About us.

Bloomdale Eyewear is a successful and trendy Dutch Eyewear label founded in 2015. Our designs stands for cheerful and trendy colors, original shapes and fine details. Bloomdale design a broad, colorful, and original collection of eyewear. Glasses that are wearable by a wide audience, but also just that little bit different.

Our models are made of high quality and light materials, which ensures comfortable and long wearing pleasure. For example, we mainly use Mazzucchelli acetate from Italy, Japanese stainless steel with a nickel-free coating and soft silicone nose pads from Germany.

Enjoy!

This modern pantos shape with a youthful spirit is defined by an easy-to-wear concept. The sculpted profiles make a clear architectural reference through the mix of acetates and light metal temples.
