Direct Paper have joined Spicers Australia.

We will continue to provide great service and now have access to a greater sourcing network and a wider range of products through our parent company (Kokusai Pulp and Papers) global network that will continue to benefit our customers.

We are a quality wholesale merchant servicing the Commercial Print, Food Packaging and Design industries in Melbourne, Sydney & Brisbane. Direct Paper offers a huge range of paper and packaging products to suit your needs and budget - from providing ideas, inspiration and guidance on initial substrate selection right through to inventory management, customised sheeting and cost reduction - we do it all.

Our Food Packaging range offers a versatile collection of ready-to-use, all-purpose food applications with options for eco-friendly, fully recyclable products for hot or cold food packaging. Contact our team of Food Packaging specialists for a sample or to discuss how we can assist you with product selection.

When it comes to paper & packaging, we are experts in our field. With a breadth of proven knowledge and skills over decades in the paper and packaging industry you can rest assured that the team at Direct Paper can assist with all your paper and packaging solutions.

Creating solutions together.

sustainability statement

Sustainability is integral to Spicers' business strategy, ensuring we conduct everyday business in a responsible & ethical manner that considers our employees, shareholders and the environment, now and in the future.

As a leading wholesale and distributor of commercial print, labelling, signage and visual display solutions, a key sustainability focus for Spicers is to continuously improve the supply chains of its operations. This encompasses resources used in fulfilling orders, conducting day-to-day business and waste management. Spicers continues to promote responsible and sustainable business practices across the organisation, which positively impacts the Company's operational footprint.

Spicers is committed to managing its operations to comply with applicable environmental legislation in all regions that we operate.

Supply chain focus

Our products are sourced with consideration of environmental factors; Measures to improve environmental impact, such as use of certified forest fibres, alternative renewable energy sources, reducing chemical, energy and water usage and effluent, and manufacturing products that contain recycled content, are discussed with key suppliers.

All operations are committed to maintaining 'Chain-of-Custody' (CoC) and other environmental certifications, such as Forest Stewardship Council (FSC®) or Program for the Endorsement of Forest Certification (PEFC) for sustainably sourced and manufactured papers. Over 95% of fibre-based products sourced by Spicers are either FSC® or PEFC certified.

Spicers provides a wide range of products with strong sustainability and environmental credentials, particularly recycled paper products and alternative fibre products such as cotton, hemp or bamboo.

External audits on Spicers Supply Chain processes are performed on a yearly basis by SCS (Scientific Certification Systems, Inc.) to ensure compliance with CoC and various other criteria. Our Supply Chain team evaluate fibre-based products from suppliers to ensure they comply with the illegal logging legislation introduced by the Australian Government. Records are kept on each supplier that detail the species of tree used and the country of origin.

Our selection criteria for Paper & Board manufacturers ensures they must have an environmental management system in place that meets, or exceeds an internationally recognised standard. For non-fibre-based materials we ensure considerations are given to attributes such as compostability biodegradability or recyclability.

Operational footprint

The Company's operations include warehouses, transportation and offices. All operations take responsibility for legal compliance and the management of environmental impacts related to their business activities.

Emphasis is placed on initiatives that reduce our environmental impact, such as energy efficiency (LED lighting and Solar Panels) and waste management. Our sites collect and recycle waste paper, cardboard and other materials, such as wood, pallets, plastics, acrylic and PVC where possible.

We promote sustainable business practices across the organisation, ensuring that we conduct ourselves responsibly and ethically, and continually looking for opportunities to strengthen the sustainability of our supply chain.

We make available the latest environmental and technical information on our products to customers, staff and stakeholders through training and education. The ongoing development of sustainable products and services assist our customers and their clients achieve their sustainability goals, print and production requirements.

By thinking and acting sustainably, we strive to deliver excellent customer service and position the company and industry for a strong future.

greenfleet partnership

In 2022 Spicers embarked on our journey towards Carbon Neutrality.

Spicers Australia is offsetting CO2 emissions relating to our Australian operations. This includes emissions from LPG for our gas forklift, the diesel used in our fleet of trucks, the fuel used in company cars (including those with car allowances) and electricity used in our offices and Distribution centres.

Whilst Spicers have taken action through solar panels on some of our sites, LED lighting upgrades and movement to more electric forklifts, we still have some work to go. We are proud to be partnering with Greenfleet to take climate action and offset our carbon emissions through native reforestation.

Greenfleet is a leading not-for-profit environmental organization committed to protecting our climate by restoring our forests. Greenfleet plants native biodiverse forests to capture carbon emissions and help fight the impacts of climate change. Since 1997, Greenfleet had planted over 10 million trees across over 500 forests in Australia and New Zealand. As they grow Greenfleet forests absorb carbon emissions, improve soil and water quality, and restore habitat for native wildlife, including many endangered species.

Spicers' first offset will be allocated to Glendalough, VIC. In the rolling hills of South Gippsland, this previously cleared 240-hectare property will be returned to native ecosystem. The property is adjacent to remnant native forest and will provide an important vegetation link for Strzelecki Koalas and habitat for native birds such as Yellow-faced Honeyeater and Grey Fantail.

"By partnering with Greenfleet, we are confident that our climate action provides genuine and lasting environmental benefits. We are proud of the impact we have made and that we will continue to make into the future," said David Martin, CEO of Spicers Limited. "By offsetting our emissions with Greenfleet, we are taking practical action against climate change and helping to restore Australia's forests, recreate crucial habitat for native wildlife and transform degraded land back to its natural state."

Through practical climate action, Greenfleet is growing hope for our climate.
