LIONS CODE OF ETHICS

1. **TO SHOW** my faith in the worthiness of my vocation by industrious application to the end that I may merit a reputation for quality of service.

2. **TO SEEK** success and to demand all fair remuneration or profit as my just due, but to accept no profit or success at the price of my own selfrespect lost because of unfair advantage taken or because of questionable acts on my part.

3. **TO REMEMBER** that in building up my business, it is not necessary to tear down another's; to be loyal to my clients or customers and true to myself.

4. **WHENEVER** a doubt arises as to the right or ethics of my position or action towards others to resolve such doubt against myself.

5. **TO HOLD** friendship as an end not a means. To hold that true friendship exists not on account of the service performed by one another; but that true friendship demands nothing but accepts service in the spirit in which it is given.

6. **ALWAYS** to bear in mind my obligations as a citizen to my nation, my state and my community, and to give them my unswerving loyalty in word, act and deed. To give them freely of my time, labour and means.

7. **TO AID** fellow men by giving my sympathy to those in distress, my aid to the weak, and substance to the needy.

8. **TO BE CAREFUL** with my criticism and liberal with my praise; to build and not to destroy.

සිංහ ආචාර ධර්ම පද්ධතිය

1. නිර්මාණශීලීව, දැඩි විශ්වාසයෙන් හා කැපවීමෙන් මගේ වෘත්තියෙහි නිරතවන මම, එහි ගුණාත්මක බවින් බුහුමන් ලබමි.

2. සාධාරණව ලැබිය යුතු හැම දේ ලබමින්, සාර්ථකත්වය කරා ගමන් කරන මම, ඒ වෙනුවෙන් කිසිවිටෙකත් මගේ ආත්ම ගෞරවය කෙලෙසන හෝ කෙනෙකුට මා ප්‍රශ්න කළ හැකි කිසිවක් හෝ නොකරන්නෙමි.

3. මගේ සියළු කටයුතු අනෙකෙකුට හිරිහැරයක් නොවන සේ කළ යුතු බවත්, මා හා සම්බන්ධ සියල්ලන්ට මෙන්ම, මා මට ද අවංක විය යුතු බවත් මම තරයේ විශ්වාස කරමි.

5. මිත්‍රත්වය ඵලයකි. එය වාසි ලබන්නක් නොවේ. මිතුරුකම කෙනෙක් තවකෙකුට කරන ලද සේවය නිසා ඇතිවූවක් නොවේ. අකලංක මිත්‍රත්වය නම් තමන්ට ලබාදුන් සේවය එය ලබාදුන් පවිත්‍ර චේතනාවෙන්ම පිළිගැනීම වන්නේය.

6. පුරවැසියකු වශයෙන් මගේ ජාතියට, මගේ රාජ්‍යයට සහ මගේ ප්‍රජාවට මගෙන් ඉටුවිය යුතු යුතුකම් නිරතුරුව සිත්හි දරාගෙන ඒවාට මගේ අප්‍රතිහත පක්ෂපාතීත්වය කතාවෙනුත්, ක්‍රියාවෙනුත් පිරිනමමි. ඒවාට මගේ කාලය, ශ්‍රමය හා ධනය බැඳීමකින් තොරව යොදවමි.

7. මා ඇසුරු කරන්නන් අතර, විපතට පත්වූවන්ට පිහිට වෙමින් ද, දුබලයන්ට ආධාර දෙමින් ද, අසරණයන්ට සරණ වෙමින් ද, මම මාගේ මෙහෙවර ඉටු කරමි.

8. මම යමක් විවේචනය කරන්නේ ඉතා ප්‍රවේශමෙනි. එහෙත් අගය කිරීමේ දී නිර්ලෝභී වන්නෙමි. ඒ මගේ වෑයම ගොඩනැගීම සඳහා මිස විනාශය සඳහා නොවන නිසාය.

Re-Dedication Pledge

Let each individual Lion fully understand and recite the following Re-dedication Pledge with sincerity of purpose.

“Recognizing the debt I owe to the vision and leadership of the founders of Lionism at the International and Club level, I hereby re-affirm my dedication to the high principles of our organization as reflected in our Code of Ethics and Lions Objects, and pledge myself, to meet with renewed vigour, the challenges to serve, wherever the need may be found”

HISTORY OF LIONS CLUBS INTERNATIONAL

The Lions Clubs International began as the dream of Chicago businessman Melvin Jones. He believed that local business clubs should expand their horizons from purely professional concerns to the betterment of their communities and the world at large.

Jones' group, the Business Circle of Chicago, agreed after contacting similar groups around the United States, an organizational meeting was held on June 7, 1917 in Chicago, Illinois, USA. The new group took the name of one of the invited groups, the "Association of Lions Clubs," and a national convention was held in Dallas, Texas, USA in October of that year. A constitution, by-laws, objects and code of ethics were approved.

Among the objects adopted in those early years was one that read, "No club shall hold out the financial betterment of its members as its object." This called for unselfish service to others to remain one of the association's main tenets.

Just three years after its formation, the association became international when the first club in Canada was established in 1920. Major international expansion continued as clubs were established, particularly throughout Europe, Asia and Africa during the 1950s and 1960s.

In 1925, Helen Keller addressed the Lions international convention in Cedar Point, Ohio, USA. She challenged Lions to become "Knights of the blind in the crusade against darkness." From this time, Lions clubs have been actively involved in service to the blind and visually impaired.

Broadening its international role, Lions Clubs International helped the United Nations representing the Non-Governmental Organizations sector in 1945 and continues to hold consultative status with the U.N.

In 1990, Lions launched its most aggressive sight preservation effort, Sight First 1. The US$ 202 million program strive to rid the world of preventable and reversible blindness by supporting desperately needed health care services. Lions have launched Campaign Sight First II to raise at least US$ 150 million which has now reached 200 million to continue and expand the extraordinary work of Sight First, globally.

In addition to sight programs, Lions Clubs International is committed to providing services for youth. Lions clubs also work to improve the environment, build homes for the disabled, support diabetes education, conduct hearing programs and, through their foundation, provide disaster relief around the world.

Lions Clubs International has grown to include 1.4 million men and women in approximately 46,000 clubs located in 210 countries and is regarded as the best NGO in the world.

THERE ARE FOUR MAIN RELIGIONS IN SRI LANKA SUCH AS BUDDHISM, HINDUISM, ISLAM AND CHRISTIANITY.

More than 22 million people reside in Sri Lanka. As a multinational state, Sri Lanka makes home to various ethnicities such as Sinhalese, the Tamils, the Moors, the Burghers, the Malays, the Chinese and the indigenous Vedda. Sinhalese make up the largest ethnic division with three fourth of the population, while the Tamils constitute the largest minority group. Practiced by 70 percent of the population, Buddhism is the largest religion in the country with Hinduism coming in second practiced mostly by Sri Lankan Tamils. Islam and Christianity are also practiced by portions less than 10% of the population. As for the culture, Sri Lanka sticks to tradition in the arts and customs to a large extent. Due to the existence of varied religions and ethnicities, diversity in culture can also be seen in the country just like in India.

THE KANDY ESALA PERAHERA

One of Sri Lanka's most vibrant and historically significant festivals, is an annual grand procession held in the sacred city of Kandy. Rooted in Buddhist traditions, this magnificent event takes place in July or August, during the Esala full moon, to honor the Sacred Tooth Relic of the Buddha, housed at the Sri Dalada Maligawa (Temple of the Tooth Relic). The perahera (procession) symbolizes both religious devotion and the country's rich cultural heritage, attracting thousands of local and international spectators.

The origins of the Kandy Esala Perahera date back to the 4th century when the Tooth Relic was brought to Sri Lanka from India. Initially, royal processions were held to honor the relic. However, during the reign of King Kirthi Sri Rajasinghe (1747–1782), the event was merged with the four Devale Peraheras, which pay tribute to the guardian deities: Natha, Vishnu, Kataragama, and Pattini. Today, the festival is a fusion of Buddhist and Hindu traditions, showcasing a spectacular mix of devotion, artistry, and pageantry.

The Kandy Esala Perahera spans ten days, starting with the Kumbal Perahera and culminating in the Randoli Perahera, each night becoming increasingly elaborate. The procession features majestic elephants adorned in lavish garments, traditional dancers, drummers, torchbearers, and whip-crackers. The most revered sight of the perahera is the Maligawa Tusker, a beautifully decorated elephant that carries the golden casket containing a replica of the Sacred Tooth Relic.

This grand event is not only a religious ceremony but also an embodiment of Sri Lanka's deep-rooted cultural identity. It serves as a blessing for the people, ensuring prosperity, fertility, and protection. The rhythmic beats of the hevisi drums, the mesmerizing movements of Ves dancers, and the glowing fire torches create an unforgettable spectacle, making the Kandy Esala Perahera one of the most breathtaking cultural festivals in the world.

CINNAMON

SRI LANKA IS KNOWN FOR EXPORTING TEA, COFFEE, RUBBER AND CINNAMON, BUT ***CINNAMON*** *IS NATIVE TO THE ISLAND*

The scientific name for cinnamon is Cinnamomum zeylanicum, with the latter part of the name coming from Ceylon, the former name of Sri Lanka. It also grows in southwest India and Myanmar. Cinnamon was used by the Egyptians in embalming and in medieval times it was used to treat coughs and throat infections. At one time Sri Lanka held a monopoly on production of the spice, but this declined as cultivation spread to other areas.

Black Ruby Barb is a beautiful endemic freshwater fish found in Sri Lanka. Known as "Bulath Hapaya" in native Sinhala language, it grows between 5cm to 6.5cm. Found in the streams of wet zone rainforests and surrounding area between the Kelani and Nilawala rivers they prefer streams with shade and clear water.

Due to the destruction of freshwater streams around rainforests for private mini-hydro projects, Black Ruby Barb is in danger of being going extinct in the near future.

A thirikkale **තිරික්කලේ** is a traditional Sri Lankan, **Bull-drawn Carriage**, historically a luxurious and exclusive means of transport for the elite, similar to having a Benz car today, and was sometimes used for festivals and even, in its racing form, as a popular sport. While no longer common on modern streets, these antique vehicles are now revived for fun, especially during events like New Year's celebrations and by bridal couples.

Sri Lankan traditional masks, known as Ves Muhunu or "Character Faces," are hand-carved wooden masks used in cultural rituals, devil dances, and comic folk plays for purposes of healing, protection, and entertainment.

These vibrant masks represent characters from mythology and folklore, including demons, deities, animals, and human archetypes, with specific types like Raksha masks warding off evil and Sanni masks used in healing ceremonies for specific illnesses. The masks originate from ancient beliefs and practices, particularly in the Ambalangoda region, and are crafted from local woods like Vel Kanduru and Ruk Attana.

Coconut Shell Craft involves transforming the hard outer layer of a coconut into functional and decorative items like bowls, jewelry, and home decor, utilizing a process of cleaning, cutting, sanding, and polishing. These eco-friendly and durable products are popular due to growing demand for sustainable goods and can be found in online marketplaces and specialty stores, particularly in regions like Kerala, India. The craft highlights the versatility of coconut shells as a sustainable raw material, turning a common byproduct into unique, artisanal pieces.

Preparation: The coconut shell is cleaned and processed.
Shaping: The shell is cut and shaped into desired forms.
Finishing: The surfaces are sanded, buffed, and polished to achieve a smooth and desirable finish.

The mountains of Sri Lanka are home for the endemic Ceylon wood pigeon. In Sinhala, this bird is referred to as Manila Goya. The IUCN Red List described it as vulnerable. Its body is bluish-grey, and its purplish hind neck is marked in black and white. They are substantial birds, measuring about 36 cm. They have simple gray plumage. They are larger than pigeons in the wild.

Kadavunu Poronduva ("The Broken Promise") was the first film to be made in the Sinhala language; it is generally considered to have heralded the coming of Sinhala Cinema. The film was produced and filmed in India however, and was highly influenced by South Indian melodrama. It was first shown on January 21, 1947, at the Kingsley Cinema in Colombo, Sri Lanka. Kadavunu Poronduva was produced by S. M. Nayagam, a pioneer of Sinhala film industry and an Indian citizen. He had to ferry the entire cast to Madurai India for filming and production. It began as a successful play for dramatist B. A. W. Jayamanne. In 1947 he filmed and processed the movie in South India. The duration of a film had to be two and a half hours. One hour of this had to be given to scenes with dialogue. Half an hour to songs (about ten), another half-hour given to silent background scenes, with an interval of fifteen minutes.

Yala National Park is a national park in Sri Lanka. The reserve covers 979 km, although only the original 141 km are open to the public. It was established in 1894 as a Game Sanctuary. Much of the reserve is parkland, but it also contains jungle, beaches, freshwater lakes and rivers and scrubland. The latter zone is punctuated with enormous rocky outcrops. The range of habitats give rise to a good range of wildlife.

Sri Lanka is a crucial nesting ground for five of the world's seven sea turtle species: the Green Turtle, Hawksbill, Loggerhead, Olive Ridley, and Leatherback. These marine reptiles, including the large Green Turtle and the unique, hard-shelled Hawksbill and Loggerhead, rely on Sri Lanka's warm waters and beaches for feeding and nesting. However, they face severe threats from human activities like fishing nets, plastic pollution, and poaching of eggs, leading to conservation efforts to protect these endangered animals.
Female turtles come ashore to lay dozens of eggs in nests dug on the beach. After nesting, the female returns to the sea, leaving a trail that predators can follow to the nest.

- **Turtle Hatcheries:**

Facilities exist to protect eggs from predators and human activities, providing a safer environment for development.

Local communities are increasingly involved in conservation, with some initiatives providing sustainable alternatives to harmful practices.
Educating the public and tourists about the importance of sea turtle conservation is a key part of ongoing efforts.

Green Turtle: The most common species, named for their green fat, and a significant herbivore.

Hawksbill Turtle: Known for its pointed beak and distinctive, colorful shell, though it is critically endangered.

Olive Ridley Turtle: The smallest of the sea turtles, recognized by its olive-colored shell and known for its mass nesting events.

Loggerhead Turtle: Easily identified by its large head, it uses powerful jaws to eat mollusks and crustaceans.

Leatherback Turtle: The largest turtle, unique for its soft, leathery shell rather than a hard one.

The most prominent "Army Museum" is likely referring to the Orr's Hill Army Museum in Trincomalee, Sri Lanka, which showcases Sri Lankan military history through artifacts, vehicles, and interactive experiences, including a bunker simulation and a free air rifle range.

Other army museums include the free-to-enter National Army Museum in the UK, which covers the history of the British Army from the 1600s onwards, and the Museum of the Sri Lanka Military Academy (SLMA), which displays firearms and uniforms and focuses on the academy's history.

The Seven Virgins (Saptha Kanya) is a untouched and unspoiled Mountain Range in Central Highland of Sri Lanka. The sight from the way to Adams Peak alone may not enough and its a place to explore. Anyone who appreciates beauty of the legendary kind, It looks like Seven Virgins are the true keepers of nature at its most splendour.

The Seven Virgin Mountain became world famous after the plane Martin Air Flight at night crashed into its massif in 1974 and 191 people never walked free from such a place of rugged beauty. There is a tombstone marked at the foot of the Seven Virgins.

The enticing beauty of Seven Virgins can be seen in each of their pristine peaks as one can be as contrasting from the other although they all stand collectively like nothing more evergreen. Many travellers, trekkers talk abut Knuckles Mountain Range as probably the best and most scenic mountain in the country, but Seven Virgins will never cry out to be on the top shelf. That tragedy may also be gradually moving away into the where-are-they-now files and if it does not, it could only show how inseparable that even beauty and the beast could be.

Adam's Peak, also known as Sri Pada, is a sacred conical mountain in Sri Lanka renowned for its religious significance and challenging pilgrimage climb, which traditionally involves an overnight ascent to witness the sunrise. It features a 1.8-meter rock formation at its summit, believed by Buddhists to be the footprint of the Buddha, by Hindus to be that of Lord Shiva, and by Muslims and Christians to be the footprint of Adam after his expulsion from the Garden of Eden. The surrounding region is a designated wildlife reserve, recognized as a World Heritage Site.

Sacred Footprint: The summit features a sacred footprint-shaped mark, revered by multiple faiths.

Religious Significance: It is a major pilgrimage site for Buddhists, Hindus, Muslims, and Christians.

Height: The peak stands at approximately 2,243 meters (7,359 feet).

"Butterfly Mountain": Also known as Samanala Kanda (Butterfly Mountain).

Wildlife Reserve: The mountain is part of the Peak Wilderness Sanctuary, a World Heritage Site that supports diverse flora and fauna.

Overnight Climb: The most popular approach is to begin the hike in the middle of the night to reach the summit by sunrise.

Sera Ella is a waterfall located in Pothatawela village, a place near Laggala in the Matale District. There are several opinions about how Sera Ella got its name. According to one, the name of the fall derives from the 'Sera' species of fish that inhabits the water.Another opinion is that the name Sera Ella explains that the beauty of this waterfall is just like the leaves of a sera tree (Lemon grass) hanging down. Some people also claim that because this waterfall reflects the way where a handful of Sera seeds falls down from the palm when it is lowered from the small finger side of the hand it got the name Sera Ella.

The Sera Ella waterfall is separated into two sections as it falls down the rockface, both falling down a height of 10 m (33 ft) and are visible from the Dumbara Jungle.

Baker's Bend *is one of the many amazing viewpoints in the hill country in Sri Lanka. This is a horse-shaped bend inside the Nonpareil Estate on the route to the Nagarak Bungalow. The Nonpareil Estate had been managed by William Baker during the time of British rule. It is said that once his horse slipped and fell off at this bend killing the horse and injuring him.*

At 1530 meters (5000 feet) this viewpoint provides panoramic views towards Balathuduwa, Gommolikanda, Adarakanda mountain range to the left and Samanala and Udawalawe reservoirs to the right on a clear day.

Toddy production in Sri Lanka involves the collection of sweet, non-alcoholic sap from the flower buds of the coconut or Palmyrah palm by skilled toddy tappers who climb the trees. The sap then ferments naturally within hours due to wild yeasts, becoming a mildly alcoholic, cloudy drink called "toddy," or "Raa" in the local language. This traditional beverage is sold by toddy sellers and is the base for coconut arrack, a distilled alcoholic spirt.

Tapping the Flower: Toddy tappers climb tall coconut or Palmyrah trees and carefully tap the unopened flower buds.

Collecting the Sap: The tappers slice the flower stalks to collect the dripping, sweet sap into containers, traditionally called 'labuketaya'.

Fermentation: The fresh sap begins to ferment naturally within hours, a process supported by residual yeasts present in the collection containers.

Appearance and Taste: Toddy is a cloudy, white, and sugary beverage.

Alcohol Content: The alcohol content ranges from 0.5% to 8%.

Shelf Life: Fresh toddy has a short shelf life.

Nutrient Content: It is a rich source of nutrients, including protein and vitamins.

Coconut Toddy (Pol Ra): Made from the sap of the coconut palm's flower.

Palmyrah Toddy (Thal Ra): Primarily produced in the northern and eastern parts of Sri Lanka using the Palmyrah palm.

Kithul Toddy (Kitul Ra): Another type of toddy made from the Kithul palm.

Distribution: Toddy is sold by toddy sellers and is also used to produce the distilled spirit, arrack.

Pigeon Island National Park is one of the three marine national parks of Sri Lanka. The national park is situated 1 km off the coast of Nilaveli, a coastal town in Eastern Province, encompassing a total area of 471.429 hectares. The island's name derives from the rock pigeon which has colonized it. The national park contains some of the best remaining coral reefs of Sri Lanka. Pigeon Island was designated as a sanctuary in 1963. In 2003 it was re-designated as a national park, making it the 17th such park in Sri Lanka. The island was used as a shooting range during the colonial era. Pigeon Island was one of the several protected areas affected by the Indian Ocean tsunami in 2004.

Sri Lanka's original name of Ceylon comes from Ceilão, which was given to the island in 1505 by settlers from European country called Portugal. The Portuguese, under Lourenço de Almeida, arrived to find the island divided into seven different kingdoms too busy fighting each other to be able to fend off invaders. They settled mainly in the coastal regions of the west and south and established a capital city at Colombo on the west coast. Colombo is still often referred to as Sri Lanka's capital, although the official capital is now Sri Jayawardena pura Kotte which adjoins Colombo. The Portuguese occupation was a time of religious persecution with Christianity being imposed on the Buddhist Sinhalese population and the Islamic Moors. The country received help from the Dutch who established their own colony in 1656 and the name was anglicized to Ceylon when the British took control of the island.

TEA PLANTATION

Sri Lanka's tea plantation history began in 1824 with the arrival of the first tea plant from China, planted for non-commercial purposes at the Royal Botanical Gardens in Peradeniya. The coffee industry collapsed in the 1860s due to coffee rust disease, leading to the rise of commercial tea cultivation spearheaded by Scotsman James Taylor in 1867 at the Loolecondera Estate with a fully equipped tea factory. In 1870 other planters quickly followed Taylor's Lead.

In 1873 the first shipment of 23 pounds of Ceylon tea was sent to London.Expansion and Growth (Late 19th Century - Present). In 1883 the first tea auction was conducted in Colombo. This experiment flourished, any 1990 the island's tea cultivation expanded to 120,000 hectares, making Ceylon tea a global commodity.

Today Sri Lanka remains one of the world's largest tea producers and exporters, with its tea being known for its distinct flavor and aroma

The Colombo National Museum

The Colombo National Museum, also known as the Sri Lanka National Museum, is a museum in Colombo and the largest in Sri Lanka. Founded in 1877 by Sir William Henry Gregory, the British Governor of Ceylon at that time.

The construction of the Museum was completed in 1876 and it was officially opened in the following year. The Museum is housed in a Colonial building designed in the Italian architectural style. Over the years, it has expanded to include various wings and extensions, such as a natural history Museum and an Auditorium. The Museum was given the status of a National Museum during the period of Dr P E P Dertaniyagala, and he established branch Museums in Jaffna, Kandy and Ratnapura.

The Colombo National Museum is maintained by the Department of National Museums, it holds collections of significant importance to Sri Lanka, such as the regalia of the Kandyan monarchs, as well as many other exhibits relating the country's cultural and natural heritage.

Sigiriya rock palace fortress, with an entrance between the paws of a lion, can find a mirror wall with graffiti and fresco paintings of young maidens on sheer rock.

Sigiriya, or the 'Lion Rock Fortress', was declared a world heritage site in 1982. A fortified palace was built in the fifth century by King Kassapa on the peak of a rock which was over 150 metres in height to protect himself from the attacks of Dhatusena. The most famous aspects of the site are twenty-two well preserved frescoes of young women painted on the sheer rock. It is believed that there may have been over five hundred pictures originally. The entrance was guarded by a statue of a lion at the base of the rock, with the gateway being between its paws, which are now all that remain of it.

CEYLON RUBBER PLANTATION

Rubber cultivation in Sri Lanka began in 1876 with the planting of Hevea brasiliensis seedlings at the Henerathgoda Botanical Gardens, a step that followed Sir Henry Wickham's successful introduction of rubber seeds to England from South America. The first commercial planting occurred in 1883, with cultivation expanding at a moderate pace.

The industry expanded rapidly from the early 1900s, becoming a significant agricultural export by the 1920s and creating a vital economic sector that persists today, supported by institutes like the Rubber Research Institute (RRI).

Rubber planting increased significantly after 1904. By 1928, Sri Lanka had 214,000 hectares under rubber cultivation.The cultivation spread from the initial Kalutara area to other regions, including the Western, Central, and Southern provinces.

The Golden Temple of Dambulla

The Golden Temple of Dambulla is also known as the Dambulla Cave Temple and it's built in a Cave. The Golden Temple houses Buddhist statues and wall paintings exhibited over five caves. Humans have been living in these caves for almost 3,000 years and there are burial sites in this cave complex. This temple was built in the 1st century B.C. and from the front looks somewhat like a normal temple built into an overhanging rock. As soon as you enter you will be greeted with fantastic paintings on the walls and ceilings. While the public may view this lovely temple, there are parts that are kept private as they are considered very sacred and only a few are blessed enough to enter.

Hummanaya Blowhole is considered to be the second largest blowhole in the World. Hummanaya refers to the noice, "HOO", that can be heard a distance away when the blowhole is active.

Hummanaya is a natural blowhole and is caused when sea water rushes through a submerged cavern and is pushed upwards. The sea water flows underneath the shore and then comes out of this hole due to pressure. The water fountain created by the geological feature shoots up every couple of minutes, depending on the nature of the sea, with the spray often reaching as high as 25 m (82 ft) to 30 m (98 ft)

The Hummanaya Blowhole is located 1.1 kilometres (0.7 mi) from the small fishing village of Kudawella, which is 28 km (17 mi) from Matara, 5 km (3.1 mi) from Dikwella and 12 km (7.5 mi) from Tangalle, in the Southern Province.

This site has now been developed as a tourist attraction, with a small visitors' information Centre on marine life and a viewing platform.

ISURUMUNIYA TEMPLE

ISURUMUNIYA IS A BUDDHIST TEMPLE SITUATED NEAR TO THE TISSA WEWA (TISA TANK) IN ANURADHAPURA, SRI LANKA. THERE ARE FOUR CARVINGS OF SPECIAL INTEREST IN THIS VIHARA. THEY ARE THE ISURUMUNIYA LOVERS, ELEPHANT POND AND THE ROYAL FAMILY.

THE ANCIENT MEGHAGIRI VIHARA OR MEYGIRI VIHARA IS PRESENTLY IDENTIFIED AS THE ISURUMUNI VIHARA. IT WAS BUILT BY KING DEVANAMPIYA TISSA (307 BC TO 267 BC) WHO RULED IN THE ANCIENT SRI LANKAN CAPITAL OF ANURADHAPURA.

AFTER 500 CHILDREN OF HIGH-CASTE WERE ORDAINED, ISURUMUNIYA WAS BUILT FOR THEM TO RESIDE.]KING KASYAPA I (473-491 AD) AGAIN RENOVATED THIS VIHARAYA AND NAMED IT AS "BOUPULVAN, KASUBGIRI RADMAHA VEHERA" GIVING THE NAMES OF HIS 2 DAUGHTERS AND HIS NAME.

THERE IS A VIHARAYA CONNECTED TO A CAVE AND ABOVE IS A CLIFF. A SMALL STUPA IS BUILT ON IT. IT CAN BE SEEN THAT THE CONSTRUCTIONAL WORK OF THIS STUPA BELONGS TO THE PRESENT PERIOD. LOWER DOWN ON BOTH SIDES OF A CLEFT, IN A ROCK THAT APPEARS TO RISE OUT OF A POOL, HAVE BEEN CARVED THE FIGURES OF ELEPHANTS. ON THE ROCK IS CARVED THE FIGURE OF A HORSE. THE CARVING OF ISURUMUNIYA LOVERS ON THE SLAB HAS BEEN BROUGHT FROM ANOTHER PLACE AND PLACED IT THERE. A FEW YARDS AWAY FROM THIS VIHARA IS THE RANMASU UYANA.

Kandyan dance, also known as Udarata Natum, is a traditional dance form from Kandy, Sri Lanka, that is characterized by powerful, dynamic movements, complex footwork, and elaborate costumes worn by traditionally male dancers. Male dancers wear distinctive costumes including silver regalia, headgear, and a skirt-like garment over their bare chests. The dance evolved during the period of the Kandyan kings and is a significant part of the country's cultural identity. Rooted in the ancient Kohomba Kankariya ritual, it has developed into a classical art form with a repertoire including Vannam. A major part of the repertoire, Vannams are dances that depict specific subjects, often animals like elephants (Gajaga Wannam) and peacocks (Mayura Wannam), or tell stories from epics like the Ramayana. Performances are driven by percussion, primarily the Geta Beraya drum, and the Thalampota cymbals.

Kandyan dance includes five distinct varieties: Ves, Naiyandi, Udekki, Pantheru, and the Vannams. The dance is known for its dynamism, powerful footwork, energetic leaps, and vigorous whirls

Kandyan dance is now considered the national dance of Sri Lanka.

Lipton's Seat *high observation point in the hills of Poonagala. Located on the top of the town's namesake, Poonagala Hill, it is also near the Dambatenne Tea Factory. Lipton's Seat is so named because the famed Scottish baron and tea planter Sir Thomas Lipton used it as the seat to survey his empire in a time long gone but not forgotten.*

The point of Lipton's Seat is reached by climbing for around 7km surrounded by peaceful green tea plantations and an occasional colorful tea plucker. There are two routes available; one from the Nayabedda estate in Bandarawela, and the second through the Dambatenna estate in Haputale. Both routes have entrances marked with sign boards and narrow paved roads. Some parts of the road even have some of the original stone constructions from the British era of Ceylon, and hence are worth seeing from a historical point of view. The climb takes about two and a half hours on average, after a visitor reaches the hill top.

Lipton's Seat *the Uva, Sabaragamuwa, Central and Eastern provinces spread out from before the feet of the viewer in a display rivaling that of the famed World's End observation point. Visible from the hill top are 7 provinces along with sights such as Handapanagala Lake, Chandrika Lake, Udawalawe Lake, Wedihitikanda Mountains, and even the Hambanthota harbor from the Southern coast.*

For those who wish for even more stunning view or photographers wishing to snap a picture of nature at its best, Lipton's Seat is best visited early in the morning before sunrise. The change of colors as the sun shows its face, as the thick mist fees the heat revealing the carpet of greens and browns spread out below, is a spectacular sight. There is also a very good chance to see basket bearing tea pluckers making their way to work. However, for those visitors who find it hard to wake early, making the hilltop before 10 am should be sufficient to get a reasonably clear view.

World's End at Horton Plains is a dramatic escarpment with a sheer drop of about 900 meters (3,000 feet) that marks the southern edge of the plateau. This UNESCO World Heritage Site offers breathtaking panoramic views of the southern lowlands, tea plantations, and distant coastlines on clear mornings, though mist often obscures the vista after 10 AM. The ~4km trail to World's End passes through diverse terrain including grasslands and cloud forests and is a prime location for spotting Sambar deer and unique endemic flora.

ADISHAM BUNGALOW

Adisham Bungalow, also known as Adisham Hall, was built in 1931 by English aristocrat and planter Sir Thomas Villiers as a private residence near Haputale, Sri Lanka. Named after Adisham in England, the house was designed in the Tudor and Jacobean styles by architects R. Booth and F. Webster. After Villiers's retirement, the property became a haven for prominent colonial figures. Today, it functions as the Saint Benedict Adisham Monastery, serving as a monastic retreat and offering a glimpse into Sri Lanka's colonial past to visitors on weekends and holidays.

Sri Lanka Planetarium *is a public planetarium located in Colombo, Sri Lanka. It is the first and only planetarium in the country and maintained as an institute under the Ministry of Science, Technology and Research.*

The planetarium was established on 1 February 1965 by the State Engineering Corporation as a special feature for the Ceylon industrial exhibition held in Colombo same year. The planetarium was designed by the chief engineer from the State Engineering Corporation of Ceylon, A. N. S. Kulasinghe, and was constructed by engineers from Germany. The building takes elements from the Liverpool Metropolitan Cathedral (Sir Frederick Gibberd - 1960) and the Cathedral of Brasília (Oscar Niemeyer - 1960).

The building has a reinforced concrete floor and a pre-stressed concrete folded plate roof, which was pre-cast on-site. The building was funded by the German Democratic Republic as a gift to Ceylon. The planetarium is 21.33 m (70.0 ft) high and 37.8 m (124 ft) in diameter.

The building was refurbished in 2014 at a cost of Rs 200 million and re-opened to the public on 9 December.

The planetarium has a digital fully-spherical projector stationed at the centre of the building, which projects an artificial sky on the 23 m (75 ft) diameter dome above a 570-seat auditorium. The universal projector is a product of Carl Zeiss AG East Germany.

GEMSTONES FOUND IN SRI LANKA

Sri Lanka lies at the southern tip of India which is located at latitude of 6° – 10° N and longitude of 80° – 82° E. The major part of Sri Lanka is made up of Precambrian crystalline rocks except for a belt of sedimentary rocks along the north-west coast of the country. The Precambrian rocks which covers nearly 90% of Sri Lanka, have been classified into three major lithological units, which are Highland / Southwestern Complex, Vijayan Complex and Wanni Complex. Sri Lanka is well known throughout the world for the large quantity and exquisite variety of its gemstones. These gemstones occur mainly in alluvial gravels found in valley bottoms into which flow tributary hillside streams which carry gem minerals released by weathering form the bed rock sources located at hilltops or hillsides. Apart from the sedimentary formation which carry gemstones some rocks too have been shown to contain gemstones particularly varieties of Corundum. There are also gemstones associated with pegmatite which constituted an important source.

During early times Sri Lanka was once quite fittingly referred to as ''Rathna-dweepa'' which connotes the meaning ''The Island of Gemstones''.The name Rathna-dveepa is found in many chronicles. A Merchants Guide ''Periplus of the Erythrean Sea'' presumed to have been complied during the first century.

Today around 200 minerals have been classified as gemstones either due to their beauty, durability, rarity or a combination of some of these attribute which should be fulfilled make a mineral worthy of being classified as a gemstone. Of these gemstones, around 75 varieties have been mined or found in Sri Lanka. Although exploitation of Sri Lanka gemstone deposits has been going on for many centuries, its only in reason times that effort has been made to make study of the industry itself, the locations of possible gemstone deposits and most importantly.

The Our Lady of Madhu Church in Sri Lanka is the country's most sacred Christian site, a Roman Catholic shrine to the Virgin Mary located in the Mannar district, known for its history of over 400 years. It began in the 17th century when a statue of Mary was moved to Madhu to escape Dutch persecution, and the current church structure was built and expanded upon starting in the late 19th century.

History

- **Origins:**
  The shrine's origins date back to the second half of the 17th century, following the Dutch invasion of 1670.
- **Persecution and Flight:**
  Catholic families fled their homes to protect their religious artifacts, carrying a statue of Mary from the coastal town of Manthai to Madhu.
- **Development:**
  The construction of the current church began in 1872 under Bishop Bonjean and continued with additions like a facade, a presbytery, and a grotto of Our Lady of Lourdes by his successors.
  Location and Significance
- **Location:**
  The church is situated in the Madhu Junction area, about 12 km from the A14 road in the Mannar district.
- **Sacred Site:**
  It is considered the holiest Catholic shrine in Sri Lanka and serves as a major pilgrimage site, with annual festivals, including one in August.
- **Art and Architecture:**
  The church features a cream and duck-egg blue portico and golden statues depicting the stations of the cross.
- **Sacred Relics:**
  It holds the statue of Our Lady of Good Counsel, which was the original icon moved to Madhu during the historical events.

Believed to date back to 400BC, the Koneswaram Temple in Trincomalee is a significant Hindu Temple that has gone through many prosperous years,as well as many turbulent ones during European colonisation. Located inside the historic Fort Frederick,the temple gives that perfect balance of the island's unique culture in an otherwise European setting.

Koneswaram Temple

Significance of the Temple and Colonialism

The Koneswaram Temple is considered to be one of the Pancha Ishwaram (one of the five abodes of Lord Shiva),thus making it one of the most important Hindu temples in the whole country. The temple flourished since its inception,as the many kingdoms that came, such as the Anuradhapura Kingdom, Chola Empire, Pandyan Kingdom,and the Jaffna Kingdom made sure to protect the place of worship. Come the 17th century,and the 'Temple of a Thousand Pillars' was pillaged and destroyed by the Portuguese colonists,which resulted in the loss of many priceless artefacts. Regardless,the subsequent colonisers,namely the Dutch,and the British allowed the rebuilding of this sacred temple. Moreover,during this time,many lost artefacts were recovered from many excavations conducted by archaeologists.

The temple is now adorned in many sculptures of Lord Shiva, Lord Ganesh and Goddess Parvati,along with many other elements that showcase just how significant this place of worship is to Sri Lankans.

The Ambuluwawa Tower is one of Sri Lanka's most unique landmarks. This tower is located in the Ambuluwawa Diversity Complex, the country's first multi-religious centre. Here, you will find a Buddhist Stupa, a Christian Church, a Hindu Kovil and a Muslim Mosque.

Also called the "White Tower", Ambuluwawa is an easy half-day trip from Kandy. If you're an adventure lover, climbing it is something you must add to your itinerary for Sri Lanka. The tower looks somewhat like one of Gaudí's creations, and the higher you climb, the narrower the spiralling staircase gets.

The Ambuluwawa Tower stands on top of a mountain and it's 48 m (157.4 ft) high, so it's not the best place for those who are afraid of heights. However, if you decide to climb it, you will be rewarded with a magnificent 360° view of the surroundings.

Commissioned under the British in the year 1921, the Nine Arch Bridge stands proudly, a testament to the engineering and architectural brilliance of the early 20th century. Ideally placed between the Ella and Demodara railway station, those choosing to walk along the bridge will be presented with scenes of rolling hills and dense jungle to delight in.

THE NINE ARCH BRIDGE

The Nine Arch Bridge, also known as the 'Bridge in the Sky' was constructed by connecting two bog mountains when constructing the Badulla – Colombo railway. This bridge is 300 feet in length, 25 feet in width and 80-100 feet in height. It is one of the best examples of colonial-era railway construction in the country. The Bridge can be reached by travelling 2km on Gotuwala road starting from Halpe Textile centre in Badulla Bandarawela road. The surrounding area has seen a steady increase in tourism due to the bridge's architectural ingenuity and the profuse greenery in the nearby hillsides.

*The origins of the **Botanic Gardens** date as far back as 1371 when King Wickramabahu III ascended the throne and kept court at Peradeniya near the Mahaweli river. This was followed by King Kirti Sri and King Rajadhi Rajasinghe. A temple was built on this location by King Wimala Dharma, but it was destroyed by the British when they were given control over the Kingdom of Kandy.*

Thereafter, the groundwork for a botanical garden was formed by Alexandar Moon in 1821. He used the garden for coffee and cinnamon plants. The Botanical Garden at Peradeniya was formally established in 1843 with plants brought from Kew Garden, Slave Island, Colombo, and the Kalutara Garden in Kalutara. The Royal Botanic Garden, Peradeniya was made more independent and expanded under George Gardner as superintendent in 1844. On Gardner's death in 1849 George Henry Kendrick Thwaites became superintendent. He served until he resigned in 1879, when he was succeeded by Henry Trimen, who served until 1895. He was succeeded in turn by John Christopher Willis who served as director from 1898 until 1912. The garden came under the administration of the Department of Agriculture when it was established in 1912.

There are avenues in the River Drive such as Cook's Pine Avenue, Palmyra Palm Avenue, Double Coconut Avenue, Cabbage Palm Avenue, and Royal Palm Avenue.Th e classical Avenue of Palms is in this Garden. One item with a significant history is the Cannonball Tree planted by King George V of the United Kingdom and Queen Mary in 1901. It is often laden with fruit, which are thought to resemble cannonballs. During World War II, the Botanic Garden was used by Lord Louis Mountbatten, the supreme commander of the allied forces in the South Asia, as the headquarters of the South East Asia Command. The gardens were used as a location in the 1957 film The Bridge on the River Kwai.

The Sri Lankan lion (Panthera leo sinhaleyus), also known as the Ceylonese lion, is an extinct prehistoric subspecies of lion, excavated in Sri Lanka. It is believed to have become extinct prior to the arrival of culturally modern humans, c. 37,000 years BC. This lion is only known from two teeth found in deposits at Kuruwita. Based on these teeth, P. Deraniyagala proposed this subspecies in 1939.

However, there is insufficient information to determine how it might differ from other subspecies of lion. Deraniyagala did not explain explicitly how he diagnosed the holotype of this subspecies as belonging to a lion, though he justified its allocation to a distinct subspecies of lion by its being "narrower and more elongate" than those of recent lions in the British Natural History Museum collection.

THE COLOMBO MARITIME MUSEUM

The Colombo Maritime Museum is in one of the former Dutch prisons which were built in 1676 making it one of the oldest Dutch buildings in Colombo. The museum has undergone many renovations to date, and it has been open to the public since the year 2003. There are two stories in the museum which are made of unique architecture and design inspired by Italian architecture.

Colombo Maritime Museum has a beautiful entrance which is flanked by old fashioned canons. It houses beautiful sculptures, artifacts, models, paintings and maps which speak about the maritime history of Sri Lanka. The museum is also home to statues of King Vijaya, Sanghamitta, Fa-Hien, Ibn Battuta and the Portuguese, Dutch and British. In addition, there are models of ships which were brought to the shore by the British colonials.

Take a historical tour which will leave you spellbound lost in the beauty of the large size painting of the voyages of discoveries by famous men. These voyages have played a significant role in shaping Sri Lanka's history, culture, and religion. There are also 3D displays of the harbor of Colombo along with paintings of the Colombo fort which depict the European conquests.

Rama's Bridge, or Rama Setu, stretches between Pamban Island off the coast of Tamil Nadu, India and Mannar Island off the coast of Sri Lanka. The bridge is 30km (18 miles) long and is a chain of limestone shoals. Hindus believe that the bridge was created by Shri Laksman and Shri Rama in order to find Shri Rama's wife, Sita, who had been kidnapped by Ravana, the king of the demons. Evidence has been found suggesting that the bridge was a former land connection between India and Sri Lanka.

The name of Adam's Bridge appears to be of more recent origin, with the earliest reference being dated to 1804 and based on a legend that Adam used the bridge to reach the mountain called Adam's Peak on Sri Lanka.

RAMA'S BRIDGE IN SRI LANKA IS ALSO KNOWN BY ADAM'S BRIDGE

Kitulgala is a picturesque town in western Sri Lanka, renowned as a hub for adventure tourism and a site where scenes from the movie **"The Bridge on the River Kwai"** were filmed.

Located on the Kelani River amidst lush, tropical hills and rainforests, Kitulgala offers activities like white-water rafting, waterfall abseiling, and hiking to nearby waterfalls, making it a popular destination for thrill-seekers and nature lovers alike. While the film site has little left but concrete foundations, the town has become a popular base for these activities and is easily accessible from Colombo and the Hill Country.

***Sandakada Pahana**, also known as Moonstone, is a unique feature of the architecture of ancient Sri Lanka.It is an elaborately carved semi-circular stone slab, usually placed at the bottom of staircases and entrances.*

First seen in the latter stage of the Anuradhapura period, the sandakada pahana evolved through the Polonnaruwa, Gampola and Kandyan period. According to historians, the sandakada pahana symbolises the cycle of samsara in Buddhism. Known in Sinhalese as sandakada pahana, it is roughly translated into English as moonstone.

Sri Lanka's national tree is the Na Tree (Mesua ferrea or Mesua nagassarium), also known as the Ceylon Ironwood, recognized for its cultural and religious significance, its beauty with striking new red leaves, fragrant white flowers, and incredibly hard, durable timber. This indigenous rainforest tree thrives in the wet zone, grows to about 30 meters, and while its wood was historically used for heavy construction, its value now lies in its traditional medicinal, cosmetic, and spiritual uses, making the tree itself protected.

DANIGALA – THE ALIEN MOUNTAIN

Danigala, known as the "Alien Mountain," is a circular rock formation in the Polonnaruwa district of Sri Lanka that has earned its nickname due to its unique semi-circular shape, local reports of "UFO sightings," and ancient "petroglyphs found in its caves, which depict strange figures and symbols.

The mountain, also called Kandegama Rock, is a challenging climb but offers breathtaking panoramic views, and the site also features ancient Buddhist caves, some with reclining Buddha statues and inscriptions.

Rajagala (Rassagala or Rajagalathenna) is a place which reveals the splendour of Sri Lanka's prehistoric era to the world. The place consists of more than 500 ruins and artifacts of a Buddhist temple.

It is situated in the Ampara district, in the Eastern Province. Rajagala is a rugged and thickly forested mountain on this sparsely populated and rarely visited part of Sri Lanka. Rassagala is situated 1,038 feet above sea level. This archaeological site spreads over 300 acres.

RAJAGALA MONASTERY

The history of the place is not definite, but monks are believed to have inhabited it between the 10th and 3rdcenturies BC. 'Shila Lipi' (stone inscriptions) belonging to that period have been found at the site. All over the northern summit of the mountain, extensive ruins have been recovered from the thick jungle, and some are only half excavated.

Trincomalee Harbour's history spans from ancient use as the ancient port of Gokanna to a strategic naval base for various colonial powers, including the British, who established a Royal Navy base there in the 19th century. It was attacked by the Japanese in World War II and later became a commercial port after being taken over by the Sri Lankan government in 1957. Today, it is a major natural harbor that the Sri Lanka Ports Authority is redeveloping for industrial, tourism, and agricultural activities, though its potential has historically been constrained by the faster development of the Port of Colombo.

COFFEE

Sri Lanka's coffee history began with early Arab traders in the 16th century but bloomed as a commercial crop under the Dutch and British in the 18th century, peaking in the 1870s before a devastating coffee leaf rust outbreak ended the era, leading to widespread tea cultivation.

Despite the historical setback, coffee cultivation continued on a smaller scale and has experienced a resurgence in recent decades, fueled by increased local coffee culture, specialty markets, and ongoing efforts to promote high-quality, rust-tolerant varieties.

Matale Ambokka Stone Ambalama

Ambalama is the name for rest stops or shelters built along roads for the convenience of travelers during the ancient times in Sri Lanka. In the past, when people traveled by foot or dola (palanquin), building an ambalama was considered a highly meritorious deed that brought great merit. This was further influenced by the Buddhist ethos in Sri Lanka. As a result, ambalam could be found along main roads every two or three miles, and many old villages even had two or three of them. These ambalam also served as a meeting place for the villagers.

Some ambalam were exquisitely carved. They were often built under the patronage of royalty or regional nobles. The size and artistic quality of these ambalam varied according to the wealth and status of the person who sponsored them.

The village of Ambokka is located in the Matale District. It is best known for the ancient Ambokka Pattini Devalaya.

Halaba is a small village in the Badulla Uva Paranagama area close to the Uma Oya. A spectacular 372 foot long steel bridge lies across Uma Oya at Halaba where no roads exist or ever existed. Why the English who ruled the country put so much effort into building such a massive bridge in nowhere is a puzzle still not solved.

The bridge is built at one of the widest points of Uma Oya where it is about 300 feet wide and 25-40 feet deep. It is built at a height of about 100 feet above the river connecting Uva Paranagama and Hali-Ela. There is no roads to the bridge from either end other than a footpath.

This mysterious steel bridge was built in 1919 (some websites mention it as 1872) in 3 segments of 124 feet each. The two ends are 10 feet wide and the mid portion is 8 feet wide. Wooden sleepers have been laid across the bridge to travel over the river. A small plate at the top of the bridge states that the bridge was manufactured at a government plant in 1919.

One belief is that the bridge was destined to be installed at Halawatha (Chillaw) but due to some mistake, it was installed at Halaba.

The Mahaweli River is a 335 km (208 mi) long river, ranking as the longest river in Sri Lanka. It has a drainage basin of 10,448 km2 (4,034 sq mi), the largest in the country, which covers almost one-fifth of the total area of the island. The real creation of Mahaweli ganga starts at Polwathura(at Mahawila area), a remote village of Nuwara-Eliya District in bank Nawalapitiya of Kandy District by further joining of Hatton oya and Kotmale oya.The river reaches the Bay of Bengal on the southwestern side of Trincomalee Bay. The bay includes the first of a number submarine canyons, making Trincomalee one of the finest deep-sea harbors in the world.

As part of Mahaweli Development programme the river and its tributaries are dammed at several locations to allow irrigation in the dry zone, with almost 1,000 km2 (386 sq mi) of land irrigated. Production of hydroelectricity from six dams of the Mahaweli system supplies more than 40% of Sri Lanka's electricity needs. One of the many sources of the river is the Kotmale Oya.

There is a misconception in Sri Lanka that the Mahaweli starts in the Sri Pada mountain. The Mahaweli gets its source waters from Horton Plains in Kirigalpoththa and the Thotupola mountain range.

Pasikuda Beach on Sri Lanka's east coast is a crescent-shaped bay known for its exceptionally shallow, calm, and clear turquoise waters, vast stretches of golden-white sand, and a well-preserved offshore reef making it ideal for swimming, snorkeling, Jet skiing, windsurfing, kayaking and other family-friendly water sports. The beach offers a picturesque setting with modern resorts and opportunities for relaxation and activities like sunbathing and beach sports.

The natural curve of the bay contributes to its calm conditions, making it a serene and scenic destination. The bay is protected by a natural reef that runs across it, ensuring calm, safe waters, and creating a marine sanctuary for vibrant coral and marine life. The marine sanctuary with its rich coral and marine species makes it a world-class snorkeling and diving destination. A string of high-end luxury resorts lines the beach, providing upscale amenities and manicured beachfronts.

Sri Lanka's very **FIRST POSTAGE STAMP** was a 6 pence stamp issued on April 1, 1857, during the British colonial period when the island was known as Ceylon. The stamp featured a portrait of Queen Victoria and was printed on blue paper without perforations, meaning it had to be cut from the sheet.

THE URAKANDA PETROGLYPHS

The Urakanda Petroglyphs are ancient rock engravings discovered in 1983 by W.H. Wijayapala at the base of Urakanda Mountain in Asmadala Village, Kegalle District, Sri Lanka.

Located within a mushroom-shaped cave called Mukkugala Cave, these simple, symbolic scratchings include figures interpreted as humans and phytomorphs (three straight lines). They are one of only seven discovered petroglyph sites in Sri Lanka and are considered significant because of their association with the Megalithic context.

SRI LANKAN LEOPARD

The Leopard (Panthera pardus, Linnaeus, 1758) is the most secretive and elusive of the large carnivores, and also the shrewdest. Pound for pound, it is the strongest climber of the larger cats and is capable of killing prey far larger than itself. However, the leopard is the smallest member of the genus Panthera, which includes the Lion, Tiger and Jaguar. Historically, the leopard had a wide distribution across eastern and southern Asia and Africa, from Siberia to South Africa, with fragmented populations in the Indian subcontinent, Sri Lanka, Indochina, Malaysia, Indonesia and China. Sadly, the range has decreased radically due to over hunting and loss of habitat.

After Linnaeus published his description of leopards in the Systema Naturae in 1758, as many as 27 subspecies of leopards were described within a period of 162 years (1794 to 1956), by various scientists.

In 1996, according to genetic (DNA) analysis, nine subspecies are recognized; Panthera pardus pardus (Linnaeus, 1758): Africa, Panthera pardus nimr (Hemprich & Ehrenberg, 1833): Arabia, Panthera pardus saxicolor (Pocock, 1927): Central Asia, Panthera pardus melas (Cuvier, 1809): Java, Panthera pardus fusca (Meyer, 1794): Indian sub-continent, Panthera pardus delacourii (Pocock, 1930): southeast Asia into southern China, Panthera pardus japonensis (Gray, 1862): northern China, Panthera pardus orientalis (Schlegel, 1857): Russian Far East, Korean peninsula and north-eastern China and Panthera pardus kotiya (Deraniyagala, 1956): Sri Lanka, this subspecies is endemic to the island.

*In Sri Lanka, a **"Devil Dance"** refers to Yakun Natima or Sanni Yakuma, a ritualistic dance performed with elaborate masks and costumes to exorcise evil spirits, cure illnesses, and bring good luck to individuals or families.*

These ancient practices, involving rhythmic drumming and chanting, are rooted in a blend of Buddhist, Hindu, and indigenous beliefs, with the Sanni Yakuma featuring 18 different dances each representing a specific ailment or demon to be banished.

Cocoa cultivation began in Sri Lanka around the mid-19th century, with the British officially introducing the plant in 1819, establishing the first plantations in the Matale district.

Once a significant crop, particularly grown under the shade of coconut and rubber trees, cocoa production is no longer a major economic sector but has seen a renewed focus in recent years on quality, sustainable practices, and developing a local chocolate-making industry.

Batik was introduced to Sri Lanka by Dutch colonizers in the 19th century and originally served as a hobby for the elite, but it became a cottage industry for artisans by the late 1970s thanks to increasing tourism. Pioneering figures like Ena de Silva helped revive and develop a uniquely Sri Lankan style of batik, which blends local traditions with modern techniques and is now a celebrated art form and fashion statement.

Today, the industry faces challenges from past conflicts and import bans designed to boost local production, but remains a significant part of the country's cultural heritage and a thriving economic sector.

Brass industry in Sri Lanka

The historic brass industry in Sri Lanka is thought to have begun during the period of the Aryans, who introduced various traditional industries from India circa 200 BC. Nearby museums have an extensive collection of brass artifacts from the Anuradhapura era (200 BC to 900 AD). These prove how affluent this country was in fields like the gold industry. With a wide range of goods and artwork showcasing their sector's caliber, it has grown to be a prominent industry in the nation.

Most home things are customary brass products, and a few opulent pieces are handed down as relics from generation to generation. Traditional Sri Lankan homes require some components, such as the traditional oil lamps mentioned. Products made of brass are also said to bring luck and be highly beneficial for households.

The brass industry grew and developed due to these convictions for centuries, and the tradition still exists today. Buddhist culture has initiated the golden era with the impacts of brass products, eminent witnesses of their culture. There are many products used for domestic as well as in religious purposes, especially in Buddhist temples. Hindus also worship several bronze statues of gods. Among those products, oil lamps, goblets, vases, bowls, and trays are prominent examples of embedded carvings. Because they offer a touch of glitz, importance, and riches to any environment, traditional decorative items like oil lamps, elephants, ashtrays, and vases are used.

Brass is a man-made metal. It is made by adding copper and zinc. In Sri Lanka, casting and forging are used to make brass products. Artisans use these techniques to create a wide variety of copper items. Brass items are more appealing and expensive when engraved using conventional and contemporary techniques.

Angampora is an ancient Sri Lankan martial art that dates back thousands of years, incorporating hand-to-hand combat (angam), weaponry (ilangam), and meditation and yoga (mayangam). Historically, it was practiced in Sri Lanka and used in warfare, but a succession of colonial powers, especially the British, feared its power, leading to its prohibition and near disappearance. Angampora survived through clandestine family lineages and has since experienced a revival, with a formal governing body established in 2001 to promote and preserve it.

සිංහ සමාජයක සාමාජිකත්වය ලැබීම වරප්‍රසාදයක් වන අතරම, එයින් නිශ්චිත වගකීම් හා යුතුකම් රැසක්ද පැවරෙන්නේය. සිංහ සමාජය දේශපාලනමය හෝ වෙනත් කට්ටිවාදී සංවිධානයක් නොවේ. එය හුදෙක් ඔබටත මටත් තනිව කල නොහැකි කාර්යභාරයක් ඉටු කිරීමට එකතු වූ මිනිස් කණ්ඩායමකි. අපිට අපේ සහෝදර ජනතාවට සේවය කිරීමට ඉඩ සලසන මාර්ගයකි. අපගේ ආදර්ශ පාඨය අපි සේවය කරමු යන්නයි. ඔබ සිංහයකු ලෙස ඉදිරියට යද්දී අපගේ මෙම ප්‍රයත්නයෙහි කොටස් කරුවෙකු වීමෙන් ලැබෙන ඉමහත් තෘප්තියකට ඔබද හිමිකරුවෙකු වනු නොඅනුමානයි.

සිංහ සමාජය අද දින ජන ජීවිතයේ විවිධ අංශවල නොයෙක් සේවාවන් වල නියත වේ. තම කාලයත් ශ්‍රමයත් ඒ සඳහා සිංහයන් වශයෙන් කැප කල යුතුවෙයි. තමන් වෙත පැවරෙන කිනම් හෝ කාර්ය්‍යක් හෝ නොපිරිහෙකා ඉටු කිරීම සෑම සිංහ සමාජිකයෙකුගේ යුතුකම සහ වගකීම වේ. සිංහ සාමාජිකත්වය වූ කලී සමූහික ප්‍රයත්නයකි. හැම සාමාජිකයාම ඒ වගකීම් නිසි පරිදි ඉටු කල යුතුයි. එසේ කරද්දි අප තරම් භාග්‍යවත් නොවූවන් ගේ ගැටලු, දුෂ්කරතා සෑහෙන දුරට ලිහිල්වෙනු ඇත.

සිංහ සාමාජිකත්වය නිසා ලැබෙන වරප්‍රසාදයක් වුවද ඉන් ලැබෙන ලාභ ප්‍රයෝජන සුළුපටු නොවේ. අපේ නගරයේ හොඳම මිනිසුන් රැසක් ඇසුරු කිරීමට එයින් ඔබට ඉඩ ලැබේ. ඔබේ අසල්වැසියාට උදව් උපකාර කිරීම නිසා ඔවුන්ගේ ප්‍රශංසාවද නියැතින්ම හිමිවේ. ඔවුන් ගේ තුති පුදෙන් ඔබේ සිත ප්‍රබෝධ වේ. ඔවුන් ගේ සිතුතියද ඔබට හිමිවේ. එපමණක් නොව සෙසු මිනිසුන් සමග වැඩ කිරීමෙන් හා ප්‍රජා සේවාවන් මෙහෙයවීමෙන් ඔබ විශාල අසස්වාදයක් ලබනු ඇත. ඔබේ ජන කොට්ඨාශයේ ඇති ප්‍රශ්ණ වටහා ගෙන ඒවාට විසඳුම් සෙවීමේදි සිංහ සාමාජිකයෙකු ලෙස නායකත්වය ගැනීමටත් අවස්ථාව ලැබෙනු ඇත. ඒ සියල්ලටමත් වඩා යහපත් පුරවැසියන් හා සුහද අසල්වැසියෙකු ලෙස හඳපත්ලෙන්ම මතුවන හොඳ හිත සෙස්සන්ට ප්‍රකාශ කිරීමට අවස්ථාවක් එළඹෙනු ඇත.

සිංහ සාමාජිකයෙකු ලෙස සේවය කිරීමට ඔබට සිදුවන්නේ මේ ආකාරයටය. ඔබේ කාලය සහ ශ්‍රමය මිඩංගු කොට සිංහ සාමාජයේ කාර්යයන්හි නිරතවීම ඔබෙන් අපේක්ෂා කරනු ලැබේ. ඔබේ සිංහ සමාජයේ සියලුම රැස්වීම් වලට ඔබ අනිවාර්යයෙන්ම සහභාගී විය යුතුයි.

තවද මෙම සිංහ සමාජයේ සාමාජිකත්වය ආරක්ෂා කිරීමටද සිංහ සමාජයේ කටයුතුවලදී මගේ සේවය අවශ්‍ය වූ හැමවිටකදීම මගේ ආධාරයදීමටද මා සූදානම් බවට ගාම්භීරතා පූර්වකව තව දුරටත් ප්‍රකාශ කර සිටිමි. අවසාන වශයෙන් ජාත්‍යන්තර සිංහ සමාජ සංගමයේ අරමුණුවලට එකඟව කටයුතු කිරීමටද පොරොන්දු වෙමි"

Every colour has it's own beauty, but a mix of shades creates an art.

Synergy is the combination of efforts and the appreciation of differences which ends up in the creation of a whole that is greater than the simple sum of it's parts.

At Commercial Credit, we believe in synergy.
