AUTONOMOUS SURFACE VESSELS

Ran Marine

RANMARINE

RanMarine Technology is a cleantech company that designs, manufactures, and distributes emission-free autonomous surface vessels like WasteShark, MegaShark, and OilShark. These ASVs remove plastic, algae, waste, and oil while gathering critical water-quality data for clients

BATTERY (CELLS AND BATTERIES)

Elerix Cells And Batteries

ELERIX may sound as a fresh new brand, and actually it is, however there is a decade long experience in doing business with a number of battery cell manufacturers, of product design and active sales to entities of different size and scope.

Behind the brand stands a team of experts from various fields of business and industry. **ELERIX** was created with the aim of having a range of products that we, ourselves, believe in.

All **ELERIX** batteries are manufactured in renowned factories in China, owned by Foxconn (which also makes iPhones for Apple) and Tsingshan Group, China's largest metals company. BMS is designed and manufactured exclusively in the EU.
