

INTRODUCING OMNITELE PRIMEA

In our May newsletter we are introducing Omnitele PRIMEA that is the set of our AI solutions. It includes RAN Performance Optimisation, RAN Investment Optimisation, as well as customer specific solutions. Omnitele PRIMEA is always customised to your needs and does not require system integration.

Omnitele PRIMEA RAN Investment Optimisation is a machine learning solution to maximise the CAPEX efficiency of RAN investments. PRIMEA RAN Investment Optimisation is compatible with readily available network data from all major network vendors.

Introducing Omnitele PRIMEA-Al solution

All players in the telecom industry want to make smart, cost efficient choices that can be implemented quickly in order to gain maximum value while offering their customers superior user experience.

With the help of Omnitele PRIMEA, our customers are discovering 20-40% efficiency improvements in RAN Capex by maximising the user experience with the existing RAN assets and by maximising the CAPEX efficiency of the future RAN investments.

LEARN MORE

OMNITELE PRIMEA FOR RAN INVESTMENT OPTIMISATION

Should you invest in 5G only or should you take advantage of all the available spectrum that is still left with 4G or maybe be a combination of both?

Omnitele PRIMEA forecasts how the traffic and terminal development will change the provided user experience, and quantifies how the alternative technology and spectrum deployments can improve it in a given time frame.

Meet with us in MWC21 in Barcelona

Are you returning to Barcelona in June 28 for MWC21?

We will be showcasing Omnitele PRIMEA solutions there. Let us know if you are there!
