➤ IMPORTANT INFORMATION

Specifications, information and products featured in this catalogue are subject to change.

Contact us for up to date information.

Products displayed are not actual size and the logos used are for reference only to illustrate branding options. They are the property of their owners and represent no endorsement of this brochure or its content.

Product colours illustrated are matched as closely as the print process will allow and should be considered to be approximate.

Actual product colours can also vary from shipment to shipment and this is beyond our control. Always ask to see a sample to ensure the product colour and the product itself are suitable for the intended purpose as we do not accept returns due to minor colour variations or the product being deemed unsuitable once it is delivered.

REUSABLE COFFEE CUPS

for positive and practical promotion

It is estimated that Australia and New Zealand use over 1.2 billion disposable coffee cups each year. The demand for alternatives to single-use cups has meant that thousands of cafes, businesses and individuals are making the move to reusable coffee cups.

This makes them an increasingly popular promotional item and a practical way for brands to send a positive message.

COFFEE CUP CONSTRUCTION

choosing the right cup for your promotion

SINGLE WALL

Single wall cups are an affordable, lightweight and compact coffee cup option. A heat-resistant silicone or cork band ensures the cup is comfortable to hold and provides a perfect branding opportunity.

DOUBLE WALL

Coffee cups with double wall construction are an economical way to insulate your beverage. The cup is designed to trap air between an internal and external wall. Air has excellent insulation properties and reduces the rate of temperature change. The outside of the cup remains comfortable to hold, and there is no messy condensation from cold drinks.

VACUUM INSULATED

When it comes to maintaining drink temperatures, it's hard to beat a vacuum insulated cup. These cups have the same construction as double walled cups, but the air is removed between the two walls to create a vacuum. A vacuum reduces the rate of temperature change significantly, keeping the outside of the cup cool and preventing messy condensation from cold drinks.

BRANDING OPTIONS

Pad Print

Pad Printing uses a silicone pad to transfer an image to a product from a laser etched printing plate. It is one of the most popular, fast and affordable ways of branding products due to its ability to reproduce images on uneven or curved products and print multiple colours.

Screen Print

Screen printing is achieved by forcing ink through a fine mesh screen onto the product and is ideal for cylindrical objects. This branding is perfect for larger branding areas and for bold, colourful artwork, letting your brand shine through.

Laser Engraving

Laser engraving uses a laser to etch artwork into a product permanently. Different materials produce different effects when engraved, such as shiny steel, natural etch or mirror finishes. Laser engraving is a stylish way to elevate and add value to your brand.

BRANDING OPTIONS

Silicone Debossing

Debossing makes an impression of the artwork into the product. The brand becomes part of the product, permanent and dishwasher safe, keeping your brand in the public arena for longer. This is a sophisticated way to present your brand and has a higher perceived value than other forms of branding.

Silicone Digital Print

Silicone Digital Print is the pinnacle of branding on silicone, allowing for vibrant, full colour, high resolution artwork. Large print areas allow for maximum branding opportunities, and the finished prints are vivid, eye-catching and durable.

Sublimation Print

For this process, sublimation ink is printed onto transfer paper and heat pressed onto the product. Sublimation ink is a dye, so the product has no ink build-up, and the brand becomes part of the product. This branding method is perfect for producing full colour wrap around prints that really stand out.

Choose any colour combination from the standard colours at no extra cost.

Express Cup Claritas - 350ml

115012

- Crystal-clear 350ml BPA-free cup
- AS plastic cup and polypropylene lid
