

Microsoft Teams[®]

Streamline communication by enabling voice calling through Microsoft Teams. Seamlessly connect across devices and networks with a single phone number.

Faster, easier deployment

Use your own in-house expertise to administer your Microsoft Teams Phone System

Enhanced support

Enjoy unmatched service and support from OneCloud's white-glove team

Reduced costs

Save by reducing the need to purchase and maintain equipment

For companies that want to integrate carrier-grade calling into Teams, Operator Connect for Microsoft Teams provides a simplified operator-managed setup.

As a certified Operator Connect for Microsoft Teams Partner, OneCloud provides unrivaled call quality, faster, simpler deployment, and end-to-end support to ensure your business communications are the most dependable and cost-effective they can be.

The OneCloud team are experts in Teams deployment and management and can quickly modernize your company's communication and collaboration efforts.

All-In-One Voice Solution

Streamline and simplify calling capabilities for your Teams users and maximize your Microsoft Teams environment. Give employees a truly unified communications platform with powerful OneCloud PBX features.

Secure & Reliable

Never worry about your Teams call connectivity and always enjoy HD voice quality with OneCloud's geo-redundant data centers that deliver 99.999% uptime.

With Teams Phone Mobile, a user's SIM-enabled phone number is also their Teams phone number. Users can use a single phone number in Microsoft Teams across both their mobile service and desk lines, and seamlessly transition between networks and devices.
