Who is GID?

GID began operations in 1994 as a manufacturer of furniture for prisons, hospitals, laboratories, industrial kitchens, offices and special designs.

In 1996, it received recognition in the sixth Latin American Applied Design Competition for the manufacture of the “Combo” (integrated toilet and sink), designed in stainless steel.

Since 2005, **GID** has been certified with ISO 9001.

What is the purpose of GID?

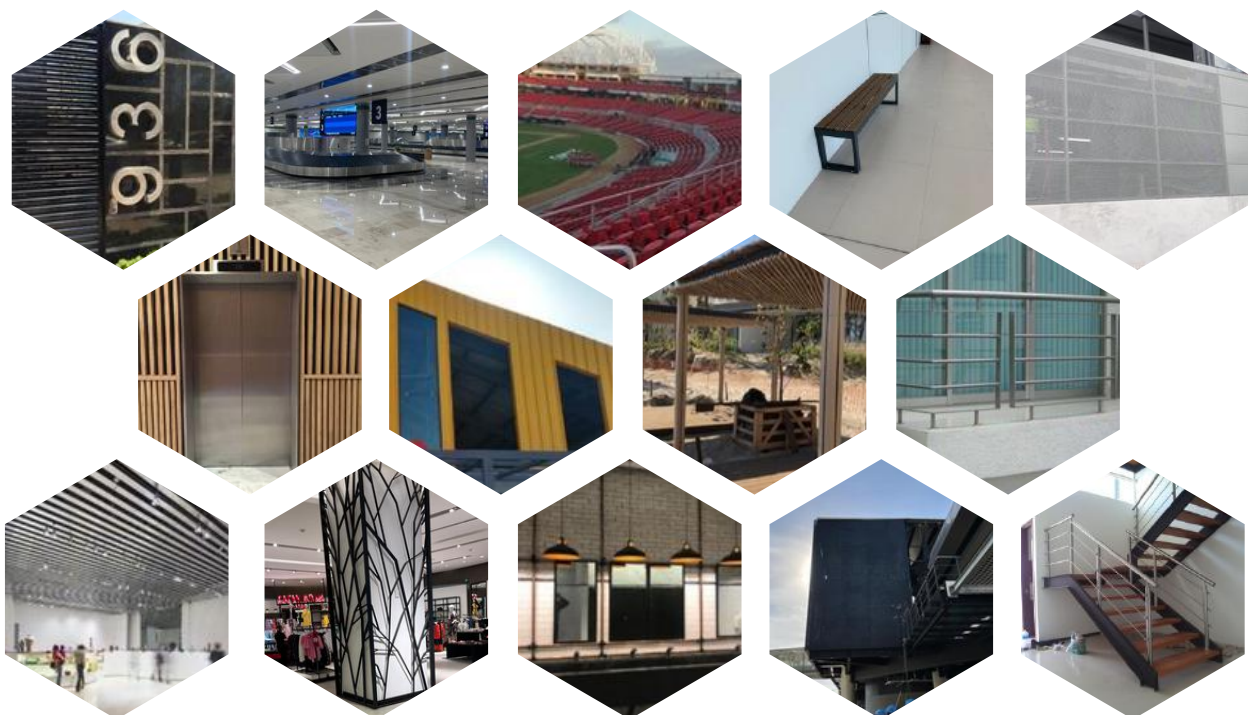

Increase our prestige and leadership in the market with innovative and functional solutions, obtaining permanent clients and satisfied users, exceeding expectations of quality and service.

At Grupo Internacional de Diseño y Fabricación de Muebles Especiales S.A. de C.V., we are manufacturers of high quality furniture certified in manufacturing processes, backed by the experience and training of all our staff for more than 20 years.

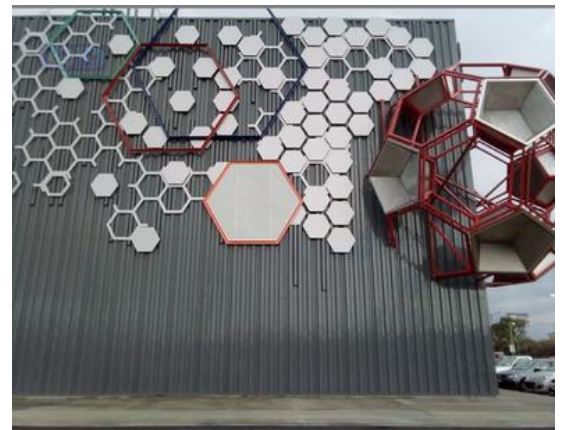

Our quality and versatility allows us to cover different areas, such as hospitals, education, laboratories, restaurants, food and chemical industries.

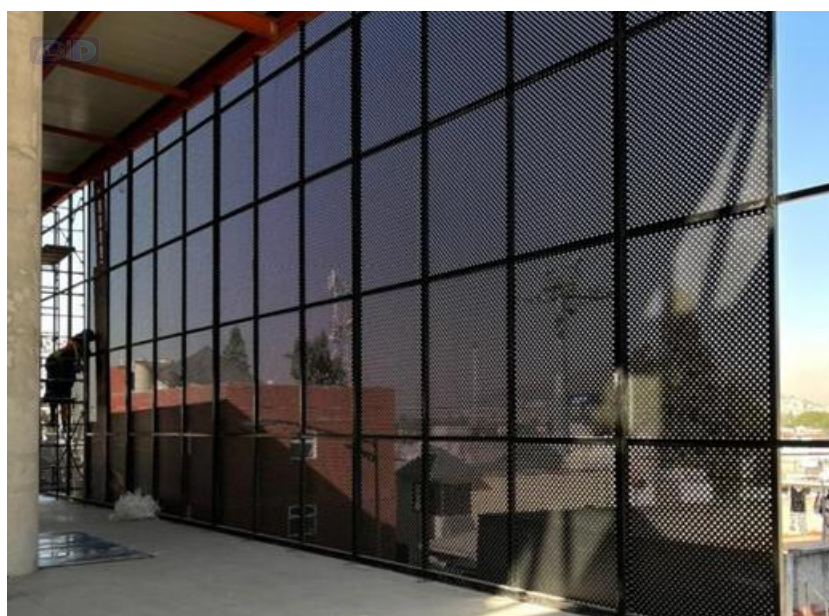

Architectural Designs

Architectural design is the process by which architecture professionals interpret the client's needs, process them and, based on operating principles, general structural criteria and regulations, aesthetically develop a proposal so that it can be built.

FACADES

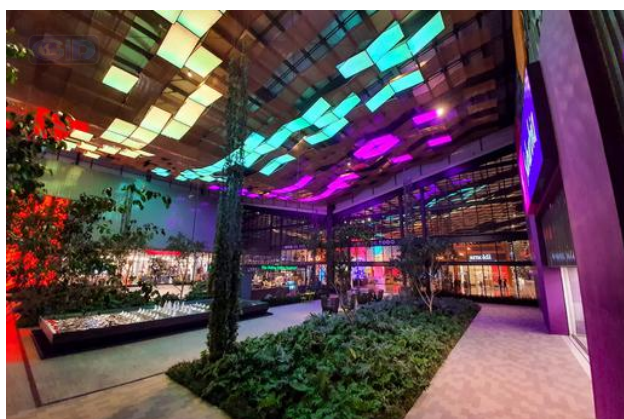

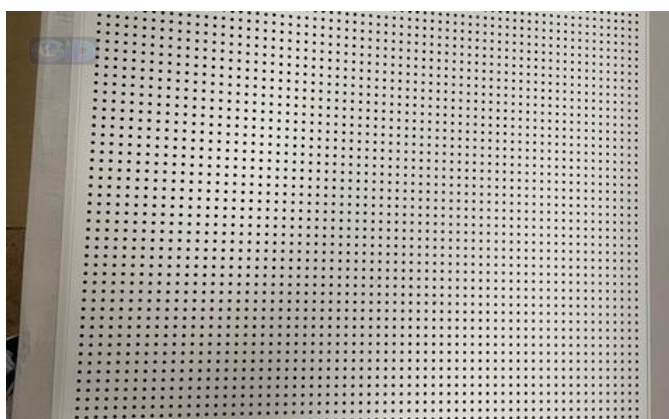

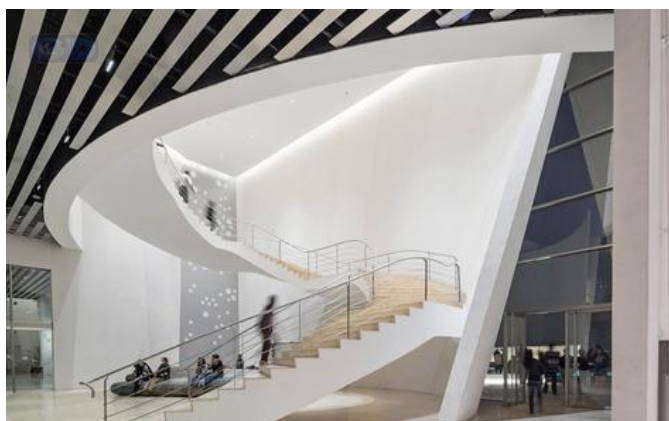

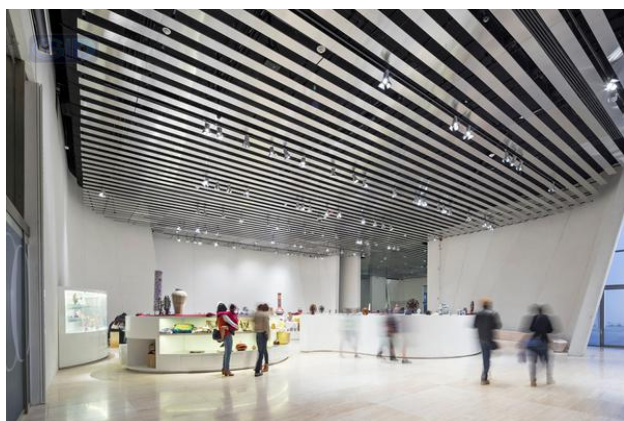

Ideal for the exterior of museums, offices, hotels, shopping centers, etc. General measurements usually vary depending on the project. They are made of stainless steel, carbon steel or galvanized steel. The finish is electrostatic paint and/or sanitary polishing, with color according to the sample authorized by the client.

Ideal for the exterior of museums, offices, hotels, shopping centers, etc. General measurements usually vary depending on the project. They are made of stainless steel, carbon steel or galvanized steel. The finish is electrostatic paint and/or sanitary polishing, with color according to the sample authorized by the client.

CEILINGS

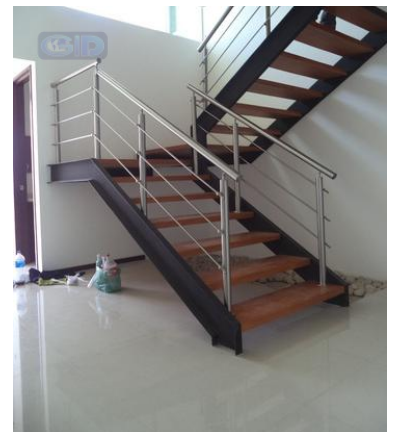

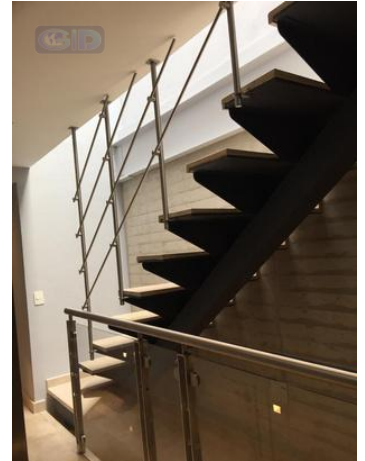

General measurements usually vary depending on the project, a physical survey is carried out. They can be made of stainless steel, carbon steel or galvanized steel. The finishes are sanitary polished, mirror finish and/or electrostatic paint.

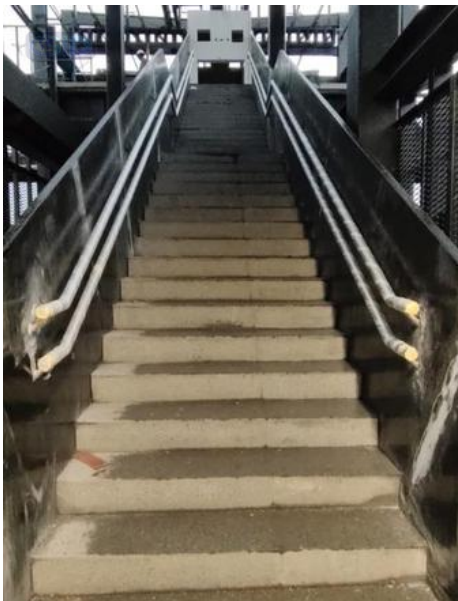

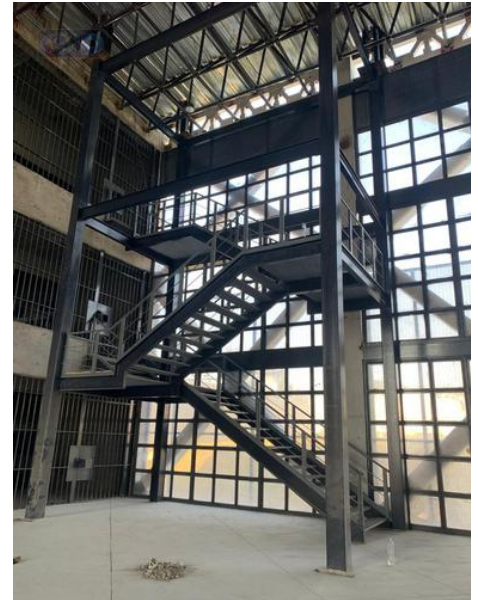

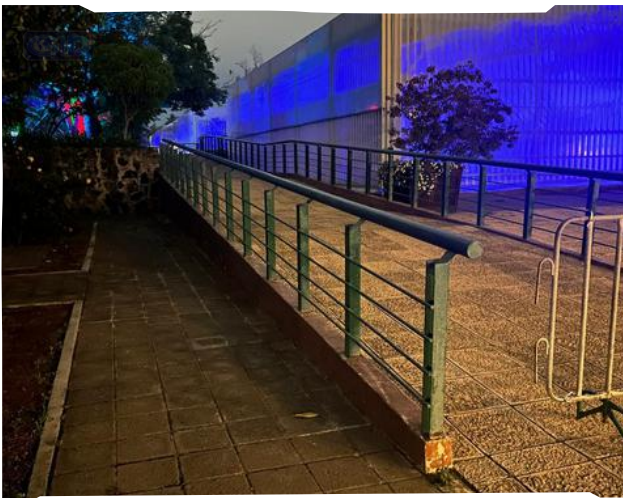

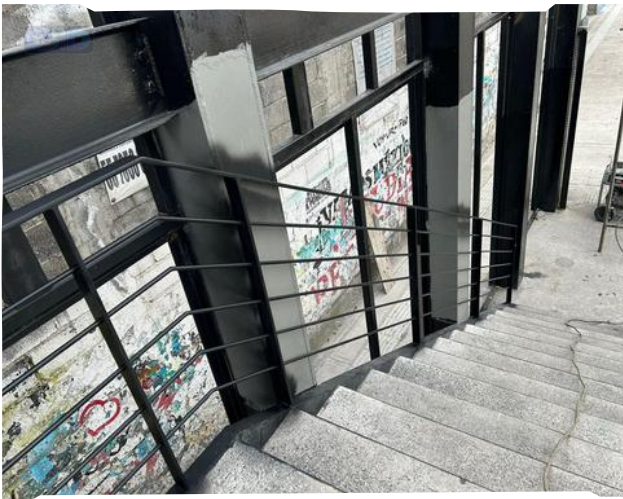

"Sturdy shelves, perfect organization."

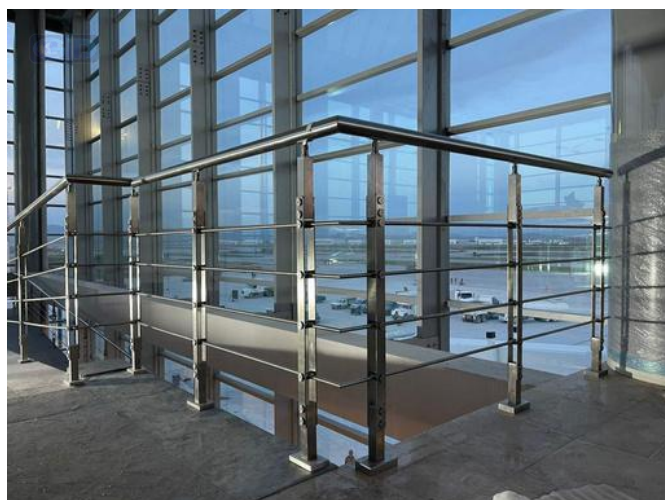

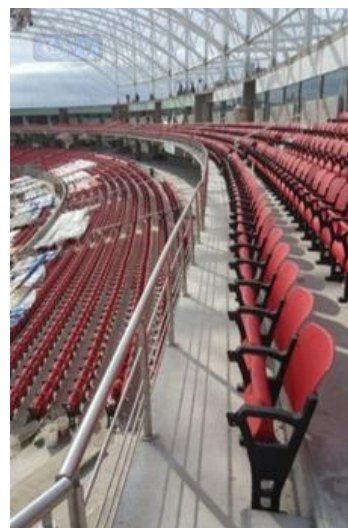

RAILINGS

Ideal for interiors and exteriors of museums, offices, hotels, shopping centers, residential areas, etc.

Measurements vary depending on the project. They are made of stainless steel, carbon steel or galvanized steel. The finish is usually electrostatic paint and/or sanitary polishing. The color is according to the sample authorized by the client.

Screens

Dimensions vary by design. Made of stainless steel
Ideal for bathrooms in shopping malls, offices, schools.

PLANTERS

Ideal for the exteriors of museums, offices, hotels, shopping centers, etc.

The general measurements usually vary depending on the project.

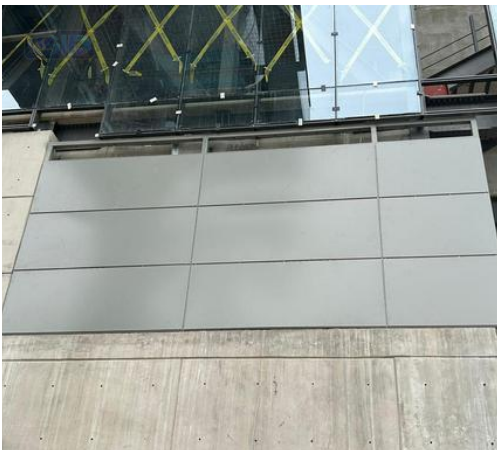

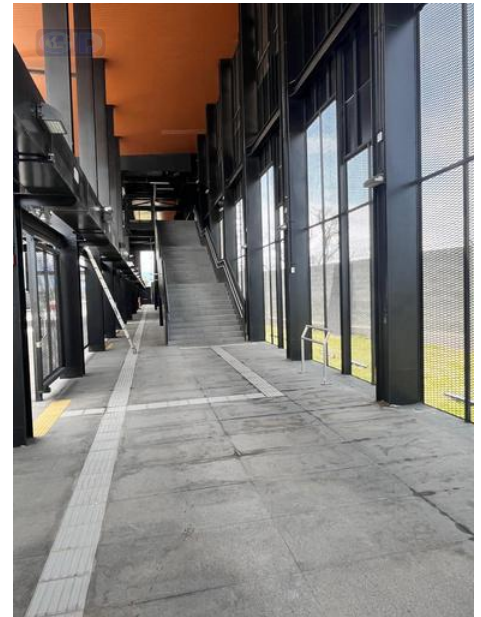

It is manufactured in stainless steel, carbon steel or galvanized steel. Its finishes are electrostatic paint and/or with different polishes.
