The VOCALOID4 Library "v4 flower" is a VOCALOID specialized for "rock" amongst a wide range of music genres. Her neutral voice is appealing in various ways, from the boyish strength in the mid- to high tones, to the sorrowful, fleeting, and sad low tones. She provides a vocal sound that isn't lost even in heavy music with guitar sounds in the foreground.

Not only did we equip the Growl function to support VOCALOID4, but we also reviewed the sound source, improving fluidity. This makes it easier to output a voice that, while specialized for rock, doesn't hurt your ears. This aloof girl is a rock VOCALOID that can sing anything from slow rock to up-tempo heavy sounds.

GALASYNTH 2024

Theme: Fruit Girl Bohemian Y2k 🍓 🍏 🍏

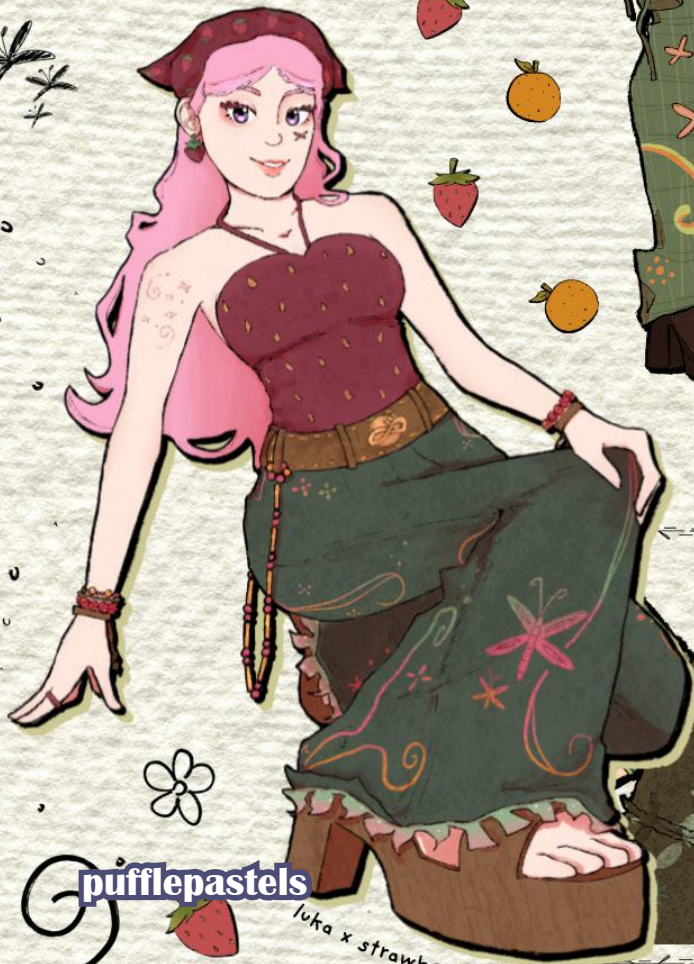

MODELS: Miku Hatsune, Rin Kagamine, and Luka Megurine

Hi, hi!

Boho fashion has been my comfort style for as long as I can remember. For my entry, I decided to dress my three favorite VOCALOIDs in this beloved style.

My biggest inspirations are the Bratz Fashion Pixiez, Strawberry Shortcake, and Peach Riot. I added lots of butterflies and swirls to give the designs a whimsical, woody vibe.

This project was stressful but a joy to work on. I haven't put this much commitment in an artwork in a long time ♡.
