare accessible is changing how people think about mental healthcare itself.

"It shouldn't feel any different to come get treatment for depression or anxiety or bipolar than it does for diabetes or heart disease," she said. "It's medical treatment with evidence-based practices that help you get better."

The shift from not just awareness but to

normalization is a key component of reducing stigma. Mental healthcare is healthcare.

Education also plays a key role, especially when it comes to working with families.

"It's not just the child in treatment, it's the family unit," Peters said. "We're helping them understand what we're doing, why it works and how they can support their loved one."

She emphasized that just like in the medical field and the physical health world, evidence-based practices with research behind them show that differences are made when treatment is consistent and engaged.

Outside of clinical care, Peters encourages individuals to take small, proactive steps to support their mental health at home, such as practicing mindfulness to help manage stressful situations before they become overwhelming.

Those seeking mental health services can call DWIHN's 24-hour helpline at (800) 241-4949 or visit www.dwihn.org for more information.

Parks and Recreation

Brownstown Recreation Department Office

Hours: Monday-Thursday
8 a.m.-6 p.m.

Rentals taken until 5:30 p.m.

Summer Carnival Program – New!

In partnership with the Woodhaven Brownstown School District

Get ready to turn up the summer fun! We are thrilled to invite families to the Summer Carnival Program – a series of high-energy, community-building events designed to keep the learning alive and the smiles even wider while school is out.

Whether you're looking to keep your student's brain sharp or just want a place to let the kids burn off some energy, we've got something for everyone. Mark your calendars for these five big days of sun and excitement:

- June 24, 10 a.m.-12 p.m.
- July 6, 10 a.m.-12 p.m.*
- July 21, 10 a.m.-12 p.m.
- August 12, 10 a.m.-12 p.m.
- August 19, 10 a.m.-12 p.m.

All dates at the Brownstown Event Center, 23345 King Road except July 6 at Thorn Park.

What's Happening at the Carnival?

We've packed the schedule with activities for all ages:

- Early On Music Class: A high-energy, rhythmic experience specifically designed for our littlest warriors.
- "Thinkstretch" Check-ins: Bring your workbooks! We're hosting dedicated check-in stations to celebrate your student's progress and keep those academic muscles flexed.
- School-Aged Fun: From interactive games to "much more" surprises, there are plenty of activities tailored to keep older kids engaged and entertained.
- "Young Athletes" Sessions: A couple dedicated sessions of this inclusive sports play program to get those hearts pumping and motor skills moving!

Don't let the summer slide get in the way of a good time. Come join your friends, meet your teachers and make some memories at the WBSD Summer Carnival!

Parks & Rec continued on page 28

SENIOR PROGRAMS

All registration and programs held at the Brownstown Event Center unless otherwise noted. When renovations are complete, programs will return to the Community Center.

Senior Activities And Events

Brownstown and surrounding community residents 50 and over are welcome to participate in a wide variety of programs, events and trips. Check out our monthly calendar at <https://brownstown-mi.org>.

SMART SENIOR Transportation

Residents of Brownstown can take advantage of the Senior Bus Transportation services through a SMART Specialized Services Grant. This service is available to disabled residents of Brownstown or persons 60 years of age or older. The cost is \$1 for shopping trips (Meijer, Kroger, Target, Aldi, Walmart, and Trentwood Market) or occasional educational and social field trips. You can apply for the program by completing an application and submitting a copy of your driver's license or state ID at the Event Center.

Now offering medical trips, a \$3 roundtrip ride to a medical or dental appointment with a seven-day advance registration on Monday-Thursday between 9 a.m. and 1 p.m. Approved residents can call (734) 675-0920 to register for transportation within our service area.

The Senior Nutrition Program

You must meet the qualifications for these programs.

Sponsored by Wayne County, congregate meals are served at noon Monday through Thursday at the Event Center. There is a suggested donation of \$4 per meal. Sign up to join us by calling Joanie at (734) 675-5902, Monday-Thursday between 9 a.m. and 1 p.m.

Meals on Wheels home delivery is also available Monday-Thursday for seniors. You must call the Lajoy Group at (734) 259-7584 Monday-Thursday 9 a.m.-12 p.m. to sign up or for more information.

Monthly Activities

- **Travel Club** – First Monday of each month at 11 a.m., with three vendors presenting trips. Representatives from Bianco, Premiere World Discovery and Custom Holidays will be in attendance.
- **Pleasure Seekers** – Third Thursday of each month, 1:00 p.m. potluck lunch followed by Bingo. Annual membership is \$10. Accepting new members!
- **Brownstown Book Buffs Book Club (Trenton Library during the Community Center Renovation)** – Second Thursday of each month from 10 a.m. to 12:00 p.m., with coffee and cookies.

- **Game Day** – Second Thursday of each month at 1 p.m. Enjoy a light lunch and beverages while you play board games and cards of your choice. Sign up in advance and pay \$4 at the Event Center.
- **Breakfast Bingo** – Third Monday of every month at 9:00 a.m. Brownstown firefighters cook pancakes and sausage. Sign up in advance: \$2. Bingo is \$3 and paid for at the breakfast.
- **Taste of Brownstown** – Fourth Monday of each month at 5 p.m. Sign up in advance. We will visit different local restaurants each month.
- **Feisty Red Hats Club** – Second Monday of each month. This group meets offsite during the Community Center renovation. If you are interested in having fun, going to lunch, plays, teas, and more, then check out the Feisty Red Hat Club, call for more info.

Weekly Activities

- **Beginner Line Dance** with Marion Baxter Tuesdays at 1 p.m. \$2 for drop-in class. Great exercise and a fun way to meet people!
- **Senior Exercise Drop-In-Free!** – Tuesday, Thursday and Friday from 10:00 a.m. to 11:00 a.m. Once back in the Community Center, class will be Monday-Thursday. No Fridays.

Special Events

Held at the Event Center unless otherwise noted.

- **Tuesday, May 26** – Annual Senior Memorial Day Picnic at the Event Center. 1-3 p.m. Free, requires registration.
- **Saturday, June 13** – Wayne County Senior FunFest, 11 a.m. to 2 p.m. Bus departs around 10 a.m. Free, requires registration in advance.
- **Thursday, June 25** – Senior Garden Party. Themed lunch and music at Event Center, 1 p.m. Fee \$15, requires registration in advance.
- **Wednesday, July 1** – Brownstown Seniors America's 250 Independence Celebration. Lunch and music. Fee \$15, register in advance.
- **Thursday, July 30** – Melodies at the Museum with Maria Meirelles. Time TBD for bus ride. Lunch at Pegasus with a stop at Astoria Bakery, cost on your own. Fee \$10, require registration in advance.
- **August 10-14** – Downriver Senior Olympics, Lincoln Park. Register at the Event Center beginning the first week of June.
- **August 14 & 15** – Brownstown Summerfest – Senior Bingo. Open to the public, time TBD.

Email info@customholidaysonline.com or call (313) 388-0448 to sign up.

Custom Holidays offers a variety of travel experiences that can be scheduled by calling them directly and mentioning that you are a member of the Brownstown Travel Club. Alternatively, you can complete the lower portion of the Custom Holidays travel flyer and submit it, along with your check or credit card details, to the front desk staff at the Brownstown Community Center.

Check out Custom Holidays website for one day trips, multi-day trips, cruises, and more at <https://customholidaysonline.com>.

FACILITY RENTALS

The Brownstown Community Center and the Thorn Park Shelter are not currently taking reservations due to renovations. We plan to open rentals for 2026 and 2027 sometime soon. Event Center reservations are limited during this time. Please call for up-to-date information.

Brownstown Event Center

Located at 23345 King Road, the Event Center is an elegant location to hold showers, graduation parties or even weddings. During the in-season time a large outdoor area provides a beautiful space for wedding ceremonies. In the offseason, it provides a beautiful backdrop for any special occasion.

Thorn Park Shelter Rental*

Not available until renovations are complete

A \$200 rental fee plus \$200 returnable deposit is required. Reserving the shelter does not guarantee the use of the splash pad. Thorn Park Shelter rentals are available for Brownstown residents only. Renter must remain present at party. If the shelter is not reserved, it will be available for public users of the splash pad and park. Only reserved parties are allowed in the shelter. This will be enforced by our park supervisor and staff.

Rentals must be done in person at the Community Center. No rentals Memorial Day weekend, Fourth of July or Labor Day weekend. Alcohol is not permitted in the shelter or the park. Please see list of rules posted online and at Thorn Park Shelter.

Brownstown Community Center*

Not available until renovations are complete

Located at 21311 Telegraph, the Brownstown Community Center has been the place for Downriver special events for many years. The Community Center has a total of six rooms for individual or combination rent. A full-service kitchen is also available for rent to those with a food handling license.

Whether you rent all rooms for your large wedding or a single room for a birthday, shower, anniversary or meeting, the Community Center is sure to have an affordable combination that will suit a variety of needs.

Meaningful Connections

Brownstown DDA Resource Fair brings big opportunities to small businesses

THE Brownstown Downtown Development Authority recently welcomed Tech Town Detroit for the Brownstown Resource Fair. The event focused on connecting local businesses with the tools and support they need to grow.

Hosted as part of the Wayne County Small Business Initiative in partnership with TechTown Detroit, the event took place at Let Love Rule Screen Printing event space and delivered an afternoon filled with practical insights, one-on-one guidance and meaningful connections.

The Brownstown Resource Fair brought together a variety of organizations dedicated to small business success, including Develop Downriver, the Southern Wayne County Regional Chamber, the U.S. Small Business Administration, and the MOVE America Apex Accelerator. Representatives from these groups were on hand to share information about funding opportunities, business development programs and regional support services available to entrepreneurs.

Attendees had the opportunity to explore resources tailored to businesses at every stage, from startups just getting off the ground to established companies looking to expand.

One of the highlights of the event was the opportunity for participants to sit down with TechTown strategists for brief, one-on-one coaching sessions. These personalized conversations gave business owners the chance to ask questions, get feedback and walk away with actionable ideas specific to their needs.

Brownstown Trustee Patrick Killian talks with Tech Town Detroit staff.

SWCRC Senior Director of Membership Engagement Monique Reister speaks with Jonathan Stone and Jeff Karpinski from Greater Detroit Auto Auction.

From marketing strategies to operational improvements, the sessions provided immediate value and left many attendees feeling more confident about their next steps.

Beyond the educational component, the event created a welcoming space for networking and collaboration. Business owners connected with one another, exchanged ideas and began forming relationships.

Events like the Brownstown Resource Fair highlight the importance of local collaboration in strengthening our small business community by bringing together organizations, resources and entrepreneurs in one place. The initiative continues to make it easier for businesses to find the support they need to succeed.

As the Brownstown DDA continues to invest in its business community, opportunities like this serve as a reminder that help is always available.

Success Virtual Learning Center offers flexible options for Downriver students

By Kelsi Klein

SUCCESS Virtual Learning Centers of Michigan's Taylor Downriver location continues to provide an alternative path for high school students, offering flexible, personalized education options designed to meet a wide range of academic needs.

Open to all students

While the Downriver location is physically located in Taylor, enrollment is not limited to those within the Taylor School District boundary.

"We want families to know we're available to all Downriver students," Nowicki said. "You don't have to go through an out-of-district process to attend."

Success Virtual Learning Centers of Michigan accepts expelled or suspended students following a review of their behavior records, and students with an IEP or 504 plan. Their vision is to "be a place where every student, regardless of their past, feels 100 percent accepted and cared for."

How it works

Success Virtual Learning Centers of Michigan was designed to be a non-traditional education option for students ages 14-21 who may not thrive in a traditional classroom setting.

With 10 locations across the state, these centers have helped thousands of students stay on track academically and graduate at their own pace with individualized support.

The accredited, tuition-free public school allows students to complete high school courses on their own schedule and is an 18-credit Michigan Merit Curriculum only program without elective requirements.

Each student receives a customized learning plan tailored to their goals, schedule and academic standing. Certified teachers are available for one-on-one assistance, both in person at the center and virtually, ensuring students have consistent guidance throughout their coursework.

Online learning extras

Opportunities for hands-on experiences through internships, mentorships, field trips, clubs, career fairs and extracurricular activities are also provided to students who choose to be more involved.

Different levels of support are available to students as needed including counseling, social and emotional

programming, intervention services, special education services, career advisors and much more.

Beyond academics, Success Virtual Learning Center also provides incentives for student success. Those in good academic standing may be eligible for free driver's training, an additional benefit meant to help support students both in and out of the classroom.

SUCCESS
VIRTUAL LEARNING
Centers of Michigan

Credit recovery

In addition to standard school-year programming, Success Virtual Learning Centers of Michigan offers a free summer credit recovery program.

"We specialize in helping students who are behind in credits or potentially unable to graduate on time to graduate on time or as close to it as possible," Nowicki said. "We're a good fit for kids who just don't fit the mold of regular school."

Open to both enrolled students and those attending local districts with counselor approval, the six-week program provides an opportunity to catch up or get ahead without the financial burden of traditional summer school.

Families interested in enrolling can visit the Taylor Downriver center at 24680 Eureka Road from 8 a.m.-4 p.m., call (734) 992-6914 or visit www.successmichigan.org for more information.

Protecting a Rare Natural Treasure in Brownstown: The Sibley Prairie

Tucked within Brownstown Township lies one of Michigan's most extraordinary natural landscapes: Sibley Prairie. Spanning 440 acres, this rare ecosystem is one of the last remaining lake plain prairies in the state, a habitat that has nearly disappeared from southeast Michigan. Sibley Prairie is the largest and highest-quality example of its kind, supporting a diverse mix of prairie, wetland, and forest habitats. It has been identified as the top site among dozens surveyed across Michigan.

Among its ecological highlights:

- 15 threatened or special concern plant species
- The state-threatened Duke's skipper butterfly
- An exceptional level of biodiversity

There is strong momentum to protect it. Brownstown Township is pursuing funding through the Michigan Department of Natural Resources (DNR) to acquire and preserve the property, with additional support possible through statewide conservation programs.

If protected, Sibley Prairie would expand opportunities for:

- Birdwatching and wildlife observation
- Outdoor recreation
- Environmental education

Beyond its beauty, the prairie provides critical environmental benefits:

- Reduces flooding risks
- Improves water quality by filtering runoff
- Supports climate resilience by storing carbon and moderating temperatures

In a rapidly developing region, spaces like this are essential infrastructure, not luxuries.

Opportunities to preserve land of this scale and quality are rare. Protecting Sibley Prairie would safeguard a unique ecosystem while expanding access to green space in Wayne County.

The future of Sibley Prairie depends on community awareness and action. For Brownstown Township and the Downriver region, this is a chance to protect a natural legacy and ensure future generations can experience one of Michigan's last remaining prairies. KICKSTART YOUR CHILD'S EDUCATIONAL JOURNEY!

Now enrolling Kindergarten and Preschool students for the 2026-2027 school year.

When it comes to your child's early education, you have options. See for yourself why Summit Academy North is the best choice! With our comprehensive curriculum, highly experienced teachers, and safe learning environment, we prepare our youngest students for a lifetime of success.

Individual Learning

Small class sizes allow our teachers to work closely with students and ensure each child is appropriately challenged.

Comprehensive Curriculum

Students receive a top-flight early education in science, technology, reading, engineering, arts, and math.

1:1 Technology

Each student has access to technologies that bring learning to life.

Cultural Appreciation

We celebrate the different cultures that make our school and community so bright!

Family Friendly

We're committed to partnering with families, so please volunteer!

Logistically Manageable

Bus transportation for K-12 students is available at local hubs.

ENROLLMENT IS NOW OPEN

Secure your child's spot for the 2026-2027 school year.

Our program is 100% tuition-free and available to students throughout Southeast Michigan. Enrollment is now open!

A DEDICATED PARTNER

Advantage One Credit Union Strengthens Community Through Outreach and Support

By Kelsi Klein

ADVANTAGE ONE Credit Union has not only been a staple financial institution in the Brownstown area for years, but also a dedicated community partner.

Over the years, the credit union has built a strong reputation as a committed supporter of Downriver schools, teachers and students, consistently investing in initiatives that benefit students both inside and outside the classroom. From sponsoring school programs like robotics teams, softball teams and marching bands to donating raffle baskets and branded items for fundraisers, Advantage One plays an active role in strengthening a sense of community across Downriver schools.

One of the credit union's major education initiatives is its student scholarship program designed to provide financial aid to individuals pursuing further education. Each spring, Advantage One awards four \$2,500 scholarships to traditional college or university students, trade school attendees and adults continuing their education. One of the scholarships is reserved specifically for an Advantage One member, while another is designated specifically for an adult learner.

In recent years, the credit union has expanded its educational impact through a popular teacher grant program. Now in its third year, the campaign allows local teachers to share how they would use a \$500 grant to benefit their classroom. Ten winners are selected annually, and more than 100 teacher grant applications were submitted last year alone.

"Teacher grant time is my favorite time of year," said Community Outreach Coordinator Lindsay Dennis. "Teachers spend so much of their own money and time on their classrooms, and they don't always get the recognition they deserve, so I love seeing how we can help meet the needs that these teachers have and it brings instant tears

to my eyes to see how happy they are."

Beyond formal programs and initiatives, Advantage One is dedicated to supporting educators and students year-round. Last fall, after learning that some local teachers were personally covering the costs of snacks for students who came to school without adequate food, the credit union stepped in to provide classroom snacks, truly personifying their philosophy of "people helping people."

The same spirit of giving extends into Advantage One's daily operations as they prioritize giving back to the broader community. For the past three years, Advantage

One has donated \$5,000 to the Taylor School District's Resource Closet (formerly known as Blessings in a Backpack), which helps provide essential items and support to local families in need.

Financial education is another cornerstone of Advantage One's community outreach. The credit union teaches essential money management skills through interactive reality fairs and classroom presentations with hands-on experiences that help students build financial literacy

skills that will last a lifetime.

Additionally, the credit union volunteers annually at the Taylor Schools Special Olympics, works with Sleep in Heavenly Peace to help build beds for children in need and is actively involved with organizations like the Downriver West Kiwanis Club and the Woodhaven-Brownstown Rotary Club.

"I'm very blessed to have a job where I can see the difference we make in our community," Dennis said.

To learn more about Advantage One Credit Union, visit www.myaocu.com or call the Brownstown branch at (734) 676-7000.

2025 Drinking Water Quality Report

MARCH 2026 – WQR NO. 28

ATTENTION: THIS IS AN IMPORTANT REPORT ON WATER QUALITY AND SAFETY

The Great Lakes Water Authority (GLWA) and the Brownstown Township Department of Public Works want you to know your tap water is safe to drink and that it meets or surpasses all federal and state standards for quality and safety.

Drinking water quality is important to our community and the region. The Charter Township of Brownstown and the Great Lakes Water Authority (GLWA) are committed to meeting state and federal water quality standards including the Lead and Copper Rule. With the Great Lakes as our water source and proven treatment technologies, the GLWA consistently delivers safe drinking water to our community. Brownstown Township operates the system of water mains that carry this water to your home's service line. This year's Water Quality Report highlights the performance of GLWA and Brownstown Township water professionals in delivering some of the nation's best drinking water. Together, we remain committed to protecting public health and maintaining open communication with the public about our drinking water.

How Do We Know The Water Is Safe To Drink?

GLWA treatment facilities operate 24 hours a day, seven days a week. The treatment process begins with disinfecting the source water with chlorine to kill harmful microorganisms that can cause illness. Next, a chemical called Alum is mixed with the water to remove fine particles that make the water cloudy or turbid. Alum causes the particles to clump together and settle to the bottom. Fluoride is also added to protect our teeth from cavities and decay.

The water then flows through fine sand filters called beds. These filters remove even more particles and certain microorganisms that are resistant to chlorine. Finally, small amounts of phosphoric acid and chlorine are added to the treated water just before it leaves the treatment plant. The phosphoric acid helps control the lead that may dissolve in water from household plumbing systems. The chlorine keeps the water disinfected as it travels through water mains to reach your home.

In addition to a carefully controlled and monitored treatment process, the water is tested for a variety of substances before treatment, during various stages of treatment, and throughout the distribution system. Highly

qualified trained staff test hundreds of samples each week in GLWA-certified laboratories. GLWA water not only meets safety and health standards, but also ranks among the top 10 in the country for quality and value.

Detroit River Intakes

Your source water comes from the Detroit River, situated within the Lake St. Clair, Clinton River, Detroit River, Rouge River, Ecorse River, watersheds in the U.S. and parts of the Thames River, Little River, Turkey Creek, and Sydenham watersheds in Canada. The Michigan Department of Environmental Quality in partnership with the U.S. Geological Survey, the Detroit Water and Sewerage Department, and the Michigan Public Health Institute performed a source water assessment in 2004 to determine the susceptibility of GLWA's Detroit River source water for potential contamination. The susceptibility rating is based on a seven-tiered scale and ranges from very low to very high determined primarily using geologic sensitivity, water chemistry, and potential contaminant sources. The report described GLWA's Detroit River intakes as highly susceptible to potential contamination. GLWA's Southwest water treatment plant that draws water from the Detroit River has historically provided satisfactory treatment and meets drinking water standards.

GLWA has initiated source-water protection activities that include chemical containment, spill response, and a mercury reduction program. GLWA participates in a National Pollutant Discharge Elimination System permit discharge program and has an emergency response management plan. GLWA has an updated Surface Water Intake Protection plan for the Fighting Island Intake. The plan has seven elements that include: roles and duties of government units and water supply agencies, delineation of a source water protection areas, identification of potential sources of contamination, management approaches for protection, contingency plans, siting of new water sources, public participation, and public education activities. If you would like to know more information about the Source Water Assessment Report, please contact GLWA at (313) 926-8127.

The Charter Township of Brownstown and the Great Lakes Water Authority are committed to safeguarding our water supply and delivering the highest quality drinking water to protect public health. Please contact us with any questions or concerns about your water.

Water Report continued on page 42

Key to the Detected Contaminants Table

Symbol	Abbreviation	Definition/Explanation
AL	Action Level	The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.
°C	Celsius	A scale of temperature in which water freezes at 0° and boils at 100° under standard conditions.
>	Greater than	
HAA5	Haloacetic Acids	HAA5 is the total of bromoacetic, chloroacetic, dibromoacetic, dichloroacetic, and trichloroacetic acids. Compliance is based on the total.
Level 1	Level 1 Assessment	A Level 1 assessment is a study of the water system to identify potential problems and determine (if possible) why total coliform bacteria have been found in our system.
LRAA	Locational Running Annual Average	The average of analytical results for samples at a particular monitoring location during the previous four quarters.
MCL	Maximum Contaminant Level	The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.
MCLG	Maximum Contaminant Level Goal	The level of contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow a margin of safety.
MRDL	Maximum Residual Disinfectant Level	The highest level of disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
MRDLG	Maximum Residual Disinfectant Level Goal	The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLG's do not reflect the benefits of the use of disinfectants to control microbial contaminants.
n/a	not applicable	
ND	Not Detected	
ng/L	Nanograms per liter	The ng/L is equivalent to nanogram per liter. A nanogram = 1/1,000,000 milligram.
NTU	Nephelometric Turbidity Units	Measures the cloudiness of water.
pCi/L	Picocuries Per Liter	A measure of radioactivity
ppb	Parts Per Billion (one in one billion)	The ppb is equivalent to micrograms per liter. A microgram = 1/1000 milligram.
ppm	Parts Per Million (one in one million)	The ppm is equivalent to milligrams per liter. A milligram = 1/1000 gram.
RAA	Running Annual Average	The average of all analytical results for all samples during the previous four quarters.
SMCL	Secondary Maximum Contaminant Level	
TT	Treatment Technique	A required process intended to reduce the level of a contaminant in drinking water.
TTHM	Total Trihalomethanes	Total Trihalomethanes is the sum of chloroform, bromodichloromethane, dibromochloromethane and bromoform. Compliance is based on the total.
µohms	Microohms	Measure of electrical conductance of water

WATER QUALITY DATA TABLE

The tables below list all of the drinking water contaminants that we detected during the calendar year of this report. The presence of contaminants in the water does not necessarily indicate that the water poses a health risk. Unless otherwise noted, the data presented in this table is from testing done in the calendar year of the report. The EPA and/or the State require us to monitor for certain contaminants less than once a year because the concentrations of these contaminants do not change frequently.

Southwest Water Treatment Plant 2025 Regulated Detected Contaminants Table

2025 Inorganic Chemicals - Annual Monitoring at Plant Finished Tap								
Regulated Contaminant	Test Date	Unit	Health Goal MCLG	Allowed Level MCL	Highest Level Detected	Range of Detection	Violation	Major Sources in Drinking Water
Fluoride	2-11-2025	ppm	4	4	0.50	n/a	no	Erosion of natural deposit; Water additive, which promotes strong teeth; Discharge from fertilizer and aluminum factories.
Nitrate	2-11-2025	ppm	10	10	0.35	n/a	no	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits.

Lead and Copper Monitoring at the Customer's Tap in 2025								
Regulated Contaminant	Unit	Year Sampled	Health Goal MCLG	Action Level AL	90 th Percentile Value*	Range of Individual Samples Results	Number of Samples Over AL	Major Sources in Drinking Water
Lead	ppb	2025	0	12	0	0 ppb – 14 ppb	1	Lead services lines, corrosion of household plumbing including fittings and fixtures; erosion of natural deposits.
Copper	ppm	2025	1.3	1.3	0.1 ppm	0.0 ppm – 0.2 ppm	0	Corrosion of household plumbing systems; Erosion of natural deposits.

* The 90th percentile value means 90 percent of the homes tested have lead and copper levels below the given 90th percentile value. If the 90th percentile value is above the AL additional requirements must be met.

2025 Disinfection Residual - Monitoring in the Distribution System								
Regulated Contaminant	Test Date	Unit	Health Goal MRDLG	Allowed Level MRDL	Highest Level RAA	Range of Quarterly Results	Violation	Major Sources in Drinking Water
Total Chlorine Residual	2025	ppm	4	4	0.71	0.59-0.79	no	Water additive used to control microbes

2025 Disinfection By-Products - Stage 2 Disinfection By-Products Monitoring in the Distribution System								
REGULATED CONTAMINANT	Test Date	Unit	Health Goal MCLG	Allowed Level MCL	Highest Level LRAA	Range of Quarterly Results	Violation	Major Sources in Drinking Water
Total Trihalomethanes (TTHM)	2025	ppb	n/a	80	50	11 ppb – 50 ppb	no	By-product of drinking water chlorination
Haloacetic Acids (HAA5)	2025	ppb	n/a	60	20	2.7 ppb – 20 ppb	no	By-product of drinking water chlorination

Southwest Water Treatment Plant 2025 Regulated Detected Contaminants Table

2025 Turbidity - Monitored Every 4 Hours at the Plant Finished Water Tap			
Highest Single Measurement Cannot Exceed 1 NTU	Lowest Monthly % of Samples Meeting Turbidity Limit of 0.3 NTU (minimum 95%)	Violation	Major Sources in Drinking Water
0.1 NTU	100%	no	Soil Runoff
Turbidity is a measure of the cloudiness of the water. We monitor it because it is a good indicator of the effectiveness of our filtration system			

Regulated Contaminant	Treatment Technique	Typical Source of Contaminant
Total Organic Carbon ppm	The Total Organic Carbon (TOC) removal ratio is calculated as the ratio between the actual TOC removal and the TOC removal requirements. The TOC is measured each quarter and because the level is low, there is no requirement for TOC removal.	Erosion of natural deposits

Regulated Contaminant	Test Date	Unit	Allowed Level MCL	Highest Level Detected	Range of Detection	Violation	Major Sources in Drinking Water
Perfluorooctanoic acid (PFOA)	03-11-2025	ng/L	4	2	ND-2	no	Industrial manufacturing sites, fire-fighting foams (AFFF) used at airports/military bases, and waste management facilities like landfills.

2025 Special Monitoring						
Contaminant	Test Date	Unit	MCLG	MCL	Highest Level Detected	Source of Contaminant
Sodium	2-11-25	ppm	n/a	n/a	6.8	Erosion of natural deposits

These tables are based on tests conducted by GLWA in the year 2025 or the most recent testing done within the last five calendar years. GLWA conducts tests throughout the year only tests that show the presence of a substance or require special monitoring are presented in these tables. The State allows us to monitor for certain contaminants less than once per year because the concentrations of these contaminants are not expected to vary significantly from year to year. The data is representative of the water quality, but some are more than one year old.

Great Lakes Water Authority (GLWA) is required to notify water users of any unresolved significant deficiencies identified by the Michigan Department of Environment, Great Lakes, and Energy, Drinking Water and Environment Health Division (EGLE). Below is the status of significant deficiencies in the GLWA water system identified by EGLE:

Date Identified by EGLE	Description	Compliance Agreement Deadline	Status
08-02-2022	Improper rapid mixing and coagulant feed location at the Southwest water plant	12-31-2027	Coagulant feed was completed 12/11/2024. Rapid mix is in the design phase. <i>On track to meet the deadline.</i>
08-02-2022	Inoperable flocculation equipment at the Southwest water plant	07-31-2031	A contractor for the design portion of the project will be awarded shortly. <i>On track to meet the deadline.</i>

Additional Information

In order to ensure that tap water is safe to drink, the EPA prescribes regulations that limit the amount of certain contaminants in water provided by public water systems. Food and Drug Administration regulations establish limits for contaminants in bottled water, which provide the same protection for public health. Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water hot line (800-426-4791)

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

- **Microbial contaminants**, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- **Inorganic contaminants**, such as salts and metals, which can be naturally occurring or result from urban storm water runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.
- **Pesticides and herbicides**, which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses.
- **Organic chemical contaminants**, including synthetic and volatile organic, which are by-products of industrial processes and petroleum production, can also come from gas stations, urban storm water runoff, and septic systems.
- **Radioactive contaminants**, which are naturally occurring or may be the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. The Food and Drug Administration (FDA) regulations establish limits for contaminants in bottled water, which must provide the same protection for "public health." Some people may be more vulnerable to contaminants in

drinking water than the general population. Immuno-compromised persons such as a person with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

Information About Lead

There is no safe level of lead in drinking water. Exposure to lead in drinking water can cause serious health effects in all age groups. Infants and children can have decreases in IQ and attention span. Lead exposure can lead to new learning and behavior problems or exacerbate existing learning and behavior problems. The children of persons who are exposed to lead before or during pregnancy can have increased risk of these adverse health effects. Adults can have increased risks of heart disease, high blood pressure, kidney, or nervous system problems.

Lead can cause serious health effects in people of all ages, especially pregnant people, infants (both formula-fed and breastfed), and young children. Lead in drinking water is primarily from materials and parts used in service lines and in home plumbing. Brownstown Township is responsible for providing high quality drinking water and removing lead pipes but cannot control the variety of materials used in the plumbing in your home. Because lead levels may vary over time, lead exposure is possible even when your tap sampling results do not detect lead at one point in time. You can help protect yourself and your family by identifying and removing lead materials within your home plumbing and taking steps to reduce your family's risk. Using a filter, certified by an American National Standards Institute accredited certifier to reduce lead, is effective in reducing lead exposures. Follow the instructions provided with the filter to ensure the filter is used properly. Use only cold water for drinking, cooking, and making baby formula. Boiling water does not remove lead from water. Before using tap water for drinking, cooking, or making baby formula, flush your pipes for several minutes. You can do this by running your tap, taking a shower, doing laundry or a load of dishes. If you have a lead service line or galvanized requiring replacement service line, you may need to flush your pipes for at least 5 minutes to flush water from both your

home plumbing and the lead service line. If you are concerned about lead in your water and wish to have your water tested, contact the Brownstown Water Department at 734-675-4000 for available resources. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available at <https://www.epa.gov/safewater/lead>.

Service Lines

Brownstown Township has 10,037 service lines. No lines are known to be lead and 80 are not known. The Complete Distribution System Materials Inventory can be found at <https://bit.ly/CDSMI>.

Other Monitoring

In addition to testing we are required to perform, our water system voluntarily tests for hundreds of additional substances and microscopic organisms to make certain our water is safe and of the highest quality. For a more detailed report, contact the GLWA Water Quality Division at (313) 926-8102.

Helpful Hints On Prevention Of Water Waste

- **Toilet Leaks:** This is the most common water waster but tends to be less noticeable than faucet leaks. To determine if your toilet is leaking, look at the toilet bowl after the tank has stopped filling. If water is still running, your toilet is leaking. Most leaks occur at the overflow pipe or at the plunger ball inside the tank. To locate a leak, take the tank lid off and flush. The water level should come up to about a half inch or so below the overflow pipe. Adjust the float level control screw, if necessary, so the valve shuts off the water at that level. If the valve itself is leaking you may need a plumber to fix it. Although you may not hear or see water running, your toilet could have a silent leak. To test for a silent leak, drop a little food coloring into the tank. DO NOT FLUSH. Wait for about 10 – 30 minutes. If food coloring appears in the bowl, you have a silent leak.
- **Lawn Watering:** If you have an automatic sprinkler system, check the heads periodically. Be sure they haven't shifted direction, causing water to be sprayed everywhere except on the lawn. Do your lawn sprinkling early in the morning, between 12:00 am and 5:00 am, when water demand is low. After about 10:00 a.m., both heat and evaporation go up, robbing the lawn of moisture. Don't water your lawn too much.
- **Running Water:** When brushing your teeth, washing your hair, shaving, rinsing vegetables, washing dishes etc., don't let the water run. You are probably using at least one (1) gallon a minute, most of it wasted.

- **Kitchen:** Use the automatic dishwasher for full loads only. Keep a bottle of drinking water in the refrigerator. Running tap water to cool it off for drinking water is wasteful. Check faucets and pipes for leaks. Leaks waste water 24 hours a day, seven days a week and often can be repaired with only an inexpensive washer.
- **Outside:** Many beautiful trees and plants thrive with far less watering than other species. Use a broom, not a hose, to clean driveways and sidewalks. Don't run the hose while washing your car. Clean the car with a pail of soapy water. Use the hose just to rinse it off. Check for leaks in pipes, hoses, faucets, and couplings. Leaks outside the house may not seem as bad since they're not as visible, but they can be just as wasteful as leaks inside. Check frequently and keep them drip-free.

Think about water. It's yours for the taking, 24 hours a day. All you have to do is turn on a faucet. But where does it come from? The water you use doesn't appear magically. It's a carefully manufactured product clean, safe and piped directly into your home. It is a valuable resource that shouldn't be wasted. Water will recycle itself eventually. But the high-quality water that we need and expect in our homes is not an infinite resource. Besides, you're paying for every drop whether it's used or wasted. So conservation can benefit your pocketbook, too.

Help Save Water – Avoid 6 to 10

The Charter Township of Brownstown is seeking resident's cooperation to keep the increase in our Water Rates to a minimum. The major factor that contributes to the rate increase from our supplier, the Great Lakes Water Authority is our "Peak Demand" requirements. Demand for beautiful, lush green lawns has increased. For some unknown reason, sprinkler installers and residents have selected their lawn irrigation systems to automatically 'water' during the periods of highest water usage!

How can you assist? The greatest demand for water is between the hours of 6 and 10 in the morning, and then again from 6 to 10 in the evening! Drive down the street and you'll be amazed to see that this is also the most popular time to 'water' the lawn! It is suggested that you voluntarily water either on the 'odd' or 'even' days that correspond with your street address! Even more important-Totally avoid lawn irrigation between the heavy demand periods of 6 to 10 in the morning and again at 6 to 10 in the evening!

SEVEN SIMPLE STEPS TO CLEAN WATER

- 1. Help keep pollution out of storm drains.** Storm drains lead to our lakes and streams. Any oil, pet waste, leaves, or dirty water from washing your car that enters a storm drain gets into our lakes and streams. With almost 5 million people living in Southeast Michigan, we all need to be aware of what goes in our storm drains. **REMEMBER, ONLY RAIN IN THE DRAIN!**
- 2. Fertilize sparingly and carefully.** Storm drains in our streets and yards empty into our lakes and streams. When we fertilize our lawn, we could also be fertilizing our lakes and streams. While fertilizer is good for our lawn, it's bad for our water. Fertilizer in our lakes and streams causes algae to grow. Algae can form large blooms and use oxygen that fish need to survive. With 1.5 million homes in southeast Michigan, all of us need to be aware of the cumulative effects of our lawn care practices. What can you do? Simple. **USE FERTILIZER LOW IN PHOSPHORUS**, select a slow-release fertilizer where at least half of the nitrogen is "water insoluble" (check the ingredients on the label), keep fertilizer away from lakes, streams, and storm drains, and **SWEEP EXCESS FERTILIZER** back into your lawn.
- 3. Carefully store and dispose of household cleaner, chemicals, and oil.** Antifreeze, household cleaners, gasoline, pesticides, oil paints, solvents, and motor oil are just some of the common household products that enter our storm drains. You can help keep these out of our lakes and streams. Instead of putting these items in the trash, down the storm drain, or on the ground, **TAKE THEM TO A LOCAL HAZARDOUS WASTE CENTER OR COLLECTION DAY.**
- 4. Clean up after your pet.** Most of us pick up after our pets to be a good neighbor and keep our yard clean. But there's another important reason. Pet waste contains bacteria that are harmful to us and our water. Leaving it on the sidewalk or lawn means harmful bacteria will be transported into the storm drains and then into our lakes and streams. So what can you do to help? Simple. Whether on a walk or in your yard, **DISPOSE OF YOUR PET'S WASTE PROMPTLY IN THE TOILET OR TRASH.**
- 5. Practice good car care.** Did you know that just four quarts of oil from your car's engine, can form an eight-acre oil slick if spilled or dumped down a storm drain? There are over 4 million cars in southeast Michigan, so even small leaks matter. **KEEP YOUR CAR TUNED, AND FIX LEAKS PROMPTLY.** Not only will this make your car run better and last longer, it will be good for our lakes, streams, and air. When washing your car, keep the polluted water from going into the street and storm drain. **CONSIDER TAKING YOUR CAR TO THE CAR WASH OR WASHING YOUR CAR ON THE GRASS.** Your lawn will gladly soak up the excess water.
- 6. Choose earth-friendly landscaping.** When landscaping your yard you can protect your kids, pets, and the environment from harm. **USE PESTICIDES SPARINGLY.** Put mulch around trees and plants. Water your lawn only when it needs it (one to two times a week is usually sufficient) and **CHOOSE PLANTS NATIVE TO MICHIGAN.** Once established, these plants tolerate dry weather and resist disease.
- 7. Save water.** Did you know that individually we use about 77 gallons of water each day? When we over-water our lawns, it can easily carry pollution to the storm drains and to our lakes and streams. **CONSIDER USING A BROOM INSTEAD OF A HOSE** to clean sidewalks and driveways. Direct hoses and sprinklers on the lawn, not the driveway. Water when necessary instead of on a fixed schedule. Remember - saving water also saves you money.

Our Water – Our Future – Ours to Protect

Water Report continued on page 48

WATER DEPARTMENT UPDATES

Paperless Billing

If you wish to receive your water bill by email, please email us at dpw@brownstown-mi.org. Requests must be received from the email address you want your bill sent to. Please include your name, address, and phone number.

Final Reads

Final water read is required if selling, buying and/or renting a home. Reads are done by appointment only. Final read billings are mailed to the Title Company/Realtors etc. holding escrow accounts. Access using **LOCK BOXES** is not permitted.

Radio Read Devices

The Township has installed radio read devices on the exterior of homes replacing existing touch pads. Per Water Ordinance home owners are responsible for the safe keeping of these devices as well as the water meter. If damaged, removed, etc. a replacement fee will be charged. A two (2) foot diameter area around the device must be kept free of debris, vegetation to assure accurate reads.

Irrigation Systems

All residents with an irrigation system installed will be required to have the back flow device tested every three (3) years. Testing must be performed by a Michigan State certified plumber with an ASSE 5110 cross connection certification. Test report must be filed and Company/Person needs to be registered with the DPW.

Senior Citizen Affidavits

Property owners occupying the residence aged 62 or older should contact the DPW regarding information on water usage savings.

Shut-Off Payment Requirements

Payments must be made by **CASH, MONEY ORDER, CERTIFIED CHECK, or Credit/Debit Card** for any account which is 60 days in arrears and/or receives a Shut-off notification. **NO PERSONAL CHECKS once in shut-off status.** Checks will be returned through the mail if received when in shut-off status.

Automatic Deductions

Automatic deduction from your checking and/or saving account is available **at no charge**. Form available on line at www.brownstown-mi.org or contact DPW. Call 734-675-4000 for more information.

Credit/Debit Cards Accepted

The Township accepts Visa, MasterCard, Discover, and American Express debit or credit cards for a fee. Payments can be made online at www.brownstown-mi.org or at the treasury department. The fee schedule for water bills only are as follows: If the bill is between:

- \$1-\$50 = \$1.50 fee
- \$51-\$100 = \$3.00 fee
- \$100 or more = \$3.00 per \$100

LOCALLY OWNED & OPERATED

Appliances & Fixtures

**Sewer Repair/ Replacements • Backflow Testing
Hot Water Systems • Sump Pumps**

With same-day services, our licensed, trained, and expert local plumbers can deliver the solutions you need, when you need them. Our upfront pricing, comprehensive repairs, and trusted professional recommendations have made us the go-to choice for all your plumbing needs.

Eyes in the Sky

How Brownstown's Police Drone Program makes our community safer

By Deputy Chief Andrew Starzec

As public safety challenges grow more complex, law enforcement agencies must adapt with tools that improve both effectiveness and safety. The Brownstown Police Department's Unmanned Aerial System (UAS), or drone program, is a prime example of this evolution – providing officers with a critical advantage while directly contributing to a safer environment for the community.

At its core, the drone program enhances situational awareness. When officers respond to an incident, having immediate, real-time aerial intelligence changes how decisions are made. Instead of relying solely on ground-level observations, officers can quickly gain a comprehensive view of a scene – identifying threats, locating individuals and understanding the dynamics of a situation before engaging. This elevated perspective leads to more informed, controlled responses, reducing uncertainty and minimizing unnecessary risk.

One of the most significant benefits of the drone program is its ability to reduce danger to both officers and civilians. In high-risk situations – such as searching for a fleeing suspect, responding to a barricaded subject or clearing a large area – deploying a drone first allows officers to assess the environment without immediate physical exposure. This approach creates time and distance, two of the most important factors in de-escalation and safe resolution. By gathering intelligence before contact, officers can develop a plan that prioritizes safety at every level.

Search and rescue operations are another area where drones have a direct impact on community safety. Whether assisting in the search for a missing child, an endangered adult or a vulnerable individual, drones can cover large areas quickly and efficiently. Equipped with thermal imaging, they are especially effective in low-light conditions or challenging terrain. Faster location of missing persons not only improves outcomes but also reduces the likelihood of prolonged exposure to environmental dangers.

Drones also contribute to safer roadways. During serious traffic crashes, aerial imagery allows officers to document scenes accurately and efficiently. This reduces the amount of time roads need to be closed, lowering the risk of secondary accidents and minimizing disruption to the public. The ability to quickly clear roadways while still conducting thorough investigations is a direct benefit to both safety and quality of life.

In addition to emergency response, drones can assist during large public events by providing an added layer of oversight. In a world of mass casualty incidents, monitoring crowd movement to identify potential hazards helps officers proactively address concerns before they occur. This proactive capability strengthens the department's ability to maintain a safe and secure environment during gatherings of all sizes.

The Brownstown Police Department operates its drone program with strict policies, ensuring that every deployment is purposeful, lawful and focused on public safety. This is not a tool for routine surveillance – it is a targeted resource used when it can make a measurable difference in protecting life and property. Ultimately, the drone program represents a shift toward smarter, safer policing.

STAYING SAFE

During the Summer Storm Season

By Fire Chief Ryan Raumen and Deputy Fire Chief Dave Zurawski

SUMMER brings longer days, outdoor activities and time spent with family and friends. But it also marks the peak season for severe weather. Thunderstorms can develop quickly, bringing damaging winds, lightning, heavy rain, and even tornadoes. Staying aware and prepared is key to keeping you and all of Brownstown safe when these storms strike.

Summer Storms and Severe Weather

Summer storms can develop rapidly and become dangerous with little warning. These storms often bring damaging winds, lightning, heavy rain, hail, and occasionally tornadoes.

Start by staying informed. Monitor forecasts regularly and make sure you have multiple ways to receive alerts, especially overnight. A NOAA weather radio, smartphone alerts or local emergency notifications can provide critical warnings when seconds count.

Brownstown Township has partnered with Hyper-Reach, a

mass emergency notification system designed to quickly alert residents of hazardous or urgent situations. The system delivers notifications through a combination of phone calls, text messages and email.

To receive weather alerts on mobile phones and email, residents and those who work in Brownstown can sign up by calling or texting "Alert" to (734) 789-3770 or by visiting: <http://hyper-reach.com/mibrownstownsignup.html>.

Residents may also download the free Hyper-Reach Anywhere app on their smartphones for additional access to alerts.

Preparation and awareness are key:

- Monitor weather forecasts daily, especially when planning outdoor events.
- Enable emergency alerts on your phone or use a weather radio for real-time warnings.
- Identify a safe shelter location in advance, such as a basement or an interior room away from windows.

When storms approach:

- At the first sound of thunder, move indoors immediately. Lightning can strike several miles from a storm.
- Avoid open areas, tall objects and water during lightning activity.

- Secure or bring inside outdoor furniture, grills and loose items that could become projectiles in high winds.

Power outages are common during summer storms:

- Keep flashlights, batteries and backup power sources readily available.
- Avoid using candles, when possible, to reduce fire risk.
- Keep refrigerators and freezers closed to preserve food.
- Stay clear of downed power lines. Treat all power lines as energized until confirmed safe by DTE or the fire department.

Heavy rainfall can quickly lead to flash flooding:

- Never drive through flooded roadways. Just a small amount of moving water can sweep a vehicle away.
- Be cautious in low-lying areas, underpasses and near drainage systems.
- Move to higher ground if flooding is observed or anticipated.

In the event of a tornado warning:

- Seek shelter immediately in a basement or interior room on the lowest level.
- Stay away from windows and protect your head.
- If outdoors with no shelter, lie flat in a low-lying area and cover your head.

Summer is meant to be enjoyed, but it also requires awareness and preparation. By taking a few simple precautions, monitoring the weather and practicing safe habits, you can make the most of the season while keeping safety a top priority.

Helping Your Teen Navigate Friendships

By Tracy Willis

So much of middle school and high school drama revolves around friendships. When your child reaches their teen years, friends can morph from besties into enemies, seemingly overnight. The desire to fit in with a social group comes with tons of pressure. Add social media into the mix, and friendships can feel like tiptoeing through a minefield.

Navigating the ups and downs of adolescent friendships is a rite of passage. How can you help your child manage the drama?

Begin by helping your teen think about the qualities they value in their current friends. What traits do they exemplify? Point these characteristics out when you see them in other people. Encourage them to seek friends who have the qualities they value.

Next, teach your teen to recognize the trouble signs in friendships. Discuss dysfunctional friendship patterns like one-sidedness, jealousy, competitiveness, or exclusion. Help your teen build emotional awareness: how does the friendship make you feel? Do you feel unsure or unsupported when you're around a certain friend? A big part of navigating friendships for teens is learning that they deserve to be treated well within the relationship.

Boundaries. It's a popular word that seems to be everywhere lately. It's the foundation of healthy friendships and relationships. Reassure your child that it's okay to assert themselves, to say "no" to friends, and to communicate honestly about their own limits and to respect the limits of others.

And finally, talk openly with your teen about rejection and exclusion. They're a normal aspect of life that everyone deals with. Let them know that rejection doesn't define their worth. It may feel like it does, but that's a normal feeling, too. There's nothing wrong with asking for support when those big feelings well up.

Even if you talk with your child about their friendships until you're blue in the face, chances are they will still ride the friendship rollercoaster. Pay attention to your teen's behaviors:

- Are they withdrawing from social situations?
- Do they seem sadder or irritable after social commitments or time on social media?
- Are they complaining frequently about certain friends?
- Are they engaging in negative self-talk?

Tuning into your teen on a regular basis will help you know when they need more support, as well as the level of support they might need.

Most of us have cringy teen memories about our own over-involved parents. Giving the right amount and type of support feels like riding a bucking bronco at the rodeo. Here are some things to avoid while you're riding that bull:

1. Don't minimize their feelings or qualify them as being "right" or "wrong."
2. Avoid criticizing their friends. Remember, a week from now, they might be besties again. Criticism makes communication shut down when your teen becomes defensive.
3. Don't pry. This is a hard one. You want to know the ins and outs of the situation, but your teen is learning to be independent. Respect their boundaries (it's how they learn to have boundaries themselves).
4. You're not a friendship mechanic. Don't try to fix it unless there are extreme circumstances. Leaping in with your relationship wrench undermines your child's confidence.

It's hard to watch your child struggle. Remind your teen that facing challenges is about growth. They might not have it all figured out yet, but they're moving in the right direction.

Tracy has been teaching for over 30 years in and out of Michigan. She currently teaches middle school and spends her free time writing for publications and small businesses. When she's not putting pencil to paper or dreaming up ways to inspire her English students, she can be found in the woods on the trails.

Expanding Opportunities

Inside Our Innovative Career and Academic Programs

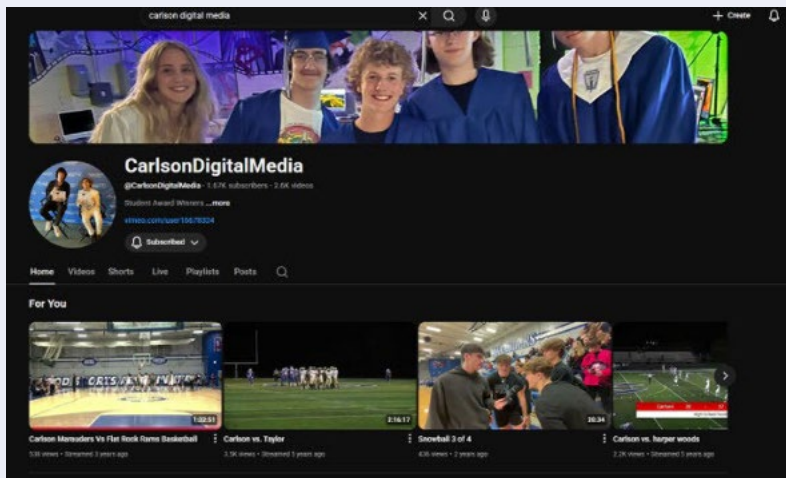

OUR district is proud to offer a diverse range of programs that prepare students for both college and career success. From hands-on technical training to cutting-edge digital skills, students are gaining real-world experience and building pathways toward their future. Among our standout offerings are construction trades, digital media, the Peppy Print Shop, aviation, and advanced placement computer science. Each provides unique opportunities for growth, creativity and career readiness.

Building the Future with Construction Trades

The Construction Trades program equips students with practical skills in carpentry, electrical work, blueprint reading, and general construction techniques. Through project-based learning, students gain firsthand experience using industry tools and safety practices. Whether building structures or learning renovation skills, students leave the program with a strong foundation for careers in the skilled trades, an industry that remains in high demand.

Telling Stories Through Digital Media

In the Digital Media program, creativity meets technology. Students learn photography, videography, graphic design, and content production using industry-standard software. From producing school announcements to designing promotional materials, students develop both technical expertise and storytelling skills that are essential in today's media-driven world.

Soaring to New Heights in Aviation

The Aviation program introduces students to the exciting world of flight and aerospace. Through coursework in aerodynamics, navigation and flight systems, students explore both the science and career pathways within aviation. With access to simulators and industry-aligned curriculum, students gain insight into careers such as piloting, air traffic control and aircraft maintenance.

Real-World Experience at the Peppy Print Shop

The Peppy Print Shop provides students with a true business environment where they design, produce, and manage print jobs for the school and community. Students gain experience in customer service, production workflows and business operations while creating items such as apparel, signage and promotional materials. This hands-on experience helps students build confidence, responsibility and entrepreneurial skills.

Advanced Placement Computer Science: Preparing Tomorrow's Innovators

The AP Computer Science program challenges students to think critically and solve complex problems through coding and computational thinking. Students learn programming languages, data structures and software development concepts that prepare them for college-level coursework and careers in technology. This rigorous course not only builds technical skills but also fosters creativity and innovation.

A Commitment to Student Success

Together, these programs reflect our commitment to providing students with meaningful, future-focused learning experiences. By blending academic rigor with hands-on application, we are ensuring that every student has the opportunity to explore their interests, develop valuable skills and graduate ready to succeed in an ever-changing world.

CARLSON HIGH SCHOOL

Class of 2026

TOP 10

**Rocco
Stoney**

Rocco, this year's valedictorian, plans to study economics and mathematics at the University of Michigan.

**Jack
Klotz**

Salutatorian Jack is off to New York University, where he's keeping his academic options open.

**Kali
Slade**

Kali is off to the University of Michigan to dive into the world of biochemistry.

**Elizabeth
Jenkin**

Elizabeth will attend the University of Michigan, where she'll focus on mathematics.

**Nathaniel
Nichols**

Nathaniel is off to the University of Michigan to study computer science and build what comes next.

**Elena
Bruner**

Elena is off to Eastern Michigan University to study elementary education.

**Leo
Rowe**

Leo is headed to Wayne State University to study finance.

**Brayden
Mantz**

Brayden is off to Wayne State University to study computer science.

**Morelia
Perez-Rodriguez**

Morelia is headed to the University of Michigan-Dearborn to study finance and accounting

**Jerry
Hocutt**

Jerry plans to study pharmacy, with Wayne State University among his top choices.

Parsons Pirates Dominate at Wayne State Invention Convention Competition

CONGRATULATIONS to our Parsons Pirates for sweeping the Wayne State Invention Convention Regional Competition! Our Inventor's Club has been hard at work since November under the dedicated coaching of Dan Chojnowski and Colleen Buscemi, and their efforts truly paid off.

The Invention Convention is an engaging, hands-on learning experience for students in grades three through 12 that focuses on solving real-world problems through the invention process. Students enhance existing products or design brand-new ideas while building critical thinking, teamwork and presentation skills. For months, students in grades three through five collaborated in teams to brainstorm ideas, build prototypes, create pitch videos, and design posters.

On March 21, 28 Parsons students presented independently to judges at Wayne State University. Out of the five teams advancing to the state finals, our Parsons Pirates earned places two through five!

Lucy Chojnowski, Nolan Jager, Brendan Krechnyak, and Ben Queen came in second place with their invention of the Weather Hat – a hat that cleverly stores a hidden poncho for unexpected weather. Isabelle Hall and Scarlett Pace secured third place with Zonked Out – an invention that alerts a cat to mice in a chicken coop. In fourth place, Frankie and Lily Green designed the Hot and Cold 2000, which warns a person taking a shower that the temperature is about to change. In fifth place, Callum Aherne, Jonah Putek, Ivy Shuman, and Katheryne Smith created the Glow Can – a glowing garbage can that

prevents accidents in the dark and signals when pickup is complete.

We are proud to share that four Parsons teams recently represented our school at the Regional Invention Convention, competing alongside more than 130 teams from across the state of Michigan at the Henry Ford Museum of American Innovation. Our students worked collaboratively to present their innovative ideas to a panel

of judges, demonstrating creativity, problem-solving and confidence.

In addition to their presentations, students enjoyed a special lunch and had the opportunity to explore the museum's inspiring exhibits, making it a truly memorable experience.

While our teams did not advance to the national competition this year, we are incredibly proud of their hard work and accomplishments. It was a fantastic first season for Parsons, and we are excited to build on this success in the years to come!

HERE'S THE LATEST FROM *Hunter Elementary School*

Hunter Elementary's 3rd Annual STEM Day!

If you stepped into the Hunter gym on February 18, you could feel it immediately: the excitement of Hunter's Outstanding STEM Day. Now in its third year under the leadership of Mrs. Brown, this event continues to grow as a highlight not only for students but for our entire community.

Each station was inspired by titles from this year's NSTA Outstanding Science Trade Book list and connected students to real-world STEM careers both within our schools and across the region. After the annual book list is released, Mrs. Brown brings the day to life by recruiting community partners and designing hands-on experiences that turn engaging stories into meaningful scientific

exploration, books that soon find their way into the hands of our Hunter Hornets.

Students had the opportunity to explore flower structures by creating wax windows, plant seed bombs alongside Huron Metroparks staff to support native

plants and examine real X-rays with medical professionals while creating cyanotype prints inspired by Inside In. Industry partners like NALCO and Ford demonstrated how sludge can be transformed into clean water, highlighting the role of science and engineering in protecting our environment.

Future engineers were inspired by Carlson Robotics through live demonstrations of building and programming. The University of Michigan Natural History Museum shared dinosaur fossils, while the DNR introduced students to Earth's rocks and natural resources. Consumers Energy and AT&T explained how underground gas and internet systems work, and health care professionals helped students understand topics like insulin and human health.

Students also explored pollination with a Fisheries and Wildlife ranger and discovered how engineers design solutions to help salamanders cross roadways safely.

DECODING EGGS

What are you really getting?

By Lisa Howard

EGGs can seem mysterious. Fortunately, with a little know-how, it's (mostly) easy to figure out what kind of eggs would suit your needs.

Eggs are particularly lovely combined with spring ingredients like mushrooms, alliums and fresh herbs, and they can be prepared in a variety of ways: baked into quiches (or mini quiches), sautéed into frittatas, hard-boiled, poached, made into omelets or scrambled. (If necessary, a tattered omelet can easily become a tidy scramble.)

As a complete protein, eggs are ideal for light-but-hearty meals as well as non-starchy desserts like custards and mousses. You can even make your own top-notch mayo using hard-boiled yolks and extra-virgin olive oil!

Eggshell colors can be shades of white, brown and blue. Different breeds lay different-colored eggs, making this factor kind of like human hair colors. While you might prefer blue eggshells (or hair), the color doesn't impact the quality or flavor of the egg.

Egg size can matter when you're cooking from recipes since most recipes are based on large eggs. If you opt for jumbo or peewee or any size other than large, your results might not match what the recipe stipulates. But you might want to use nonlarge eggs for other uses, like adorably small, hard-boiled eggs. (Quail eggs are even smaller.)

Egg grades are AA, A and B. Grade A is what's mostly sold in stores. According to CertifiedHumane.org, AA eggs have "thick, firm whites and high, round yolks and strong shells," while Grade A eggs have "reasonably firm" whites. Grade B eggs have "thin whites and wider yolks" and their shells may be stained. (You won't see those in stores.)

The pack date is the day the eggs were washed, graded and placed in the carton. This date is expressed using the three-digit Julian calendar, where January 1st is 001 and December 31st is 365. (So February 1st is 032.)

Free-range eggs are from hens allowed access to the outside. Technically, this "access" can be a tiny window high up in the wall or a tiny hatch leading to a paved parking lot. It can also be full outdoor access, making this label not as useful as you might think.

Pasture-raised eggs come from hens that probably are truly outside, roaming and foraging. But because the USDA doesn't

have requirements for this label, shoppers need to look for an animal welfare certification such as Certified Humane Raised and Handled or Animal Welfare Approved.

Organic eggs come from hens that are, according to the USDA, "free to roam in their houses and have access to the outdoors. The hens are fed an organic diet of feed produced without conventional pesticides or fertilizers." Again, though, "free-range" is a rather imprecise term.

Cage-free eggs are from hens that aren't kept in individual tiny pens. However, this has nothing to do with outdoor access or how much space hens actually have.

Vegetarian-fed eggs are from hens who are only fed vegetarian fare. But! As the saying goes, "The early bird gets the worm." Chickens are omnivores, not herbivores. If a hen is allowed to go outside, she will not be a vegetarian.

Hormone-free is meaningless since U.S. federal law requires that hens be raised without supplemental hormones.

Natural, farm-fresh, and all-natural mean essentially nothing. Per the USDA, "All raw single-ingredient meat and poultry qualify as 'natural.'"

Lisa Howard is a writer, editor and health educator who loves to share her joy of cooking delicious and nutritious foods during her community talks and culinary classes. You can find out more about her classes and recipes at www.theculturedcook.com.

What's the Buzz?

How to support Michigan's pollinators this spring By Kelsi Klein

AS we finally break free from winter and begin to welcome the sights and sounds of spring, there is a whole group of native pollinators awakening and emerging, ready to play a crucial, yet often unnoticed role in Michigan's ecosystem.

What are pollinators and why are they important?

According to the National Park Service, pollinators are anything that helps move pollen from one part of a flower to another. This process is vital to the fertilization of plants, helping make seeds, fruits and even new plants.

Michigan is home to a wide variety of native pollinators including bees, butterflies, moths, flies, beetles and even hummingbirds and bats.

While some plants are pollinated by themselves, water or wind, approximately 75-95 percent of all flowering plants on Earth rely on animal pollinators.

The United States Department of Agriculture has reported that about 35 percent of the world's food crops, including Michigan staples like apples, blueberries, cherries, cucumbers, squash and countless others, are pollinated by animals.

In addition to food crops, pollinators are essential for reproducing plants that provide food and shelter for Michigan's wildlife as well as purifying the air and stabilizing soil.

How are they in danger?

With more than 450 species of bees alone, Michigan's diverse pollinators work around the clock to keep the ecosystem running smoothly, but they are also facing real challenges.

Pollinators need natural spaces with flowering plants, grasses and shrubs for food and shelter. Agriculture, development and other human activities are causing habitat loss, pushing pollinators out of their homes.

When non-native plant species take over, native plants that pollinators rely on can die out. Even if non-native plants are attractive, they don't always offer the right nutrition or habitat for pollinators.

Even if they don't kill pollinators directly, pesticides can impact the plants that they rely on, leaving behind chemicals that can affect their health.

How can residents help?

The easiest way to help pollinators is to spread the word. If people don't know how important they are, they won't know how important it is to protect them.

Planting native plants is one of the biggest ways to support pollinators. Early blooming plants like wild columbine and woodland phlox provide food in early spring, while black-eyed Susans and purple coneflower last through fall. Milkweed is another crucial native plant as it's the only plant on which Monarch butterflies lay their eggs.

Reducing or eliminating pesticides is another key step in helping pollinators. Hand-pulling weeds rather than spraying them with weed killer and tolerating minor plant damage can go a long way.

Homeowners can also rethink spring cleaning. Leaving old leaves, hollow plant stems and bark undisturbed until the weather stays consistently warm keeps pollinators' shelters intact and habitats preserved when they need it most.

Communities around Michigan are encouraging pollinator-friendly practices with education and conservation. Many city parks are allowing space for un-mowed grass and wildflowers to support pollinators, and homeowners can do the same in their own back yards.

TODAY

MAGAZINES

Our TODAY Magazines are an incredible platform that allows the entire community to coalesce, interact and tout successes, initiatives, events and achievements on a yearly basis.

Our quarterly publications allow cities/townships, chambers, DDAs, schools, businesses, residents, etc. to connect and be proud of where they work, play and live.

Our TODAY medium is truly the most cost-effective avenue to tout your business's services and/or products to your exact target audience, each quarterly season throughout the year.

From Your Building Department

What is MISS DIG 811?

MISS DIG 811 is Michigan's statewide 811 notification system, established to prevent accidental damage to underground utilities during excavation.

MISS DIG 811 is free, simple and available 24/7. Homeowners and contractors can dial 8-1-1 or visit missdig811.org to submit a locate request before starting any digging project.

Why should I contact MISS DIG 811?

Contacting MISS DIG 811 keeps you, your neighbors and the community safe. Safety is in your hands. Every Dig. Every Time.

When do I need to contact MISS DIG 811?

Before any digging project – big or small – like planting trees, installing a fence or building a deck. Contact at least three business days in advance.

How does MISS DIG 811 work?

Call 811 or submit a request at missdig811.org. Local utilities are notified, and locators mark underground lines so you can dig safely.

What if I don't contact MISS DIG 811?

You risk injury, service outages, property damage, and fines. Always contact MISS DIG 811 before digging. **Remember:** SAFETY IS IN YOUR HANDS. EVERY DIG. EVERY TIME.

Want to Install a Pool?

Make Sure You Have all the Correct Permits First

YOU'VE decided to install a pool...Hooray! Let the fun begin!

We know you're ready to get the ball rolling, but first there are a few permits you (or your contractor/pool installer) need to pull to make sure you're in compliance with Michigan law and Brownstown Zoning Ordinances.

Pool permits are required to ensure the safety of those enjoying the new pool. By properly following building safety codes, many water-related injuries in and around pools can be avoided. Obtaining permits also helps ensure that any existing infrastructure, such as sewer lines, septic systems, etc., are protected and maintained during the construction process.

Here are the most common questions we get about obtaining pool permits in Michigan.

Do I need a permit for an in-ground pool?

Yes, 100 percent. All Michigan townships/cities require you (at a bare minimum) to have a residential building permit and an electrical permit to build an in-ground swimming pool. Other possible permits can include an EGLE permit, fence permit and/or mechanical permit (if installing a gas pool heater) along with zoning approval.

Do I need a permit for an above-ground pool?

Yes again. Like in-ground pools, you'll need at least a residential building permit. Other permits you may need

include an electrical permit and fence permit. You will also need zoning approval.

Do I need a permit for a temporary/inflatable pool?

Yes, a permit is required for any swimming pool that contains water over 24 inches deep. This includes temporary/inflatable pools. Temporary/inflatable pools only require a one-time permitting and inspection approval and can be re-established in following years when re-installed in the approved locations per the approved permit site plan. Any alterations from the approved plan will require a new permit and inspections.

What are the pool permit requirements?

Currently, the 2015 Michigan Residential Code requires that you provide all the following information before issuing a permit:

- Completed application
- Site plan
- Pool barrier information
- Drain cover specifications (if applicable)
- Diving pool specifications (if applicable)

Also, it is important to note that the final inspection must be requested within five (5) days of completion and approval obtained prior to use.

What are the placement requirements?

1. MISS DIG (1-800-482-7171) Staking must be complete BEFORE pool placement inspection.
2. Pool and equipment must be a minimum one foot from any "public utility" easement.
3. Pool and equipment must be at a minimum of five feet from any underground electrical lines.
4. Pool and equipment must be a minimum of 10 feet horizontally from any overhead lines.
5. Pool and equipment must be a minimum of 10 feet from house and six feet from property lines and/or accessory structure. Corner lots must follow ordinance setback.
6. Site plan drawn to scale, showing location of pool with accurate dimensions and all existing structures and easements. Yard must be marked according to drawing and accessible for inspection (gates unlocked and dogs secured for all inspections).

Regardless of how you feel about government regulation and the ensuing costs, do not be tempted to move forward with your pool installation without a permit. Negative outcomes can include project stops, hefty fines and even having to rip out a partially – or even fully – completed pool.

Beware of any builder that suggests moving forward on a project without a permit. As frustrating as permitting requirements may seem, skirting the law is never a good idea.

Moving forward with properly secured permits will give you peace of mind knowing that you are in full regulatory compliance – and that much closer to your first carefree dip in your new pool.

WHERE'S TEAM A TODAY?

WHERE LOCAL BRANDS GET THEIR MOMENT

Join AyLaina and Ashley as they visit your favorite hometown spots—and discover a few new ones along the way!

This weekly series from TODAY Magazines takes you behind the scenes with AyLaina and Ashley as they spotlight our advertising partners in fresh, creative ways that set us apart from other marketers.

AROUND Brownstown

June - August

ONGOING

- The Brownstown Splash Pad will be open from Saturday, May 23 to Monday, September 7. Cost is \$3 per person per session. Sunday-Saturday 11 a.m.-1 p.m., 1:30-3:30 p.m. and 4-6 p.m. Kids 12 and under need a paying adult in the splash pad with them.
- The Brownstown Local Market returns to the Brownstown Soccer Fields Parking lot (23555 King Road) on June 10 (Kids Day), July 15 (Christmas in July) and August 12 (Health & Fitness). Come out and enjoy more food offerings than ever before!
- Concerts in the Park will take place on June 18, July 16 and August 6 from 7-9 p.m., behind the Brownstown Event Center, 23345 King Road. There will be food trucks and a mobile bar available. For more information, visit www.brownstown-mi.org.
- Movies in the Park will be held on June 26, July 24 and August 7 at dusk at different locations. (See Parks and Rec pages in this edition for more information). This free event will feature kids activities an hour before the movie starts. Bring a blanket or lawn chair.

JUNE

June 7

Youth Fishing Derby

11 a.m. - 1 p.m.

Pointe Mouillee near DNR office off Campau Road

Kids must bring their own fishing gear. Parents will register children 17 and under near the DNR Office the day of at Pointe Mouillee, there is no registration fee for this event. Check-in starts at 10 a.m.

Awards for biggest fish caught, most fish caught and smallest fish caught. All participants have a chance to win raffle prizes!

AUGUST

August 14-15

Brownstown Summer Fest

Thorn Park Campus

Featuring fireworks, food trucks, beer tent, fun run, craft event, pancake breakfast, music, vintage baseball game, kids' zone and more! For more information, see the Parks and Rec pages in this issue.

PLEASE NOTE: Event details may have changed. Please check event website or social pages for the most up-to-date information.

Employment Opportunities for All Abilities

Services To Enhance Potential (STEP) is a non-profit organization that provides support and services to more than 1,100 individuals with disabilities and mental health needs residing in Wayne County. STEP helps individuals with barriers to employment reach their full potential and achieve their life goals through various programs and trainings. These include skill building, supported employment, volunteer opportunities, vocational rehabilitation, and more. With offerings like the Progressive Art Studio Collective (PASC), STEP in the Kitchen, and training at our three STEP Thrift Store and Donation Centers, STEP offers opportunities to individuals of all abilities.
