MASTER KEYED SUITES

One of the many services we provide via our dedicated workshop is the ability to supply 'Master Suited' lock systems using our Maxus Pro (MX26) range of cylinders.

Each suite is pinned/keyed up 'In-House' by our dedicated locksmith team using quality, dual finish, security cylinders. Thereby, ensuring not only a quality product but also a quick lead time.

Whether it is a small, straight forward 'Master Suite' or a complex, multi-level system. You can rely on our specialist team to provide a seamless, hassle free service from beginning to end.

For more information please contact our Sales Team (sales@jma-uk.co.uk).

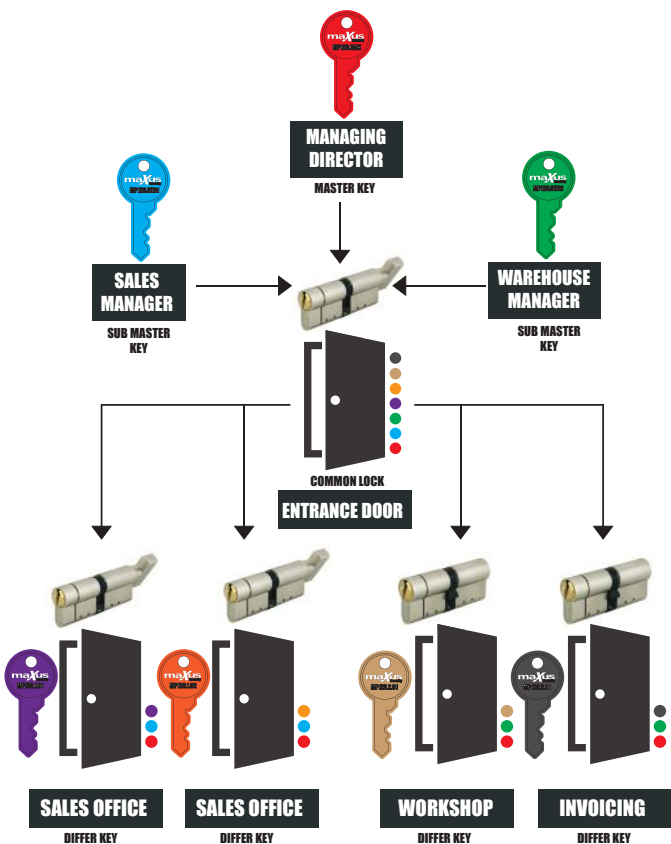

Guide to a Master Key Suite

What is a Master Key Suite?

A Master Key Suite allows each lock to have its own individual key which will not operate any other lock; however, each lock also forms part of a larger set allowing them to be operated by a single key – the master key.

What are the benefits?

It controls security within one or more buildings as it gives designated individuals access to specific parts of a building. It also offers more convenience as individuals can have access using one key.
