# LETTER FROM ALPI®

## VICE PRESIDENT MARCO INDRIO

First and foremost, I want to thank every single one of our customers who helped propel us to another year of tremendous growth. It is your support that helped land Alpi® on the INC 5000 list as one of the fastest growing private companies in America. Without you, none of this would be possible, so from the entire Indrio and Alpi® family, thank you.

It has been a busy year! For the first time in our 42-year history, we operated out of two locations to successfully keep up with demand. We are proud to have spent the year growing inventory levels and expanding our technology offerings. Alpi® is now live with nine different PromoStandards endpoints with many more preparing to go live in 2025. Even with new tech upgrades, we promise to never abandon our pledge to customer service. If you call us, a real person will pick up the phone quickly, every single time.

2025 promises to be a very exciting year. In this catalog you will find more fun designs of Squeezies®, new adorable rubber ducks, and other unique items that you always expect from Alpi®. We are most excited to launch our new line: **Alpi® Pets**. Our new dog toys are extremely

durable, have great branding areas, and are sure to be a hit with all customers and more importantly, their pets! I invite you to look through this catalog and get inspired with new ideas for the coming year. Alpi® is ready to work for you!

## PPAI PRODUCT SAFETY AMBASSADOR

Early Adopter of the  
PPAI Code of Conduct

## ALPI® IS SERIOUS ABOUT SAFETY

Visit [www.alpi.net](http://www.alpi.net) for our complete  
statement on product safety

Alpi®'s supply chain is based on a number of long standing relationships with our suppliers. This is the base for assurance that our products are produced in an ethical and safe way, and that the final product is safe for our users. Alpi® continues to address and comply with all applicable safety standards and regulations as they evolve. Staying compliant with the constantly changing safety information and regulations has been a goal for us since our start. Alpi® strives to keep up with and abide by all legal warnings and labeling requirements as established by the U.S. government and the Consumer Product Safety Commission.

We personally visit the factories we buy from to insure that they continue to meet our standards. We will not do business with factories we believe are in violation of our policies or engaged in unethical conduct. We prefer our personal auditing to third party inspections because a third party inspection may not be accurate. We also implement random testing of one or more items out of any shipment we are receiving. Random testing allows us to insure that our factories continue to produce high quality items that can pass all applicable safety tests at any time.

### CPSIA of 2008

While Alpi® has created and launched many fun toys and novelty over the years, our products have always been designed and intended for use by adults. This is especially true now that Alpi® is only selling to the promotional and advertising industries. This does not exempt us from providing items that are non toxic at all times and under all circumstance, but it exempts us from certain new labeling requirements that are applicable only for items intended primarily for children under 12 years of age. Currently the

CPSC regards stress relievers as products intended for adults. As such, stress relievers are not subject to tracking label requirements. However, if items are ordered with the purpose of being sold to children, Alpi® provides the necessary warnings and recall notices by printing them on the product. When we are handling the sale of our Squeezies®, all of our paperwork from sales order, to order confirmations, invoices and even paper proofs bears a statement that requires our customers to specify when the product is being intended for children under 12 years of age. If the primary intended users of our stress relievers are children under 12 years of age we will register each item in the PPAI database and print the with a non-removable tracking label. We will also do this for items we believe might be attractive to children, in case a child should pick it up. This requirement is necessary to comply with the CPSIA. An additional fee for printing this label will be incurred.

### California Proposition 65

Proposition 65 requires consumer product warnings for products shipped to California that may expose consumers in the state of California to a published list of carcinogens or reproductive toxins unless such substances are present that pose no harm. After a complete review of the text of the law in 2018, Alpi® believes our products are exempt from the requirement of labeling our products. Under sect. 25249. 10c of the original text of the law, our products do not expose any user to any risk of permanent damage or intoxication. Our safety tests explicitly declare our products are safe under California Proposition 65.

*All safety documents are available upon request.*
