SHOWER DRYING SOLUTIONS

A PROBLEM

SOLVER WITH

A VISION

When most folks are faced with a home design challenge, their first thought is not to dream up a new product and build a company from scratch around it. But most people are not like Ron Tucker — founder, innovator and self-professed problem solver of AIRMADA Drying Solutions.

#### **A Family's Request**

In 2011, when designing a master bath for his family's personal residence, they wanted a walk-in, *curbless* shower and a steam system all in one. A sealed space for steam proved challenging. In fact the solution was non-existent.

#### **A Solution Delivered**

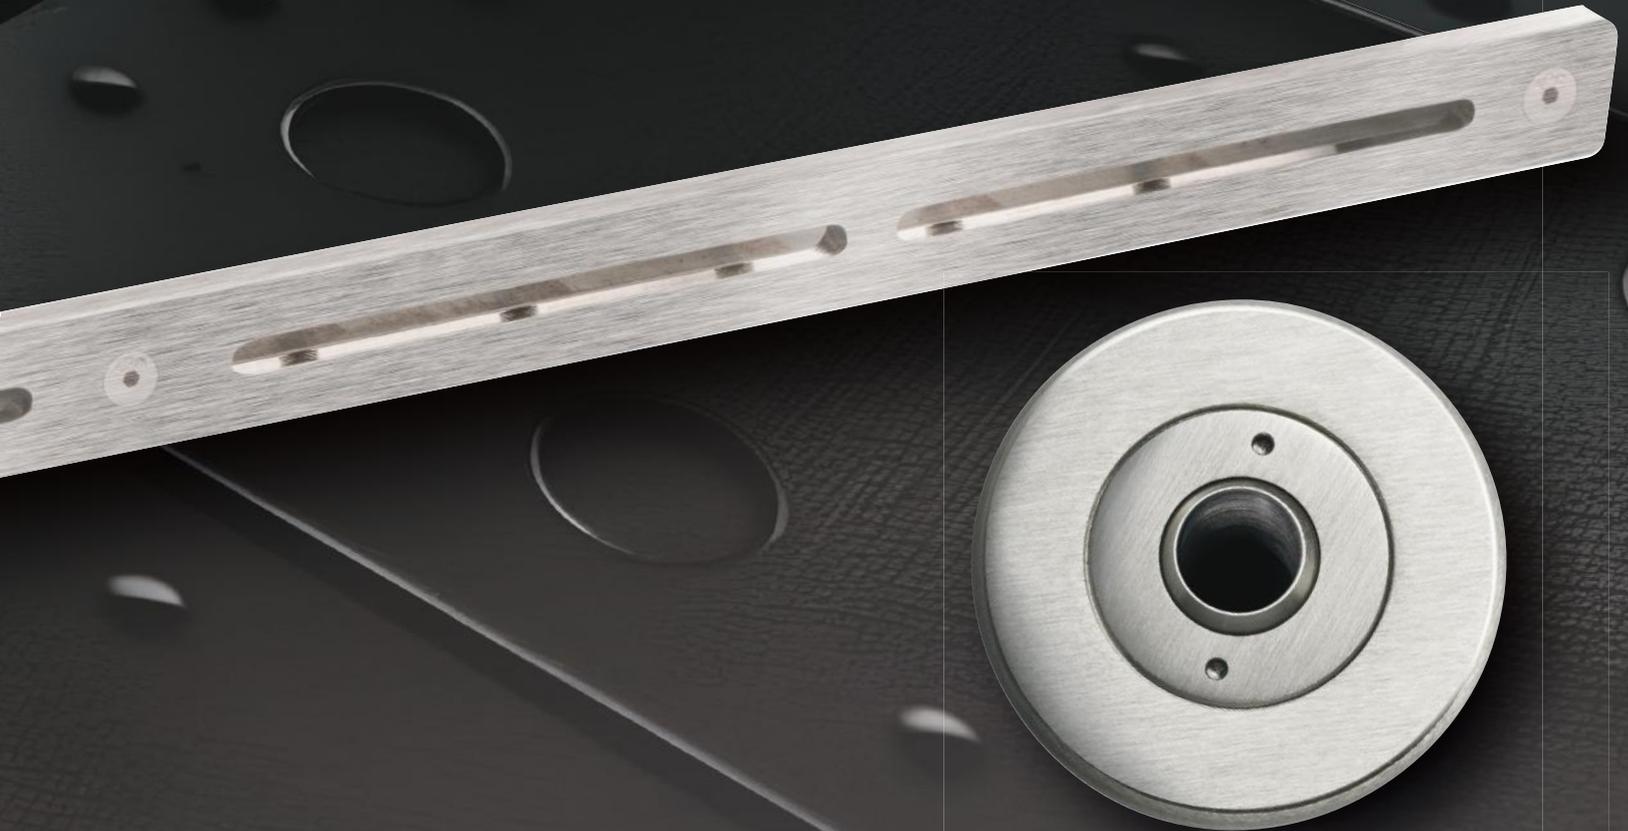

So Ron set out to design a pocket shower door system that was curbless, yet able to slide along a track and seal the space. To slide the door out of sight, he developed and patented a stainless-steel pocket. And for the drying aspect? An air-drying system utilizing strategically placed nozzles with a compact motor tucked almost 50' away, was the long-awaited answer. The system insured the

glass and track stayed dry when inactive. In fact, it was so effective, the line was expanded to include drying capability for the floor, ceilings and walls. This provided a number of benefits for safety and wellness.

### **An Enduring Promise**

Through it all, one thing has not changed. With a growing team of metal artisans and engineers, the commitment to functionality, quality and design remains ever strong. It is truly the art of inspiration, coupled with the drive to solve problems and innovate.

AIRPOCKET DOOR

## RAISE YOUR SHOWER GAME

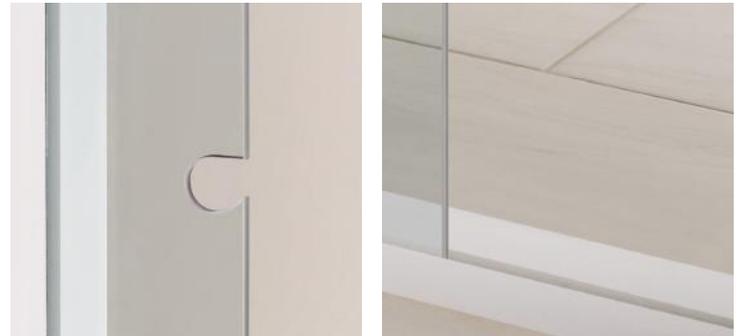

With our exclusive patented design, you have the freedom to create and enjoy a custom spa shower, the way you prefer.

If you long for a walk-in curbless shower for the ultimate modern look, you can have that. If you also desire a steam shower, you can have that too. The freedom to have it all — nothing is better than that.

## THE ANSWER FOR ADDED DESIGN FLEXIBILITY, SAFETY AND WELLNESS

### DESIGNED TO PERFORM

- Allows for an open curbless shower
- Creates a sealed space for a steam shower
- Push-to-open and soft-close functionalities
- Provides more flexibility in bath and shower design
- Regulates temperature control
- Improves accessibility and ADA compliant
- Saves up to 3' of usable space with no shower door swing
- Eliminates dripping water from shower door onto the floor

# SIMPLICITY IN THE SHOWER, *AFTER* THE SHOWER

Everyone talks about the shower, the water jets, the rain head, etc. But what about when the shower ends and it needs to dry? That's where we come in - your showers' new best friend, the AIRMADA AirJet Shower Drying System.

It's the perfect anecdote and a *must-have* for every steam shower. Eliminate the steam and humidity. With round and linear trim options, the strategically placed Airjets gently dry the floor and shower space - simply, quickly, beautifully.

### SEVEN REASONS TO CHOOSE

1. Decrease slippery floors
2. Prevent mold and mildew
3. Eliminate after-shower steam and humidity
4. Minimize watermarks
5. Extend the life of tile and grout
6. Provide design flexibility
7. Choose from 8 finishes, plus custom options

## THINK OUTSIDE THE *SHOWER*

FROM RESIDENTIAL, TO HOSPITALITY,  
TO COMMERCIAL

The drying necessity you didn't know you needed. With performance measured in wow. It's all give and no nothing... no slip, no mold, no mildew, no dampness.

The AirJet Shower Drying System is an excellent solution for residential and commercial applications. It offers benefits of convenience, hygiene, efficiency and aesthetic appeal. This system is designed for various environments that experience dampness - restaurants, hotels, gyms, locker rooms, spas and health clubs.

Protect the people in these spaces and the materials that make them. Think safety. Think practicality. Think AIRMADA.

### Eight Finishes Plus Custom Options

Available in directional, non-directional and linear nozzles based on application.
