

TRADER CATALOGUE 2025

Storage Design Limited

Bespoke products; bringing your vision to reality.

Whilst we produce many different products, there is always a need for something bespoke, and we are equipped to help.

We have produced 100's of bespoke products over the years. Simply share your vision with us and we will create a full product spec, drawings, costings and physical prototype.

Bespoke products can be made as a 'one off' or batch production, just tell us how many you need and we will make it happen.

The VNA Forklift Cage Trolley

Promoting our Bespoke services into modern warehousing.

These Picking Cages are made especially designed and made to connect and anchor on to major brands of Forklift trucks. Once 'locked on' the cage can be lifted with personnel inside, allowing picking to take place at very high heights without picking and unloading the pallet.

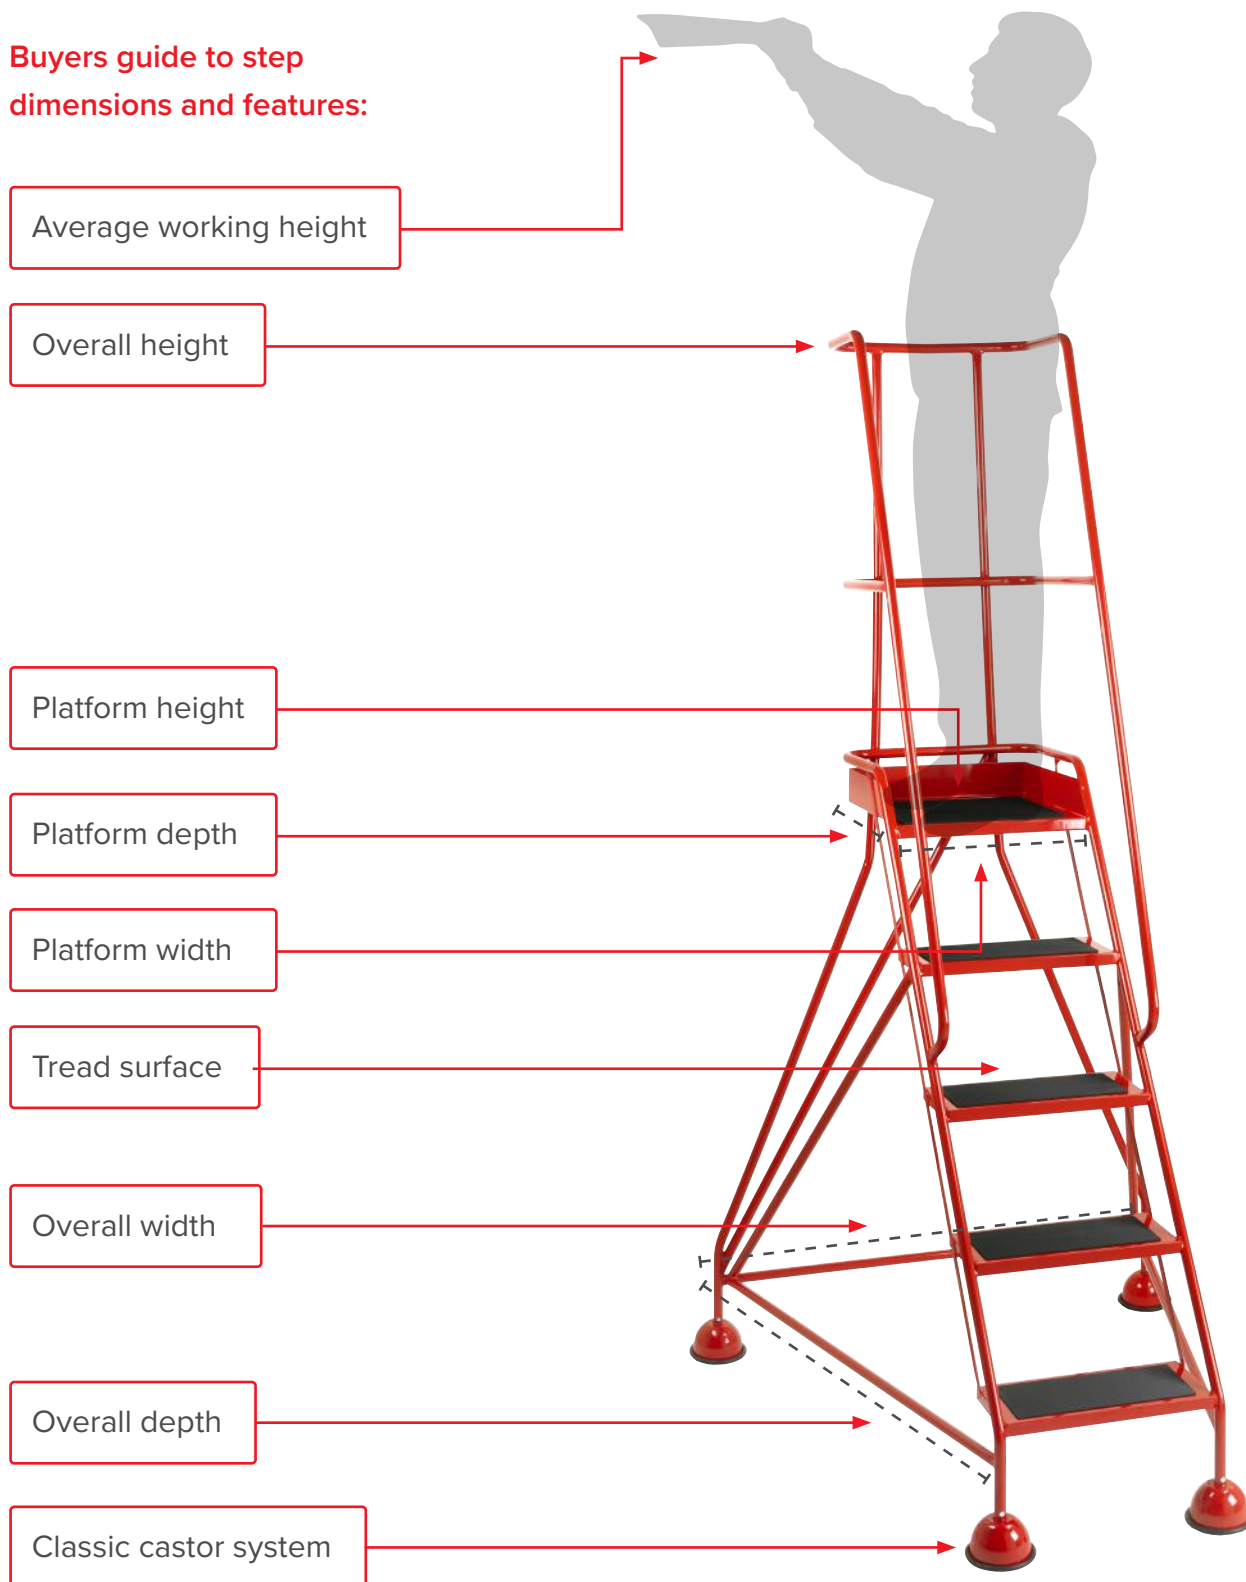

Mobile Steps	6 - 29
Trucks & Trolleys	30 - 51
Plate & Sheet Handling & Storage	52 - 55
Drum Storage & Handling	56 - 63
Cylinder Storage & Handling	64 - 73
Trailers	74 - 79
Sack Trucks & Stairclimbers	80 - 96
Plastic Container Systems	97 - 107
Access Platform & Roller Platforms	108 - 109
Book Trolleys & Chair Handling	110 - 115
Racking Protection & Warehouse Barriers	116 - 121
Snow Ploughs	122 - 123
Recycling Bins	124 - 127
Cabinets / Drawer Systems & Shelving Units	128 - 145
Workbenches & Accessories	146 - 161

Steptek

Steptek steps are strong, sturdy and designed with stability and mobility in mind, an unbeatable combination.

Buyers guide to step dimensions and features:

Tread Surface Options

Ribbed Rubber Tread

Great for general usage
Cost effective solution
Clamp option adds high visibility

Punched Steel Tread

Reduced risk of slips, trips and falls
Hard wearing and durable
Maintenance free

Anti-slip Tread

Reduced risk of slips, trips and falls
Added safety
Cost effective solution

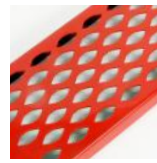

Aluminium Tread

Hard wearing and durable
Reduced risk of slips, trips and falls
Added safety

GRP Tread - Available on Request

Glass reinforced plastic
Extreme grip to surface
Added safety

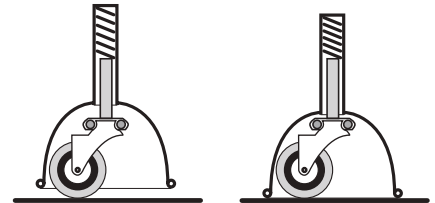

Expamet Tread

Mesh tread construction
Easy to keep debris free
Great for use outside

Classic Castor System

Steps fitted with dome with dome covered spring loaded swivel castors which retract when weight is applied to the steps, giving firm contact with the floor. Dome covers have a double rolled bottom edge together with a protective cover strip and grey non marking tyres.

Standard and Optional Safety Features

Hinged Stabilisers

For extra stability when working at height.

Safety Warning Bar

Deters climbing when steps are in mobile mode.

Security Gate

With padlock facility to prevent unauthorised use.

Handlock Anchorage

When locked the feet rest firmly on the floor.

British Standard Safety Step Range.

BS EN 131-7:2013 Mobile Ladders with Platform - The standard explained

The following is the key criteria (plus more) to certifying a set of mobile steps to BS EN 131-7:2013. They detail what to look out for when comparing British Standard Safety Steps to others claiming to be 'certified'.

Scope

This European Standard defines the general design characteristics of mobile ladders with platform. It applies to mobile ladders with a working platform, maximum of 1m², and a maximum platform height of 5000mm, to be used only by one person at a time. The maximum load is 150kg which includes a maximum combined load of the user and any tools, equipment and materials.

EN 131-7:2013 is the only standard that applies to mobile ladders with platform. Parts 1-6 of the EN131 standard, specifically state that they do not apply to mobile ladders.

Ascending Treads

The minimum tread depth is 80mm.
 The maximum gap between the treads is 50mm.
 The minimum 1st tread height is 150mm from the ground, the maximum is the tread spacing plus 40mm.
 The minimum tread spacing is 200mm (after the 1st tread, from surface to surface) and must be constant, the maximum is 250mm.

Ascending treads must also pass torsion and bending tests according to the standard.

Stability

The mobile step must pass a stability test. This test is a side pull where 750N test load is applied to the most unfavourable position on the platform. For indoor use a horizontal pulling force of 300N is applied gradually to the side of the platform in the most unfavourable position and direction. The test is passed if the mobile ladder does not overturn.

Spring Loaded Steps

For steps with spring loaded castors a test load of 200N is applied in turn to each ascending tread and platform. The test requirement is that both feet of the side of the step where the load is applied shall be in contact with the floor during the test.

Marking, User and Safety Instructions

Marking shall be displayed as specified in the standard. These must also pass a durability test and be specific to the individual mobile ladder showing important visual safety pictograms and also manufacturing information.

User instructions shall be provided as specified in the standard. These are supplied with the steps.

Prevention of Falls (Guardrails and Middle Rails)

The minimum handrail height is 950mm.
 The maximum handrail height is 1100mm.
 The guardrails and middle rails shall avoid a sphere of 470mm diameter to pass.

Handrails/Guardrails/Middle Rails

The ascending handrail should be positioned so the lowest grab point is a maximum of 1000mm from the ground. Handrails/Guardrails must also pass multiple strength and deflection tests according to the standard.

Working Area Dimensions (enclosed handrail area)

The minimum working area dimensions are 400mm wide x 400mm deep x 950mm high.
 The maximum working area dimensions are 1000mm wide x 1000mm deep x 1100mm high.

Platform and Toe Board Dimensions

The minimum platform dimensions are 400mm wide x 400mm deep with a 50mm toe board to 3 sides.
 The maximum platform dimensions are 1000mm wide x 1000mm deep. The platform must also pass multiple strength and deflection tests according to the standard.

Kitemark

These are the only steps of their type (at time of print) to be awarded with the British Standard Kitemark from the BSI. The award of the BSI Kitemark for this range of mobile safety steps demonstrates a new benchmark for quality and reliability in this sector.

British Standard Classic Colour Range

The Classic Colour BS Step Range is ideal for warehouse or office use. They are available with 2, 3, 4 or 5 steps including platform, providing a maximum working height of up to 2.77m. The steps are available in a range of eight colours.

British Standard Steptek Quality Red Range

Handbuilt with attention to detail, both in design and manufacture, to ensure total reliability and many years of arduous operation.

Welded steel tube and bar construction with a 560mm tread width. Fitted with handlock anchorage; when locked the front feet rest firmly on the floor, feet fitted with protective plastic floor pads. The outboard axle mounted rear wheels gives extra stability.

Finish: All steelwork red epoxy finish

Wheels: Front 2 swivel castors with 100mm diameter rubber-tyred wheels with roller bearings. Rear 2 axle mounted 200mm diameter wheels with rubber tyres and roller bearings.

Caution Notice: A caution notice is fitted to each set to remind user of operation procedure. A health and safety at work information sheet is supplied.

Stainless Three, Four and Five Step

Max Load
125kg

Made in
Britain

Stainless steel mobile step units with close fitting handrail round three sides of platform.

High quality range of mobile step units, manufactured from formed tube and sheet stainless steel of quality particularly suitable for food drink and chemical industries. Fully welded throughout for maximum rigidity.

All step units fitted with 4 x 80mm diameter spring loaded castors with grey non marking rubber tyres fitted in heavy zinc plated housing which retract when weight is applied to the steps, giving firm contact with the floor.

Anti-slip tread surfaces.

Each unit is fitted with four grey non marking rubber feet.

Stainless steel treads covered with anti-slip surface which is both hard wearing and resistant to water, oil and most chemicals.

Please note:

Steps are not a polished finished.

Steps are not designed for clean rooms as they have an anti-slip tread surface - punched tread option available upon request.

Step Tray Trolleys - 3 Step

Ideal for stock picking and putting away in stores, warehouse, office, library etc.

Spring loaded step unit, with ribbed rubber treads, locates firmly on floor when foot placed on first step, immobilising trolley. Top tread height 686mm. Fully welded construction, from RSA angle and ERW tube. Rubber feet fitted to step unit. Blue epoxy finish.

Tray options (For medium or heavy duty trolleys):

Fixed sheet steel trays - with 20mm lip all round, blue epoxy finish.

Fixed plywood shelves - recessed with 10mm lip all round.

Removable steel trays - reversible to give either a flush finish, or 25mm lip all round, white powder coated finish.

Removable wire baskets - 160mm high sides, white powder coated finish.

Medium Duty - 125kg total load capacity 2 and 3 tray

Heavy Duty - 175kg total load capacity 2 and 3 tray

Heavy Duty Castors:

2 swivel and 2 fixed castors with 125mm diameter rubber tyred wheels with roller bearings.

Medium Duty Castors:

4 stem fitting swivel castors with 125mm diameter wheels with grey non marking tyres and thread guards.

**A RANGE OF
PRODUCTS
WELL BUILT IN
BRITAIN FOR
MATERIAL
HANDLING**

Loadtek

Loadtek products are built to vigorous standards for many years of relentless use.

The product ranges come with a choice of materials, styles, sizes and colours. Additional specification is available to modify your choice of product including handle, wheel, bumper and brake options for the majority of the ranges.

Covering an extensive range of lifting and moving tasks, Loadtek products are built to solve all your handling problems.

Choosing the right product

Weight to be transported

It is important to understand the weight being transported when choosing the correct product.

Usage guide

0-150kg - Light Duty
150-300kg - Medium Duty
300kg+ - Heavy Duty

Size to be transported

The Loadtek product range has been built through years of innovation and metal manufacturing expertise.

Developed with the needs of industry at the forefront of our thinking, we have developed a comprehensive range of products to handle all shapes and size of items.

Wheel type

Understanding the environment your product is going to be commonly used will help you choose the right wheel.

Wheel Options

Pneumatic - Ideal for rough or uneven terrain
Solid - Long lasting and smooth running
Foam Filled - Puncture proof and long lasting

Utility Tray Trolleys

A unique range of robust tray trolleys designed for most environments, including warehouses, garages, catering, serving and general everyday use. The specially formed aluminium uprights and ribbed plastic shelves provide strength, durability and stability. Fitted with 100mm diameter thermoplastic swivel rubber castors (2 braked).

Drum Trolley and Pouring Stand

DT30P

Suitable for 210 litre steel drums. Choose from pneumatic or solid tyred wheels: 2 x 400mm diameter. 4 Nylon drum rollers and strap supplied. Finish: Blue epoxy.

As manufacturers we are pleased to quote for drum movers for any specific diameter of kegs, drums, containers or rolls.

Description	Overall H x W x L mm	Height of Bung* mm	Weight kg	Order Ref
Pneumatic Wheels	510 x 800 x 1220	360	22	DT30P
Solid Wheels			35	DT30

Drum Stands

Manufactured from a robust and strong welded steel frame and finished with a tough, hard wearing red epoxy coating.

The tubular chassis is angled to hold the drum safely and securely, with two support bars to ensure rigidity.

Max Load
250kg

Made in
Britain

Description	Overall H x W x L mm	Capacity kg	Weight kg	Order Ref
Static Stand	490 x 585 x 880	250	9	DS17

Optional extras

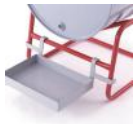

Tilt Lever (factory fitted). Length 1070mm with hand grip

Ref: **DS29**

Hook on Drip Tray
L x W x H 387 x 280 x 50mm
Available for all drum stands.

Ref: **DS30**

Complete Mobile Drum Stand

Suitable for holding 210 litre steel drums. Manufactured from a strong tubular steel welded construction and finished in a tough red epoxy coating. The drum rotation rollers make it easy to change the position of the drum while on the stand, and the tilt lever ensures easy operation from standing to vertical position.

Two fixed outrigger wheels, 150 x 40mm, and two swivel castor nylon wheels, 80 x 35mm

Max Load
250kg

Stacking Drum Pallet Racking System

Flexible, expandable storage system for 200/220 litre steel drums. Pallet Unit: Holds 2 drums. Strong welded steel construction stackable pallet. Pallet feet 127mm square. Maximum stacking 3 units high. Also with Drum Rotation option. Finish: Red epoxy.

Sump Unit: Capacity 250 litres. Formed from 3mm sheet steel, fully welded seams. Ground clearance 100mm. Finish: Grey epoxy.

Fork Pocket W x H: 240 x 70mm
Max Width Over Forks: 920mm
Distance Between Pockets: 430mm

Description	Overall H x W x L mm	Weight kg	Order Ref
Pallet Unit	890 x 1460 x 615	50	DS100
Sump Unit	300 x 1250 x 1000	70	DS2

Optional extras

Drum retaining bars for added stability. Overall H x W x D: 1420 x 170 x 40mm. Weight: 6kg. Finish: Red epoxy.

Ref: **DS103**

Drum rotating sets: fitted with 4 x 65mm dia nylon rollers. Drops onto pallet unit 1 set per drum position. Weight: 4kg. Finish: Zinc plated.

Ref: **DS101**

Dispenser stand hooks onto pallet. Overall H x W x D: 330 x 340 x 290mm. Weight: 6kg. Finish: Grey epoxy.

Ref: **DS102**

Drum Sump Storage System

Designed to store drums either vertically or horizontally for ease of use and access. In case of leakage, sumps are designed to hold more than the contents of the drum.

Products designed to assist conformance with Environmental Duties of Care and Oil Storage Regulations (England) 2001. Sump capacity >125% of drum contents.

Fully welded sump covered with removable galvanised steel grid and retaining chain (vertical stores only). Stores without roofs fitted with 125mm pallet feet for ease of stacking. Maximum stack 3 high. All sumps fully welded liquid tight, fitted with drain plug and fork locators.

Drum stand to take 2 horizontal drums fits over DS402.

Drum rotation frame for 1 horizontal drum, fits over DS411. Nylon wheels allow full rotation of drum.

GOODSMAN

**AN ELECTRIC
SACK TRUCK
RANGE FOR
EFFORTLESS
HANDLING**

Introducing the GoodsMan Sack Truck Range – Powered by Redhill

The GoodsMan Powered Sack Truck range, designed with precision, handles tough tasks with ease. With over 11 years of proven performance, this robust British-designed solution reduces fatigue, boosts efficiency, and offers a high ROI. It navigates grass, gravel, long distances, and steep slopes, making work easier, faster, and safer.

Key Features & Benefits:

- Effortless Mobility: Ideal for use on Grass, Gravel, Distances and Slopes, easy transport of goods even over deep gravel.
- Safe & Stable: Designed for inclines, maintaining safety even when loaded, mitigating risks.
- Forward and reverse variable drive.
- Proven ROI: Demonstrated high return on investment.
- Built to Last: Trusted for over 11 years, delivering long-lasting performance and reliability.
- British Design & Manufacture: Proudly made in the UK, ensuring top quality.
- UK Patent: Protected by a proven UK patent, highlighting its unique design.
- Grab 'n Go Ready: Quick, easy deployment, making it perfect for busy environments.
- Reduces User Fatigue: The powered drive cuts physical effort, boosting workforce efficiency.
- 2-Year Warranty.*
- Battery run time: 1hour continuous use (typically 2-3 miles). Optional upgrade to double run time.

Take your operations to the next level with the GoodsMan Sack Truck range - Powered by Redhill, designed to handle the toughest tasks while keeping your team safe and productive.

Rough Terrain Truck 6 Model Range

Max Load
350kg

Made in
Britain

Made for rough ground and tough work. Choose from Solid or pneumatic tyres and 3 toe iron sizes. The large diameter wheels cope with rough and uneven ground with ease. Solid tyred wheels should be chosen if the truck is likely to frequently come in contact with sharp objects. The trucks are heavily built and very strong, coping easily with the maximum load rating of 350kg. Protective handgrips are fitted as standard and this also helps handling over rough terrain. Finish: Blue epoxy.

Access Platform

For use with forklift trucks. Manufactured according to Health and Safety executive guidance note PM28 (3rd edition) December 2005. Approved to be used by 2 persons of average weight - max total load capacity 350kg. Finish: Yellow epoxy.

Max Load
350kg

Made in
Britain

The Access Platform has been designed to provide easier access for your maintenance, repair and installation requirements.

Fully welded with a raised expanded metal floor, located and welded into a formed kickboard surround. Tubular handrail and rear RSA frame with wire mesh panels. Hinged entry gate with spring return to closed position a spring loaded retention bolt holds the gate in the closed position.

Platform locks onto the lift truck forks with threaded screw jacks.

Important ordering requirements

In the interests of safety, we do not specify standard fork location details. Platform must be manufactured to your forklift truck specification.

On all orders please specify:

- 1. Length of fork
- 2. Width and depth (cross section) of fork
- 3. Maximum standard distance between forks

Fork heel lock and screw jack. Raised gate lock and slam bolt.

Overall H x W x D mm	Platform Size W x L mm	Handrail Height: mm	Gate Width mm	Weight kg (approx.):	Order Ref
1925 x 1020 x 1020	1000 x 1000	1010	510	78	ASP1

Optional accessories

Castors - 2 swivel, 2 fixed castors, 100mm diameter. nylon wheels. Provides for ease of movement and storage independent of forklift truck. Increases height by 125mm

Ref: ASP4

Tool Tray - Welded tool tray hooks onto front guard rail. Complete with locking screws. L x W x D : 1000 x 200 x 200mm. Weight: 10kg
Ref: ASP2

Rolling Corners

Max Load
600kg

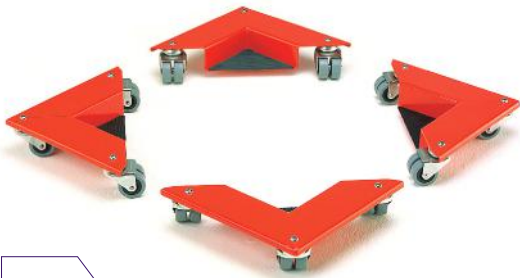

Made in
Britain

Sold in sets of 4, rolling corners allow large items to be moved with little effort. Manufactured from formed and welded sheet steel, platforms fitted with 3mm thick black ribbed rubber matting. Metalwork finished in high quality powder coating.

Wheels: 3 castors, all swivel with 50mm wheels with grey non marking rubber tyres.

IMPORTANT: Weight must be evenly distributed on the four corners.

Pedestrian Snow Ploughs

HSP-1

This bi-directional snow plough makes it simple and easy to clear your driveway and sidewalks in half the time with half the effort needed for conventional shovelling. Manufactured from mild steel with high quality epoxy coated finish, making this a superior and hard wearing product. Product is supplied fully assembled.

Angled plough to allow snow to easily slide off the side of the blade. Simply flip the handle over to choose which side the snow is ploughed to. Narrow Model is ideal for home use where space is restricted.

Wheels: 160mm solid rubber tyred wheels and roller bearings.
