Channel Manager

Our Channel Manager connects you seamlessly and instantly to all your preferred channels- Online Travel Agents, GDSs, Meta Search Sites and more.

It ensures that your rates and inventory are instantly and continuously synced to all connected channels, avoiding overbooking and rate parity issues.

All bookings are automatically dropped to Jupiter. The efficient Channel Manager not only guarantees accuracy but saves the precious time of front desk staff and revenue managers.

If you are already connected with any other channel manager, we would integrate with them for impeccable operations of your inventory distribution and reservations.

Drive the engine of your progress and prosperity, with us.

Booking Engine

In today's competitive hospitality scenario, it is imperative to cater to potential customers who browse through your site or social media page. You must be ready to expand your hospitality experience online, with an effective Booking Engine.

Jupiter's mobile friendly, integrated Booking Engine widget helps you capture direct bookings as people browse your property, explore options, check rates and availability and proceed to book. As they complete payment, they receive a confirmation instantly.

Ours is a responsive engine that minimizes your staff's workload and maximizes your revenue, in just a click.
It is time to focus on customer centric approach, grow your business and reap rich rewards. Leave the rest to Jupiter.

A Value Addition
Free Website Creation

Our team is equipped to create an attractive, well designed website for you and integrate your booking engine with it. That too for free!

Why wait then? Start your journey today with Jupiter.

Lead your quest for the best, with us.
RateQuest

RateQuest is a dedicated platform specially designed to maximize your reach and empower your online branding. This intuitive software manages the rate parity across all available channels and notifies you when you are out of parity.

RateQuest enables you to track your competitor's pricing and ensure optimum revenue. It also provides precise real time reports with the convenience of rescheduling them. It is a highly secured feed system to access the data in multiple formats such as HTML, XML, CSV, PDF, JSON etc.

RateQuest Highlights

- A sophisticated, user-friendly, Interactive Dashboard with real time intelligence data
- Detailed Reporting including property performance and growth analysis, strategy forecast, performance evaluation and history reports
- Out of Parity Notifications for prompt action, OTA partnership evaluation and relationship strengthening
- Real time Alerts, Event Pricing Strategies, Inventory Planning
- Reviewing OTA Ranking and Score, Comparison with competitors reviews
- Real Time Reports in multiple formats, such as XML, CSV, PDF, JSON formats with email scheduling feature
- Highly secured Feed System for easy and quick third party integration

Reap the rewards of efficiency,
with us.
