HANDY INFORMATION FOR YOUR STAY AT THE MARATHON COACH SERVICE DEPARTMENT

Driver Air Conditioning

Recharge

Driver Air is the dash AC, essential for staying cool on the road. A recharge involves topping off the freon to maintain optimal cooling and should be done once a year.

Roof Air Conditioning Maintenance

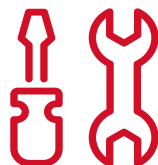

Filter Cleaning for Coleman and Dometic Roof Air Systems

Coleman and Dometic filters should be cleaned at least once a year to ensure proper airflow. In dry, dusty environments, biannual cleaning is recommended to prevent buildup. Regular maintenance maximizes AC efficiency and overall performance.

Cruise Air

Maintenance and Recharge

Cruise Air is the house air conditioning system used in most Marathon coaches until 2002. To keep your system running efficiently, regular maintenance and recharges should be done once or twice a year, depending on usage.

While converting to roof AC is possible, it requires significant structural modifications and new electrical wiring.

(Prices vary per coach year and options)
