NEW & IMPROVED**

NEW Plastic Repair Micro-emission

High-quality, black, polyurethane repair glue without diisocyanates. Developed for professional plastic repair, available in 3 versions with a variety of drying, bonding and sanding times. Safe and sustainable plastic repair. Our 2K plastic repair / bonding glue is free of diisocyanates, protects your health, and reduces environmental impact, all without compromising results.

This next-generation 2-component plastic repair glue is specially developed for the professional repair of damaged plastic parts. From car bumpers and trims to housings and interior panels, this plastic bonding glue offers the same strong, seamless finish you're used to, but with major improvements in safety, ease of use and sustainability. The adhesive is completely free of diisocyanates, meaning no certified training is required. It reduces health risks for users, improves the overall working environment, and lowers the product's environmental impact.

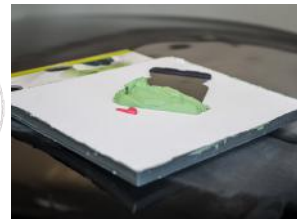

Lifting tape 'Easy Tear'

\$28.00
FOL 51ET

Streamline your windshield masking with our Lifting Tape 'Easy Tear.' This tape features a 10mm plastic strip. Just insert the strip between the rubber and panel, attach the tape to the window, and remove the rubber. Plus, it's perforated every 46mm for easy tearing by hand.

Mixing Board

A multi-layered palette board with 100 sheets designed for improved putty mixing. It's advisable to use this board instead of mixing putty and hardener directly on palettes to prevent pinholes during application. Crafted from non-absorbing treated paper, it prevents the paper from soaking up resin and hardener, reducing the need for cleaning.

\$25.75
GAP 60

Mixing Cup Range

Available in 6 volumes:
 400ml, 650ml, 900ml,
 1300ml, 2240ml and
 5000ml.

Lids available separately

Meticulously designed for optimal mixing accuracy. With clearly printed and readable mixing ratios on the inside, these cups offer convenience and precision. The winter-proof plastic construction ensures durability, and the cups come with bottom feet to protect against cold transfer during mixing.

PRODUCT RECAP

The **fastest and most powerful** UV curing tool.

Colad UV Curing Light & Putties

To ensure profitability and streamline work processes, UV curing technology is being used more and more in various paint processing markets. The technology enables you to work faster and more efficiently, while significantly reducing curing time between process steps. The Colad Fast Curing UV Light can be used to cure UV curing putties, UV curing paints and UV curing primers and body fillers on both small and larger areas.

Colad FILM4CRASH

Key features

- UV resistant
- Prevents any discolouring of the interior
- Easy to apply on clean and dry surface
- Wrinkles and bubbles don't affect the function of the product
- Easy to remove without adhesive residue
- Film can be used outside up to 6 months
- Apply at room temperature
- 75cm x 60m per roll

Range of UV putties
• Coarse/Fine/Transparent
