# Bagasse

That Benefits the Planet.

## ABOUT OXYLUS ECOGREEN

Welcome to OXYLUS ECO GREEN, where we specialize in providing high-quality sugarcane bagasse products. We are dedicated to sustainability and environmental responsibility, and our products are a testament to that commitment.

OXYLUS ECO GREEN take pride in being a socially responsible company. By offering sugarcane bagasse products, we aim to raise awareness about sustainable alternatives and encourage others to make eco-conscious choices. We believe that small changes can make a big difference, and our products are a testament to that belief.

## Committed to **Purpose Focused** on the Future

Our journey is fueled by a clear mission, a powerful vision, and a purposeful aim. These pillars shape our identity, guide our decisions, and inspire us to grow every day. Discover what motivates us to create lasting value and make a meaningful difference.

### **Our Mission**

Our journey is fueled by a clear mission, a powerful vision, and a purposeful aim. These pillars shape our identity, guide our decisions, and inspire us to grow every day. Discover what motivates us to create lasting value and make a meaningful difference.

### **Our Vision**

Revolutionize the utilization of sugarcane bagasse, transforming it into a globally recognized sustainable material that drives environmental stewardship and promotes a circular economy.

### **Our Aim**

A leading provider of innovative sugarcane bagasse products, delivering solutions that surpass customer expectations while minimizing our ecological footprint. Through our commitment to research, development, and collaboration, we envision a future where sugarcane bagasse is widely embraced as a renewable resource, replacing conventional materials in a wide range of applications.

## Why Choose Sugarcane Bagasse Products.

Our Products are made completely from sugarcane bagasse pulp without any plastic or wax coating. It certified biodegradable and compostable and has a strong structural integrity to be able to hold shape when being used with solid and liquid food.

- Oil Resistant ▪ Water Resistant ▪ Freezer Free
- Microwave Safe ▪ No Plastic ▪ Environment Friendly
- Quality Product ▪ Hygienic & Healthy
- Biodegradable & Compostable ▪ 100 % Strength & Durable
- 100% Sugarcane Bagasse

# Biodegradable Strength You Can Trust

## The Cycle of Bagasse.

### Harvesting Begins

Sugarcane is carefully harvested from farms. It's the starting point of this sustainable journey.

### Juice & Bagasse

At factories, sugarcane is crushed for juice. The remaining fibrous pulp is known as bagasse.

### Pulpboard Creation

The bagasse is processed into a soft, moldable pulpboard. This becomes the base for biodegradable products.

### Eco Tableware Molded

Pulpboard is shaped into eco-friendly plates, bowls, and cups. A clean, green alternative to plastic.

### Used & Composted

After serving their purpose, the products are composted. They break down naturally in a short time.

### Back to the Earth

The compost enriches the earth with nutrients. This supports the growth of new crops — and the cycle continues.

# Nature's Waste

Reimagined with Purpose.

## Our Product Range

Our coaching services provide personalized strategies for both personal growth and business success. We focus on your unique challenges, offering expert guidance to help you.

### Plain Plates:

Simple, Sturdy, and Sustainable for everyday use. perfect for all kinds of meal, Hot or Cold.

### Compartment Plates:

Keep Food items neatly separated. Ideal for Combos, Meals, or Thalison-the-go.

### Bowls:

Deep and Durable for Soups, Salads or Snacks. Eco-Friendly Choice for Any Serving Need.

### Clamshells:

Secure, Hinged Design for Easy Takeaway. Great for Food Delivery and Storage.

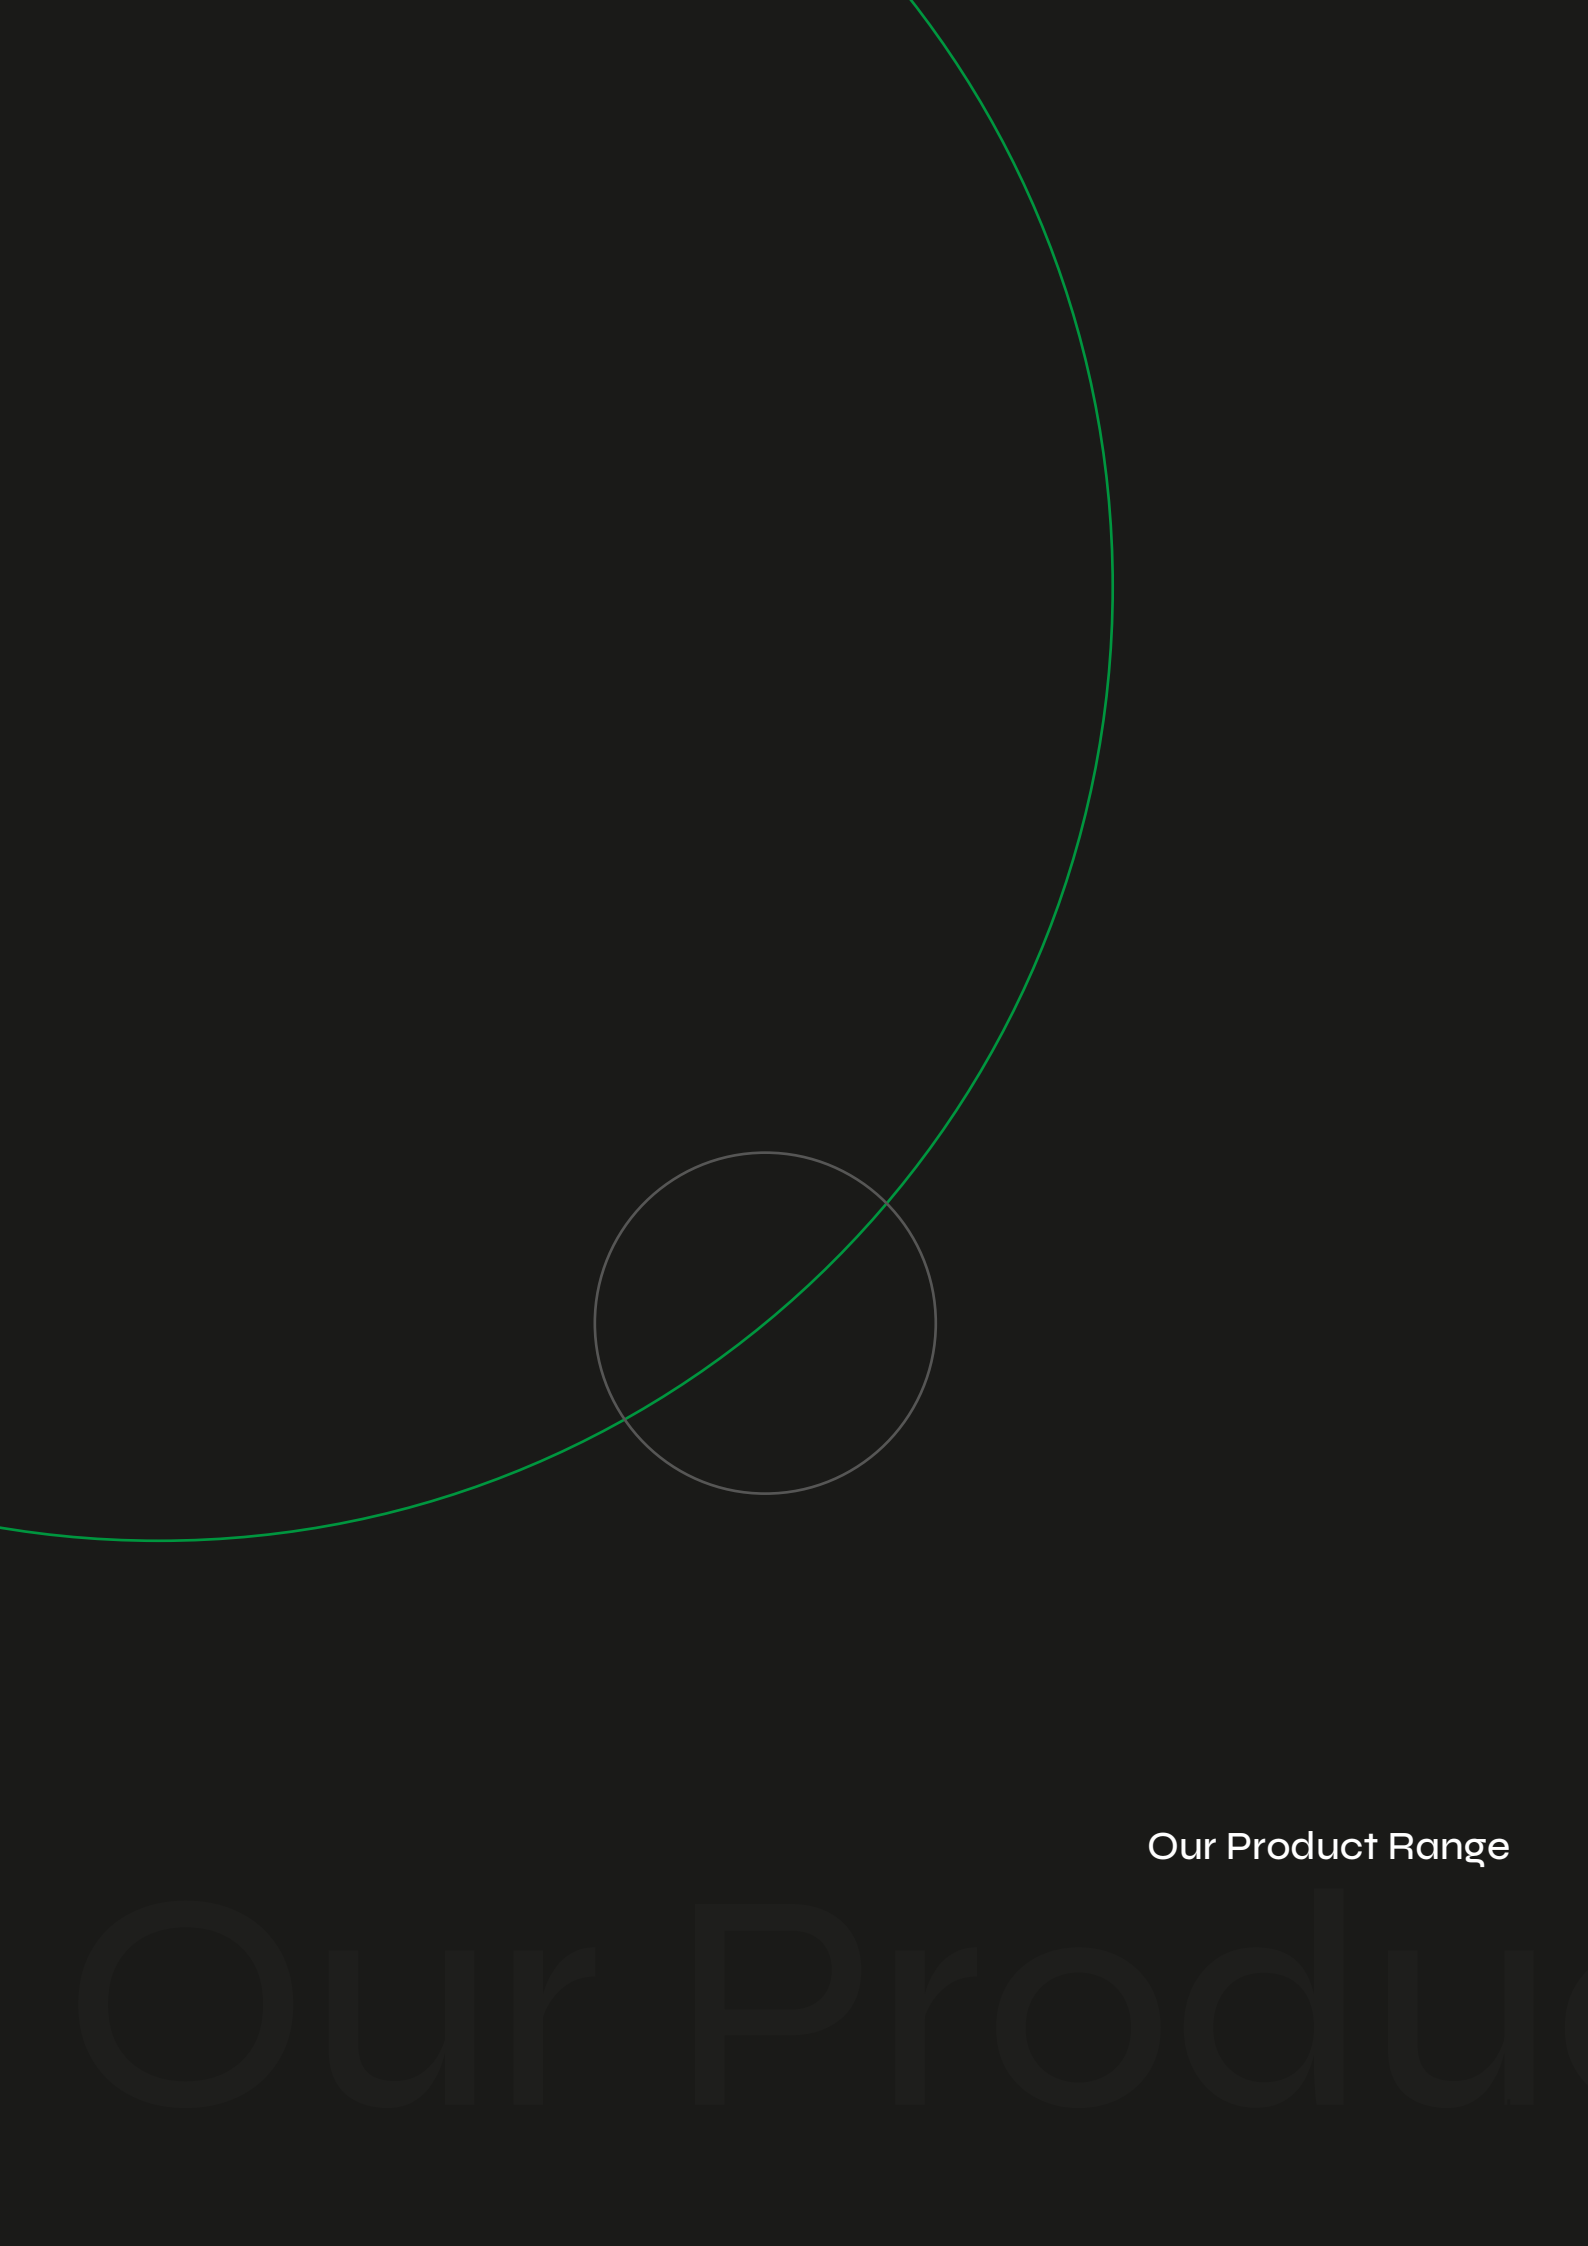

### Cups & Lids:

Perfect for Hot or Cold Drinks on The Move. Comes with Tight-Fitting Lids for Spill-Free Use.

### Industrial Packaging:

Strong, Reliable and Eco-Safe for Bulk use. Made to Protect Products with Minimal Waste.
