# ABOUT US

At Shri Balaji Chemicals, our mission has always been to elevate the standards of pharmaceutical-grade chemicals. Founded in Mumbai, we set out not just to be another manufacturer, but to become a benchmark of excellence in the pharmaceutical industry.

Driven by passion and precision, every batch we produce reflects our unwavering commitment to purity, consistency, and innovation. We don't just follow industry standards—we define them. Our state-of-the-art facilities and dedicated team ensure that each product meets the most stringent quality requirements.

We specialize in a wide range of high-purity chemicals, including:

- HPLC Grade Solvents
- Dry Solvents
- Karl Fischer Reagents
- Semiconductor Grade Solvents

At Shri Balaji Chemicals, excellence isn't just a goal—it's our identity.

Karl Fischer reagents are specifically designed to react quantitatively with water, enabling accurate measurement of moisture content in various samples. They typically consist of iodine, sulfur dioxide, a base (like imidazole or pyridine), and a suitable solvent (like alcohol). The reagents are used in both volumetric and coulometric Karl Fischer titrations. The general reaction is:  $\text{H}_2\text{O} + \text{I}_2 + \text{SO}_2 + 3\text{RN} + \text{ROH} \rightarrow (\text{RNH})\text{SO}_4\text{R} + 2(\text{RNH})\text{I}$ .
