**IT** — Base in cemento colato in stampo. Sulla superficie esterna viene applicata una vernice protettiva trasparente, mentre la superficie del foro è verniciata nera. Il trattamento protettivo lascia volutamente visibili la naturale porosità del materiale, e la non omogeneità di colore. Il top è disponibile in marmo o in Fenix o in MDF impiallacciato.

**EN** — Base in moulded concrete. A transparent protective paint is applied to the external surface, while the surface of the hole is black matt varnished. The protective treatment deliberately leaves visible the natural porosity of the material, and the lack of uniformity of color. The top is available in marble or Fenix or in veneered MDF.

**FR** — Base en béton moulé. Une peinture de protection transparente est appliquée sur la surface extérieure, tandis que la surface du trou est laquée en noir. Le traitement protecteur laisse délibérément apparaître la porosité naturelle du matériau et le manque d'uniformité de couleur. Le plateau est disponible en marbre, Fenix ou en MDF plaqué.

**DE** — Basis aus Formbeton. Die Basisaußenfläche wird mit einer transparenten Schutzfarbe beschichtet. Die Oberfläche des Durchgangslochs wurde mit einer schwarzen Deckfarbe behandelt. Die Schutzbehandlung lässt bewusst die natürliche Porosität des Materials und die fehlende Farbgleichheit sichtbar. Die Platte ist in Marmor oder Fenix oder furniertem MDF erhältlich.

**ES** — Base en hormigón colado en molde. En la superficie externa se aplica un barniz protector transparente, mientras que en la superficie del foro central el barniz es negro. El tratamiento protector deja intencionalmente visible la natural porosidad del material y el color no uniforme. La superficie está disponible en mármol o en Fenix o en MDF enchapado.

Lazy Susan in Fenix nero.

Lazy Susan in black Fenix.

Lazy Susan en Fenix noir.

Lazy Susan in schwarzem Fenix.

Lazy Susan en Fenix negro.
