Green Partner Certifications

Environmentally Preferred Products

To identify Green products offered throughout this catalog, please look for the Green leaf logo. Products with this symbol printed next to the item code will fall into one or more of the following categories:

-  Independent Third-Party Certified: Environmental claims, as well as the product's performance, have been tested and certified by an established, legitimate, and nationally recognized certification program. Common certification logos are listed below.
-  Compostable in a designated commercial composting facility *
-  Made of recycled material - with a set minimum percentage standard **

Green Seal® Certification

The nation's premier ecolabel, symbolizing transparency, integrity and proven environmental leadership. The independent, non-profit develops standards and certifies products that can prove they meet strict criteria for human health, reduced environmental impact and excellent performance.

BPI® Certification

The Biodegradable Products Institute (BPI) is North America's leading certifier of compostable products and packaging. The certification program ensures that products and packaging have been independently tested and verified according to scientifically based standards.

ECOLOGO® Certification

UL's ECOLOGO Certification identifies cleaning chemicals, paper and plastic products (garbage bags/trashcan liners) that comply with the requirements of green cleaning programs. ECOLOGO is recognized or referenced in more than 350 specifications and standards.

An independent, non-profit whose mission is to advance sustainability through forest-focused collaboration. SFI

works with the forest sector, brand owners, conservation groups, resource professionals, landowners, educators, local communities, Indigenous Peoples, governments, and universities.

FSC® Certification

Ensures that products come from responsibly managed forests that provide environmental, social and economic benefits. FSC's initiatives are based on the belief that the best way to prevent deforestation is to stop using forest products.

ASTM is an international standards organization that develops and publishes voluntary consensus technical standards for a wide range of materials, products, systems, and services.

COMPOSTABLE

Compostables* are anything that undergoes degradation by biological processes during composting to yield CO₂, water, inorganic compounds

and biomass at a rate consistent with other compostable materials and leaves no visible, distinguishable or toxic residue.

CMA - Compostable Manufacturer Alliance

CMA provides industrial composting facilities an acceptance standard for compostables by performing field disintegration testing through several prominent processing methods to ensure products sent to industrial compost facilities adequately break down within the production cycle.

Recycled **

Products made from recycled content Promotes environmental sustainability by removing raw material input and redirecting waste output in the economic system. Standard mandates specify that a certain percentage of a new product must consist of recycled material.

Dear Valued Customer,

Welcome to Callico. We're grateful for your loyalty and your business.

We have survived many variants of the Covid-19 virus as well as the many problems it created within our industry; soaring prices, delays in product availability and disruption in the workplace. But we did survive and thanks to you, the efforts of all the Callico employees and our suppliers, we have emerged stronger than ever.

Our customers deserve a salute for managing through the difficult times. Thank you for your loyalty and continued business. It has always been about team-work for us – between our own employees and with you. We have all needed to be a little more flexible as we navigate the current industry issues. Working together will ensure success for all of us going forward.

Callico has been able to meet the incredible challenges of recent years and can still say, now more than ever,

We deliver what we say.

Sincerely,

Mark Callahan

Manufacturers occasionally change product design, product content, ingredients and/or specifications. When these changes occur between publications of our catalog, they are beyond our control. Therefore, certain product designs, product content, ingredients and/or specifications may be different than those illustrated in this catalog. We appreciate your understanding as these changes will occur. Also, practical production methods make it impossible to illustrate every product that we carry in this catalog. However, the products shown are generally the most representative of the manufacturer's line and/or those in most common usage by the trade. In cases where third-party environmental certification status is relayed, we cannot guarantee manufacturer accuracy or that items will remain certified at the time of catalog printing. Features & Benefits

Hygiene

> Cascades PRO Tandem® dispensers are built for better hygiene with a seamless finish. No more crevices or dirt-attracting corners.

Reliability

> Bring confidence to custodial staff, reduce complaints and maintenance time needed with a **99.9% jam-free*** line of hand towel dispensers.

Savings

> Reduce paper waste with our stub roll function maximizing the use of each roll of paper. Reduce maintenance time with our Quick-Check Design, a clear center-strip and clear top allowing the custodial staff to get an instant view of paper levels.

Piece of mind

> Faster maintenance with cleverly designed dispensers. The Quick-Check Design and Quick Load Technology help custodial/staff save time in their daily routine.

*A guest will get paper 99.9% of the time, either by pulling the paper or using the knob (without custodial support to open the dispenser).

Understanding Plastic Recycling Symbols

Many recyclable plastics have a numeric designation, but not all plastics with a number are being recycled since China and other foreign markets began limiting what they'll accept. Numbers 1 and 2 are the most desirable for recycling, while many areas do not recycle Numbers 3-7. Most do not recycle soiled materials. Check with local hauler to see what they will recycle.

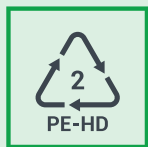

Polyethylene Terephthalate (PETE)

Soft drink bottles
Water bottles
Beer bottles
Peanut butter containers
Salad dressing bottles
Oven-ready cooking trays

YES

Recyclable by most commercial haulers

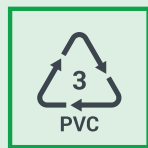

High Density Polyethylene (HDPE)

Cleaner bottles
Butter & yogurt containers
Cereal liners

YES

Recyclable by most commercial haulers

Polyvinyl Chloride (PVC)

Window Frames
Window cleaner bottles
Detergent bottles
Cooking oil bottles
Clear food packaging

NO

Not usually recyclable and is considered trash. Check with your commercial hauler

Low Density Polyethylene (LOPE)

Squeezable bottles
Bread bags
Frozen food bags
Trash can liners

?

Recycling acceptability varies by state and vendor. Check with your commercial hauler

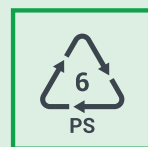

Polypropylene (PP)

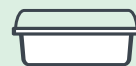

Disposable cups
Take out containers
Ketchup bottles
Straws

?

Recycling acceptability varies by state and vendor. Check with your commercial hauler

Polystyrene (PS)

Can Liner Guide

Types of Plastic Bag Materials

Linear Low Density Bags (LLD)

Used for rough or sharp objects under tough transport conditions. These bags are very strong and are more resistant to tearing, but handle lower load capacities than Hi-D bags.

Suggested LLD applications:

- Sticks, rough yard trimmings, glass
- Metal w/sharp edges
- Plastic eating utensils

Hi Density Bags (Hi-D)

Used for paper and non-rough objects under moderate transport conditions. These bags are very strong and handle higher load capacities than LLD bags, but tear easier once punctured.

Suggested Hi-D applications:

- Paper-plates, cups, towels, office
- Grass, rags, smooth heavy objects
- Cans w/out sharp edges

Metalocene LLD

A Form of Linear Low Density Polyethylene produced using Metalocene as a catalyst. Excellent impact and puncture resistance.

Repro LLD

A Form of Linear Low Density Polyethylene produced using a combination of virgin resin and reprocessed recycled plastics. It has very good high impact and puncture resistance.

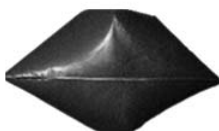

Bottom Seals

Star Seal

Gusset Seal

Flat Seal

Star Seal

- Bottom of the bag looks like a star or appears "bunched up"
- Highest quality & most common type in the market
- Conforms better to larger, round trash cans
- Minimum leak potential

Gusset Seal

- A flat style bag
- Both sides are tucked in which forms a gusset
- If bag is lying flat it will have a third dimension like an expandable envelope
- Conforms reasonably well to the shape of the trash can

Flat Seal

- Bag will lay out perfectly flat like a tube with a seal on one end or resemble a pillow case
- Holds 20-30% more than a star sealed

Measuring Trash Can to Determine Liner Fit

Trash bags are measured by their width and length when laid flat. To determine what size bag is needed for your particular waste receptacle:

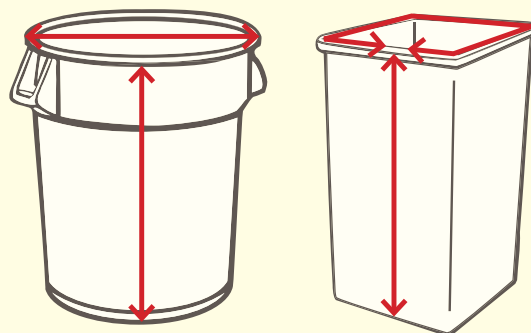

Bag Width = Circumference of your can divided by 2.

Square Container Circumference = Sum of all four sides
(add all four sides together)

Round Container Circumference = Diameter multiplied by 3.14
(or pi, if you remember your junior high school math)

Bag Length = Height of your can plus 3" for overhang plus half of the trash can's width (or half the diameter for circular trash cans)

Example - a circular trash can with a diameter of 24" and height of 30" will be calculated as followed: 30" + 3" + (24"/2) = 45"

Sample Conversions - Microns to Mils

Conversion Formulas

Linear Low Density Case Weight Formula

Length x Width x Gauge (in mils) ÷ 15 ÷ 1000 x bags per case = net lbs. per case

High Density Case Weight Formula

Length x Width x Gauge (in microns) ÷ 14.5 ÷ 25.4 ÷ 1000 x bags per case = net lbs. per case

Microns to Mils Formula

Divide the microns by 25.4 to arrive at mic thickness. Example:
10 Microns ÷ 25.4 = .39 Mil
24 Microns ÷ 25.4 = .94 Mil

Mils to Microns Formula

Multiply the mils by 25.4 to arrive at mil thickness. Example: 1 Mil = 25.4 Microns
.30 Mil x 25.4 = 7.6 Microns
.65 Mil x 25.4 = 16.5 Microns

ICE MELTERS (CONTINUED)

CALCIUM CHLORIDE CRYSTALS ICE MELT W/EXTENDERS

Calcium chloride based ice melt formulation generates heat upon contact with snow and ice, which allows the melting process to speed up even at temperatures as low as -25° F. Formulated to last up to 24 hours. Traction control, provides a greater level of safety. Specially formulated with an anti-caking agent to allow for free-flow dispersion.

| Item No. | Description | Pack |
|-------------|-------------|------|
| KIS-7923182 | 50 lb. Bag | BG. |

EARTH'S ECOMAGNESIUM CHLORIDE™ ICE MELTER W/EXTENDERS

All in one ice melter. Safer for the environment and less harmful to children, pets and wildlife. Less harmful to grass, shrubs and concrete. Green color indicator. Time released formula stays on the surface area longer. Helps to control the freeze/thaw cycle. CMA (Calcium Magnesium Acetate) is an environmentally benign deicer. Provides safe, no slip protection on steps, sidewalks and driveways. Non-tracking, will not harm carpets and floors. Will not damage leather or footwear.

| Item No. | Description | Pack |
|-------------|-------------|------|
| KIS-8301075 | 50 lb. Bag | BG. |

**PELADOW™
CALCIUM CHLORIDE PELLETS**

Peladow is easily distinguished from other ice melters because it contains more than 90% calcium chloride, the most effective material for melting ice and snow. Peladow melts ice 2 to 5 times faster than competing ice-melt materials. Peladow outperforms other ice melters in all winter conditions, whether the temperature is just below freezing or -25°F. Ideal for concrete driveways, sidewalks, loading docks, ramps and is safe on lawns.
