## **SECUR-A-NUT WHEEL SECURITY SYSTEM**

The crime rate leaves no one untouched and criminals have discovered an easy source of income: Expensive truck tyres and rims. Until now, there was very little that could be done. However the amazingly simple SECUR-A-NUT Wheel Security System stops all would be thieves in their tracks.

## **SECUR-A-NUT WHEEL SECURITY SYSTEM MEANS:**

- No more stolen wheels and Rims
- No Down time caused by unscheduled replacement of wheel assemblies
- Wheel & Tyre security at the fraction of the cost of replacement
- Quick and Easy fitment
- Peace of mind

## **SIMPLE & EASILY AFFORDABLE**

Manufactured and hardened steel, the SECUR-A-NUT Wheel Security System quickly & cost effectively reduces wheel theft as the wheel assembly simply cannot be removed without your unique corresponding SECUR-A-SOCKET.

We manufacture to our patented design, which includes your unique registered pattern number, for Nuts & Sockets that meet your vehicles requirements.

## **TESTED FOR YOUR SECURITY**

The SECUR-A-NUT Security System has had rigorous tests done on both the nut and the socket and results showed they easily withstood well in excess 750Nm of torque without loosening. The strength of the system was confirmed by withstanding more than 50 tightening and loosening cycles without any sign of damage.

## Seats for safety and strength

The Seat Connection has been a regular and frequent supplier of mining seats for some 30 years.

We have a fully equipped workshop and professionally trained team to assemble new seats and repair or restore used seats.

Developed for strength, our THESCO Mining Seats with their compact EU approved suspensions are ideal for limited space environments and harsh conditions.

# Human Body Facts

- 1. The largest bone in the human body is the femur. It can support 30 times the weight of a person's body. Ounce for ounce, that's stronger than steel.**
- 2. Messages from the human brain travel along nerves at up to 200 miles an hour (322 km/h).**
- 3. In an adult human, 25% of their bones are in the feet.**
- 4. The gluteus maximus is the body's largest muscle.**
- 5. A human's ears and nose never stop growing.**
- 6. There are more bacteria in a human mouth than there are people in the world.**
- 7. If a human being's DNA were uncoiled, it would stretch 10 billion miles, from Earth to Pluto and back.**
- 8. Within three days of dying, the enzymes that digested a person's food will begin to digest that person's body.**
- 9. For an adult human, taking just one step uses up to 200 muscles.**
- 10. A human skeleton renews itself completely every 10 years.**

1. The strongest muscle in the human body is the masseter, or the jaw muscle.
2. The liver the largest internal organ and is the only organ that can regenerate itself. However, repeated damage to the liver can eventually injure and scar this amazing organ.
3. The human brain uses just as much power as a 10-watt light bulb.
4. The word “organ” comes from an old Greek word, organon, which means “tool” or “instrument.”
5. There are so many nerve cells in a human brain that it would take almost 3,000 years to count them.
6. An adult’s skin weighs between 8 and 11 pounds (3.6 to 5 kg). It’s surface area is about 18-22 square feet (1.7 to 2 sq. m), which is the size of the floor in a one-person tent.
7. The longest bone in an adult human is the thighbone, measuring about 18 inches (46 cm). The shortest bone is in the ear and is just 0.1 inches (.25 cm) long, which is shorter than a grain of rice.
8. An adult who weighs 150 pounds has a skeleton that weighs about 21 pounds.
9. An average person walks about 100,000 miles (160,934 km) in his or her lifetimes, which is like walking around the world four times at the equator.

***An adult is made up of  
7,000,000,000,000,000  
,000,000,000,000  
(7 octillion) atoms***

## **SECUR-A-NUT WHEEL SECURITY SYSTEM**

The crime rate leaves no one untouched and criminals have discovered an easy source of income: Expensive truck tyres and rims. Until now, there was very little that could be done. However the amazingly simple SECUR-A-NUT Wheel Security System stops all would be thieves in their tracks.

## **SECUR-A-NUT WHEEL SECURITY SYSTEM MEANS:**

- No more stolen wheels and Rims
- No Down time caused by unscheduled replacement of wheel assemblies
- Wheel & Tyre security at the fraction of the cost of replacement
- Quick and Easy fitment
- Peace of mind

## **SIMPLE & EASILY AFFORDABLE**

Manufactured and hardened steel, the SECUR-A-NUT Wheel Security System quickly & cost effectively reduces wheel theft as the wheel assembly simply cannot be removed without your unique corresponding SECUR-A-SOCKET.

We manufacture to our patented design, which includes your unique registered pattern number, for Nuts & Sockets that meet your vehicles requirements.

## **TESTED FOR YOUR SECURITY**

The SECUR-A-NUT Security System has had rigorous tests done on both the nut and the socket and results showed they easily withstood well in excess 750Nm of torque without loosening. The strength of the system was confirmed by withstanding more than 50 tightening and loosening cycles without any sign of damage.

## INDEX

PLACING BUYERS AND SELLERS TOGETHER.

# TURBOFIX

"We are the leaders in the turbocharging field"

## Facts for Customers

We know that there are customers that believe you can't repair a Turbocharger due to the bad experience with poor workmanship in Turbocharger Companies.

Quality Turbocharger repairs are infinitely possible, as long as the correct equipment & knowledge is used. Cheaper Turbochargers are not always the same quality, due to inferior quality & low cost parts. (Price vs. Quality)

**We strive to supply the best Quality.**

"There is no substitute for quality & service"
