OCTOBER 26

NOVEMBER 2020

DECEMBER 2020

Co-Researchers Presentation sessions

First Cocreation Sessions

VICENÇ'S Story

OLDER BROTHER IN LONG TERM CARE for the last 30 YEARS

Works in SOCIAL CARE

SECRETARY - CATALONIA MENTAL HEALTH FEDERATION

this is FOR ME!! I'm IMPLICATED! it AFFECTS ME!!

this was a COMPLETE CHANGE

Writing MICROSTORIES was like SHAKING a TREE it was a HEALING EXPERIENCE

new APPRECIATION of what is involved in a PROJECT like this one

We feel LESS ALONE NOW and the VALUE of COMMUNITY PROJECTS

Co-Researchers Plenary Session To Present Outcomes of Microstory writing exercise

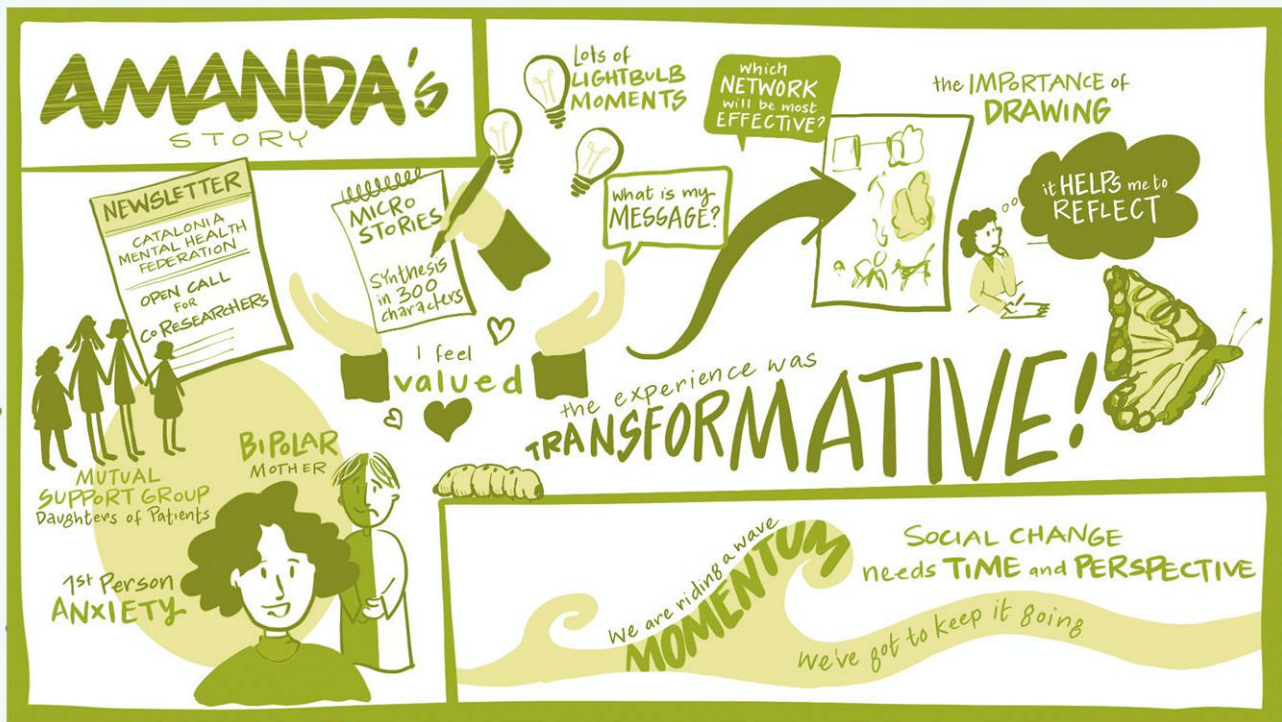

Chatbot testing with Co-Researchers

Intensive Co-Creation Work with Co-Researchers to Write Microstories for the Chatbot

Printed Research Diary sent to Co-Researchers

Co-Researchers present Chatbot to the Knowledge Coalition

First face-to-face meeting with the Co-Researchers, video testimonials created

CoAct for Mental Health Chatbot official Launch!! Promotion and press campaign begin

SEPTEMBER 3

Alba & Amanda participate in the Chile Citizen Science Conference

Amanda presented at First Meeting of Citizen Science, Social Sciences & Humanities

SEPTEMBER 23

300

participants
already in the chatbot!!

500
participants

Viceng presented
at m4social
at Mobile World
Congress

Ana interviewed by
a local TV channel

Launch of the
testimonials videos

QUIONA'S Story

IMAGINA THEATRE GROUP

Research Notebook
GAVE STRUCTURE

GROUP SESSIONS
we were like CHICKS
being RELEASED

MICRO STORIES
can be used ELSEWHERE such as MUTUAL SUPPORT GROUPS

take a DEEP BREATH

I'm NOT ALONE

this will HELP others

Daughter

Wife

1st Person

MICRO STORIES from TOUGH to THERAPEUTIC

AND IT HAS HELPED ME BE KINDER TO MYSELF

with POSITIVE BEHAVIOUR CHANGES

Networks Data Results Actions

3 Collective Data Interpretation sessions

EXPERIENCE THE CO DESIGN PROCESS
what it means to be a CO-RESEARCHER

Quiona, Assumpta and other Co-Researchers explained the project in a public conference at the Canodrom

Amanda conducted workshop at the Living Knowledge Conference

MAY 6

MAY 31

JULY 7

“A much more horizontal research. It’s not that some do the studying, and others are the studied. Between us, we all do a little bit of everything”

A. M., CoAct for Mental Health Co-Researcher

This graphic document is a testimony of the Co-Researchers’ contribution to CoAct for Mental Health over a long and still unfinished journey, from 2020 to 2022. Co-Researchers, people with mental health problems and their families, have been the main actors of this research, as in-the-field competent experts. The research involved launching a chatbot in Telegram where anyone can listen to their lived experiences and react to them. Co-Researchers have been involved in the interpretation of the data collected and drew conclusions to make political recommendations and support specific demands.

CoAct for Mental Health is part of CoAct (Co-designing Citizen Social Science for Collective Action), a project funded by the European Union’s Horizon 2020 research and innovation programme. CoAct understands Citizen Social Science as participatory research co-designed and directly driven by citizen groups sharing a social concern. We expect to upscale this project at a more global level and to replicate it to other social pressing issues.

The Co-Researchers presented 14 Policy Recommendations to Barcelona and Catalonia Public Authorities

CoAct for Mental Health final assembly
