Did you know...

Natural light isn't always enough for healthy plant growth – especially during colder months, when the days are shorter, and sunlight is scarce. That's when our **specialized lighting** can help your indoor plants thrive!

What is PPF?

The performance of plant lights is not measured in lumens but in **PPF (Photosynthetic Photon Flux)**, which indicates how much plant-usable light the lamp emits. The **more μmol/s, the better** for your plants!

Special light spectrum

Not all light affects plants in the same way. Our lamps offer a specialized spectrum that **supports every stage of growth!**

BLUE LIGHT
strengthens leaves
and promotes
compact seedlings

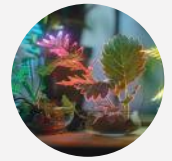

RED LIGHT
encourages
flowering and
fruiting

GREEN LIGHT
mimics natural
sunlight

FAR RED LIGHT
with blue light
supports roots and
blooming

UV & INFRARED
boosts overall
plant health and
metabolism

*Light dosing
is also a thing*

Too much or too little light can harm your plants. That's why our lamps feature **built-in timers** to keep their light cycle just right.
