

Redefine Your Fax Experience

SecureFax delivers HIPAA-compliant encryption for your businesses' important documents from any device.

Effortless Faxing. Anytime, Anywhere.

Send and receive internet faxes from anywhere using your computer, tablet, or smartphone. No hardware required.

Mobile friendly

Send or receive documents from any device anywhere using the mobile-friendly web portal.

99.9% delivery rate

Stop wasting time with failed faxes and busy phone lines. SecureFax is a reliable solution to efficiently transfer your documents.

Multiple recipients

Send to multiple parties and receive to numerous accounts at once.

Voice / Fax detection

Intelligently distinguish between voice and fax transmissions to streamline incoming communications.

Network fax server (optional)

Maximize control over your fax communications with enhanced customization and management capabilities.

Onsite fax devices available

Complement digital services with physical infrastructure for flexible document management.

HIPAA-Compliant

SecureFax is a HIPAA-compliant fax service that ensures sensitive patient information is protected. HIPAA, or the Health Insurance Portability and Accountability Act, sets clear standards for keeping healthcare data secure, and with SecureFax, your faxes are encrypted and safeguarded with authentication and access controls. Staying HIPAA-compliant means more than avoiding penalties—it ensures patient data is kept confidential. With SecureFax, healthcare providers can confidently share medical information while meeting privacy standards and maintaining patient trust.

Pick what fits your needs

**Standard Cloud
Fax with ATA**

**Fax-to-Email &
Email-to-Fax**

**SecureFax HIPAA
Compliant Web Portal**
