# COMMERCIAL MILLWORK

Most everyone knows that SBS Millwork stocks high quality residential products and offers in-house millwork services and custom machining, but we may be one of Anchorage's best kept secrets for commercial projects. SBS commercial millwork strives to supply you with the products you need, on time and at a competitive price. From the start to the finish of your project we are here to help with an in-house fully staffed commercial door and hardware department.

SBS Millwork stocks a wide variety of commercial products and services committed to the best customer service and quality. We can generate proprietary professional door and hardware schedules to help get your job started, or for fully detailed projects provide professional quotes, submittals and shipping logistics services for state wide delivery.

With the knowledge that doors and hardware that look good make an impact on any project, SBS represents the top manufacturers in the industry including, Curries hollow metal doors and frames, Timely Frames, Stanley/Best locks and hardware, Pemko sills and gaskets, Rockwood Hardware, Corrim FRP doors and frames, Lynden and Graham architectural doors, Schlage Locks, Von-Duprin Exits, McKinney Hinge and many more.

## WOOD VENEER, HARD-BOARD & PREFINISHED PARTICLEBOARD CORE

### APPLICATIONS & BENEFITS

Recommended for a wide range of residential and light commercial applications. The particle board core offers good stability against warpage and reduces telegraphing. Available as either nonrated or 20 minute fire-rated in a wide variety of Veneered, Hardboard, and Prefinished faces.

(20 minute-rated)

Single doors

Maximum size door/transom

Paired doors: Dependent on hardware used, up to

Note: GP Firestop II meeting edges may be used for 20 minute pairs in lieu of metal edges.

### DOOR THICKNESS

1<sup>3</sup>/<sub>4</sub>" standard.

### STILES

1<sup>3</sup>/<sub>4</sub>" doors: Minimum 1<sup>1</sup>/<sub>4</sub>" (before trim) clear or fingerjointed stiles.

### RAILS

1<sup>3</sup>/<sub>4</sub>" doors: Minimum 2<sup>5</sup>/<sub>8</sub>" (before trim) mill option wood rails.

### LOOSE LAY CORE AND FRAME ASSEMBLY

Particle board core with an average density of 28 to 34 lbs.

### FACES

Pregraded: Hardboard or Premium 2-, 3-, or 4-ply veneered skins (minimum 1/60" veneer before sanding). Veneers available in a wide variety of species and cuts.

### ADHESIVES

Core and frame assembly and veneer application all with Type II water-resistant adhesives. Type I waterproof adhesive available upon request.

### BLOCKING

Special inner blocking options may be specified for hardware reinforcement.

### FACTORY MACHINING/DETAILING

Complete range of machining capabilities and detailing available. Rated doors must be in accordance with Warnock Hersey International, Inc. and National Fire Protection Association Standards (NFPA 80, latest edition). Lynden Door, Inc. recommends factory prefitting on all fire doors.

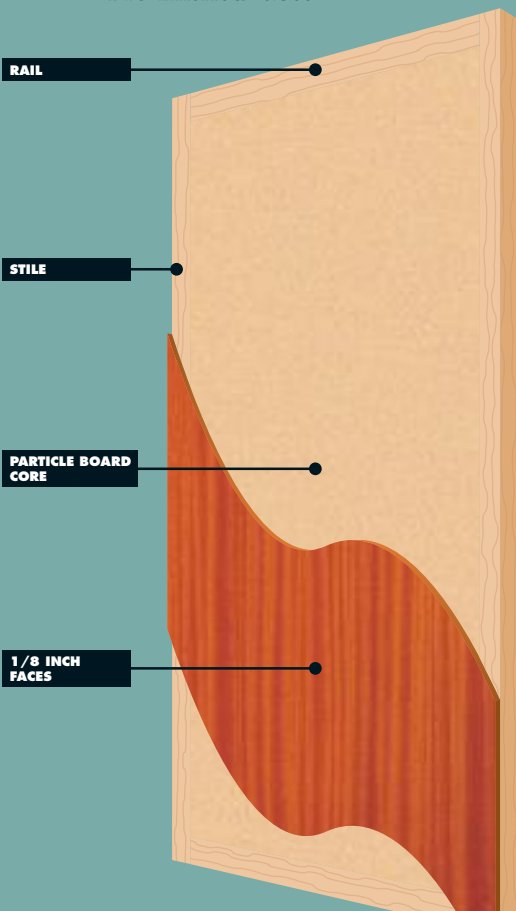

### LIGHT OPENINGS

Cutout area may not exceed 40% of the face or half of the door height to comply with the warranty. For 20 minute-rated doors, the total visible area of single or multiple lights may not exceed 1,296 sq. in. per leaf, with a maximum width of 36", or a maximum height of 54". All cutouts must be 6" from the edge of the door or any other cutouts and/or hardware preps. Louvres are not allowed in 20 minute doors.

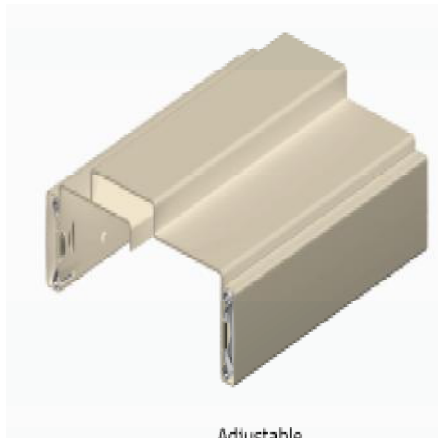

### WARRANTY

One year for interior use only. See warranty terms and conditions. Use of Lynden Door, Inc. interior doors in exterior applications is neither recommended nor warranted.

## ADJUSTABLE FRAME (A-Series)

The galvanized prefinished steel **A-Series** Adjustable Frame is the perfect companion for the **Standard Frame**. Use **A-Series** Adjustable Frames to prevent jobsite problems resulting from walls of varying wall thickness or non-standard Jamb depth. **A-Series** Adjustable Frames are also the solution where pre-hung assemblies are required. Our **A-Series** Adjustable Frames are made using 18 gauge galvanized Powder Coated steel. 90 minutes are available for non-glazed openings, and up to 45 minutes for glazed openings. Mullions are not available for **A-Series** Adjustable Frames.

Our **A-Series** Adjustable Frames will accommodate a 1 3/4" door weighing up to 250 lbs.

Some specifications require the use of M series frames in wood stud or metal stud type wall construction. Various types of stud combinations and wall coverings result in a wide range of wall thickness' used in today's construction. For instance, a typical 3-5/8 inch metal stud, with one layer of 5/8 inch sheetrock on each side, results in a wall thickness of 4-7/8 inches. This is the most popular wall size currently used and that is why the 5-3/4 inch frame with 7/16 inch backbend has a 4-7/8 inch throat opening.

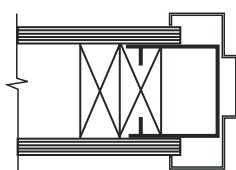

The wall construction combinations, as shown below, are detailed on the architectural plans and this determines the jamb depth of the frame for each opening.

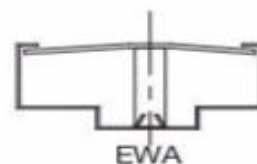

MULTI PURPOSE ANCHOR

CHANNEL STEEL STUD  
WITH 5/8" SHEETROCK

2 X 4 WOOD STUD  
WITH 5/8" SHEETROCK

EXISTING WALL ANCHOR

**NOTE:** Anchors for the M series frames are available for all of the common wall construction types. The multipurpose anchor (M.P.) is by far the most popular as it can be used in woodstud, metalstud, wiretruss, or existing wall frame installations.

## Only Omni Offers You All these Benefits in an Expandable Steel Frame

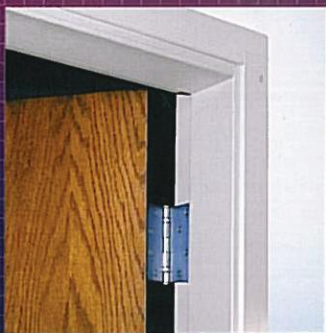

The patented slider mechanism operates smoothly and positively.

Adjustable door  
frame closed to fit  
wall 4-1/2" wide.

Adjustable door frame  
opened to fit walls up  
to 7-5/8" wide.

Omni Expandable Steel Frame for  
Double Doors is Ideal for Steel Fire  
Doors or Wooden Doors.

Serving the  
Automotive,  
Appliance,  
and  
Commercial  
Hardware  
Industries.

OMNI Does It All!

### • Fully Expandable & Reversible

Over 3" of expansion fits any wall thickness from 4-1/2" to 7-5/8". Stocking is simplified and many installation costs are eliminated. No sanding required. Ready to be painted.

### • One-Piece Design

Side jambs and headers are each of one piece. No need to choose various extension sections. No loose pieces to lose or damage.

### • Strength

The strength of 18 g. steel and the safety of 90-minute fire rating for both single and double door units.

### • Long Life

The long term protection of hot-dipped galvanizing: an excellent base for the finish of your choice.

#### Features

##### BEST Standard Cores and Keys

- **Enhanced integrity.** We manufacture Standard Cores and Keys with tighter tolerances for greater lock integrity and the highest mechanical security.
- **Industry-leading quality.** Each Standard offering is subject to our stringent internal quality requirements, which meet or exceed industry standards.
- **Long-term durability.** Brass alloy core construction and nickel silver keys and pins result in reliable performance over time.
- **Easy retrofit.** BEST's small format interchangeable cores make retrofitting and rekeying simple. Individually capped core pin chambers reduce repinning labor.

## UNIVERSAL MORTISE LOCK

### ONE MORTISE LOCK CAPABLE OF MULTIPLE FUNCTIONS

In addition to the ability to quickly change the lock handing, the universal case design of the 40H provides the ability to reconfigure a lock into many different functions easily and quickly, often by rearranging existing parts without disassembling

the lock case. The efficiency of the design enables 9 of the most commonly used lock functions to be included in just 2 case configurations.

The 40H provides the ability to postpone decisions on how the lock will be configured all the way up to the point of installation, making it one of the most flexible and user-friendly mortise locks available. This translates into value for anyone involved in the process, whether they're an architect, specification writer, distributor, or end-user.

**21B SERIES**

**Specifications**

**Case** – Machined from solid extruded brass.  
Standard finish is 626 satin chromium plated.

**Width** – 1 <sup>25</sup>/<sub>32</sub>”

**Length** – 2 <sup>1</sup>/<sub>16</sub>”

**Thickness** – <sup>13</sup>/<sub>16</sub>”

**Shackle** – The shackle locks at both heel and toe. The length of shackle opening is measured from top of case to inside of shackle when padlock is locked.

**Material** – Stainless steel

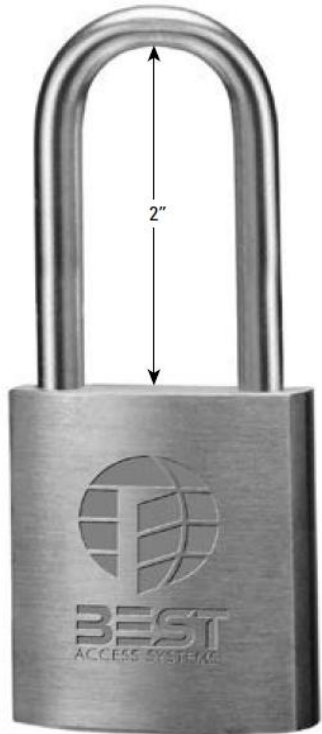

**Diameter** – <sup>5</sup>/<sub>16</sub>”

**Width of opening** – <sup>7</sup>/<sub>8</sub>”

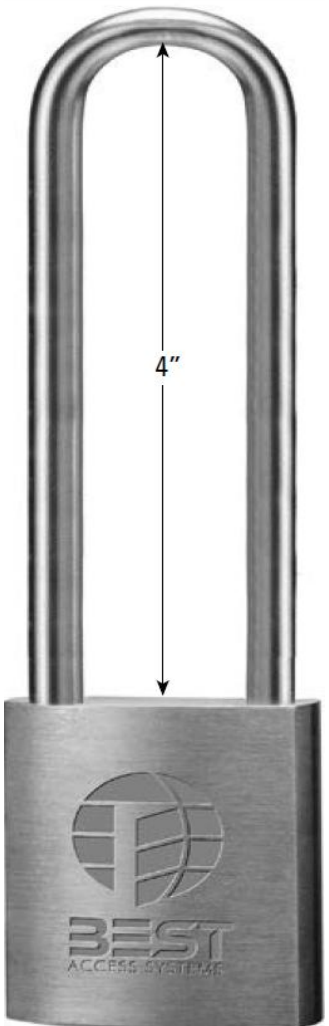

**ASTM F883** – Meets Grade 4 with stainless steel shackle.

### Performance Features

- Fully adjustable from 1 - 6 allowing for maximum flexibility.
- All-weather fluid ensures optimal operational performance in multiple climate conditions.
- Delayed action and backcheck are standard in the same door closer body.

### Certifications

- ANSI/BHMA A156.4 Series – Grade 1
- ANSI A117.1 Accessibility Code (ADA Compliant)
- UL/cUL listed (3 hour) for self closing
- UL10C Positive Pressure Rated
- UL10B Pressure Rated

### Product Specifications

- Handing – All QDC100 Series Closers are non-handed (QDC116 arms & metal covers are handed).
- Cast-iron closer body.
- All-weather fluid.
- Stacked valves prevent oil leaks from screws being backed out too far.
- Cover – metal and plastic covers available.
- Arms & brackets – Tri-pack standard, additional arms optional.
- Arm material – Heat-treated carbon steel.
- Springs – High-impact hand-drawn steel wires.
- Pinions – Heat-treated chrome molybdenum steel.
- Cylinder construction – Heat-treated free-cutting carbon steel.
- Fasteners – Wood and machine screws standard; sex nuts and self-reaming, self-tapping screws shipped standard.
- Door weights & sizes:

Size	Applicable Door Weight	Door Width Ranges	
		Interior	Exterior

## 580-8 - Surface Bolt 8" Bolt Length

### Specifications:

Material: Steel, Stainless Steel

Fastener: 8 ea. #10 x 1-1/4 FH SMS, 8 ea. 10-24 x 1 FH MS

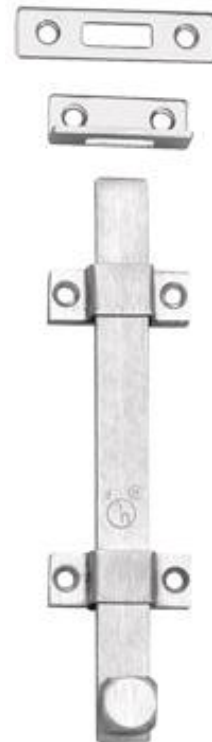

Other: 1-1/8" bolt throw, 1/4" x 3/4" bolt material.

Features:

- UL listed for use on inactive leaf of a pair of 3-hour labeled fire doors.
- Includes a universal top strike and a mortise bottom strike.

Bolt Length: 8"      Weight: 1.1 lbs.      ANSI A156.16: L04161

BOLT	
14500580	US32D Surface Bolt 8"

## 555 - Lever Extension Flush Bolt

### Specifications:

Fastener: 8 ea. #8 x 3/4 FH Combo Screws

Features:

- Fits ANSI A115 door and frame preparation.
- 3/4" bolt throw, 3/4" rod backset.
- 12" rod length (center of face to bolt end - retracted).
- 1-1/2" adjustable bolt head.

SIZE

Face Plate: 1" x 6-3/4"

Strike: 15/16" x 2-1/4"

Guide: 1" x 2"

Weight: 1.5 lbs./2

ANSI A156.16: L04251

Sold as one box with 2 bolts

## K1050 - .050" Thick - Metal Kick Plate-Standard Duty

### Specifications:

Material: .050" , Stainless Steel Fastener:

#6 x 5/8 OH SMS

Weight: 8" x 34" = 4.0 lbs.

Width of Plates:

Push Side: 2" less than door width. Pull Side: 1-1/2" less than door width.

NFPA 80 STANDARDS - 2-4.5 Protection Plates: Factory-installed protection plates shall be installed in accordance with the listing of the door.

Field-installed protection plates shall be labeled and installed in accordance with their listing.

Exception: Labeling is not required where the top of the protection plate is not more than 16 in. (406 mm) above the bottom of the door.

KICK PLATE	
14810343	US32D Kickplate 10"x34"

## 320CXL - Latch Protector

### Specifications:

Material: Steel, Stainless Steel

Fastener: 5/16 -18 Carriage Bolts and Hex Drive Sex Nuts.

Ordering: Product number and finish.

Features: Jamb pin prevents prying of door. Non-handed.

Notched for 2-1/4"-3-3/4" diameter rose on cylindrical lockset.

Material Size: 3" x 11"

Thickness: .105"

Lock Type: cylindrical

Weight: 1.2 lbs.

Latch Protector	
14532032	320CXL32D LATCH GUARD

## Low Dome Stops No. 441CU

**Other:** No. 441 is packed with both WS and MS fasteners

**Features:** For doors without thresholds (not undercut).

**ANSI A156.16** L02141

## Solid Cast Wall Stops No. 403

Concealed mounting concave bumper. Back plate prevents damage to wall

## Certified Installation by SBS InstallationMasters™

InstallationMasters certification ensures your windows achieve peak performance.

- Energy Savings
- No air or water leakage
- Protection from water damage and mold growth

Our performance-crafted, Energy Star-qualified windows in vinyl, wood, fiberglass or aluminum help protect your home from the elements and enhance the comfort and value of your home.

## THE SBS ADVANTAGE

### • FREE IN-HOME CONSULTATION

We will provide options for your home and your budget, including recommendations on safety glazing and egress requirements.

### • SBS PREFERRED PRICING

We offer preferred pricing to help you accomplish your window replacement goals. Free screens are also included with every window order from SBS.

### • SBS PROJECT TEAMWORK

Our team will manage your project from ordering to installation. We guarantee the highest standards in installation, job-site safety and quality control.

### • PROFESSIONAL INSTALLATION

Our installers have completed the InstallationMasters™ program.

### • FINAL INSPECTION

Our final inspection check-list will include product maintenance and warranties. Your satisfaction is guaranteed.
