58 **About SAVI**
Revolutionizing Commercial AV

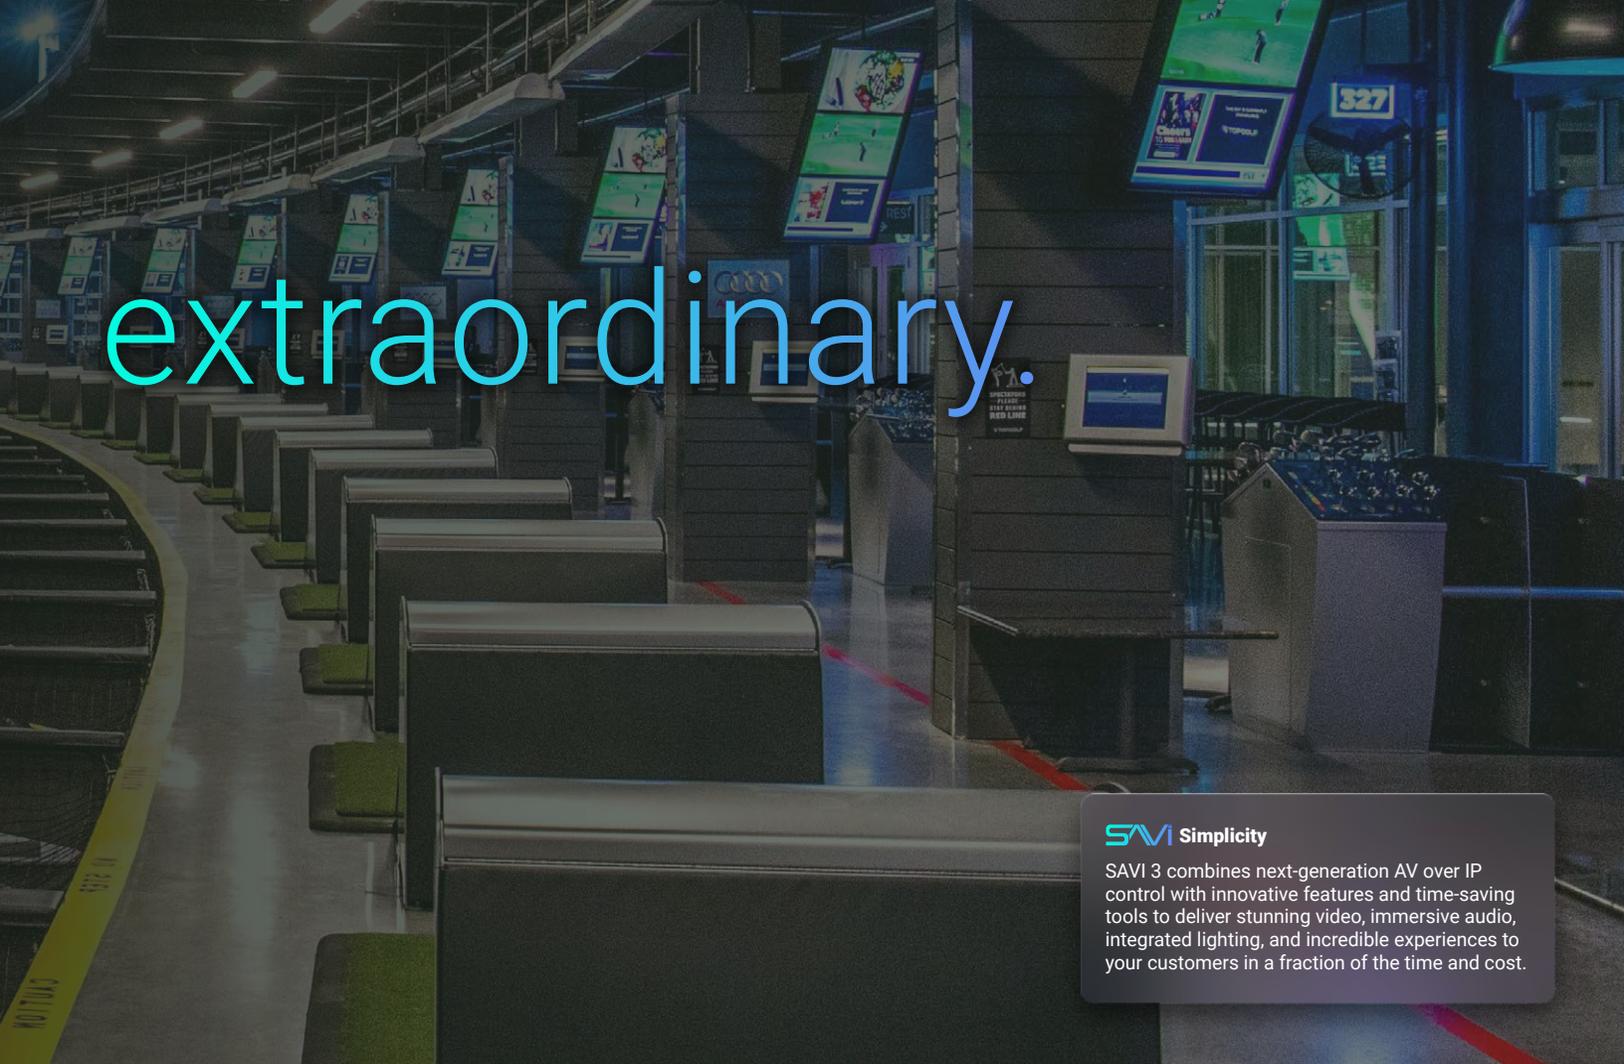

Hello simplicity, meet

Technology can dramatically transform a workspace. Elegantly orchestrated lighting, high-impact video, striking graphics, and pristine audio have the power to amaze, to energize, to motivate, and most importantly, to inspire.

But for far too long, a truly modern and automated AV experience often translated to time-consuming installs, endless points of failure, complicated platforms, and premium prices for systems no one knew how to use. **Until now.**

Say Hello to simplicity.

SAVI 3 is the only commercial AV control, automation, and management solution built to dramatically simplify and redefine the AV experience for business owners, their employees, and their customers. From streamlined hardware, effortless integration, and an intuitive user interface to transparent pricing, world-class training, and 24/7 support – SAVI 3 makes it possible for businesses to invest in extraordinary technology transformations of their spaces at any size or budget.

extraordinary.

Savi Simplicity

Savi 3 combines next-generation AV over IP control with innovative features and time-saving tools to deliver stunning video, immersive audio, integrated lighting, and incredible experiences to your customers in a fraction of the time and cost.

SAVI Creator

Program in Hours, Not Weeks

SAVI Creator introduces a dramatically simplified approach to AV programming, empowering commercial integrators with a suite of powerful tools to deliver extraordinary AV experiences in a fraction of the time and cost. With Creator's next-generation, no-code features, you can configure systems of any scale, from 10 devices to thousands, in just hours.

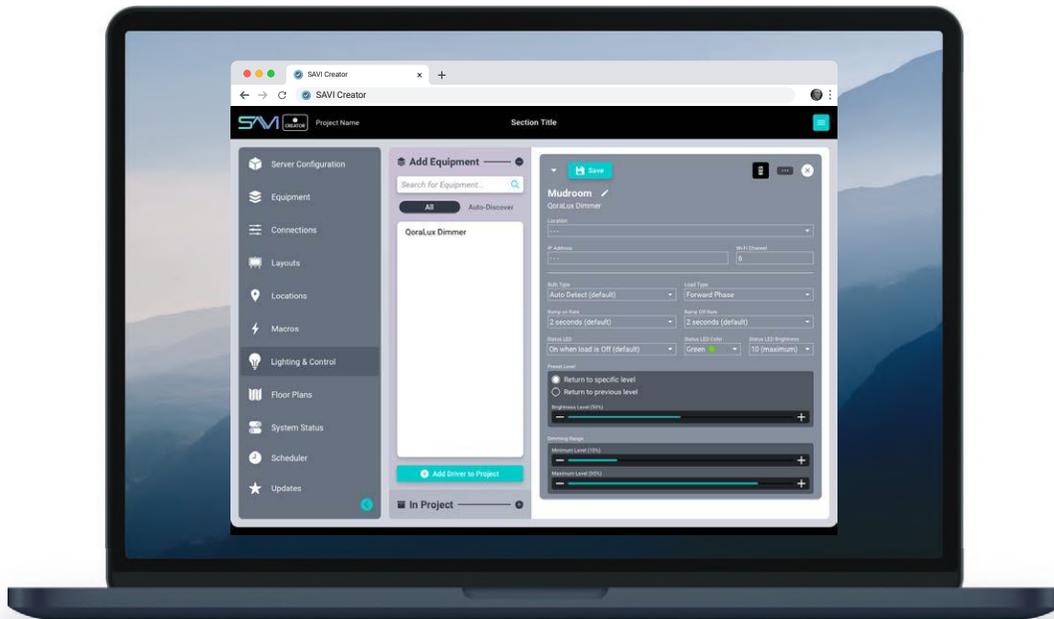

No Coding Required

Program systems of any scale in just hours.

Browser-based

Access and program projects from any web-enabled device – no software download required.

"SAVI 3 employs a unique control system that is easy for bars, restaurants, and public facilities to use. Creator streamlines programming and makes it less of a burden for the integrator and end-user."

Sean Delph
Executive Director, Delcom Group

Auto-Increment

Eliminates manual monotony and time-intensive tasks by automatically naming devices and configuring consecutive IP addresses.

Live Preview

Provides a live video feed of the source directly in Creator and eliminates the need to see the display or use a remote.

Map View

Effortlessly deliver full-scale system maps to customers by simply uploading a floor plan and dropping in the endpoints.

Location Tagging

Keeps your sources and equipment organized and automatically creates the end-user experience.

Auto-Detect

Quickly identifies network-connected components in a project and configures 100s of devices in seconds.

System Logs

Inspect system events with detailed logs, improving troubleshooting and customer support capabilities.

Firmware Updates

Update your QoraLux drivers, fixtures, and LG webOS displays directly in Creator.

Macros

Create, schedule, and automate tasks for your customers.

Instant, Responsive Search

Eliminate endless scrolling with optimized search.

SAVI Canvas

The Display is Your Canvas

With **SAVI Canvas**, one network cable to each display enables content delivery, management, source switching, and control with built-in features for video walls, tiling, ad space, marketing messaging, and video distribution. Now it's remarkably simple to deliver high-impact visual experiences for projects of any size – all without a separate digital signage platform.

SAVI Show

Allows end-users to upload and deliver custom content to any display anytime display - no dealer programming, truck rolls, or extra logins required.

Custom Layouts

Divide the display to show multiple content sources on a single screen, including iFrames, live TV, video, custom graphics, and more – all without the expense of complicated digital signage platforms.

SAVI Simplicity

Help end-users reach unrealized profit from their displays using the L-layout to promote specials or sell ad space.

Canvas Dashboard

Remote Asset Management

With at-a-glance status of all displays, **Canvas Dashboard** provides easy remote management, support, and troubleshooting. Manage and monitor health, see exactly what's playing on each display, or pull MAC addresses and warranty information, anywhere, anytime.

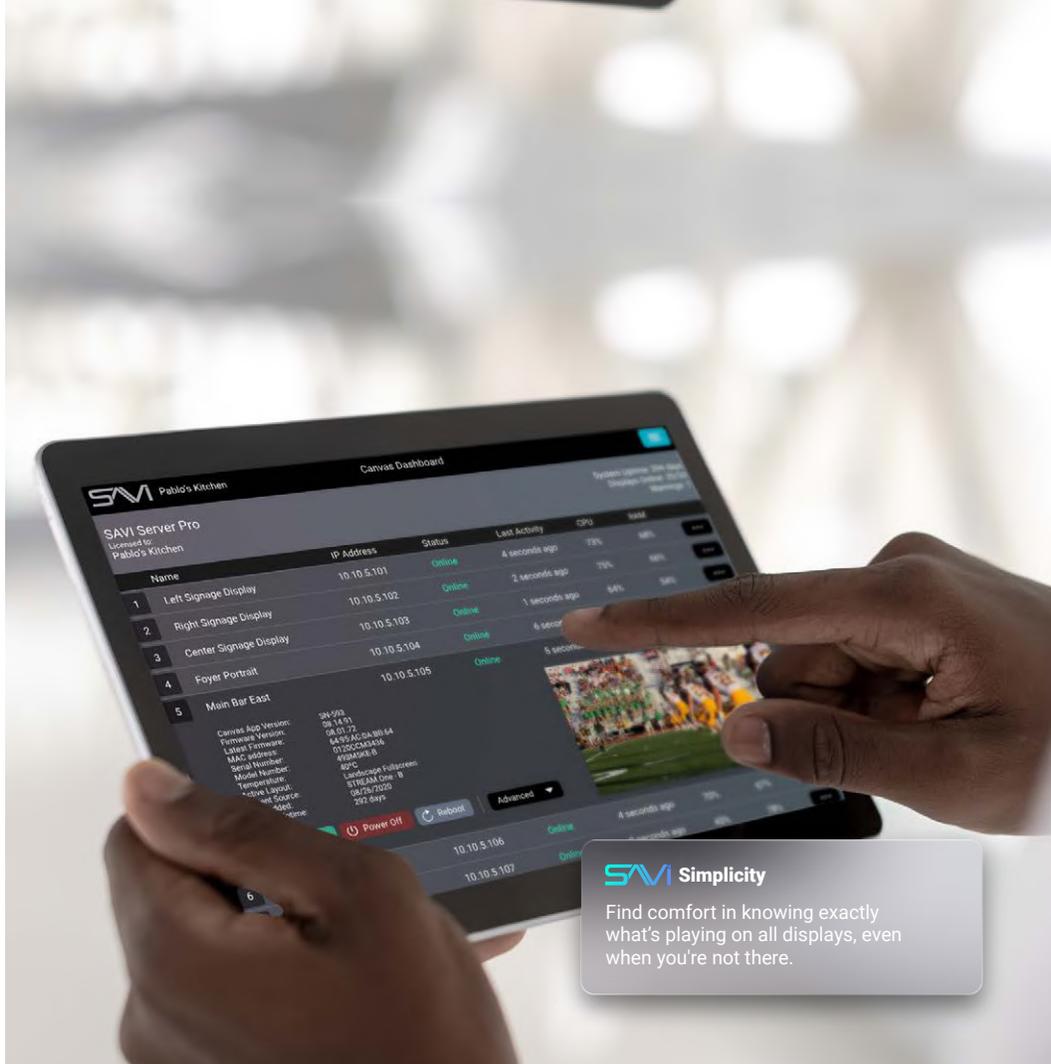

Auto-Detect and Linking Capabilities

Radically simplify troubleshooting and service calls; when a TV goes out or requires service, Canvas auto-detects, auto-links, then reconfigures the new TV with the original settings.

Canvas Dashboard Includes:

- Software & Firmware Updates
- Temperatures
- Uptime
- Warranty Information
- MAC Addresses
- Serial Numbers
- Screen Scraped Content
- Dates Added

SMV Simplicity

Find comfort in knowing exactly what's playing on all displays, even when you're not there.

SAVI 3 End-User Interface

Intuitive Control. Simplified Automation. No Training Required.

With modern design treatments and a host of built-in features, **SAVI 3** revolutionizes commercial AV by providing superior functionality and intuitive control across a wide range of devices. SAVI 3 is so consistent and user-friendly, controlling one device is just as easy as controlling thousands and virtually no end-user training is required. Advanced content distribution, custom automation, and full-system management are a simple tap, click, or swipe away.

No-Code, Built-In Features

Map View, Game View, Macros, Scheduler, SAVI Show and more come standard.

Intuitive & Modern

Sleek, approachable, and ultra-responsive for a faster, more intuitive user experience

BYOD

Accessible from any web-enabled device with no apps or proprietary hardware required.

No Training Required

So simple to use, your customers can master SAVI in minutes.

User Rights Management

Assign individual access to rooms, zones, levels, devices, and more.

Facility View

Advanced Control at Your Fingertips

Create a crafted customer experience with a single touch, tap, or swipe. Blending seamlessly into daily operations, **Facility View** provides users with quick, intuitive access, control, and management of all the displays, audio zones, lighting, and more.

Now Playing

Two-way feedback shows the current program, channel name, and channel number, enabling a global view of all displays.

Macros

Condense any complex, multi-step task into a single tap - open an entire venue or trigger light shows and graphics for events.

Previewer

View a live feed of what's playing to verify channel changes, even if the display is on the other side of the venue.

Real-Time Guide & Scheduler

Schedule content up to 4 days in advance, eliminate remotes, and never interrupt the guest experience again.

Optimized Search

Instantly find any device, even when you don't know the name or location.

"With SAVI's innovative feature set, our customers not only realized significant savings but discovered their potential to draw profit from their AV system."

Ryan Sowa

President and Co-Founder, Just Press Play

Map View

Put Your Business on the Map

Map View is a turn-key feature delivering a holistic and nested bird's eye view of your customer's AV system. Perfect for a neighborhood bar or a professional sports stadium with thousands of endpoints, it's never been easier to create, edit, control, and manage a full facility with this visually intuitive, built-in tool.

Turn-Key

Deliver a full-scale system map to your customers in seconds.

Nested Organization

Clean, modern, and ultra-responsive maps can be nested and organized by location, room, level, or zone.

Fast Filter & Search

Control the entire system or search and filter endpoints by audio, video, lighting, sources, and macros.

Advanced Control

Multi-select and multi-edit provide control of volume, lighting, source settings, and more, directly in Map View.

Pictured: GOATS Arena, Frisco, TX

Quick Find

The dynamic "@" feature pinpoints exactly where sources are distributed, and the adjustable SAVI Preview shows exactly what's playing.

Choose Your View

Choose to display two-way feedback and metadata for selected endpoints including source, channel, program, and device name.

SAVI Simplicity

Use Map View in several creative ways, like visualizing your video wall layouts.

Game View

A Game-Changer Come Game Time

Say goodbye to digging through channel line ups and googling game times. **Game View** aggregates current and future sporting event data into a simple and elegant view, making it easy and fun to fulfill any fan's fantasy, anytime.

Visually Informative

A comprehensive schedule complete with team logos, colors, and program data.

Schedule

Pre-plan your week and schedule games up to 4 days in advance.

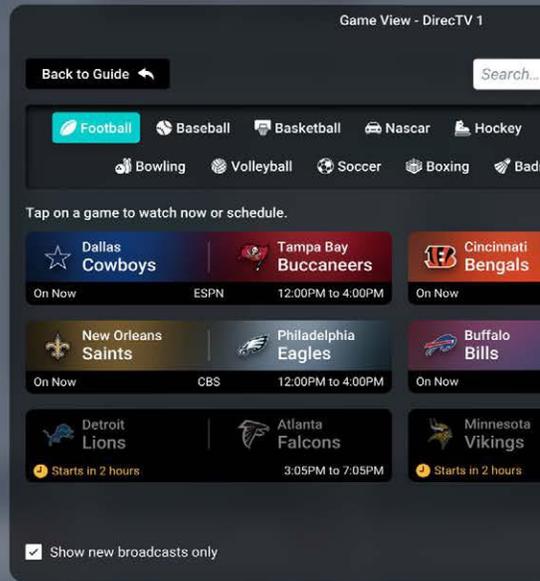

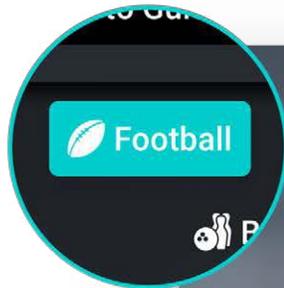

Search

Search by team to find a game or filter by sport to see all upcoming athletic events at once.

Now Playing

Game View displays in the Now Playing sidebar for quick recognition and selection.

SAVI Show

Built-In Content Manager

Simplified at every step, from basic branded signage to custom ad layouts, **SAVI Show** puts content creation, distribution, and management into the user's hands. Storing custom content, such as logos, menus, specials, slideshows, or ads, SAVI Show allows businesses to deliver personalized content to any display, anytime – eliminating the need for dealers to configure a complicated CMS.

Dedicated Media Database

Access your library from any device and upload with drag & drop or bulk upload functions.

Turn Displays into Profits

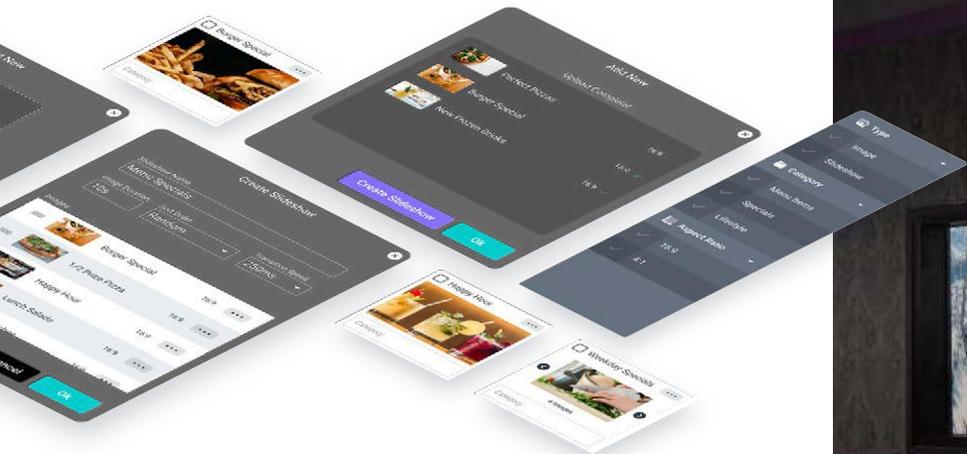

Now your customers can increase revenue by selling ad space or showing daily specials on their displays.

Schedule Content

Businesses can shift from lunchtime specials to happy hour or seasonal product promotions to weekly events by pre-scheduling and automating their custom content distribution.

Media Matching

Tap a desired layout region in Facility View and media with matching dimensions will display at the top.

Auto Frame Fill

Tastefully eliminate the negative space around any content that doesn't fit into a layout region.

Auto-Recognize Ratios

SAVI Show removes the guesswork by recognizing and categorizing files based on aspect ratios fit for Canvas layouts.

Preview SAVI Show

View SAVI Show content thumbnails directly in Facility View.

SAVI Simplicity

SAVI Show gives end-users ultimate control over their content without a CMS, dealer programming, truck rolls, or extra logins required.

Simple Integration, Extraordinary Experiences

Engineered to save integrators and end-users time and money, the **SAVI Hardware Line** eliminates points of failure and streamlines system design, cabling, and installation. Deliver reliable, high-performance, and extraordinary experiences with flexible and scalable options for commercial projects of any size.

“We want businesses to operate smoothly every day and deliver a superior, fun-filled atmosphere. Choosing SAVI was instrumental to achieving such high performance and ensuring that operations won’t be interrupted.”

Stacy Hileman
Regional Manager, *iWired*

SAVI Hardware

Superior Quality and Durability

The **SAVI Hardware** line features cold rolled steel construction and sleek, durable black powder coating. The SAVI ecosystem offers a comprehensive range of products, from 4K video and HiFi audio to low-voltage light fixtures and customizable control devices, all thoughtfully engineered for seamless integration and optimized to enhance any commercial experience.

Fully Integrated

The SAVI ecosystem offers efficiency, flexibility, and interoperability with third-party devices.

Cost-Effective

Eliminate unnecessary cabling, extra boxes, costly platforms, accessories, and licensing fees.

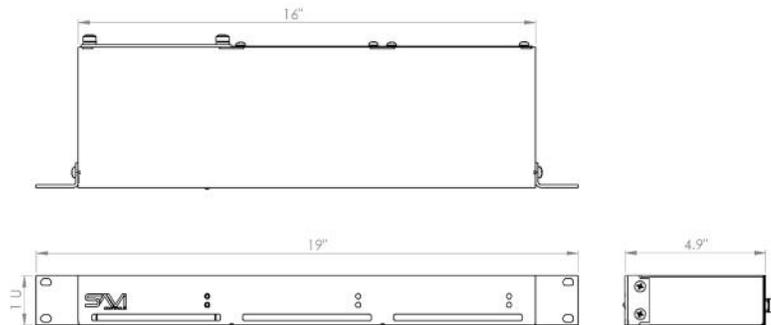

Trusted System

Over a decade of proven reliability to control 1000s of devices with power and rack space to spare.

Brilliant Audio & Video

HiFi-quality sound and advanced content distribution deliver flawless listening and viewing experiences.

SAVI Server Pro

AMP.One

SAVI Ecosystem

End-to-End Solutions

Delivering unmatched simplicity in design, programming, and installation, the **SAVI ecosystem** streamlines the AV experience from start to finish. Ever-growing, the SAVI ecosystem features a full line-up of commercial audio and speaker solutions, displays, video distribution products, digital signage solutions, surveillance systems, networking gear, and more.

SAVI Server Pro

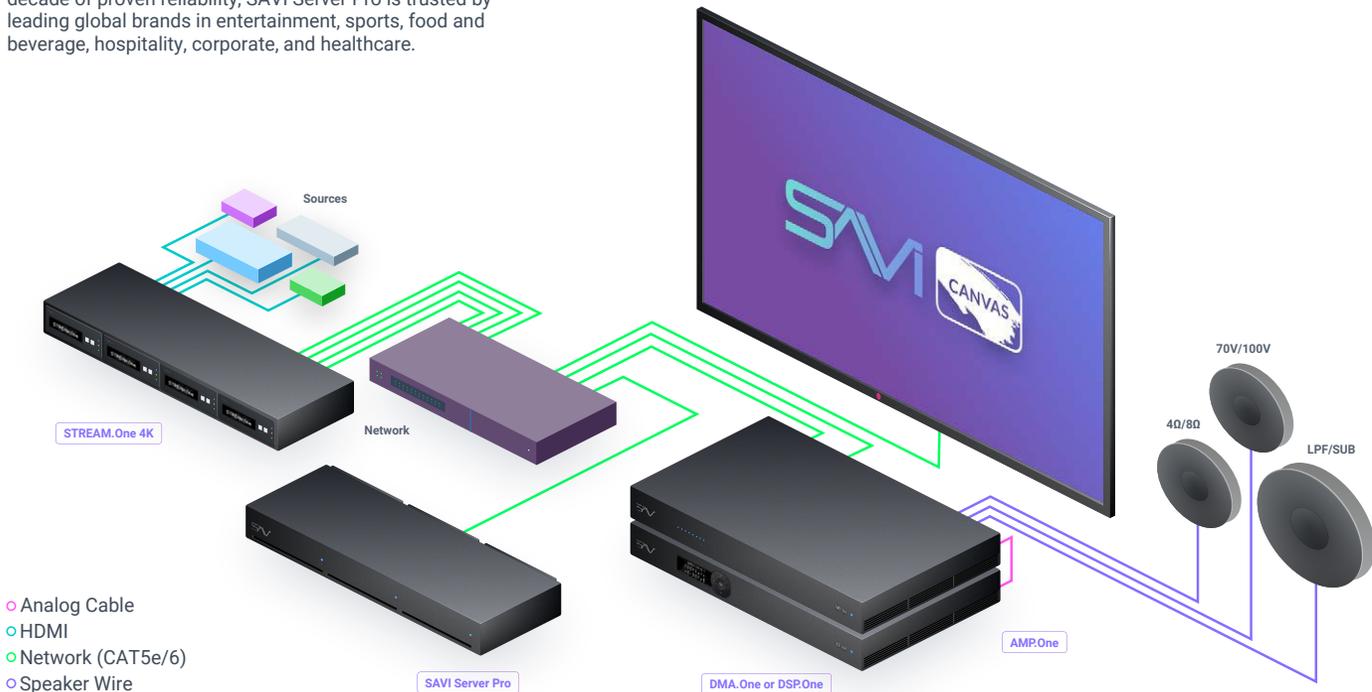

Proven Performance

SAVI Server Pro is the heart of every SAVI automation system with rock-solid performance capable of controlling virtually any project with power to spare. With over a decade of proven reliability, SAVI Server Pro is trusted by leading global brands in entertainment, sports, food and beverage, hospitality, corporate, and healthcare.

"I have not worked with another system that offers so much yet is intuitive and simple to use."

Mark Wells

President, Entertainment Systems Inc.

AV Over IP

Unlimited scalability and unsurpassed performance.

No Software or App Required

Controllable from any web-enabled device.

Seamless API Integration

Dramatically simplified integration with SAVI Hardware and third-party products.

Only 1U

The modular design leaves space for two additional processors like a Backup Server and lighting control with QORALUX.One.

Front Panel Reset

Easy troubleshooting and reset button access.

Dedicated Content Storage

Built-in storage space for custom end-user SAVI Show content and slideshows.

Native SAVI 3

The SAVI 3 control and automation system, including Creator, Canvas, SAVI Show, Map View, Game View, and more, comes standard.

Key Specifications

- Ethernet 10/100/1000 Mbps LAN port
- Power Consumption 90W
- Power Supply 19V, 65W wall-mount AC-DC power adapter

STREAM.One 4K

Dramatically Simplified Video Distribution

STREAM.One 4K delivers next-generation video distribution providing H.265 encoding at up to 4K30 – all over a single network cable to each display. Creating a unified viewing experience, STREAM.One 4K also synchronizes a source over multiple displays, eliminating the cost and complexity of video wall design and installation.

AVoIP Distribution

Make any video source available and simplify system expansion with reliable, over the network distribution.

No Box Behind the Display

Eliminate unnecessary equipment and dramatically reduce points of failure; no box behind the display, HDMI, or IR is required.

Cost-Efficiency & Scalability

The modular design enables flexible scalability and reduces cost with up to 4 STREAM.Ones fitting in a single 1U chassis.

Native SAVI 3 Integration

Seamless integration with SAVI Link and phoenix terminal block providing de-embedded unbalanced audio.

ONLY
1 CABLE

Source Sync

Synchronizes a source over multiple displays creating a unified viewing experience.

Power Over Ethernet

PoE provides clean wiring in every rack and remote power cycle; AC/DC power supply is included.

HDMI Pass-Through

Eliminates the clutter and expense of additional cables, accessories, and external splitters.

Custom Splash Screen Image

Auto displays a custom splash screen should the video signal drop.

Front Panel Configuration

Status LEDs and front panel screen provide at-a-glance information for quick configuration and troubleshooting.

Individually Encoded Audio & Video

HDMI input encodes audio and video signals into individual PCM audio and separate H.264/H.265 streams.

Auto Discover

Automatically discovers devices and saves time in the initial setup of multiple units.

Key Specifications

- H.265 4K30
- Ethernet 10/100/1000 Mbps
- Audio 0 – 1500ms Delay for Video Sync
- PoE 5000mW
- Max 15 Mbps
- 4K main stream + 1080p secondary stream

Connect I/O

Perfect Harmony & Interoperability

Connect I/O controls virtually any non-IP-enabled device in your SAVI 3 system.

Legacy Device Control

Legacy IR and RS-232 device control via IP.

IR commands

Learn IR commands to integrate IR-enabled devices easily.

IR and RS-232 Database

Easily add devices with SAVI's vast database of IR and RS-232 codes.

Convert IR Ports

Using optional Contact Closure Sensors, convert IR ports or emitters.

Key Specifications

- 4x RS-232 modules
- 9x IR outputs
- 6x Relays
- Max voltage: 250VAC/30VDC
- 19" rack mount with included ears

Garage/Automatic
Doors

Kona

Reliable Equipment Cooling

Kona keeps all your critical gear in the rack cool, increasing the reliability and longevity of your hardware. The Kona draws in air from the front and pushes it out the back, using a pre-mounted fan core on vibration isolators for the ultimate quiet cooling experience in a 1U chassis.

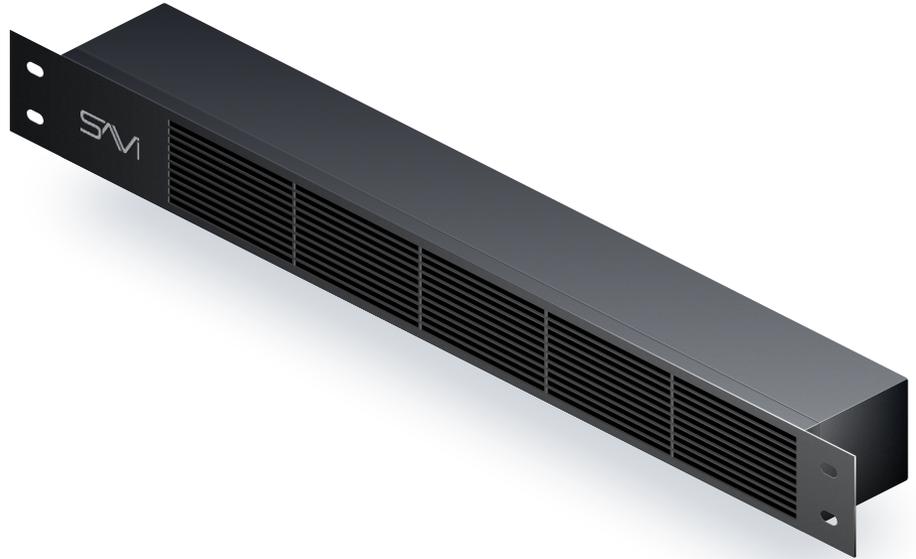

20-CFM

Provides constant, controlled airflow.

20 dBA

A quiet cooling experience.

Unprecedented HiFi-Quality Audio for Commercial Applications

SAVI Audio, featuring ICEpower® amplification modules, delivers unmatched HiFi-quality sound to commercial installations. With SAVI Audio, integrators of all skill levels can design, program, and install rich and complex audio experiences in a fraction of the time and cost. Engineered for unlimited scalability, flexible options, and seamless integration, SAVI Audio will make you forget everything you've heard before.

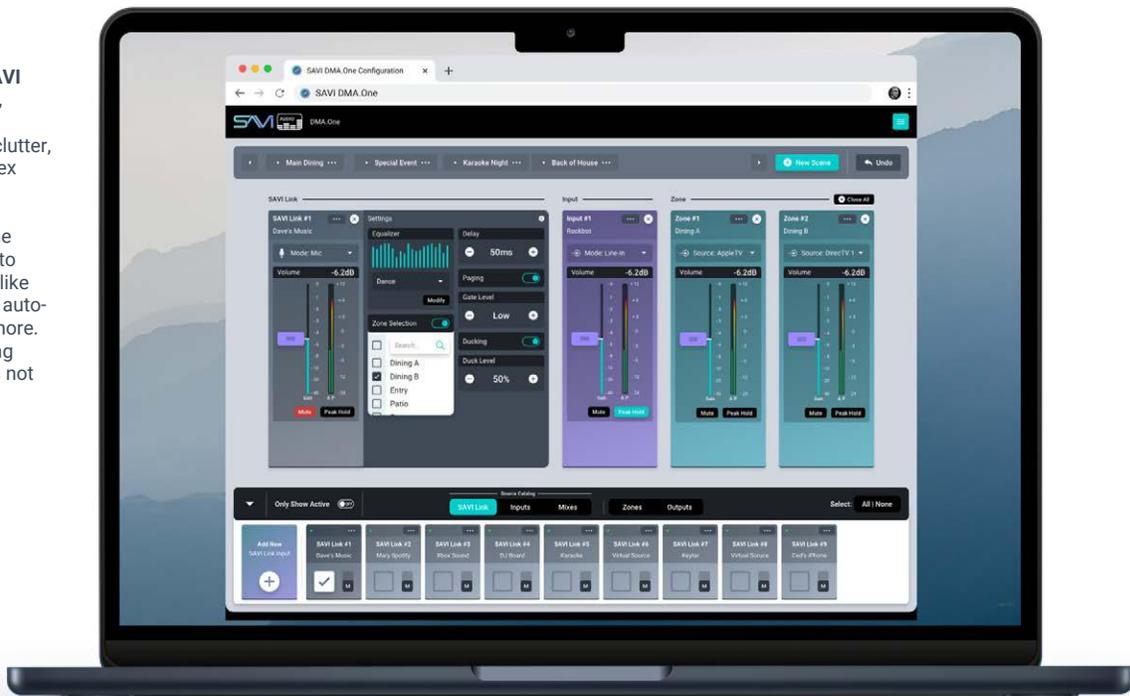

SAVI Audio User Interface

Brilliant Sound Without Complex Configuration

The wholly reimagined and revolutionary **SAVI Audio Configuration User Interface** is sleek, intuitive, and dramatically simplifies audio programming. By eliminating unnecessary clutter, techs of all levels can now configure complex audio installations in only minutes.

Customize the interface by selecting only the inputs, mixes, zones, and outputs you want to adjust or compare. Save time with features like pre-configured scenes, matrix-mode toggle, auto-discover, source renaming, SAVI Link, and more. With SAVI Audio's configuration UI, delivering high-fidelity audio to commercial projects is not only simple but remarkably cost-effective.

SAVI Link

Immersive Audio Over IP

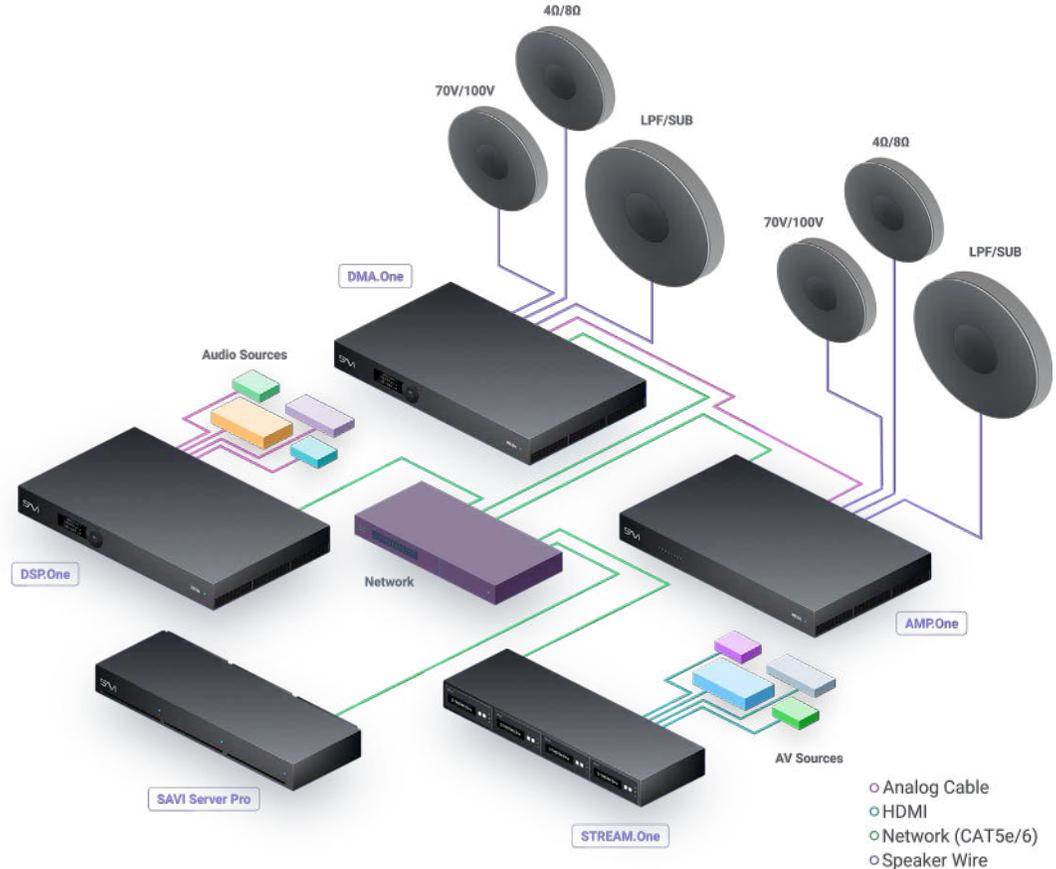

SAVI Audio features **SAVI Link**, a standards-based audio over IP system designed to eliminate license management software, simplify installation, and streamline control of AV systems for commercial venues.

SAVI Link features automatic device discovery and intuitive signal paths for interoperability with a variety of AES67 enabled devices. Combine unlimited sources over the network and leave your interconnects in the truck.

Convert Physical Sources to Virtual Sources

SAVI Link converts physical sources to virtual sources, making them available to the DSP.One and DMA.One over the network.

DSP.One

Unlimited Scalability & Reduced Cost

As the core of every SAVI Audio system, the versatile **DSP.One** simplifies system configuration, installation, and expansion with no licensing or additional software required. DSP.One is feature-rich, housing signal processing, a matrix mixer, physical 16 x 16 I/O, zone paging, eight microphone inputs, and an intuitive UI, enabling integrators of all skill levels to deliver complex audio experiences in a fraction of the time and cost.

Front Panel Configuration

The front screen and status LEDs provide at-a-glance information, troubleshooting, and quick configuration.

Harmonious Integration

Simplified over the network integration to work in harmony with STREAM.One.

Avoid Extra Licensing Fees

Connect multiple DSPs and add unlimited virtual inputs while avoiding additional commercial licensing fees.

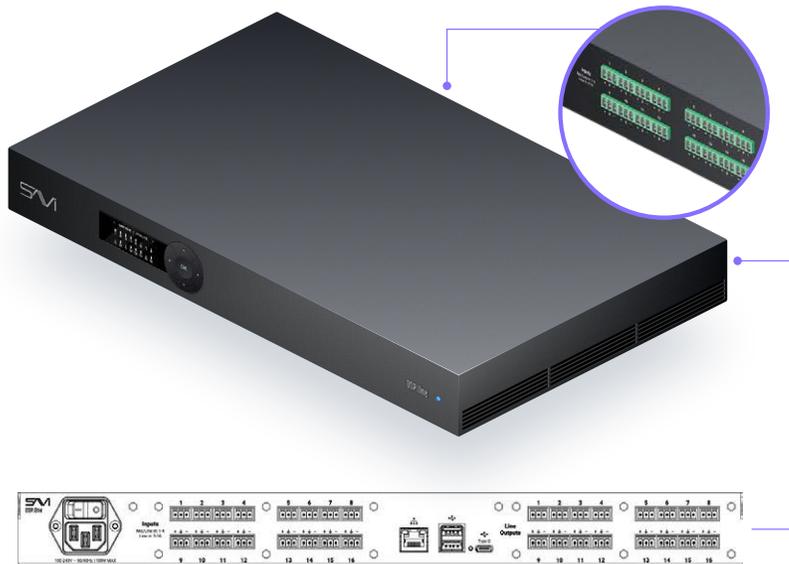

No Mixer or Additional Hardware Required

Supports up to 16 mixes with any combination of sources, including SAVI Link, inputs, and mics.

SAVI Link

Standards-based audio over IP system that combines all sources over the network, simplifying installation and eliminating license management.

Key Specifications

- 16 inputs and outputs
- 8 configurable mics
- 3-pos 3.5mm euroblock
- 10 Band Parametric EQ
- SAVI Link channels AES67, SDP, RTP, UDP, or RTSP

* Some features & specifications subject to change.

AMP.One

Unmatched Power

With unmatched power in a minimalist design, **AMP.One** offers 2400 watts of ICEpower®, delivering rich audio in a sleek 1U chassis. AMP.One is multi-functional with automatic health monitoring, bridgeable power provisioning, and the versatility to manage a variety of use cases, including 8Ω, 4Ω, 70V, and 100V.

Time-Efficient Installation

Designed to eliminate unnecessary devices and wires in a project while reducing installation time and inventory challenges.

ICEpower® Modules

Eight zones of flexible amplification ICEpower® modules to provide a solution entirely unique for 70V audio amps.

Remote, Smart Control

Over the network volume control and health status monitoring for convenient device management.

8Ω, 4Ω, 70V, and 100V

Engineered to manage a variety of use cases for multi-functional versatility.

Bridgeable Power Provisioning

2400 configurable watts in a convenient 1U design.

Any Speaker, Any Time

Selectable stereo or mono output per zone ensures AMP.One works with virtually any speaker.

Automatic Health Monitoring

Self-sensing temperature control provides automatic cooling when needed.

Compatible with

4Ω/8Ω 70V/100V LPF/SUB

Key Specifications*

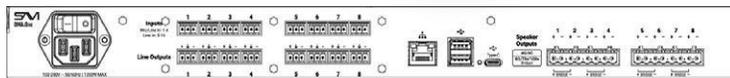

- 150-watt x 8ch @ 8Ω
- 300-watt x 8ch @ 4Ω
- 600-watt x 4ch @ 8Ω (bridged)
- 600-watt x 4ch @ 70/100V (bridged)

* Some features & specifications subject to change.

DMA.One

High-Fidelity & Endless Versatility

DMA.One combines all the features and versatility of DSP.One and AMP.One with ICEpower® module amplification outputs and 2400 watts in an industry-first 1U chassis.

No External Mixer Required

Supports up to 16 mixes with any combination of sources, including SAVI Link, inputs, and mics.

ICEpower Modules®

Eight zones of flexible amplification ICEpower® modules to provide a solution entirely unique for 70V audio amps.

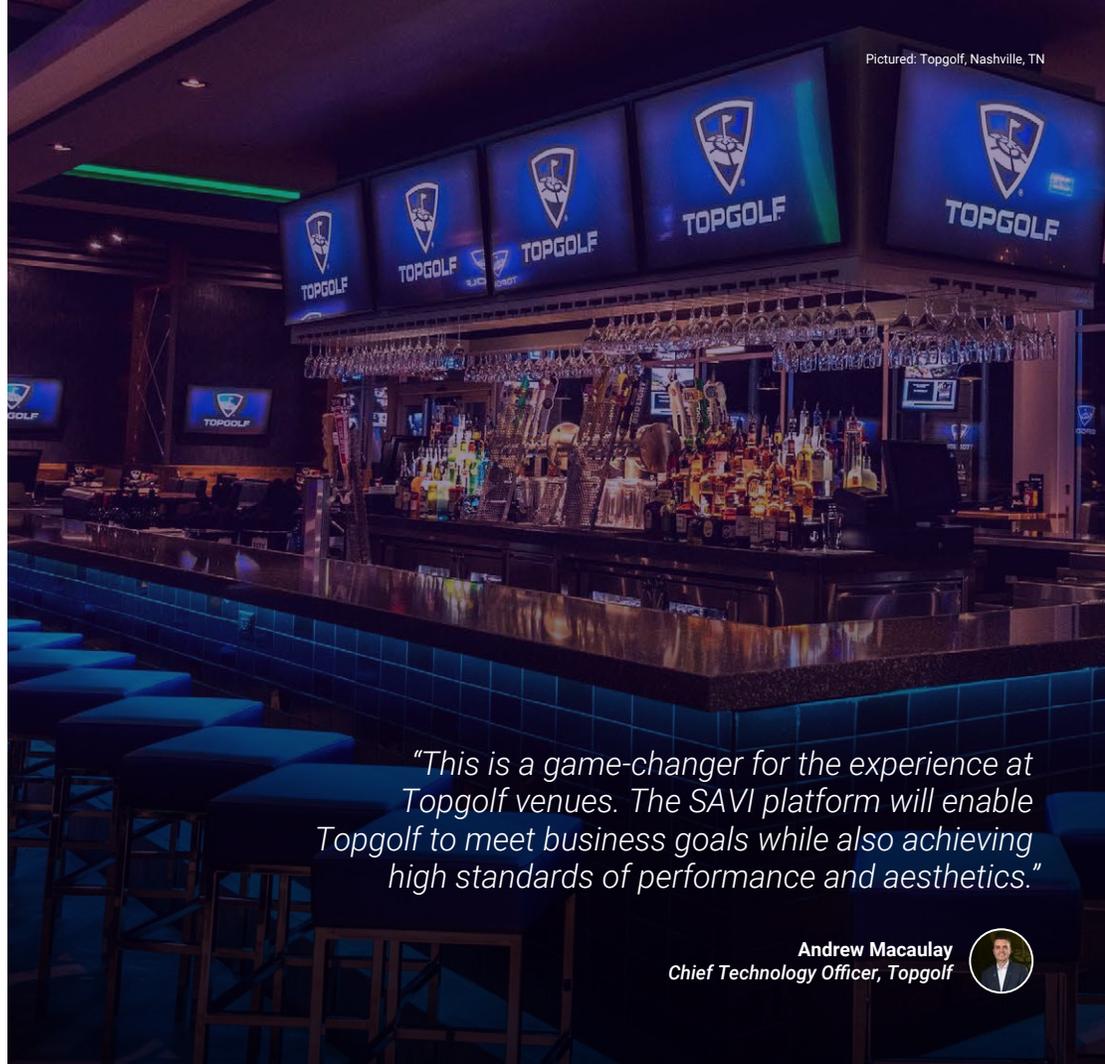

Versatile Analog and IP Audio Distribution

Delivers widespread pro audio distribution over a single network cable, making configuration simple and quick for a variety of applications from MDF to IDF and campus installations.

2400 Configurable Watts in 1U

Featuring 2400 watts with 8-line level analog inputs/outputs, four microphone pre-amps, and eight amplified output channels in an industry-first 1U chassis. For 4Ω/8Ω and 70V/ 100V installations.

Compatible with

4Ω/8Ω 70V/100V LPF/SUB

Key Specifications*

- 150-watt x 8ch @ 8Ω
- 300-watt x 8ch @ 4Ω
- 600-watt x 4ch @ 8Ω (bridged)
- 600-watt x 4ch @ 70/100V (bridged)

* Some features & specifications subject to change.

“This is a game-changer for the experience at Topgolf venues. The SAVI platform will enable Topgolf to meet business goals while also achieving high standards of performance and aesthetics.”

Andrew Macaulay
Chief Technology Officer, Topgolf

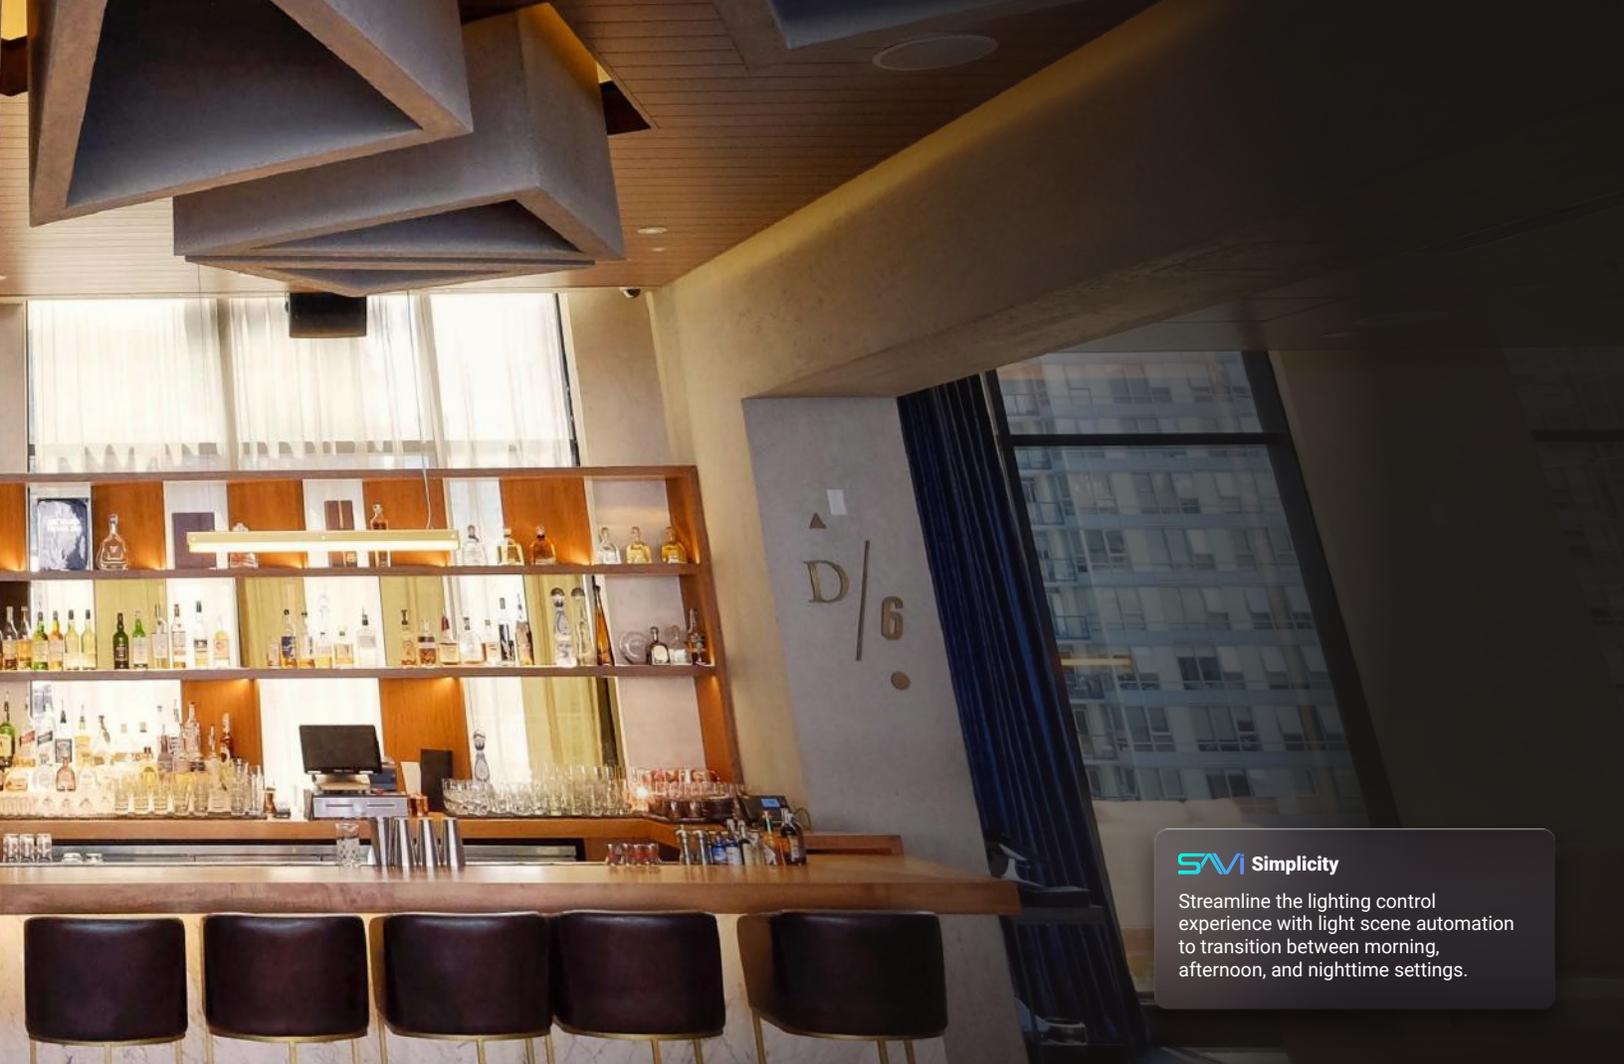

Simply Brilliant Lighting Solutions

The **QoraLux Lighting Series** is more than just a lighting solution; it's a revolutionary step forward in commercial lighting. Embracing both high-voltage and low-voltage applications, QoraLux simplifies the traditionally complex nature of lighting integration by eliminating the over-complicated project specification, time-intensive programming, and cumbersome installation.

With QoraLux, you get the freedom and flexibility to transform any commercial space into a brilliant and engaging lighting experience.

SVM Simplicity

Streamline the lighting control experience with light scene automation to transition between morning, afternoon, and nighttime settings.

QoraLux High-Voltage Series

Effortless Lighting Integration

QoraLux High-Voltage Control Series dramatically simplifies traditionally complex commercial lighting integration, offering the efficiency of decora-style lighting with over-the-network control for 277V applications.

Tailored for both new construction and retrofits, the series boasts rapid installation and commissioning, allowing integrators to create advanced high-voltage lighting control systems in a fraction of the time and cost.

Commercial-Rated Configurable Control

Integrate, control, and automate a range of devices to fit 120VAC, 277VAC, or PoE without complicated hardware, panels, or devices to install.

Cost-Effective, Time Efficient

Deliver optimized control to end-users in less time and at a lower cost than leading competitors.

Compatibility Database

Dealers can submit products for meticulous testing and optimized dimming profiles to the ever-expanding QoraLux-compatible light bulbs and fixtures database.

Best-in-Class Dimming

Designed to provide elegant dimming control for a variety of applications, including 0-10V enabled fixtures, incandescent, LED, or CFL bulbs, and low-voltage LED lights, strips, or halogen lamps.

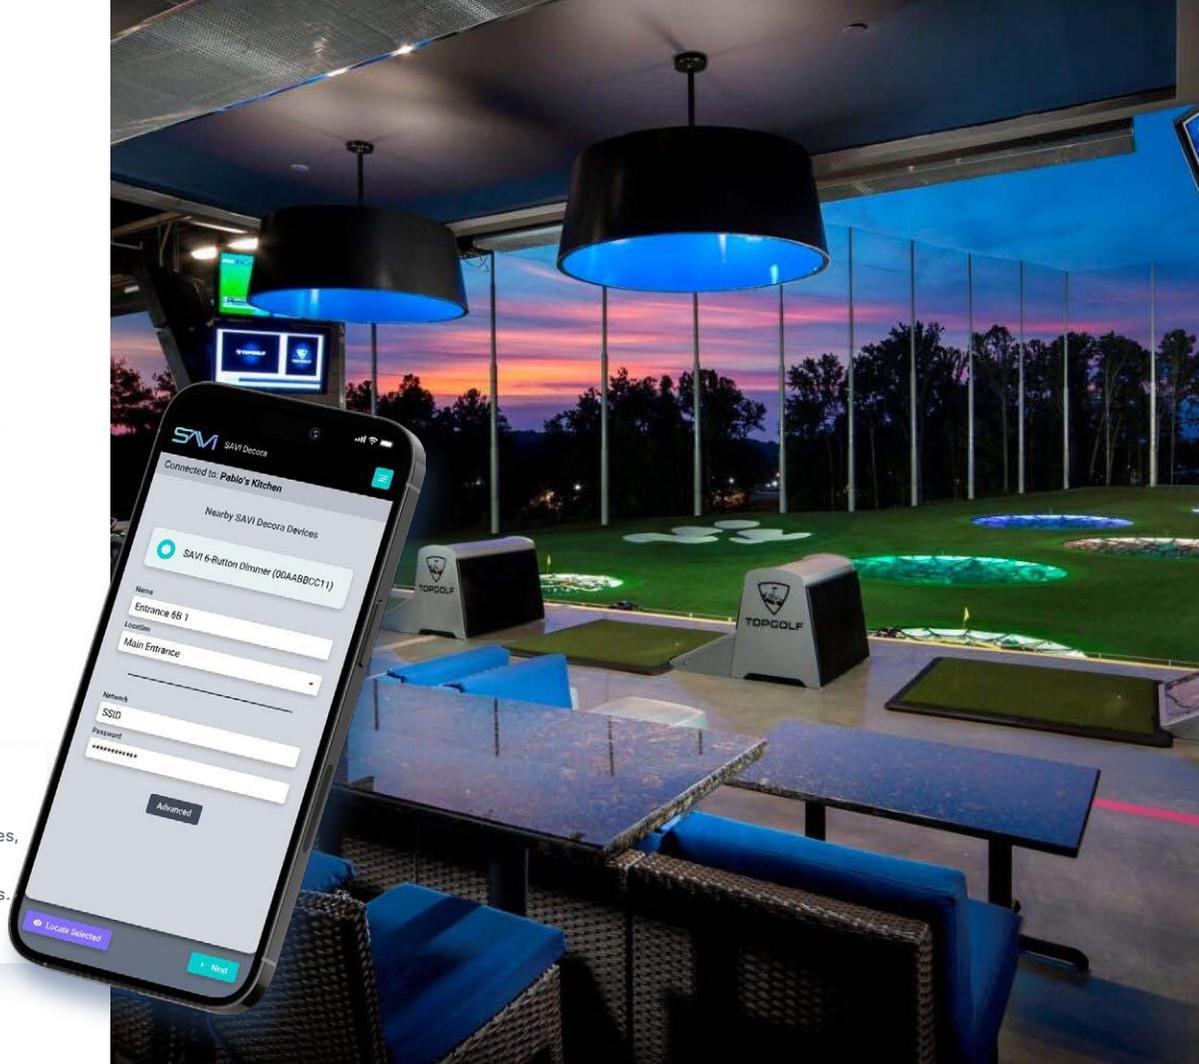

Industry-Standard, Decora-Style

A suite of decora-style keypads, switches, dimmers, and outlets with convenient screw terminals designed for easy installation in standard gang J-boxes.

SAVI Utility App

Effortlessly provision QoraLux switches, dimmers, outlets, and keypads while assigning load names with physical loads on both iOS and Android devices.

QoraLux Low-Voltage Series

Find Your Best Light

Step into the future of lighting with the **SAVI QoraLux Low-Voltage Series** – a new beacon of modern lighting in commercial spaces. Offering a blend of intuitive control, effortless management, and budget-friendly solutions, the series is an AV integrator's gateway to crafting vibrant, dynamic, and cost-efficient lightscapes that captivate and inspire, all while significantly lowering the cost for business owners.

Intuitive Lighting Control

End-users can effortlessly manage their lighting experience with ease by creating custom lighting scenes, setting schedules, and changing lights from a phone, tablet, or computer.

Revenue Generating

Low-voltage lighting solutions open new business avenues for commercial AV integrators, enhancing service portfolio and boosting sales.

Energy-Efficient Design

Rather than converting power from AC to DC at every fixture, QoraLux uses low-voltage power distribution, reducing consumption for compounded energy savings.

Cost-Effective

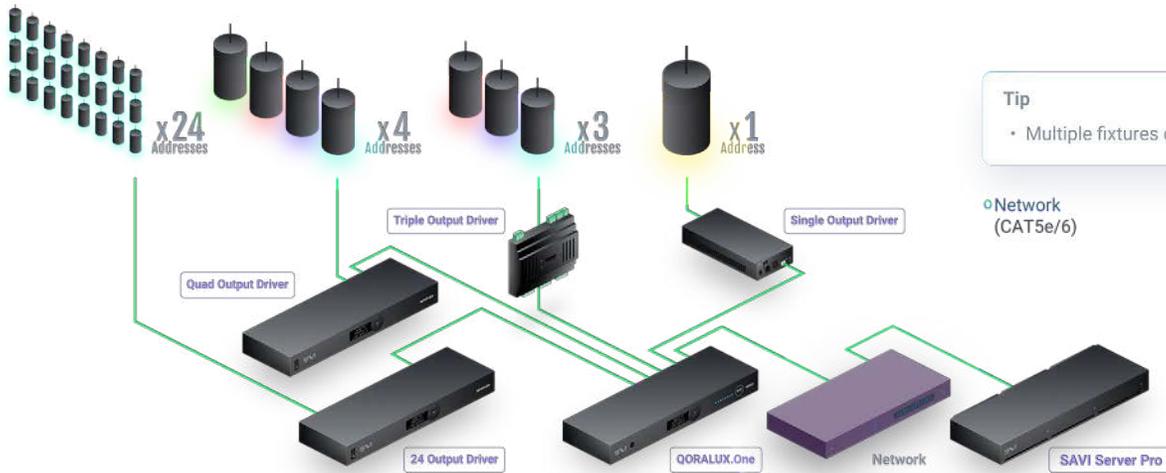

Streamlined installation with fewer circuits, less wire, and reduced labor makes QoraLux Low-Voltage one of the most cost-effective lighting solutions on the market.

Customizable Wellness Control

Unlike traditional high-voltage, QoraLux fixtures' adjustable colors and intensities are designed to improve well-being, heighten alertness, and support natural circadian rhythms, creating healthier work environments.

Tip

- Multiple fixtures can share a single address.

o Network (CAT5e/6)

Intelligent Power Distribution
 1, 3, 4, or 24 output drivers deliver an all-in-one intelligent power solution.

Driverless Fixtures
 By removing the onboard drivers, QoraLux eliminates the #1 source of fixture failures.

Dual Functionality
 Offering tunable white or full spectrum color, QoraLux Fixtures are engineered to meet any design style and specification with a single product.

Comprehensive, Centralized Management
 The era of complicated, disjointed systems with cumbersome interfaces is over – manage all lighting, audio, video, and more within one integrated platform.

Dynamic, Human-Centric Lightscares
 From a productive, cool white light to energizing brand colors, the full-color, tunable fixtures allow you to curate spaces that adapt to every moment and mood.

New Construction or Retros
 Enjoy dramatic upfront cost savings while creating stunning new venues or updating existing spaces within any budget.

SAVI Glass

Reflect Your Style

SAVI Glass enables dealers to create modern and engaging end-user control experiences for TOUCHPAD, One, tablets, and more. It's now easier than ever to develop specific UIs for a single device, room views, or multiple locations through a new level of simplified customization. Unlike anything on the market, SAVI Glass requires zero coding and offers a drag-and-drop widget grid system, empowering dealers to design technically sophisticated and visually stunning control for an unparalleled end-user experience.

Programming: No-Code Customization

Preview Mode

Enables instant visualization of the end-user interface during the build process in Creator.

Native Rockbot Integration

Displays album art, playlists, upcoming tracks, and more with a natively integrated widget.

SAVI 3 Features

Leverage features like Game View, Now Playing, Previewer, two-way feedback, source metadata, and more.

Code-free UI Configuration

A no-code, drag-and-drop grid system that creates a customizable and technically complex control experience in minutes.

Macro Toggles

Combines two separate macros within a single widget, simplifying complex command sequences and automatically updating the user interface upon execution.

Dynamic Widgets

Features real-time status feedback and adjustable widget size for optimal information visibility, accessibility, and precise placement.

UI: Where Beauty Meets Function

Modern UI

Prioritizes modern design principles, offering endless customization capabilities while automatically creating an intuitive and visually stunning interface.

Effortless Organization

Simplifies the organization of controls through widget folders and multipage accessibility, enabling easy navigation and a clean interface even as functionalities expand.

Control Everything

Offers extensive control over audio, video, content, lighting, shades, HVAC, macros, and more, in a stylish view without technical constraints.

New Branding Capabilities

Allows you to create a custom UI with preloaded graphics, pre-designed elements, or custom uploads for idle screens, welcome screens, icons or backgrounds, for a truly branded experience.

TOUCHPAD.One

One Touch is All it Takes

TOUCHPAD.One sets a new standard for modern in-room control featuring a sleek, capacitive touchscreen and visually stunning UI. Perfect for bars and restaurants, suites, event spaces, and conference rooms, TOUCHPAD.One gives end users a whole new way to interact with their SAVI system.

Proximity Sensing

Employs proximity sensing, entering sleep mode after five minutes of inactivity and reactivating when a user approaches.

Power Over Ethernet

Powered and controlled via a single network cable, streamlining installation by eliminating the need for secondary wiring.

Native SAVI 3 Integration

Powered by the SAVI 3 system and includes native programming features like auto-configured location-based device control.

Full-HD Capacitive Touchscreen

Engineered for sleek responsiveness, featuring a 5.5 high-definition capacitive touchscreen and Corning Gorilla Glass to deliver a crystal-clear display built to last.

SAVI Glass comes standard with TOUCHPAD.One.

Flexible Mounting

Compatible with both standard Decora-style and SAVI back boxes, fitting any installation and mounting requirements.

Access Control

Enhances security and device management with auto-lock timers, idle screen settings, and passcode protection.

A high-angle, wide shot of a large arena filled with spectators. The arena is brightly lit, with a basketball court visible in the foreground. The stands are packed with people, and the atmosphere is vibrant. The lighting is a mix of warm and cool tones, creating a dynamic scene. The text is overlaid on the left side of the image.

One Solution for Every Market

SAVI 3 is the only simple solution in the AV market powerful enough to create extraordinary experiences for any application. Thousands of integrators, brands, end-users, and their customers have already experienced the extraordinary – have you?

Final Exam: All students build a functional casino system, complete with displays, signage, audio zones, and lighting.

"Man, I can't speak highly enough on this training. It was super cool, and very informative. My favorite part was feeling like a master programmer."

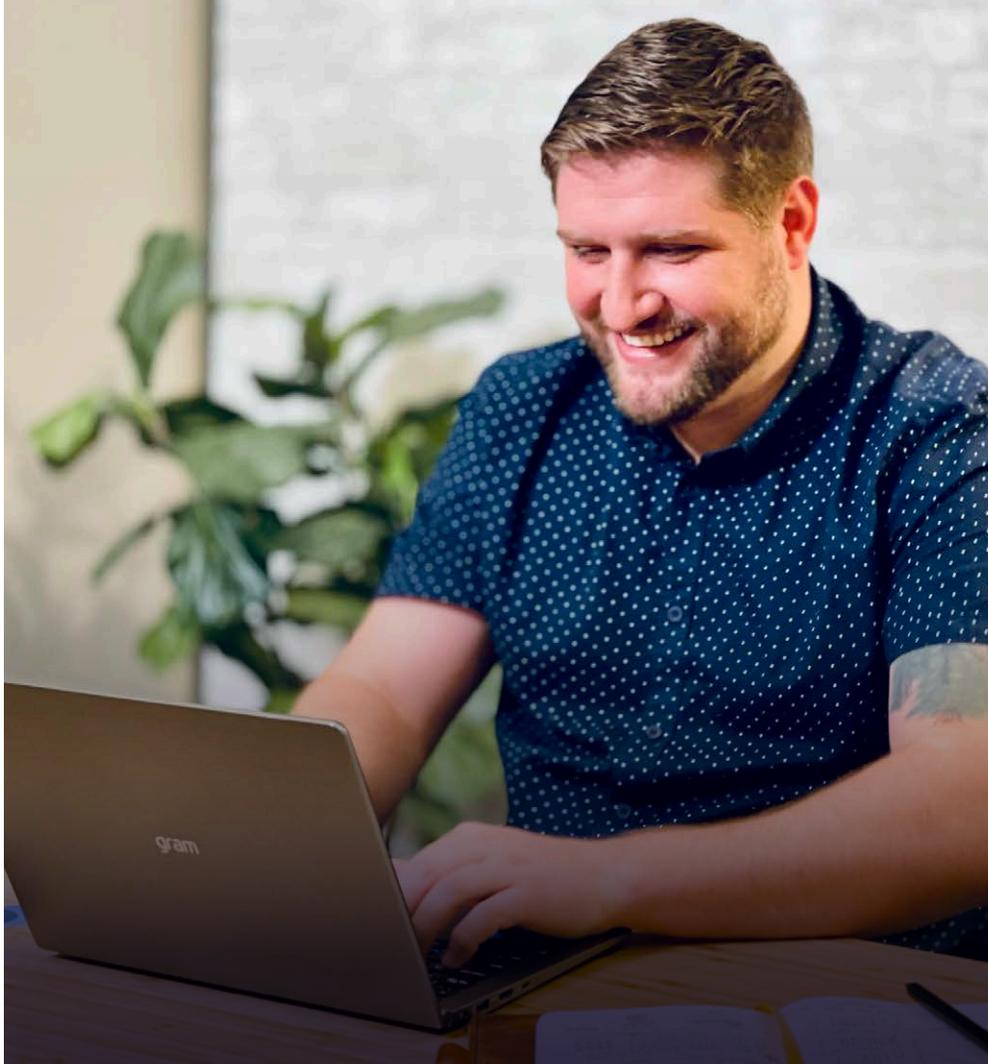

Paul Simpson
Domes Audio Video Environments

"This has been the best training class I have taken. I appreciate the amount of material covered, it really made the information sink in being able to run so many drills with the equipment."

Sam Welchel
Ford Audio-Video

"This was the best product training I have ever done, hands down. I can honestly say, I'd buy this product, not just because it's powerful and well designed, but because I know I can use it."

Anthony Nardini
All Tech Integration

About SAVI

Our story is one of transformation — not just of spaces but of experiences.

As former commercial AV integrators, we spent years in the industry frustrated by overly complicated and ridiculously expensive solutions. We weren't alone—integrators and business owners alike were growing tired of the traditional AV experience: the time-consuming programming and installs, endless points of failure, complex interfaces, and premium prices for systems that were just too complicated to use. That changed in 2010.

With the conviction that all commercial environments deserve the extraordinary, we started SAVI. Our customer-focused company is on a mission to shatter the traditional barriers of entry and transform every commercial space into a testament of innovation and simplicity, where our technology enhances every interaction and every experience.

From system architecture and hardware design to programming and end-user training, we believe there's an elegance to simplicity. So, we spent the next decade listening, engineering, and testing our platform, never settling for "the way it's always been done," to develop a solution that's as powerful as it is easy to use.

In 2020, we launched SAVI 3, the only all-in-one commercial AV control, automation, and management solution that's simple enough to program in hours, intuitive enough to learn in seconds, and powerful enough to turn every experience within your space into an extraordinary one.

With SAVI 3, we've revolutionized commercial AV. **And we're just getting started.**

“With SAVI, dealers can offer powerful solutions to their customers without compromising time, cost, or quality. We’re committed to delivering extraordinary AV experiences with groundbreaking simplicity, so you can focus your energy where it’s needed most: growing a thriving business.”

John Dorsey
