

YOU DESERVE THE GOLD STANDARD in private security

If something had to happen at your home today, wouldn't you want to have the **total peace of mind** that your loved ones are covered by **the gold standard in private security and armed response?**

1

ARMED RESPONSE

Proactive security is our focus. We are dedicated to the prevention of crime through continuous, 24-hour, high visibility patrols. With an extensive resource base and best-in-class response times, we always have you covered. Because when lives matter, seconds count!

2

MONITORING & CCTV

We are one of the leaders in public space CCTV and have an ever-growing footprint of more than 850 cameras throughout our footprint. We also have a full CCTV monitoring platform that makes use of the most sophisticated artificial intelligence

3

VIDEO VERIFICATION

A recent addition to the Beagle Watch suite of products is Video Verification. With Beagle Watch's unique Video Verification system, you can add a highly cost-effective and efficient safety layer to your private security without compromising your privacy.

4

GUARDING SERVICES

Whether you require guarding at a residential estate, industrial or commercial site, street guarding, or ad hoc guarding, why trust anyone but Johannesburg's leading private security provider to give you the peace of mind and seamless support you deserve?

5

TECHNICAL SERVICES

At Beagle Watch, we understand that reliable, 24-hour technical support for home or business security systems is not always easy to find. Which is why Beagle Watch's technical experts provide you with world-class technical services whether you are a client or not.

“ Beagle Watch has been a great for our suburb. A big improvement! I also really appreciate your swift communication and involvement with many aspects of improving the suburb. – Client, Westcliff.

Beagle Watch's personalised service is unheard of. – Client, Dunkeld.

High visibility and personalised approach set Beagle Watch apart. – Client, Northcliff.

MORE REASONS WHY BEAGLE WATCH IS **THE ONLY CHOICE**

Unsurpassed response times

Seconds count, which is why Beagle Watch's response times are the gold standard in the industry.

We operate only dedicated vehicles in all suburbs where we operate

Our Response Officers and vehicles are dedicated to specific areas, so they get to know the areas and clients they serve exceptionally well. We also pride ourselves on our exceptionally low client to vehicle ratios, which ensures the best possible support and increased safety for our clients.

Our Response Officers receive signals directly in their vehicles

The signal from your home is transmitted immediately from your home to the dedicated response vehicle in your area. This saves valuable time in case of an emergency. For your added peace of mind, our Officers always have access to extensive back-up support and will call for assistance as soon as the nature of the emergency is known (in some instances, back-up vehicles are immediately dispatched as a matter of course).

Visible and active patrols, around the clock

Our response vehicles patrol around the clock. We have a 24-hour management team in place that monitors our vehicles' movements, ensuring that all vehicles are active at all times. Beagle Watch's unique business model of high visibility and our pro-active approach to fighting crime have been proven to reduce crime in our footprint.

State-of-the-art Call Centre

Our multi-million rand Call Centre is the most technologically advanced of its kind and is operational 24/7, 365 days a year. This includes a full CCTV monitoring platform that covers over 850 cameras and which makes use of sophisticated artificial intelligence.

Revolutionary high-tech solutions to enhance your private security safety

We are the leaders in utilising technology to enhance our clients' safety and security and offer leading products, such as the Beagle Watch Gate Guardian, Hawkeye and Video Verification services.

Value-added products for even more peace of mind

All Beagle Watch clients receive priority fire response through FIRE OPS SA and emergency medical assistance from Netcare 911.
