

Is your baby fully protected?

Check your child's immunisation status today...

At Primary Care Knowsley, we are committed to supporting your child's health and wellbeing by offering a comprehensive childhood immunisation schedule. Childhood immunisations are available at all 11 of our locations for registered patients.

Why Are Childhood Immunisations Important?

Immunising your child is one of the most effective ways to protect them from serious illness and disease. Vaccines help to strengthen your child's immune system and prevent a range of potentially life-threatening conditions, such as meningitis, measles, and whooping cough. By immunising, you not only protect your child but also contribute to the protection of the wider community, especially those who may be more vulnerable.

The Childhood Immunisation Schedule

Our immunisation programme follows the NHS-recommended schedule, which includes key vaccines at various stages of your child's development:

8, 12, and 16 Weeks:

- 6-in-1 Vaccine (DTaP/IPV/Hib/HepB)
- Rotavirus Vaccine
- Meningitis B Vaccine
- Pneumococcal Vaccine (PCV)

1 Year:

- Hib/MenC Booster
- MMR (Measles, Mumps, Rubella)
- MenB Booster
- PCV Booster

3 Years 4 Months (Pre-school Booster):

- 4-in-1 Booster (DTaP/IPV)
- Second Dose of MMR

Not a Primary Care Knowsley Patient?

If you are not a patient with Primary Care Knowsley, please check with your current GP surgery to find out which childhood immunisations are available to you. Each GP practice offers different services, so it's important to confirm the details with them.

Join Primary Care Knowsley

We are always happy to welcome new patients! You can easily register with us by clicking the button on the right, or via the NHS App.
