

Fluidum

NATURE IN EVERY DROP

ABOUT PRO INFUSION, s.r.o.

PRO INFUSION, s.r.o. is a Prague-based food-tech company and the creator of Fluidum – a fusion of herbal traditions and modern technology.

We use a unique, gentle processing method to preserve the purity and potency of natural ingredients. Our internationally recognized certifications ensure the quality, safety, and compliance of our products.

Thanks to our patented Czech-made extraction and filling technologies, we produce for our own brand, collaborate with partners, and offer solutions for white and private labels.

ABOUT FLUIDUM

Fluidum is a 100% natural liquid extract of herbs and teas, packed in sachets and capsules for quick preparation with no risk of getting the drink wrong.

Made through a gentle process using only pure water and organic ingredients, it combines traditional methods with innovative technology, setting a new standard for tea and herbal drink preparation.

Always ready to use – simply mix the sachet's content with hot or cold water, or insert the Nespresso Original-compatible capsule into your machine and prepare a perfect drink at the touch of a button.

BENEFITS

FAST AND EASY PREPARATION

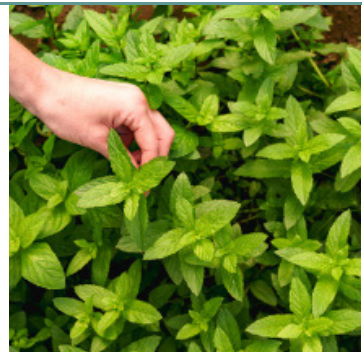

Thanks to Fluidum, your drink will be ready without brewing and waiting, literally in a second. You'll save time and enjoy a little extra relaxation. Also you don't have to be an expert on herbs or individual types of tea, with Fluidum you will never mess up the preparation.

FOR COLD AND WARM WATER

Just pour the contents of the sachet into any warm water and you're done. You can prepare a warm, iced or even bubbly drink in the same way. We recommend as well trying Fluidum in combination with your favorite mineral water.

100% NATURAL INGREDIENTS

Just water and herbs/tea/fruit. That's it, nothing more. Completely natural. Exactly the way our mothers, grandmothers and great-grandmothers did it, only with the use of modern technologies. After all, we live in the twenty-first century.

CERTIFIED QUALITY

Taste matters and quality must not be compromised. We source and blend balanced, delicious organic blends. Our manufacturing process is very gentle and we are strict with ourselves in following it. With our production of unique products in high quality help us experienced advisors and certification companies.

SMART AND ECO-FRIENDLY PACKAGING

Just mix Fluidum from the sachet with water. This packaging is ideal for trips, to the school or office. Fluidum from the capsule you prepare in your coffee machine as you are used to. The capsule is empty after use and, thanks to its all-aluminum composition, is immediately suitable for recycling. It belongs in a container for metal.

LOCAL BRAND

We invented and manufacture Fluidum in the Czech Republic, but we are also heading abroad with it. Fluidum is exactly as we dreamed it for ourselves, for our loved ones and for you.

NEW CAPSULES

Your coffee machine can also prepare delicious tea!

You don't have to worry about the taste of the tea being affected by the taste of the coffee if you rinse the coffee maker with water before making the tea.
Just run one longer cycle without inserting a capsule.

The liquid inside the capsule facilitates recycling, as the aluminium capsules are empty and clean after use.
