What apprenticeships are available?

Apprenticeship Standards have been developed by employer groups representing every sector of the economy. These standards specify the skills, knowledge and behaviours required for an apprentice to become competent in a wide range of specific occupations, at all levels.

The full range of apprenticeships can be found on the Institute for Apprenticeships and Technical Education's website by scanning the QR code.

What levels of apprenticeship are available?

There are three levels of apprenticeships available for those aged 16 and over, dependent on the level and responsibility of the job role.

Level 2 Apprenticeships (Equivalent to five good GCSE passes)

These involve the development and assessment of skills and knowledge at Level 2 (relevant to the occupational sector or job role), and as defined by the Apprenticeship Standard. Achievement of a Level 2 apprenticeship may allow progression to Level 3. To start a Level 2 apprenticeship, you should ideally have 5 GCSEs (grade E/grade 2 or above).

Level 3 Apprenticeships (Equivalent to two A Level passes)

These involve the development and assessment of skills and knowledge at Level 3 (relevant to the occupational sector or job role), and as defined by the Apprenticeship Standard. Achievement of a Level 3 apprenticeship may allow progression onto a higher or degree apprenticeship. To start a Level 3 apprenticeship, you should ideally have 5 good GCSEs (grade C/grade 4 or above) or have completed a Level 2 apprenticeship.

Higher & Degree Apprenticeships

These involve the development and assessment of skills and knowledge at Level 4 or above (relevant to the occupational sector or job role), and as defined by the Apprenticeship Standard. Higher apprenticeships at Level 4 and 5 can allow progression on to university degrees, and degree apprenticeships are also now becoming available in most sectors. To start a higher or degree apprenticeship, you should ideally have a relevant Level 3 vocational qualification, three good A Levels or have completed a relevant Level 3 apprenticeship.

What is an Apprenticeship Standard?

New Apprenticeship standards have been introduced to replace the older Apprenticeship Frameworks. Each standard defines the skills, knowledge and behaviours required for that particular job role or occupation, and each is accompanied by an assessment plan, which details how you will be assessed against the standard.

All standards will contain the following:

Skills and competencies

The range of skills and competencies that you need to practise and acquire in order to do the job to a specified standard. These skills are largely acquired and practised in the workplace and the College will allocate an assessor who has the relevant industry experience and background to carry out formal or informal assessment of your skills and provide you with feedback.

Behaviours

The standard will define the behaviours that you will need to demonstrate to become occupationally competent. This may include good attendance and punctuality, good communication, problem solving, customer service skills, etc.

Knowledge and understanding

The standard will define the knowledge and understanding you will need to acquire and apply to carry out your role effectively and become occupationally competent.

How long is an Apprenticeship?

The minimum length of an apprenticeship is 12 months, but some will be designed to last two, three or four years. This will depend on the Apprenticeship Standard being followed, the level of apprenticeship, the specific occupational area/sector and your prior skill levels and achievements.

Maths and English

All standards require you to achieve qualifications in English and maths prior to the end of your apprenticeship, and these will normally be Functional Skills qualifications.

Apprentices without prior qualifications in English and maths at Level 2 (e.g. GCSEs at grade C/grade 4 or above) will be required to study these subjects as part of their apprenticeship.

English and maths Functional Skills are practical, applied literacy and numeracy qualifications, relevant to both young people and adult learners. They will help you to develop and apply important skills such as communication, analytical and presentational skills.

Functional Skills are assessed by examination and normally require you to attend the college or online, for half a day each week, per subject, until such time as you have passed. Regular test windows are available throughout the academic year.

End point assessment

Each standard has a detailed assessment plan that sets out how you are going to be assessed against each of the above elements of your apprenticeship.

Some standards may require the achievement of formal and recognised qualifications as part of the standard. Others may require you to pass formal skills and knowledge assessments at certain points in your apprenticeship before you can move on to the next stage, and are known as gateway assessments.

The range and type of assessment methods vary significantly, but all standards will contain an End Point Assessment. This takes place at the end of the apprenticeship and is designed to assess the apprentice against all elements of the apprenticeship, including skills, knowledge and behaviours. The End Point Assessment is carried out by an independent End Point Assessment Organisation, and is usually spread out over a number of days. You will need to pass the End Point Assessment in order to become a fully qualified apprentice.

The assessment methods employed to assess you throughout and/or at the end of your apprenticeship could be one or more of the following:

- Portfolio/logbook
- Observations
- Presentations
- Assignments
- Projects
- Practical tests/assessments
- Written or online knowledge tests
- Interview/viva/professional discussion

Let's get STARTED

How do I become an apprentice?

Before you start an apprenticeship, you'll need to be in suitable employment (or have an offer of suitable employment).

Many apprenticeship vacancies are advertised on the HLNSC and County Training websites or through the government's "Find an apprenticeship" site.

A health & safety risk assessment will be carried out on your employer before you start, to ensure that you are being placed within a healthy and safe environment.

At the start of your apprenticeship, your employer will give you a contract of employment and the College will provide you with a training plan.

Submitting your application

When completing an application, please complete all information fully and with plenty of detail for your existing or potential employer to consider. Please provide all your qualifications and grades attained. It is a good idea to ask for your application to be proofread before submitting.
